GLOUCESTER, or Gloucestenshane, a maritime co. England, bounded, S. by Wilts and Somerset; E. by Oxford; N. and N.W. by Warwick, Worcester, and Herefort ; W. by Monmouth and the Severn. Length, S.W. to N. E., about 64 m . Greatest breadth, about 30 m . Area, $805,120 \mathrm{ac}$., of which $750,000 \mathrm{ac}$. are arable, meadow, and pasture. The co. is naturally divided into three distinct districts, the hill or cotswold, the vale, and the forest districts. The first comprises the hilly country, stretching from Chipping Camden, on the N., to Bath, on the S., and called Cotswold, from sheep-cotes and wolds, the old English name for hills. The second, or vale district, comprehends the whole of the Lowlands, from Stratford-upon-A von to Bristol, and includes the vales of Evesham, Gloucester, and Berkeley. The third, or Forest district, includes the parishes on the W. side of the Severn, up to Gloucester, and afterwards on the W. side of the Leden, to the Wye. The hill district is in general bleak and bare; but includes many beautiful dales, and much picturesque scenery. It lies on the limestone and clay of the oolitic formation. Much of the soil in the vales is extremely fertile, and the climate mild. The geology of the vale district is exceedingly varied, including all the formations between the upper silurian and oolite. A large portion of the district lies on the blue lias; and is in pasture, generally of poor quality. The Forest district derives its name from the royal forest of Dean, formerly very extensive, but now much reduced by the progress of cultivation and other means. Great part of it, however, is still Crown property. The principal rivers in Gloucestershire are the Severn, with its affluents, the Wye, the Leden, and Lower and Upper Avon; and the Isis or Thames, with its affluents, the Colne, Churnet, and Windrush. The Severn was formerly famous for its salmon; but they have now become scarce. Iron and coal are found in the Forest; the former is not extensively wrought, but the collieries employ large amounts both of labour and capital. Coal is also found, and extensively worked in the S. part of the county; and lead ore is found in various parts, but not in sufficient quantities to pay the expense of working. Limestone and freestone are also met with. Agriculture is in a backward state in this county, espe-
cially in the vale districts of it-the improvements intro duced by some of the more public-spirited proprietors having been but slowly and partially adopted. Wheat, barley, oats, and beans, are the crops principally cultivated. The latter are produced mostly on the clay soils of the vales, and much depended on by the farmer. Gloucestershire is, however, much more of a dairy than an agricultural county, being remarkable for the richness and extent of its natural pastures, the most valuable of which lie along the banks of the Severn. The celebrated cheese, known by the name of double and single Gloucester, is produced chiefly in the vale of Berkeley. A good cow yields from 12 to 18 quarts of milk per day, which again produces $3 \frac{1}{2} \mathrm{cwt}$. and upwards of cheese in the year. The native sheep of the Cotswold hills are large, with coarse wool; but the breed is now largely intermixed with I eicesters and South Downs. The total stock of sheep in the county has been estimated at about 550,000 , and the annual produce of wool at 15,550 packs. In the vale and forest lands, and on the sides of the hills, there are numerous orchards, from the produce of which large quantities of cyder are made. The celebrated cyder called styre, which requires to te kept for several years before it is sufficiently mellowed for use, is produced on the W. banks of the Severn. Gloncester is a considerable manufacturing county, and has been long famous for its fine broad cloths. It is intersected by the Birmingham and Bristol railway; by a branch of the Great Western railway from Swindon, through Stroud to Stonehouse, on the Birmingham and Bristol line; and a small portion of the S . of the county is crossed by the main line of the Great Western. The county is divided into 28 hundreds, and 339 parishes; returns 15 members to Parliament-four for the county; two each for the citics of Bristol and Gloucester, and the boroughs of Cirencester, Stroud, with the adjoining parishes, and Tewkesbury ; and one for Cheltenham. Pop. (1851), 458,805.

GLOUCESTER, a city, co. of itself, parl. bor. and river port, England, cap. above co., in the vale of Gloucester, on a gentle eminence, 1 . bank, Severn, here divided into two channels, and crossed by two fine bridges, 33 m . N. by E. Bristol, and 95 m. W. by N. London. It consists of four principal streets, crossing each other at right angles, and a number of smaller, all tolerably straight. The honses, which were formerly of wood, are now principally of brick and stone, most of them substantial, and many of them handsome buildings. The streets are well paved, and the town is well lighted with gas, and pretty well supplied with water. The most remarkable public cdifice is the cathedral, one of the noblest edifices of the kind in England. It was originally the church of a Benedictine abbey, established here in the beginning of the 11 th century, and converted into a cathedral at the Reformation. It is cruciform, 444 ft . in length, 154 in breadth, and $85 \frac{1}{2}$ in height, with a tower 280 ft . high. Having been built at different periods throughout several centuries, it exhibits a great variety of style, the specimens of some of which, as here exhibited, are unrivalled. This is the case, particularly with the choir, which is one of the finest examples of florid gothic in existence. In the interior of the cathedral are many ancient and interesting monuments. Amongst them, those of Robert, son of William the Conqueror, who, together with his brother Richard, was interred here, and of Edward II., murdered in Berkeley castle, the former carved in oak, the latter of alabaster. Besides the cathedral, there are ten other Established churches, some of them handsome old edifices; and places of worship for various religious denominations, including the Society of Friends, R. Catholics, and a Jews' synagogue. The other public buildings worthy of notice are the shire hall, the tolsey or guildhall, the connty jail, market-houses, new savings'-bank, custom-house, infirmary, and blue-coat hospital. The tolsey, situated in the centre of the city, is a handsome building, with a portico of Ionie columns, erected in 1814. The county jail, built in 1791, stands a little W. of the town, on the site of an ancient castle, of the time of William I. It is remarkable as having been the first prison in England where the humane system of discipline was introduced. The market-houses, the one situated in Eastgate Street, for the sale of corn, meat, poultry, vegetables, \&c., built in 1786, has a handsome front; the other, for the sale of butter, fish, \&c., is situated in Southgate Street; and there is also a commodious cattle-market. There are here numerous daily and several boarding schools, besides
several charity schools; the latter including the college school founded by Henry VIII., the blue-coat school founded in 1666 ; and the free grammar school of St. Mary de Crypt, founded in the time of Henry VIII., and cndowed with two exhibitions of $£ 50$ per annum each, tenable for eight years, for the maintenance of two scholars at Pembroke College, Oxford. The educational institutions of Gloucester include, also, a Lancasterian and a National school, the one established in 1813, and the other in 1816. There is also a literary and scientific association, well supported, and having an extensive library. Among the benevolent institutions are several hospitals of ancient foundation, the oldest being that of St. Bartholomew ; the infirmary, the lunatic asylum, about half a mile from the city, on the London road; an eye institution, and a house of industry. Pins form the principal article of Gloucester manufacture, though much declined from what it was formerly. Cutlery is also made to a considerable extent, as are, likewise, soap, gloves, sack and sailcloth, ropes, and saddlery. There was formerly a bell foundry of very ancient date, but it is now removed ; several cast-iron works, in which sugar pans, mortars, \&c., are manufactured. Shipbuilding is also carried on to some extent.

Gloucester has been an inland port for centuries, but it is only of late years that it has become a place of importance in a commercial point of view, a result chiefly owing to the opening of the Gloucester and Berkeley ship canal in 1827, by which the exports and imports are now effected at the port itself, instead of being transhipped as formerly, and conveyed by barges up and down the Severn. Gloucester has now a considerable trade, consisting in its imports, chiefly of corn and timber; the exports are salt, iron, and bricks; and coal will shortly be added to them-arrangements being now in progress (1852) to bring coal to Gloucester for this purpose from the Forest of Dean and the Welsh coal-fields. The docks comprise an area of about eight acres. The number of vessels entering the port in 1851 was 1652 , and ranging up to 1000 tons register. The foreign and colonial produce imported in the same year was 160,000 tons. Gloucester has returned two members to the House of Commons since the time of Edward I. It is a place of high antiquity, and is said to have been in existence long previous to the Roman invasion; but was, at any rate, undoubtedly an important Roman military station, and was then known by the name of Colonia Glevum. Pop. (1841), 14,497.

GLOUCES'TER, several townships, U. States :-1, A seaport, Massachusetts, on a small peninsula, 29 m . N.E. Boston. It has a good harbour, open at all seasons of the year; inhabitants extensively engaged in navigation and the fisheries. Shipping of dist. (1840), 17,072 tons. It ${ }_{s}$ agreeable situation renders it a favourite place of resort in summer. Pop. 6350.-2, Rhode 1sland, 16 m . W.S.W. Providence. Pop. 2304.-3, New Jersey, 10 m . S.E. Woodbury. Pop. 2837.

GLOUCESTER.-1, A cape, Australia, N.E. coast; lat. $20^{\circ} 1^{\prime} 15^{\prime \prime}$ S.; lon. $148^{\circ} 26^{\prime} 15^{\prime \prime}$ E.; with an island of same name off it, lat. $19^{\circ} 57^{\prime} \mathrm{S}$. ; lon. $148^{\circ} 26^{\prime}$ E. (r.) ; and about 5 m. long by 2 m. broad, 1874 ft . high, with steep, rocky shores.-2, The most S. of the Society Islands, S. Pacific Ocean; lat. $19^{\circ} \mathrm{S}^{\prime} \mathrm{s}$.; lon. $140^{\circ} 37^{\prime} \mathrm{W}$. (R.)

GLOUCES'TER, a maritime co. New S. Wales, 85 m . N.W. to S.E., and about 75 m . in breadth at the broadest part; but, being of a triangular shape, this breadth diminishes, N.W., to a point. N. parts mountainous. Area, $1,375,200 \mathrm{ac}$. The chief river is the Manning, which separates it from the co. of Macquarrie. Chief towns-Raymond Terrace, the capital; Carrington, and Stroud.

GLOUKIIOV, a tn. Russia in Europe, gov. of, and 148 m. E. by N. Tchernigov, near r. bank Verbovka. It is surrounded with an earthen wall, and contains five churches and two convents; has extensive cloth manufactories, and a considerable trade in grain and brandy. Pop. 8000.

GLÜCKSBURG, a vil. Denmark, Schleswig, bail. of, and about 5 m. N.E. Flensborg, not far from the Flensborgfiord. It contains a fine old castle, which, in 1825, was bestowed by Frederick VI. on the Duke of Schleswig-Holstein-Sonderburg-Beck, with the title of Duke of Glücksburg. Pop. 750.

GLÜCKSTADT [Latin, Tychopolis], a tn. and port, Denmark, Holstein, r. bank Elbe, and at the mouth of the

Rhin, 27 m . N.W. Altona, with which, and with Kiel, it communicates by railway ; lat. (pier), $53^{\circ} 47^{\prime} 6^{\prime \prime} \mathrm{N}$. ; lon. $9^{\circ} 24^{\prime} 30^{\prime \prime}$ E. (R.) It depends solely upon collected rain for water for culinary purposes. It is the seat of several courts; has a town church, a R. Catholic chapel, a synagogue, high school, house of correction, and several charitable institutions. It has limited manufactures; the inhabitants being chiefly engaged in trade, navigation, and whale fishing. The harbour, formed by the mouth of the Rhin, has 5 ft . depth at low water, and 15 ft . at high; and two good docks. Gliickstadt was founded in 1619 , withstood the attacks of Tilly, in 1628, and had its defences dismantled in 1814-15. Pop. 6000.

GLURNS, a tı. Austria, Tyrol, eircle Ober-Innthal, on the Adige or Etsch, $60 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Innspruck. It is surrounded with lofty walls and towers, and has been almost entirely rebuilt since 1799, when it was burnt down by the French. It contains a parish church. Pop. 695.

GLUVIAS (Sr.), par. Eng. Cornwall; 2770 ac. P. 4484.
GLYMP'OON, par. Eng. Oxford; 1670 ac. Pop. 119.
GLYN, a hamlet, S. Wales, co. Carmarthen, par. of, and $4 \frac{1}{2} \mathrm{~m}$. N.N.W. Llanelly. Pop. 908.

GLYN-CORRWG, par. Wales, Glamorgan; 12,000 ac. Pop. 634.

GLYN-TAAF, a hamlet, S . Wales, co. Glamorgan, 5 m . W. Caerphilly, l. bank Tâf, whose steep banks are here connected by the Pont-y Pridd-a bridge of singular construction. Pop. 998.

GLYNDE, par. Eng. Sussex ; 1370 ac. Pop. 270.
GLYNN, par. and tn. Irel. Antrim; 4184 ac . Pop. 1890.
GMÜND, or GemÜnd, a tn. Austria, Illyria, at the foot of the Alps, l. bank Liser, at the confluence of the Mullar, 42 m. W.N.W. Klagenfurt. It has a castle, a Protestant and a R. Catholic church; iron and steel works, and an acidulated spring. There is a copper mine in the vicinity. P. 680 .

GMÜND, a tn. Würtemberg, circle Jaxt, cap. bail. of same name, l. bank Rems, here crossed by a handsome stone bridge, 28 m. E.N.E. Stuttgart. It is surrounded with walls flanked with towers, and is cheerful-looking and well built; contains several churches, three of them very ancient, and one a handsome Gothic structure ; a townhouse, a Latin, and a normal school; a deaf and dumb institution, a blind asylum, and orphan hospital ; and has manufactures of woollen and cotton goods, jewellery, and trinkets; and carries on a trade in these articles, and in wooden tobacco bowls. Area of bail., 82 geo. sq. in. Pop.tn., 6100; bail. 24,402.

GMÜNDEN, a tn. Upper Austria, circle Traun, cap. dist. of same name, beautifully situated in the midst of magnificent scenery, at the N. extremity of the Traun or Gmünden lake, where the river Traun issues from it, 35 m . S. W. Linz. It is well built; has a parish church, with a finely-carved altar; a chapel, antique townhouse, and model cabinet, containing a collection of models of the salt mines, and of the machinery employed in working them and manufacturing the salt. These mines, and the works comnected with them, employ the greater part of the inhabitants. Pop. tn., 3250 ; dist. 8000 .

GNADENTHAL, a Moravian missionary station, S. Africa, Cape Colony, 70 m. E.S.E. Cape Town. Pop. 1400.

GNESEN, or Giniezno, a tn. Prussia, prov. Posen, gov. of, and 45 m . S.W. Bromberg, cap. circle of same name, in a fertile district, between hills and lakes. It is surrounded by walls, is the see of an archbishop, contains a handsome cathedral, and eight other R. Catholic churches, a Protestant church, an ecclesiastical seminary, a monastery, and a nunnery, is the seat of several law courts and public ofticas; and has several distilleries, breweries, and tanneries; a trade in horses and cattle, and four annual fairs. In early times the archbishop of Guesen was primate of all Poland, and its king was crowned in the cathedral. Pop. 7709.- The circle is flat, is watered by the Welna, contains numerous lakes, and has a fertile soil. Area, 283 geo. sq. m. Pop. (1846), 55,658.

GNIEWKOWO, a tn . Prussia, prov. of, and 72 m . E.N.E. Posen, on a height in a fertile district. It contains a R. Catholic parish church; and has a trade in corn, horses, and cattle; and four anuual fairs. Pop. 900.

GNOIEN, a tn. Mecklenburg-Schwerin, circle Wendisch, on a hill above a small affluent of the Recknitz, 24 m . E.S.E. Rostock. It rises up in the form of terraces, is surrounded by walls, and entered by several gates; contains a church
and a poorhouse ; and has manufactures of linen and needles, a copper foundry, tannery, several distilleries, and three annual fairs. Pop. 2982.

GNOSALL, par. Eng. Stafford; 7820 ac. Pop. 2424.
GOA, a city, IIindoostan, prov. Bejapoor, Malabar coast; lat. $15^{\circ} 28^{\prime} 18^{\prime \prime}$ N.; lon. $73^{\circ} 57^{\prime} 15^{\prime \prime}$ E.; (n.) 260 m . S.S.E. Bombay; cap. of all the Portugucse possessions, E. of the Cape of Good Hope. The name is now applied to two distinct places, namely, Old Goa and New Goa or Panjim. The former, now almost entirely deserted, is situated 5 m . further inland than the latter, which stands near the entrance of the harbour. Old Goa, deserted on account of its unhealthinezs, was at one time a populous and magnificent city, as the elegant specimens of ancient architccture, exhibited in its cathedral and numerous other religious edifices, sufficiently prove. There are here several large monasteries, a convent, the cdifice formerly occupied by the inquisition, and the viceroy's palace. The whole buildings are going fast to ruins; and are used as a quarry whence to obtain building materials for the new town, to which everything worthy of preservation and easily removed has been transported, including the tomb of Francis Xavier. A few monks, lowever, still reside in this deserted place, and make fruitless attempts to kecp certain edifices in repair. New Goa or Panjim, founded in the beginning of the 18 th century, is walled and fortified. It is situated on an island formed by two rivers, and is a handsome well-built town, streets wide and straight; and is now the seat of business, the see of an archbishop, the residence of the viceroy, and of the principal Portuguese inhabitants. The houses are of stone, with thick walls pierced with small grated windows, and roofed with tile; and altogether it presents much the appearance of a European town. It abounds with ecclesiastics, has a court of first resort, and some other courts, and several educational establishments. The harbour is a noble and capacious basin, land-locked, and well protected from the monsoon, and overlooked by a fortress, at the foot of which stands the large and commodious customliouse. The trade of Goa, at one time the most extensive of any place in India, is now inconsiderable. Its imports are piece goods, raw silk, ivery, sugar, woollens, glass, \&c. Its exports hemp, betel nut, cowries, toys, beads, \&c. P. 24,000.

The territory around Gea belonging to the Portuguese is about 40 m . in length by 20 m . in breadth. Within this district there were at one time 200 churches and chapels, and above 2000 priests. It is well watered and fertile; and its inhabitants, with the exception of a few of the higher classes, are chiefly descendants of Europeans by native women. Goa was taken from the Hindoo rajas of Bijanagur by the Bhamenee Mahometan sovereign of the Deccan about 1469 ; and in 1510 was besieged and taken by Albuquerque, who made it the capital of the l'ortuguese dominions in the east. Goa was in possession of the English from 1807 till 1815. There are 34 forts in the territory. Pop. 350,000 .

GOACK, a tn., isl. Celebes, W. coast, the native cap. of the Macassar country ; lat. $5^{\circ} 13^{\prime} \mathrm{N}$. ; lon. $119^{\circ} 21^{\prime} \mathrm{E}$.

GOADBY-MAkwood, par. Eng. Leicester; 2540 ac. Pop. 202.

GOA IIATI, or Gowhatty, a tn. Assam, l. bank Brahmapootra, 330 m . N.N.E. Calcutta; lat. $25^{\circ} 55^{\prime}$ N.; lon. $91^{\circ} 40^{\prime}$ L.; once the cap. of an ancient Hindoo territory, which included great part of Assam. It is now quite reduced.

GOALPARA, a tn. India, prov. Bengal, l. bank Brahma1,0otra, 290 m . N.N.E. Calcutta; lat. $26^{\circ} 8^{\prime}$ N.; lon. $90^{\circ} 38^{\prime}$ E. It contains some good houses, and a street of shops. A great portion of the town, however, is composed of miserable huts, which are for two months of the year flooded with water 2 or 3 ft . deep. In other respects, also, this place exhibits a squalid scene of vicc and misery. It is, nevertheless, a place of considerable resort, and the principal mart of the intercourse with the Assamese, who bring here coarse cloths, stick-lac, tar, wax; taking salt in return.

GUANDS, Gonds, or Khoonds, a wild tribe of Indians, inhabiting the hills of Omerkantuk, central Hindoostan, at the sources of the Sone and Nerbuddah. They are one of the lowest classes in the scale of civilization to be found throughout India; their manners and customs are peculiar to themselves, and their physiognomy differs very widely from the usual characters found in the natives. Their skin is much blacker than the ordinary shade, lips thick, hair woolly,

Vol. I.
resembling that of an African; forms are well proportioned. being strong and athletic. They live upon wild roots and vegetables, and such animals as they can snare or kill.

GOAR (St.), a tı. Rhenish Prussia, gov. of, and 20 m . S.S.E. Coblenz, cap. circle of same name, beautifully situated 1. bank Rhine, about a mile below the Lurlei-rock. It contains a Protestant church, with the tombs of the princes of Hesse, and a R. Catholic church, is the seat of a law court, and several public offices; and has manufactures of leather, an important salmon fishery, a trade in leather, wine, and cattle, and three annual fairs. On a height overhanging the town, and commanding a magnificent view, stands the old castle of Rheinfels, once a strong fortress, but now only the most extensive ruin on the Rline. Pop. 1433.-The circle, area 136 geo. sq. m., is for the most part covered with hills, which, in the interior, on the IIundsrücken, are cold and bleak; but, on approaching the Rhine, present much beautiful and romantic scenery. Only a small pertion of the surface is arable; but a good deal of wine is grown, and many cattle reared. Pop. 34,930.

GOARSHAUSEN (St.), a tn. Nassau, cap. bail. of same name, r. bank Rhine, opposite the Prussian town of St. Goar, and 20 m . S.S.E. Coblenz. It is partly surrounded by old walls flanked with towers, and is for the most part poorly and irregularly built. It has manufactures of leather and paper, several mills, a fishery, and some shipping. On a height above the town stand the ruins of the castle of Neu-Katzenellenbogen, better known by the name of the Katze [cat], and destroyed by the French in 1806. Area of bail. 40 geo. sq.m. Pop. tn. 872 ; bail. 16,190.

GOAT Island-1, S. Pacific Ocean, off the coast of Chili, S.W. Juan Fernandez; lat. $33^{\circ} 30^{\prime}$ S.; lon. $79^{\circ} \mathrm{W}$. ; of moderate elevation, with its summit surmounted by many conical eminences or hummocks. It is about 4 or 5 m . in circumference; elevation 400 to 500 ft ; shores precipitous, and chiefly composed of a brown volcanic stone. It has a burnt and desolate aspect, and affords no vegetation higher than a stunted shrub. Vast numbers of violet-coloured crabs occur on the rocks of the coast, and fish are abundant; aquatic birds also are numerous, and fresh water may be obtained.-2, N. Pacific Ocean, $1 \frac{1}{2} \mathrm{~m}$. W.N.W. Bashee Island, N. from the Babuyane Islands, off the N. extremity of Luzon. It is small, and rather low, but has some well cultivated spots; is well inhabited, and abounds in bullocks, goats, pigs, and fowls.-3, One of the Plilippines, Strait of Manilla; lat. $13^{\circ} 55^{\prime}$ N.; lon. $120^{\circ} 24^{\prime}$ E. (в.) -4, (or Pulo Cambing), N.E. coast Sumbawa, Flores Sea, N. point, in lat. $8^{\circ} 7^{\prime}$ S.; lon. $118^{\circ} 46^{\prime} 18^{\prime \prime}$ E. -5 , Two steep islets, off Terceira, Azores.6, An isl., U. States, Maine; lat. $43^{\circ} 21^{\prime}$ N.; lon. $70^{\circ} 25^{\prime}$ W.7, An isl. in Niagara River, at the great falls, which it divides into two unequal parts; area, about 75 ac. ; circumference, $1 \mathrm{~m} .$, mostly covered with forest. See Niagara.

GOATHILL, par. Eng. Somerset; 230 ac. Pop. 37.
GOATHURST, par. Eng. Somerset; 1370 ac. I. 341.
GOAVE (Great and Litrle), twe ths. Hayti, the former 7 m. E., the latter at the embouchure of a small river of same name. Little Goave, 32 m . W.S.W. Port-Republicain, on a small bay of same name, lias a commodious and safe harbour, capable of admitting the largest vessels; it is the port of Great Goave and other places, and carrics on a brisk export trade in coffee, sugar, indigo, and cetton. The badness of the water, and the marshes in the neighbourhood render the air unhealthy.

GOBAIN (Sr.), a tn. France, dep. Aisne, 11 m. W. by N. Laon. It has a manufactory of mirrors on a large scale, said to be the first in Europe. 1'op. 1419.

GOBI, or Shamo, an immense tract of desert country, occupying nearly the centre of the high table-land of E. Asia, between lat. $35^{\circ}$ and $45^{\circ} \mathrm{N}$., and lon. $90^{\circ}$ and $110^{\circ} \mathrm{E}$., and extending over a large portion of Mongolia and Chinese Turkestan. Its length is probably about 1800 m .; mean breadth, between 350 and 400 m .; area, $300,000 \mathrm{sq} . \mathrm{m}$. ; interrupted in its E. extremity only by a few spots of pasture and low bushes. General elevation 4220 ft . above sea-level, but it is intersected W. to E. by a depressed valley named Shamo, or the 'Sea of Sand,' which is also mixed with salt. W. from it lies the Man-IIai, 'Dry Sea,' a barren plain of shifting sand blown into bigh ridges. Wide tracts of this dreary region are flat and covered with small stones or sand ${ }_{i}$

139

## GOCH

and widely separated from one another are low lills destitute of wood and water. In summer, which lasts scarcely three months, the heat of the sun is overpowering; but in winter the cold is intense, snow and frost frequently occurring in July and August; indeed no month in the year is entirely free from them. Fierce and bitter winds from the icy regions of the N. also prevail. The desert of Gobi is comprised within one of the 'Rainless Districts' of the earth, and is consequently almost devoid of vegetation. The F. Gobi is occupied by different tribes of the Mongolian race, which have numerous herds of camels, horses, and sheep. In the W. Gobi are some nomadic tribes of the Turkish Tartar race.

GOCH, a walled tn. Rhenish Prussia, gov. of, and 40 m . N.W. Düsseldorf, l. bank Niers. It is the seat of a law court, has a Protestant, a R. Catholic, and a Menonite church, an old castle, orphan and ordinary hospital; manufactures of woollen, cetton, and linen goods, muslin, hosiery, hats, pins, starch, soap, vinegar, and tobacco; several worsted mills, tanneries, distilleries, dye-works, and blcachfields, and an annual fair. Pop. 3744.

GOCHSHEIM.-1, A walled tn. Baden, circle Middle Rhine, 1. bank Kraich, 17 m . E.N.E. Carlsruhe. It has a parish church, an old castle, now used as a school house, and four annual fairs. Pop. 1370.-2, A vil. Bavaria, circle Lower Franconia, 25 ml . N.E. Wiirzburg; with a townhouse, and small castle, and, in the environs, a number of market gardens. Pop. 1727.

GÖCKLINGEN, a vil. Bavaria, Palatinate, 7 m . S.W. Landau; with a R. Catholic parish chureh, and an iron and a flour. mill. Pop. 1519.

GÖDA, or GÖDAU, a vil. Saxony, circle of, and 5 m . W.S.W. Bautzen, on a small stream of same name. It has a large and ancient parish church, in the Byzantine style, a brewery, mill, and granite quarry. Pop. 938.

GODALMING, a bor. tn. and par. England, co. Surrey. The town, $32 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. London, on a branch of the Guilford and Reigate railway, in a beautiful valley on the Wey, which is here navigable, and surrounded by finely-wooded heights, consists principally of one street, extending about $\frac{3}{4} \mathrm{~m}$. along the high road from London to Portsmoutli. It has a parish church, an ancient cruciform edifice; and places of worship for Baptists, Independents, Wesleyan Methodists, and Quakers; almshouses for ten aged persons, a national school, an apprenticeship fund, and some minor charities. The woollen trade, which was at one time considerable, is now nearly extinct. In the vicinity are several paper, parchment, and leather mills, and some stockings and fleecy hosiery are also manufactured. A trade of some consequence is carried on in corn, malt, flour, bark, timber, wool, and hoops. Corn market on Wednesday. Pop. tn., 2183. Area of par., 8470 ac. Pop. 4328.

GODAVERY, a large river, peninsular Hindoostan, having its source in the W. Ghauts, about 70 m . N.E. Bombay, near lat. $20^{\circ} \mathrm{N} . ;$ lon. $75^{\circ} \mathrm{E} . ;$ and its embouchure in the Bay of Bengal; lat. $16^{\circ} 48^{\prime}$ N.; lon. $82^{\circ} 20^{\prime}$ E.; thus nearly crossing the entire peninsula of Hindoostan. Its course is generally S.E., and is in length about 550 to 600 m . About 50 m . from the sea the river divides into two channels, the most N . of which flows into Coringa Bay. It is only, however, in the rainy scason that either of these branches are navigable, and then for small craft only; but it is believed to be quite practicable to open up a navigation in this river of 400 m . in length for four months in the year. The forests along the banks abound with timber fit for shipbuilding.

GODDINGTON, par. Eng. Oxford; 1030 ac. Pop. 117.
GODELLA, a tn . Spain, prov. of, and 4 m . N. Valencia, 1. bank canal of Moncada, in the huerta or orchard of Valencia. It contains a palace, with two towers; a parish church, townhouse, and two schools; and has manufactures of chocolate, and a trade in corn, oil, silk, and fruit. Pop. 1244.

GODELLETA, a vil. and com. Spain, prov. of, and about 15 m . W. Valencia, on the side of a hill. It contains a parish church, courthouse, miserable prison, primary school, and a Moorish tower in ruins; and has two flour-mills, and a trade in corn, wine, and oil. Pop. 1069.

GODERICH.-1, A small tn. Upper Canada, cap. Huron, dist. on Lake Huron, at the entrance of Maitland river. It was laid out in 1827, and contains five churches and chapels, a jail, and a courthouse. P. (1852), 1329.-2, An inland co.,
W. Anstralia, about 55 m . square, in which open plains alternate with thickly-wooded land, fertile valleys, and extensive pasturages. It is watered by the rivers Beaufort and Gordon. The capital, Kojonup, is 90 m . N.W. Albany.

GODESBERG, a vil. Rhenish Prussia, gov. Cologne, circle of, and 2 m . S.E. Bonn, on a hill of same name. It is one of the most agreeable summer residences on the Rhine; contains several fine villas, and has a mineral spring and bathing establishment, much frequented by the citizens of Bonn. On an isolated height is an old castle, with a cylindrical donjon tower, commanding one of the most beautiful views on the Rhine. Pop. 900.

GODHAVN, a Danish colony on the S.W. part of Disco, isl. Davis' Strait, and residence of the inspector of N. Greenland. In the vicinity are coal mines. Pop. 250.

GODIASCO [Latin, Godiascum], a tn. Sardinian States, div. of, and 18 m . E. Alessandria, at the foot of Mount Barlacca, r. bank Staffora, near the confluence of the Ardivesta. It contains a regularly-built square, on which are two handsome palaces, two churches, and a courthouse; and has a trade in cattle, a weelkly market, and an annual fair. Near it are some remarkable caverns and petrifactions. Pop. 1607.

GÖDING [Moravian, Hodonin], a tn. Moravia, circle of, and 34 m. S.E. Brünn, cap. dist. of same name, r. bank March. It contains a castle, parish church, and chapel; and lias manufactures of tobacco, a trade in wool, horses, and cattle; a weekly market, and four annual fairs. Pop. of tn. 2829 ; of dist. 17,407.

GODMANCHESTER, or Gumcester, a municipal bor. and par. England, co. Huntingdon.-The Town, situated on the Ouse, $\frac{3}{4} \mathrm{~m}$. S.S.E. Huntingdon, within the parliamentary limits of which it is included, has a handsome church, in the later English style; a free school, founded by Queen Elizabeth; besides a number of useful charities. Area of par. 5590 ac. Pop. 2152.

GODMANSTONE, par. Eng. Dorsct; 1240 ac. P. 153. GODMERSHAM, par. Eng. Kent; 3440 ac. P. 450.
GÖDÖLLÖ, a market tn. Hungary, co. of, and 15 m . E.N.E. Pesth. It stands in a beautiful district; contains a magnificent castle, a church, theatre, and a fine park and gardens; and has a large general trade, and an arnual fair. Pop. 2330.

GODOLPHIN, a hamlet, England, co. Cornwall, $3 \frac{1}{2} \mathrm{~m}$. N.W. by W. Helston. The neighbourhood has long been celebrated for its tin mines.

GODSHILL, par. Eng., isl. of Wight; 6400 ac. P. 1435. GODSTONE, par. Eng. Surrey ; 6600 ac. Pop. 1896. GODTHAAB, a Danish colony, W. coast Greenland, in Gilbert Sound, about lat. $64^{\circ} 30^{\prime}$ N. It is the residence of the inspector of the S . district, and is the oldest Danish colony in Greenland, laving been founded in 1721, by Hans Egde. It has a seminary for the instruction of native catechists, under the superintendence of a missionary. Pop. 740.

GOEDEREEDE, or Goere, a vil. Holland, prov. S. Holland, on the island of Goederede-en-Overflakke, 10 m . S. W. Brielle. It has a townhouse in the market-place, a Reformed church, and a school. It was formerly a large, walled, commercial town; and has been brought into its present state by inundations, fire, and war. Pop. 1118.

GOEDEREEDE-En-Overflakke, an isl. Holland, forming the most S . portion of prov. S. Holland; bounded, W. by the N. Sea, N. and N.E. by the Haringvliet, and G.E., S., and S.W. by the Volkerak, Kammer, and Grevelingen, which are all portions of the estuary of the Waal, and communicate with Hollands-Diep. Before 1751, it formed two islands; hence the conjoint name of Goedereede or Goere and Overflakke, which were united by the filling up-partly naturally, and partly by artificial means-of a water-course that separated them; and which, at full tide, was navigable for vessels of considerable size. It is about 24 m . long, N.W. to S.E., by 6 m . broad. Its inhabitants are chiefly engaged in agriculture, raising a considerable quantity of madder. Pop. 20,000.

GOENONG API or Apee.-1, A small volcanic isl. Indian Archipelago, Banda Sea ; lat. $6^{\circ} 35^{\prime}$ S. ; lon. $126^{\circ} 40^{\prime}$ E. It contains an active volcano, the last ernption of which occurred in 1820.-2, An isl. Flores Sea, off the N.E. coast Sumbawa; lat. $8^{\circ} 11^{\prime} \mathrm{S} . ;$ lon. $119^{\circ} 5^{\prime} \mathrm{E}$. It also contains an active volcano.-3, A burning island, Banda group (which see).

GOENTOER, or Goenong-Goentoer, an active volcano, isl. Java, prov. Preanger, about 94 m. S.E. Batavia; height,

6689 ft . Its eruptions of $1818,1825,1835$, and 1841 , all caused great damage to the surrounding country, destroying large numbers of coffee-trees, and covering extensive tracts with ashes, sand, and stones.

GOES, or Tergoes [Latin, Gocsa], a tn. and port, IIolland, prov. Zeeland, isl. S. Beveland, 16 m . W. Bergen-opZoom. It is surrounded with walls protected by a diteh, and has seven gates. It has five open squares, of which the Great Market [Groote Markt], the fincst and largest, is in the form of a parallelogram; is planted with trees, and is further adorned with the townhall, an old, respectable-looking edifice, which once contained the weigh-house. There are also a new corn exchange, a prison, a Calvinistic, dissenting, Baptist, and R. Catholic church, and a synagogue; numerous schools, a poorhouse, orphan hospital, and several other benevolent institutions, and charitable and religious societies. It has an old and a new harbour, defended by forts; a considerable conmerce, but unimportant manufactures. Pop. 4725.

GOES, a tn. and par. Portugal, prov. Beira-Baixa, com. Cea, near r. bank Ceira, 17 m . E. Coimbra, at the foot of the Serra d' Estrella, in a valley so deep, that in winter it is searcely visited by the sun. It contains a parish church and a fine castle. Pop. 31500 .

GOETA, a river, Sweden. See Göta.
GÖGGINGEN, a market tn . Bavaria, circle Swabia, cap. dist. of same name, 2 m . S.W. Augsburg. It contains a castle, parish church, chapel, and hospital; and has manufactures of woollen cloth, white lead, clocks, and potato starch, and saw, oil, and other mills. Pop. of tn . 1222 ; of dist., area 80 geo. sq. m., 16,135.

GOGO, or Gogen, a seaport tn., W. Ilindoostan, prov. Goojerat, on the W. coast of the Gulf of Cambay; lat. $21^{\circ} 40^{\prime} \mathrm{N} . ;$ lon. $72^{\circ} 16^{\prime} 30^{\prime \prime} \mathrm{E}$. (r.) It is an ancient town, but had fallen much into decay while under the Mahratta government. The roadstead is considered safe during the S.W. monsoon.

GOGRa, Goggra, Sarjou, or Defa, a river, Hindoostan. It rises in the limalayas, near Tadagur, about lat. $30^{\circ} 11^{\prime} \mathrm{N}$.; lon. $81^{\circ} 18^{\prime}$ E.; from which it flows gencrally S.W., through Ncpaul, Oude, and into the prov. Bahar, where it falls into the Ganges, a little W. from Cluupralı; lat. $25^{\circ} 45^{\prime} \mathrm{N} . ;$ lon. $85^{\circ} 10^{\circ} \mathrm{E}$. It is one of the principal tributaries of the Ganges, and is navigable for large boats to the foot of the hills. It is held sacred by the IIIndoos, but not in equal estimation with the Ganges. Length, in a nearly straight line, about 450 m .

GOHUI, a fortified $\mathrm{tn} ., \mathrm{N} . \mathrm{W}$. Hindoostan, prov. Agra, 28 m . N.E. Gwalior ; lat. $26^{\circ} 24^{\prime} \mathrm{N}$.; lon. $78^{\circ} 20^{\prime} \mathrm{E}$.

GOIANINIIA, a tn. Brazil, prov. Rio-Grande-do-Norte, near Lake Groahiras, 28 m . S. Natal. It contains a parish church, and a primary school. It has some trade; inhabitants chiefly labourers. Pop. 1500.

GOIL (Locit), a picturesque sea-arm, W. coast Scotland, co. Argyle, stretching 4 m . N.W. from Loch Long. At its upper end is the pretty village of Lochgoilhead.

GOIRLE, a vil. Holland, prov. N. Brabant, $15 \mathrm{~m} . \mathrm{S}$ W. Hertogenbosch, on the Leije; with a R. Catholic church, and a school. Pop. (agricultural), 795.

GOITO, a tn . Austrian Italy, prov. of, and 9 m . N.W. Mantua, r. bank Mincio, here crossed by a bridge. It was formerly surrounded by a strong wall, and defended by a castle; a place of considerable military importance, and the scene of several engagements; an amual fair is held in October. Pop. 4127.

GOJAM, a prov., S.W. Abyssinia, Amhara, S. of Lake Dembea. It is a pastoral country, and consists prineipally of elevated plains and ligh mountains, surrounded by the Abai, in the form of a semicircle. The middle region is a tableland, from 2000 to 3000 ft . above the level of the river. This table-land is about 20 m . wide. Ncarly the same space is occupied by the broken country, which lies between the plain and the river. It is intersected by numerous small streams, most of which fall into the Blue Nile. The ridges of mountains rise in some parts to the regions of frost and snow, and hailstones have fallen here of such size as to kill people and
cattle. This hail lies on the ground sometimes for three days, before it melts by the heat of the sun.

GOKAUK, a tn. Hindoostan, prov. Bejapoor, 49 m. N. Darwar; lat. $16^{\circ} 11^{\prime} \mathrm{N}$. ; lon. $74^{\circ} 58^{\prime} \mathrm{E}$.; on the N. acelivity of a hill, on the Gutpurba, 352 m . S.E. Bombay. It is enclosed by a wall and ditch on its E. and S. side, and is a place of considerable extent and importance. It had formerly a considerable manufactory of silk and cotton fabrics, both in the form of dresses and of piece goods.

GÖKTSCIEE-Denghis [Blue lake], also called KeghamSee, and sometimes Sewan, a lake, Russian Armenia, to the N.E. of Erivan; about 40 m . long, from N.W. to S.E., and on an average 12 m . broad. It is situated about 5000 ft . above the sea-level, in a basin surrounded by mountains, many of them covered with the richest verdure, not a few of the most fantastic forms, and several covered with snow. The water is fresh, and of a deep blue colour; and is said, by Chesney, never to freeze, though Dubois de Montpereux asserts, that when he visited it in the beginning of February it was covered with ice, in which the people who live on the banks of the lake were making holes, to catch the fish with which it is known to abound. In the N.V. of the lake there is an island, called Sewan or Sevan, with a convent on it.

GOLA-Secces. a vil. and com. Austrian Italy, prov. of, and 33 m . N.W. Milan, l. bank Ticino. It contains a parish church. The inhabitants are chiefly employed as bargemen on the river. Hannibal crossed it here with his elephants. Pop. 1601.

GOLCONDA. a tn . and fortress, Hindoostan, prov. of, and 6 m . W.N.W. Hyderabad, on a hill ; lat. $17^{\circ} 23^{\prime} \mathrm{N}$. ; lon. $78^{\circ} 26^{\prime}$ E.; formerly the capital of an extensive kingdom. The fortress is now used chiefly as a state prison. The principal inhabitants and bankers of Hyderabad are also permitted

to retain houses in it, to which, on any alarm, they retire with their money and other portable effects. Golconda and diamonds is an old association, but is no otherwise warranted than that the town was at one time a principal mart for these precious gems, which were brought there to be cut and polished. No diamonds are, or cver were, found in any part of the adjoining, country; the nearest mines, most of which are now deserted, being probably 100 miles distant.

GOLD COAST, British possessions, on the W. coast of Africa, having Windy Coast on the W., and the Slave Coast on the E. Its precise limits are not determined, but the jurisliction of British authority, in this part of Africa, extends, with exception of a few sea-side towns, from Pram-Pram on the E., lon. $0^{\circ} 10^{\prime}$ E., to the river Assince on the W., lon. $3^{\circ} 18^{\prime} \mathrm{W} .$, or 230 m. , stretcling, inland, to Ashantce. The British forts and stations on this coast are Dix Cove, Cape Coast Castle, the residence of the governor ; Annamaboe, and Fort James. There were formerly several others, but they have been all abandoned, one after the other; there were also some Dutch and Danish forts and stations on this coast, but the latter have been sold to Great Britain. A considerable trade is carried on with the Ashantees, who bring ivory, gold
dust, horses, \&c., to exchange for silks, tobacco, rum, \&c. The imports, for 1849 , were $£ 110,600$; and the exports $£ 167,674$. The revenue for the same period was only $£ 1597$; the difference in the expenditure being made up by a parliamentary grant. No executive or legislative council exists at the Gold Coast, the power of enacting laws being vested in the governor and council of Sierra Leone. A judicial assessor, having very extensive jurisdiction, is resident at Cape Coast Castle, and British magistrates administer justice at Annamaboe, Winnebah, and British Accra. The abandoned station of Cormantine, founded in 1618 , is said to be the first fort built by the English on the Gold Coast. It was taken from the former by Admiral de Ruyter in 1663; and from that period remained in the possession of the Dutch, under the name of Fort Amsterdam, till 1807; when it was plundered by the Ashantees. There are no harbours on this coast, and the surf is so violent that trading vessels are obliged to anchor 4 m . or 5 m . from the beach.

GOLDAPP, a tn. Prussia, prov. E. Prussia, gov. of, and 20 m. S. Gumbinnen, cap. circle, and on a river of same name. It is an old and ill-built place, is the seat of a law court, and several public offices ; contains two Protestant churches; and has manufactures of woollen and linen cloth, several tanneries, and a trade in cattle. Pop. 3869.-The circle, area 295 geo. sq. m., is flat, well-wooded, and well-watered; but has not much good arable land. Pop. 36,212.

GOLDAU, a valley, Switzerland, can. Schwyz, between the Rigi and the Rossberg or Rufiberg. There is a small village of same name in the valley, near the site of a former and much larger one, which, Sept. 2, 1806, was entirely destroyed, along with the adjoining villages of Bussingen, Rothen, and part of Lowerz, by a landslip of the Rossberg, which then took place, and which also converted this once beautiful and fertile valley into a scene of desolation, covering it with enormous rocks and other debris of the mountain, to the depth, in some places, of probably 200 ft . Upwards of 450 persons were then killed, 111 houses destroyed, and whole herds of cattle swept away. The near end of Lake Lowerz, though 5 m . off, was filled up by the quantity of stones, \&c., thrown into it, and a wave produced 70 ft . high, which overwhelmed the opposite shore, and as it retired swept many houses, with their inhabitants, into the lake. The portion of the mountain that fell was about 3 m . long, 1000 ft . broad, and 100 ft . thick. No vegetation even now covers the bare space whence tbis mighty mass slipped off. The road through

fallen rocks in the valley of guldau. Frocs Sazerac, Lettres sur la Suisse.
the valley passes over the debris, which extends from the top of the Rossberg far up the Rigi, on the opposite side of the valley, and winds through among enormous blocks of stone, beginning to be moss grown. A very remarkable instance of
this kind is exhibited in our engraving, where the road is seen passing between and under huge masses of rock. The cause of the catastrophe is to be found in the structure of the mountain. Its upper part is composed of conglomerate, very liable to crack, and resting on an unctuous clay, which separates it from the more compact strata beneath. The rains, which had previously been excessive, having penetrated through the fissures and softened the clay, which lies in a slanting position towards the valley, like a roof-top, the upper part of the mountain had nothing to rest upon but a lubricated inclined plane. It accordingly lost its stability, and descended in one mass into the valley, with the noise of thunder, and almost the swiftness of lightning. Smaller masses had fallen on former occasions; and again, in 1823 and 1839, other large masses broke off from the Rossberg, but fell only on the wreck produced by the great fall.

GOLDBERG, several places, Germany, particularly:1, A walled tn. Mecklenburg-Schwerin, circle Wend, on the Wildenitz, 26 m . E.S.E. Schwerin. It has a church, townhouse, courthouse, saline springs, bathing establishment; and manufactures of woollen cloth, and tobacco, several breweries, and three annual fairs. Pop. 2646.-2, A tn. Prussia, prov. Silesia, gov. of, and 14 m . S.W. Liegnitz, cap. circle of same name, on an eminence above r. bank Katzbach, here crossed by three bridges. It is partly surrounded by walls, with four gates, and defended by three forts; is the seat of a law court, and several public offices; contains a Protestant and a R. Catholic church, a burgher, and several elementary schools, a poorhouse, workhouse, and hospital; and has extensive manufactures of woollen cloth, several worsted and other mills, dye-works, tile-works; a weekly market, and four annual fairs. Pop. 7150 .—The circle, area 177 geo. sq. m., is hilly, but tolerably fertile, and is watered by the Katzbach and other streams. Pop. 51,492.

GOLDCLIFF, par. Eng. Monmouth; 2130 ac. Pop. 282.
GOLDEN, a small market tn. Ireland, co. Tipperary, in 'Golden vale,' on the Suir. It has a church and a R. Catholic chapel, and near it the remains of Rathassel abbey. Pop. 602.

GOLDEN-Bridge, a vil. Ireland, co. of, and 2 m . W.S.W. Dublin. It is well built, and has paper, flour, and barley mills. Pop. 1090.

GOLDENSTEIN, or Koldsstein, a tn. Moravia, circle of, and 35 m . N.W. Olmiitz, on a hill above the Bord. It contains two churches, one of which is built in the Italian style; two castles, one of them an ancient fortress, in ruins; and an Augustine monastery ; and has two glass furnaces. Flax is grown extensively in the vicinity. Pop. 1020.

GOLDHANGER, par. Eng. Essex; 1140 ac. Pop. 520.
GOLDINGEN, a tn. Russia, gov. Courland, cap. circle of same name, 78 m . N.W. Mittau, on the Windau, which here forms a cascade. It occupies a considerable space; but is poorly and irregularly built; has unpaved streets, a Protestant and a R. Catholic church, a circle school, and the remains of an old castle; a brewery, distillery, some gencral trade, and an annual fair. Pop. (1852), 10,767.

GOLDINGTON, par. Eng. Bedford; 3940 ac. Pop. 509.
GOLDKRONACH, a well-built tn. Bavaria, circle Upper Franconia, in a mountainous district, on the Kronach, 7 m . N.E. Baireuth ; with three castles, two of them in ruins; and manufactures of mirrors and vitriol. Copper and antimony are mined; and there are serpentine and marble quarries in the vicinity. Pop. 940.

GOLDSBOROUGH, par. Eng. (W. Riding), York; 800 ac. Pop. 459 .

GOLEGA, a tn. and par. Portugal, prov. Estremadura, com. of, and 12 m. N.N.E. Santarem, on the margin of an extensive and fertile plain. It contains a large hospital, and a monastery; and has a much-frequented annual fair, which lasts three days. Pop. 2620.

GOLFE (Isles Du), two inhabited isls., S. Pacific Ocean; lat. $10^{\circ} 15^{\prime}$ S.; lon. $161^{\circ} 45^{\prime} 40^{\prime \prime}$ E.; the largest being pretty high. They are neither of them of any extent, and are entirely covered with a rich vegetation, but withont cocoa-nut trees. The channel between them and the shore is broad, and apparently deep and safe.-(Findlay's Directory for the Pacific Ocean.)

GOLFO DULCE, a lake, Central America. See Dulce.
GOLI.-1, A tn. Senegambia, on the estuary of the Geba, 5 m . N.E. Bissao. It bas a trade in ivory and cotton. Pop.
4000.-2, A small isl. Dalmatia, in the Adriatic, circle Zara, 3 m. N. E. isl. Arbe.

GOLLERSDORF, a market tn. Lower Austria, on the Göllersbach, 23 m. N. W. Kornenburg. It contains a castle and a parish church. Pop. 1278.

GOLLNOW, a tn. Prussia, prov. Pomerania, gov. of, and 14 m. N.E. Stettin, 1. bank Ilna; and on the railway from Stettin to Danzig. It consists of the town proper, surrounded by walls, and defended by two forts; and of two suburbs; contains two churches, and three poorhouses; and has manufactures of woollen eloth, ribbons, paper, and tobacco; an iron and a walk mill, a trade in cattle, and six annual fairs. Pop. 5188.

GOLLUB, a tn. W. Prussia, gov. of, and 40 m . S. Marienwerder, l. bank Drewenz. It has a Protestant and a R. Catholie chureh, manufactures of woollen and linen cloth, a trade in corn, eattle, and horses, and nine annual fairs. The village Dobrzin, so near Gollub as to be only its suburb, belongs to Poland. Pop. 1745.

GOLLUMBINCZLE, or Golubincze, a vil. Austria, Sclavonia, 22 m. S.E. Peterwardein. It contains a castle, a Greek non-united and a R. Catholic chureh. Pop. 3500.

GOLNITZ, a market tn. IIungary, Hither Theiss, co. Zips, l. bank river of same name, $17 \mathrm{~m} . \mathrm{S}$.W. Eperies. It stands among mountains; is the seat of a mining directory; contains a Protestant and a R. Catholic ehureh, and a high sehool; and has manufactures of iron and copper ware, wire, and cutlery. Both iron and copper are extensively mined and smelted in the vieinity. Pop. 5300.

GOLO, a river, Corsica, which rises in Lake Ino, on the E. slope of the mountain chain which stretches through the island, about 15 m . W. Corte, flows E.N.E., and, after a course of about 40 m ., falls into the sea $10 \mathrm{~m} . \mathrm{S}$. Bastia.

GOLOVATCHEFF, a cape N. W. coast isl. Tarakai or Saghalin, empire of China; lat. $52^{\circ} 32^{\prime}$ N.; lon. $141^{\circ} 54^{\prime}$ E. (r.) With the most N. W. cape of the island, Cape Maria, it incloses the bay of Nadiejada.

GOLS, or Galos, a market tn. Inngary, co. Wieseburg, 32 m. S.E. Vienna. It contains a Protestant and a R. Catholic church; and stands in a fertile district which yields heavy crops of corn, and rears fine cattle. Pop. 1800.

GOLSPIE, a maritime vil. and par. E. coast Scotland, co. Sutherland.-The village, pleasantly seated on the coast, 7 m . N.N.E. Dornoch; is inhabited by fishermen, agrieultural labourers, and other working people.-The Parisir is about 8 m . long, by 6 m . broad; and contains Dunrobin castle, the sat of the Duke of Sutherland. Pop. 1214.

GOLSSEN, a tn. Prussia, prov. Brandenburg, gov. of, and 46 m . W.S.W. Frankfort, 1. bank Dahme. It has a church, manufactures of tobaceo, which, as well as flax, is extensively grown in the vicinity; and a trade in sheep, swine, poultry, and carp. Pop. 1061.

GOLTHO, par. Eng. Lincoln; 1780 ac. Pop. 159.
GOLTSCH-Jenikad, a tn. Bohemia, circle Czaslau, 50 m . E.S.E. Prague. It contains a church, chapel, castle, and townhouse; and has manufactures of tobacco, a general trade, and two annual fairs. Pop. 2030.

GOMANIZZA, a vil. and port, European Turkey, Albania, 43 m . W.S.W. Janina ; lat. (S.E. point), $39^{\circ} 28^{\prime} 42^{\prime \prime}$ N. ; lon. $20^{\circ} 18^{\prime} \mathrm{E}$. (r.) The village is of little consequence, but the harbour is safe and eommodions.

GOMARINGEN, a vil. Würtemburg, circle Blaek Forest, 5 m . W. Rentlingen, on the Wiesatz, here crossed by several bridges. It contains a parish chureh. Pop. 1485.

GOMBAS, a vil. Hungary, Hither Danube, co. Liptau, in a mountainous but well-wooded district, on a height, above the Waag, 7 m . from Rosenberg. It contains a parish church, and has glass-works. Pop. 1000.

GOMBEROON, or Gombroon. See Bender-Abbaz.
GOMBIN, atn. Russian Poland, 55 m . W.N.W. Warsaw ; with a church, and manufactures of woollen cloth, some general trade, and two annual fairs. Pop. (1841), 3451.

GOMERA (Velez de), or Badis [anc. Parietina], a tn. Marocco, prov. Fez, with a fort, on the Mediterranean, 55 m . S.E. Ceuta. It is situated between two high mountains; and contains about 700 houses.

GOMERA, one of the Canary Islands, W. by S. Teneriffe, N. point ; lat. $28^{\circ} 13^{\prime} \mathrm{N}$. ; lon. $17^{\circ} 16^{\prime} \mathrm{W} . ;$ about 18 m . long, and 9 m . broad. It consists, properly, of one high mountain,
the upper part of which, in winter, is covered with snow. It is naturally very fertile; but cultivation is entirely negleeted, being eonfined to a tract contiguous to the coast. The centre is oceupied by forest. Pop. 11,439. The capital of the same name is on the E. coast, and has a good harbour.

G()MERSAL. a township, England, co. York (W. Riding), 7 m. S.W. Leeds; the inhabitants of which are ehiefly employed in the manufacture of woollen stuffs, and the spinning of worsted yarn. Pop. 8030.

GOMETRA, or Gometray, a sinall isl. Scotland, co. Argyle, between Staffa and Mull; and separated from Ulva by a very narrow sound.

GOMEZ, a small isl. New Granada, in the Caribbean Sea, at the mouth of the river Magdalena.

GOMMERN, a tn. Prussia, prov. Saxony, gov. of, and 5 m . E.S.E. Magdeburg, on the Elbe. It is the seat of a court of justice; contains a Protestant parish chureh; and has a trade in cattle, and three aunual fairs. Pop. 1807.

GOMONA, a small isl., S. Paeific Ocean, Pitt's Passage, S. isl. Oby; lat. $1^{\circ} 46^{\prime} \mathrm{S}$.; lon. $127^{\circ} 27^{\prime}$ E. (R.); of middling beight, and sloping from the centre towards each end.

GÖMÖR, a co. Hungary, IIither Theiss, bounded, N. by Liptau and Zips, E. Torna, S.E. Borsod, S. Borsod, ILeves, and Neograd, S.W. Neograd, and E. Sohl ; area, 1236 geo. sq. m. ; its capital, Pelsöcz, in lat. $48^{\circ} 30^{\prime} \mathrm{N}$. ; lon. $20^{\circ} 20^{\prime}$ E. The surface is traversed by ramifications of the Carpathians, one of which contains the lofty summita of Hrona, Tresznik, Czigan, and Sztudena; and stretching S.W. to N.E., divides the county into two distinet portions; the smaller of whieh, in the N.W., is drained by the Gran, which flows W., and carries its waters to the Danube; and the latter is drained by the Sajo and its tributaries, which belong to the basin of the Theiss. The climate is cold and variable; and the grain raised barely suffices for the home consumption. Some parts, however, are of great fertility, and produce good crops of tobaceo and flax. Wine, also, of good quality, is produced ; and the hills are generally well covered with wood. But perhaps the principal source of wealth in the county is its mines, which are numerous; and inelude iron, cobalt, tin, and saltpetre. For administrative purposes, the county is divided into five districts-Kis-IIonth, Putnok, Ratko, Rosenau, and Serke. Pop. 202,000.

GÖMÖR-SAJo, a market tn. II ungary, in the co. to which it gives name, r. bank Sajo, 46 m . W.S.W. Kascliau. It has a Protestant parish church; a gymnasium, with a library and museum; and manufactures of earthenware. Much tobaceo, fruit, and wine, are produced in the district. Pop. 1049.

GOMUL, a river of E. Afghanistan, the channel of which forms the Golairee pass, or great middle route, from IIindoostan to Khorasan by Dora Ismael Khan and Ghuznee. It rises about lat. $33^{\circ} \mathrm{N}$. ; lon. $69^{\circ} 22^{\prime}$ E., 50 m . S.s.W. Ghuznee, flows S.S.W. for about 50 m ., when it bends round to the E.; and having made its way tlirough the Soliman range of mountains, about lat. $32^{\circ} 25^{\circ} \mathrm{N}$., is lost in the sand to the E. of it. Previous to its entering the range, it is joined by the Zhobe, a considerable stream, flowing from the S . During the rains, however, it continues its course to the Indus; lat. $32^{\circ} 5^{\prime} \mathrm{N}$.; lon. $71^{\circ} \mathrm{E}$. Total course, to the Indus, about 160 m .

G()NAIVE, an isl. Caribbean Sea, off W. coast, Hayti, 28 m. W.N.W. Port Republicain ; lat. (W. point), $18^{\circ} 55^{\prime} 24^{\prime \prime}$ N. ; lon. $73^{\circ} 18^{\prime} 15^{\prime \prime} \mathrm{W}$. (r.) It is about 37 m . long, by 9 m . broad; and is almost surrounded by rocks and sandbanks. It has no permanent inhabitants, being destitute of fresh water.

GONAIVES (Les), a tn. Hayti, on the bay of same name, 65 m. N.N.W. Port Republicain. It las an execllent harbour, a naval and military hospital, public baths, and a mineral spring.

GONALSTON, par. Eng. Nottingham; 950 ac. Pop. 113.
GONÇALO-SÃo, a tn. Brazil, prov. Rio-Grande-do-Norte, 1. bank Potengi or Grande, 12 m . W. Natal. It contains a parish chureh and a primary sehool.

G()NÇALO-São-d'Amarante, a tn. Brazil, prov. Piauhi, 56 m. N.N.W. Oeiras. It was originally formed for the residence of Indians, called Aeroas and Guêguês, who were living dispersed among the mountains in which the Parnahiba has its source. It contains a parish church. The inhalitants cultivate provisions, and raise some cotton. 1'op. 1800.

GONDAR, the cap. city of Abyssinia, 21 m . N.E. Lako Zana, or Dembea ; lat. $12^{\circ} 50^{\prime} \mathrm{N}$. ; lon. $37^{\circ} 32^{\prime} \mathrm{E}$. It is
built on a lofty insulated hill, which is an extinet volcano, between two rivers, which unite below the town; houses widely apart from each other, of red stone, roofed with thatch; entire circumference of the city, about 11 m . It contains a ruined palace, many churches, and other buildings devoted to religious purposes. Gondar was, formerly, a royal residence; but is now, with the whole province in which it is situated, in the hands of the Gallas; and has lost much of its former splendour. Cotton cloths, of a fine quality, are manufactured here. The people of this city are represented as extremely licentious, and addicted to the most barbarous and brutal practices. Pop. estimated at 50,000 .

GONDELSHEIM, a vil. Baden, circle Middle Rhine, 14 m. E.N.E. Carlsruhe. It contains a parish church and a castle, with a fine garden; and has a saw, oil, and other mills. Pop. 1320.

GONERBY (Great), par. Eng. Lincoln; 2230 ac. P. 1049.
GONESSE, an anc. tn. France, dep. Seine-et-Oise, 10 m . N.N.E. Paris. It has a remarkable church, founded in the 12 th century; manufactures of hosiery, lace, cotton fringes; large bleacheries; and a trade in grain and fodder. Here, after the battle of Waterloo, the head-quarters of the British army were established, July 2, 1815. Pop. 2147.

GONIONDZ, a tn. Russia, prov. of, and 32 m. N.W. Bialystok, in a marshy district, l. bank Bober. It consists of the town proper, and two suburbs; and is a poor place, with unpaved streets. Pop. 1373.

GÖNNINGEN, a vil. Würtemberg, circle Black Forest, on the Wiesatz, at the foot of the Alp, 6 m . S.E. Tiibingen. It has a parish church, a paper and other mills; and a trade in seeds and fruits, raised in the vicinity. Pop. 2422.

GONNOS, several places in isl. Sardinia, particularly1, (-Fanadiga), A vil. and dist. div. of, and 30 m . N.N.W. Cagliari. It consista of two distinct portions, separated by a stream; the one on the right being called Gonnos, and the other Fanadiga. It contains a large church and a primary school; and has manufactures of woollen and linen cloth, and articles in wood and iron; and a considerable trade in fruit, particularly cherries, pears, and melons; corn, brandy, checse, and hides. Pop. 3313.-2, (-Codina), A vil., div. Cagliari, about 20 m . S.E. Oristano, on the E. slope of a hill, near r. bank Usellus. It has a very unhealthy site; contains an ancient parish and two minor churches. One of these, dedicated to St. Danicl, used to attract about 20,000 persons to the festival of that saint. A large fair was held at the same time, and a good deal of business done. Pop. 544.-$3,(-T$ ramatza $), \mathrm{A}$ vil. near the last mentioned, on both banks of a small stream. It consists of indifferent houses, of stone and mud; and of narrow, irregular streets, so dirty and ill paved, as to be almost impassable in winter. It contains a church and a primary school, and has manufactures of woollen and linen cloth, and an annual fair. Pop. 850.

GONOWI'I'Z, or Ganowitz, a market tn. Austria, Styria, in the neighbourhood of the Pollanaberg, celebrated for its wine, 19 m . S.S.W. Marburg. It consists chiefly of a long street; has a castle and a parish church, and, in its vicinity, mineral springs, and mines of iron and argentiferous lead. Its cattle markets are important. Pop. 670.

GONSINSKOIE-OzEro, a lake, Asiatic Russia, gov. Irkutsk, 58 m. N. by W. Kiakhta, called also 'Goose Lake,' from the immense numbers of geese that frequent it in the moulting season; and multitudes of which are killed by the inhabitants of the neighbouring districts. Near it are several pagodas, around which are grouped sinall houses of wretched appearance, for the accommodation of the lamas.

GONTENSWEIL, or Gundischweil, a vil. and par. Switzerland, can. Aargau, on the frontiers of Luzern, near the Winen, and about 14 m . S.S.E. Aarau. It contains a handsome new church; and has in its vicinity, at Schwarzenberg, a bathing establishment, finely situated, and well frequented. Near the baths there is a small seam of a hard black coal, resembling marble, which takes on a fine polish, and is cut into a variety of articles. Pop. 2119.

GONZAGA, a tn. Austrian Italy, prov. of, and $15 \mathrm{~m} . \mathrm{S}$. Mantua. It was formerly strongly fortified, and still possesses an ancient castle; and has a parish church, nine oratories, and several public offices. Silk is manufactured here; and a large fair for cattle and agricultural produce is held in September. Pop. 14,580.-(Dızio Della Italia.)

GOOD HOPE (Cape of). See Cape of Good Hope.
GOOD SUCCESS BAY, Tierra del Fuego, Le Maire Strait ; lat. $54^{\circ} 49^{\prime} \mathrm{S}$. ; lon. $65^{\circ} 13^{\prime} \mathrm{W}$. (R.) It is a good anchorage, perfectly safe, provided that a vessel does not anchor too far in towards the sandy beach at its head. Heights, of about 1200 ft . above the sea, surround the bay. Wood and water are to be obtained. The natives met with here have good figures, and pleasant-looking countenances, low foreheads, and high cheek-bones, with broad faces; the lower part projecting, hair coarse, and cut short on the crown, leaving a narrow border of hair banging down; over this a kind of cap, or band of skin or woollen yarn is worn. Their whole appearance, little improved by inflamed and sore eyes, is filthy and disgusting; but they are a simple and inoffensive race; subsisting principally on fish and shell-fish.

GOODERSTONE, par. Eng. Norfolk; 2870 ac. P. 500.
GOODLEIGH, par. Eng. Devon; 1180 ac. Pop. 335.
GOODMANHAM, par. Eng. York (E. Riding) ; 2930 ac. Pop. 316.

GOODMAN'S ISLANDS, S. Pacific. See Fead's and Goodman's Islands.

GOODNESTONE, two pars. Eng. Kent:-1, 140 ac. Pop. 60.-2, 1990 ac. Pop. 424.

GOODRICH, par. Eng. Hereford; 2460 ac. Pop. 738.
GOODWIN SANDS, dangerous sandbanks, England, about 4 m . or 5 m . off the E . coast of Kent, the intervening channel forming the well-known roadstead called the Downs. Their entire length, N. to S. , is about 10 m ; breadth, varying from $1 \frac{1}{2} \mathrm{~m}$. to 3 m .; and in many places they are dry at low water. They are divided into two parts by a narrow channel, called the Swash, navigable by small boats. Off the N. end of the Sands, a light-vessel is placed, another N. of the Swash, and a third near the S. Sand head. In hazy weather, a bell is kept constantly ringing, to warn vessels of their danger. According to tradition, these Sands formed, at one time, part of the Kentish land, belonging to Earl Goodwin, whence their name; and were submerged in the year 1097the sea having broken through the wall, by which they had been previously protected from its incursions.

GOOJAH, a tn. Scinde, 60 m . S.S.W. Hyderabad; lat. $24^{\circ} 45^{\prime} \mathrm{N}$. ; lon. $67^{\circ} 48^{\prime} \mathrm{E}$; ; on a navigable creek opening into the Indian Ocean, close to Kurrachee. It contains a small bazaar.

GOOJERAT-1, A small fortified tn. Punjaub, l. bank Dhwara, a tributary of the Chenaub, about 70 m . N.W. Lahore; lat. $32^{\circ} 35^{\prime} \mathrm{N}$. ; lon. $73^{\circ} 54^{\prime} \mathrm{E}$. Here, on the 21st February, 1849, the Sikh army was totally routed by the British forces, under Lord Gough. The former were 60,000 strong, the latter about 25,000 . The battle was fought almost wholly by artillery; the British having about 100 cannon in the field, the Sikhs 59 , of which 53 were captured. The country around Goojerat is clear and open, extremely fertile, and well cultivated.-2, A prov. Hindoostan, See Gujerat.

GOOLD, an isl., N.E. coast Australia, Rockingham Bay; lat. $18^{\circ} 9^{\prime} 54^{\prime \prime} \mathrm{S}$. ; lon. $146^{\circ} 11^{\prime} 30^{\prime \prime} \mathrm{E}$. (R.); about 7 m . in circumference, gradually rising towards the centre to form a peak 1376 ft . high. The shores are rocky, with occasional sandy beaches; and the island is well wooded up to its sum-mit-eucalypti (gum trees), frequently of great size, being the predominant trees. The grass is very luxuriant, and water abundant. The natives affect a friendly disposition towards Europeans; but are treacherous, and at once avail themselves of any opportunity that may offer of attacking and plundering boats or vessels. Their canoes are simply constructed of a single sheet of bark of the gum-tree, brought together at the ends, and secured by stitching.

GOOLE, a tn. and river-port, England, co. York (W. Riding), on the Ouse, 22 m . W. by S. Hull ; the E. terminus of the Pontefract and Goole Railway. It consists of several spacious streets, lined with well-built houses, and contains a handsome new church, with a lofty tower; and places of worship for Wesleyans, Primitive Methodists, and Indcpendents; also national and infant schools, a literary and scientific institution, and several charities. But the docks of Goole form its most important feature; one of these, the ship-dock, is 600 ft . long, by 200 ft . broad, with 18 ft . water; the other, the barge-dock, is 900 ft . long, by 150 ft . broad, and will contain 200 vessels, averaging 50 or 60 tons each. There has
been recently added two large docks, one wet and the other dry. There are, besides, extensive bonding warehouses, spacious sheds, a range of yards for bonding deals and iron; a pond which will hold 3000 loads of timber; and patent slip for repairing vessels. The number and tonnage of sailing vessels registered as belonging to the port, in 1850 , was 512 ; tonn. 32,878 ;-steamers, 8 ; tomn. 551. The number and tonnage of vessels that entered and cleared at the port during the same year was-sailing, steam, British and foreign, inwards, 3318 ; tonn. 194,632;-outwards, 2940 ; tonn. 173,128. Gross amount of customs'-duties for the same year, $£ 34,258$. Ship and boat building, sail-making, iron-founding, and agricultural machine making, which are carried on to some extent, comprise nearly the whole manufactures of the place. The town owes its rise and subsequent importance, in part, to its situation on the Ouse; but chiefly to the opening of the Knottingley and Goole Canal. by the Aire and Calder Navifation Company, by which a direct inland navigation has been effected to Leeds, Manchester, Liverpool, \&c. Pop. of township (1851), 5001.

GOOLKOO, a mountain-range, Afghanistan, 30 m. S.W. Ghuznee ; lat. $33^{\circ} 22^{\prime}$ N.; lon. $67^{\circ} 50^{\prime}$ E.; upwards of $13,000 \mathrm{ft}$. high, and covered with snow throughout the year.

GOOMTY, a river of N. IIndoostan, having its sources in the hills of Rohilcund, about lat. $29^{\circ} 45^{\prime} \mathrm{N}$. ; lon. $80^{\circ} 10^{\prime}$ E.; whence it flows S.E., and, traversing Oude, enters prov. Bahar, and falls into the Ganges, between Ghazeepoor and lenares, about lat. $25^{\circ} 30^{\prime} \mathbf{N}$.; lon. $83^{\circ} 30^{\prime} \mathrm{E}$. In its course it passes the cities of Lucknow and Juanpoor, becoming exceedingly tortuous below the former, and continuing more or less so to its junction with the Ganges. Its entire length, in a nearly straight line, is about 350 m . There are many other rivers in India, of a secondary class, of the same name, which signifies a winding course.
goonang TELLA, Celebes. See Gonontalo.
GOOR, a tn . Holland, prov. Overijssel, 18 m . E. Deventer. It has a Calvinistic and a R. Catholic church, and two schools; an old townhouse, a bleachery, and some calico and linen weaving. Here, in 1833, Thomas Ainsworth commenced his experiments in calico weaving, which led to the formation of a weaving-school for the teaching of workmen. So efficaciously did this school operate, that in a short time numerous workmen were taught and dispersed over the country; and the weaving of calicoes increased to such an extent, that Holland no longer required to be indebted to Belgium for supplies of that article, but manufactured sufficient for home consumption, and for exportation to the East India market. Since 1841, however, the weaving of calicoes has again fallen off. A inonument to the memory of Ainsworth lias been erected in the town. Pop. 1627.

GOORBAN, a river, Scinde. It rises in the mountainous tract between Kurrachee and Sehwan, about lat. $25^{\circ} 20^{\prime}$ N.; lon. $67^{\circ} 38^{\prime}$ E.; and, after a S. W. course of about $60 \mathrm{~m} .$, falls into the bay of Kurrachee, lat. $24^{\circ} 48^{\prime} \mathrm{N}$. ; lon. $67^{\circ} 6^{\prime} \mathrm{E}$. Though occasionally flooded, and having then a considerable body of water, it is dry the greater part of the year.

GOORKIIA, a city, Nepaul, nearly in the centre of the kingdom, 58 m . W. Khatmandoo; lat. $27^{\circ} 52^{\prime} \mathrm{N}$. ; lon. $84^{\circ} 22^{\prime}$ E.; formerly the cap. of the Goorkhas, before the formation of the present kingdom of Nepaul. The Goorkhas are the mountaincers of Nepaul, with whom a good understanding with the British exists. They now freely enter the native army, and are amongst the most faithful, active, and courageous of our troops; having particularly distinguished themsclves in the battles on the Sutlej, in 1845-6. Besides the musket, they carry a formidable short bent sword, called a kookree, with the edge on the inside of the bend, after the manner of a reaping-hook, with which, at close quarters, they do dreadinl execution.

GOOSE ISLAND.-1, British America, river St. Lawrence, about 45 m . below the isl. of Orleans. It is well cultivated, and produces wheat and hay. It also maintains numbers of cattle.- 2 , U. States, Connecticut ; lat. $4 \mathrm{I}^{\circ} 13^{\prime}$ N.; Ion. $72^{\circ} 42^{\prime}$ W. (r.)-3, One of the Furneaux Islands; lat. $40^{\circ} 19^{\prime}$ N.; lon. $147^{\circ} 47^{\prime}$ E. (r.) - 4 , Christinas Sound, S.coast Terra del Fuego ; so named by Captain Cook.-5, Australia, S. coast, between Cape Arid and Middle Island; lat. $34^{\circ} 5^{\prime}$ S.; lon. $123^{\circ} 9^{\prime}$ E.; about $1 \frac{1}{2} \mathrm{~m}$. long, by 1 m . broad, at the widest part. The rock is a coarse sienite, forming detached
bare masses and ridges, but none of considerable height. In the hollows the soil appears rich, dark, and pulverulent, with mach admixture of unformed bird-guano. The scanty vegetation is apparently limited to grass growing in tussocks, and a few maritime plants. The ground resembles a rabbitwarren; being everywhere undermined by the burrows of the mutton-bird, a dark shearwater (Puffinus brevicaudus), the size of a pigeon. Snakes of a dangerous species are numerous. There is a lighthouse on the island.-(Voyage of the Rattlesnake.)

GOOSEBERRY ISLANDS, a group of small isls. Newfoundland, E. coast Bonavista Bay.

GOOSNARGH, a township, England, Lancashire, 5 m . N.N.E. Preston. It contains a richly-endowed hospital for decayed gentry, founded by Dr. Bushell, in 1735. Pop. 1621.

GOO'TY, a tn. and fort, peninsular India, prov. Balaghaut, 56 m . S.S.W. Kurnoul ; lat. $15^{\circ} 18^{\prime} \mathrm{N}$. ; lon. $77^{\circ} 42^{\prime}$ E. -Tbe Town is approached from the plain by two breaks or openings, forming fortified gateways. - The FORT is composed of strong works, occupying the summits of a circular cluster of hills or rocks, connected with each other, and enclosing a space of level ground. The highest part of these rocks rises 1000 ft . above the surrounding plain.

GOPLO, or Garlo, a lake, Prussia, prov. Posen, gov. Bromberg, and circle Inowraclaw. It forms a long and narrow expanse, having nowhere a breadth of 2 m ; and yet is above 20 m . long. In several places it is dry. At its N.N.W. extremity there is a small village of same name.

GOPPINGEN, a tn. Wïrtemberg, circle Danube, cap. bail. of same name, r. bank Fils, 22 m . E.S.E. Stuttgart. It is regularly built; contains a handsome church, townhouse, old castle, and hospital ; and has mineral springs, with a bathing establishment; manufactures of woollen and linen cloth, hats, paper, and combs; a bleachfield, a trade in wool, and several annual fairs. Pop. tn., 5035 ; bail. 32,642 .

GORABUNDER, a vil. and small fort, Ilindoostan, isl. Salsette, W. coast, about 20 m . N. Bombay.

GORAM, a small isl. Indian Archipelago, S.E. Ceram; lat. (N.E. point) $3^{\circ} 56^{\prime}$ S. ; lon. $131^{\circ} 39^{\prime}$ E. (R.) It has a small harbour on its N.W. side, and is a place of considerable trade. Its inhabitants, mostly Mahometans, are enterprising, inclined to a nautical life, and claim the sole right of trading with some parts of New Guinea; from which they obtain nutmegs, trepang, birds of paradise, and slaves. Refreshments, consisting of fowls, fruit, and sago, are abundant. It is sometimes visited by South Sea whalers.

GORBALS, par. Scot., included in Glasgow.
GORBATOV, a tn. Russia, gov. of, and $40 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Nijnei-Novgorod, cap. circle of same name, r. bank Oka, a little below the confluence of the Kliasma. It lias a parish churel, a convent, tanneries and rope-works, a fishery, and some shipping trade. Pop. (1849), 2597.

GÖRCHEN, or Mietsia Gorka, a tn. Prussia. prov. of, and $52 \mathrm{~m} . \mathrm{S}$. Posen. It contains three churches; and has several distilleries and breweries, a trade in cattle, and four amual fairs. Pop. 1418.

GORCUM, a tn. Holland. Sce Gorkum.
GORDA I'UN'TA, several headlands, including:-1, A point on the S. coast of Cuba, 52 m . S. by E. Havanna. -2 , A cape, Central America, Mosquito coast, 47 m . S. of Cape Gracias á Dios.

GORDES [Latin, Gordz], a vil. France, dep. Vaucluse, 8 m . W.N.W. Apt. It has a trade in ironware and cattle, and four annual fairs. Pop. 1212.

GORDON, a small vil. and par. Scotland, co. Berwick. The village is $8 \frac{1}{2} \mathrm{~m}$. N.W. Kelso; and the Parish, which contains $8900 \mathrm{ac} .$, gave the title to the noble family of Gordon, supposed to have settled here in the reign of Malcolm Canmore. Pop. 903.

GORDONA, a vil. and com. Austrian Italy, gov. Milan, prov. Sondrio, dist. of, and about 5 m . S. S. W. Chiavenna, r. bank Mera, at the entrance of the valley of Bodengo. It contains a parish church, and several mills. The Bogia, in the vicinity, in descending from the mountains, presents the appearance of a stupendous cascade. Pop. 975.

GORDONCILLO, a tn. Spain, prov. of, and about 22 m . from Leon, in a plain. It contains a parish church, a large townhouse, and a primary school ; and, being centrally situated, has some transit trade, particularly in wine. Pop. 1808.

GORE, a dist. Upper Canada, comprising cos. Went worth and Halton, bounded, E. by Lake Ontario; S. and W. by the districts London and Niagara; and N. by York and Home. It is watered by the Ouse or Grand River, the head branches of which are diffused over the whole of the W. part of the district; and contains some of the richest, best settled, and most highly-cultivated townships in Upper Canada. Many of the farms here have flourishing orchards attached to them. Freestone and limestone are abundant, and are exported. Pop. about 40,000 .

GOREE, a small isl. belonging to the French, on W. coast Africa, immediately S. of Cape-de-Verd, and separated from the mainland by the Strait of Dacar; lat. $14^{\circ} 39^{\prime}$ N.; lon. $17^{\circ} 24^{\prime} \mathrm{W}$. It is 3 m . in circuit, and consists of a naked mass of black basalt, rising in some places to the height of several hundred feet perpendicular. The landing-place is on the N.E. side of the island, in a small sandy bay. In the centre, on an elevated plateau, stands the fort; and on a sandy plain, at-the foot of the rock, is the town of Gorée, occupying in all about two-thirds of the whole area of the island. It is fortified, has local courts, two schools, some manufactures, and boat-building yards; but the only remarkable building is the barracks. The roadstead is N.E. of the island, well sheltered, and safe for eight months in the year. The island produces nothing, and is scarce of water. It is, however, the chief entrepôt of the French trade in W. Africa. It belonged originally to the Dutch, who took possession of it in 1617. Pop. (1837), 4994.

GORELOY, one of the Aleutian isls., containing an active volcano ; lat. $51^{\circ} 56^{\prime} \mathrm{N}$. ; lon. $178^{\circ} 40^{\prime} \mathrm{W}$. (r.)
gORE'S ISLand. See Mattiew (St.) Island.
GORESBRIDGE, a vil. Ireland, co. of, and 10 m . E.S.E. Kilkenny, r. bank Barrow. Pop. 921.

GOREY, a market tn. Ireland, co. of, and 24 m . N.N.E. Wexford. It is of a decent and respectable appearance. It has a handsome courthouse and market-house, a spacious parish church, an elegant R. Catholic chapel, and Wesleyan Methodist meeting-house; two endowed and five private schools; a fever hospital, dispensary, and other charities; extensive flour-mills, and a large brewery. Two cattle shows, and eleven fairs for horses, cattle, and pigs, are held annually. Weekly market on Saturday. Pop. (1841), 3365.-(Local Correspondent.)

GORGEN Y-Szent-Imre, St. Emerich, or Guraiu, a market tn. Austria, Transylvania, co. Thorenburg, l. bank Görgeny, 63 m . E. Klansenburg. It stands in a mountainous, but well-wooded district; contains a Protestant and a Greek united church, and the ruins of an old castle; and has a paper and several flonr mills, glass-works, and salt mines. Pop. 1145 :

GÖRGÖ, two places, Hungary:-1, (Garhow, or Garg), a vil. co. Zips, Hither Theiss, dist. of, and about 4 m . from Leutschau, in a plain on a stream of same name, here crossed by a stone bridge. It contains a handsome chapel. P. 900. -2 , (or Gergou), a vil. Hither Theiss, co. Torno, about 15 m . from Rosenau. It stands in a valley, contains a Protestant and a R. Catholic church, and has four mills. Pop. 1450.

GORGONA.-1, An isl. Pacific Ocean, off the coast of New Granada, from which it is distant about 25 m. ; lat. (N. point) $3^{\circ}$ N.; lon. $78^{\circ} 9^{\prime}$ W. (s.); 6 m . long by 1 m . broad, and 1296 ft . high. It is well covered with large trees; and its only inhabitants are numerous black monkeys, Indian conies, and snakes. Shell-fish, on which the monkeys eagerly feed, are abundantly found at low-water. (Dampier.)-2, An isl. Gulf of Genoa, about 20 m . S.W. Leghorn; lat. $43^{\circ} 25^{\prime} 48^{\prime \prime}$ N. ; lon. $9^{\circ} 53^{\prime} 30^{\prime \prime}$ E. (r.) It is 9 m . in circumference, almost entirely covered with wood, and noted for its anchovy fisheries, in which the inhabitants are chiefly engaged.3, A vil. New Granada, isthmus of Panama; a station on the railway between Chagres and Panama.

GORGONZOLA, a tn. and com. Austrian Italy, gov. of, and 12 m . E.N.E. Milan, pleasantly situated near the canal of Martesana. It is the seat of a court of law and several public offices; contains a magnificent parish church, adorned with numerous sculptures, frescoes, and paintings, and supported by 44 Corinthian columns; and has an extensive trade in ewe-milk cheese, of the kind called stracchini; and an annual fair. In 1158 the Milanese were here surprised and defeated ly the troops of Frederick Barbarossa. Pop. 3536.

GORI, or Gory, a market tn. Russia, gov. of, and 45 m . N.E. Mohilev, on the Bistra. It contains three Greek united churches.

GORI, a considerable tn . of W. Africa, on a small isl. of same name, l. bank Niger, about midway between Egga and the confluence of the Tchadda. It is a place of some importance, and has a noted weekly market, to which slaves are brought for sale from all parts around. The other chief articles disposed of at this market are salt, tobes, country cloth, camwood, hoes and shovels, calabashes, wooden spoons and platters, mats, straw hats, bows and arrows, twine and silk, Indian corn, seeds, Shea butter, yams, dried buffaloes' flesh, and dried fish.

GORIN, a river, Russia, which rises about 18 m . S.S.W. Kremenetz, in the S.W. of gov. Volhynia, near the frontiers of Galicia; flows N., in a very circuitous course, through that government, passing the towns of Zaslav and Ostrog; enters gov. Minsk, and shortly after, among the morasses of Pink, divides into two branches, which join r. bank Pripet. Its whole course is about 300 m .; its principal affluent is the Slutch, which joins it on the r., and nearly doubles its volume.

GORINCHEM, a tn. Holland. See Gorkum.
GORING, two pars. England:-1, Oxford; 4670 ac. Pop. 971.-2, Sussex; 2120 ac. Pop. 503.

GÖRISSEIFEN (Ober or Königlich), a tn. Prussia, prov. Silesia, gov. of, and 30 m . W.S.W. Liegnitz, with a Protestant church, and several mills. Pop. 2402.

GÖRITZ.-1, A tn. Austria. See Görz.-2, A tn. Prussia, prov. Brandenburg, gov. of, and 21 m. N.N.E. Frankfort, near r. bank Oder. It contains a Protestant parish church; and has two annual fairs, chiefly for horses and cattle. Pop. 1601.

GÖRITZ. a tn. Illyria. See Görz.
gorizla, a tn. Austria. See Görz.
GORJAN, a vil. Austria, Sclavonia, co. Verocs, 8 m . from Denkovar. It contains a R. Catholic parish church. Pop. 1290.

GORKUM, or Goncum [Dutch, Gorinchem, usually shortened to Gorkum], a tn. Holland, prov. S. Holland, 22 m . E.S.E. Rotterdam, r. bank Merwede, at the junction of the Linge, by which it is intersected ; and connected by canal with Vianen, on the Lek. It is surrounded by walls, has four gates, and a good harbour, formed by the Linge, which is crossed by three wooden bridges. There are several open market-places, in one of which stands the townhouse, a goodlooking old building. There are also a prison, custom-house, barrack, arsenal, and military hospital ; six churches, and a small synagogue. The charitable and benevolent institutions are numerous; the more important are the general hospital, poorhouse, and the hospitals for old men, for old women, and for orphans. Gorkum has also a library, a literary society, a Latin, town, drawing, and mathematical school; a burgher, a poor, and numerous other schools. The principal trade is in grain, potatoes, hemp, and other farm produce, and in fishing; but there are also breweries, a vinegar-work, tanworks, boat-building yards, rope-works, \&c. Pop. 8420.

GORLA (Maggiore and Minore), two adjacent vils. and coms. Austrian Italy, prov. of, and about 4 m . from Milan, 1. bank Olona, near the top of the valley formed by the stream. Each of them contains a church; that of GorlaMaggiore being particularly handsome. Gorla Ninore has cotton-mills. The district produces excellent wine. There is an elegant palace, called Magna, in the vicinity. P. 2067.

GORLAGO [Latin, Gurgalacus], a vil. and com. Austrian Italy, prov. of, and 7 m . E.S.E. Bergamo, in a plain, r. bank Cherio. It has a magnificent parish church, adorned with frescoes and paintings by distinguished masters; the remains of an old castle; manufactures of muslin, silk-mills, and an annual fair, which lasts several days. Pop. 1149.

GORLESTON, par. Eng. Suffolk; 1830 ac. Pop. 3779.
GORLICE, a tn. Austria, Galicia, circle Jaslo, on the Roppa or Rappa, 20 m . E.N.E. Neu-Sandec. It lies on a height; and has a church, bleacheries, and important grainmarkets. Pop. 2560.

GÖRLITZ [Wendisch, Folerz; Polish, Gorlic], a tn. Prussia, prov. Silesia, gov. of, and 52 m . W.S.W. Liegnitz, chief place circle of same name, picturesquely situated on an eminence above 1. bank Neisse, and on the railway from Dresden to Breslau. It consists of the inner town, surrouaded
by walls, with eleven gates, and of three suburbs, and is well built, having generally substantial houses lined with arcades, several large squares, and spacious streets. It is the seat of a civil and criminal court, and of several public offices; contains one R. Catholic, and eight Protestant churches, one of them handsome, and among the largest in the country, with five aisles and a curions crypt hewn in the rock; a gymnasium, four burgher and other schools, a poorhouse, orphan asylum, infirmary, and three hospitals; and has manufactures of woollen and linen cloth, tobacco, and starch, numerous worsted and other mills, dye-works, a weekly market, and three annual fairs. Pop. (1846), 18,026.——The circle, area 258 geo. sq. m ., is for the most part covered with wellwooded mountains and hills; bat there is little arable, and no great extent even of good pasture land. Pop. 60,162.

GORO, or Koro, one of the Feejee islands; lat. (N. point), $17^{\circ} 14^{\prime}$ S.; lon. $179^{\circ} 26^{\prime} \mathrm{W}$. (R.) It is $9 \frac{1}{2} \mathrm{~m}$. long by 4 m . broad, high, and apparently susceptible of cultivation to its very top. The produce of Goro is oil and tortoiseshell, and exceeds in quantity that of any other island of the group. Pop. estimated at 2000.

GOROCHOW, tns., Russia. See Gorornov.
GORODISCH'TCHE, several places, Russia, particularly :-1, A tn., gov. of, and 16 m . E.N.E. Nijnei-Novgorod. It has three churches and a monastery, in which the grand duke Alexander lived as a monk; cotton printfields, and manufactures of Prussian blue and white-lead. Pop. 3000. -2, A tn., gov. of, and 33 m . E.N.E. Penza, cap. circle of same name, on both sides of the Kitticli-Keleika. It contains two churches. Pop. 1800.-The circle is well wooded, and rears great numbers of cattle. Pop. 104,000.-3, A market tn ., gov. of, and 38 m . S.S.W. Tver. Pop. 1300.-4, A market tn., gov. Grodno, near Novogrodek. Pop. 1500.

GORODNIA, a tn . lussia, gov. of, and 30 m . N.N.E. Tchernigov, cap. dist. of same name, on the Gorodna. It contains three churches, and has some general trade, both by land and water. Pop. 1200._The circle is well wooded, and tolerably fertile. Pop. 80,800.

GORODOK, several places, Russia, but the only one deserving of notice is Gorodok, or Gorodez, a tn., gov. of, and 21 m. N.N.W. Vitepsk, cap. circle of same name, on the Gorodka and lake Nestehedra. It contains a Greek united church and a synagogue, and has a little trade. Pop. 1500; of whom about two-thirds are Jews. -The circLe is densely wooded, contains numerous lakes, produces much corn, and rears great numbers of cattle. Pop. 46,000.

GOROKHOV, two ths. Russia :-1, (or Gorokhovetz), Gov. of, and 90 m . E. Vladimir, cap. circle of same name, at the foot of a hill near the confluence of the Mojilanka with the Kliasma. It contains four stone churches; and has manufactures of leather, soap, and fine yarn, a bell foundry, tile-works; a considerable transit trade, particularly in fur, flax, and leather, sent to Astrakhan, and in caviar and salt-fish sent to St. Petersburg; and several large annual fairs. Pop. 2000.-The circas, in the E. of the gov., is only of tolerable fertility, and is more adapted for pasture than agriculture. Pop. 68,900.-2, (or Gonocnow, or Horochow), Gov. Volhynia, circle of, and 87 m. E. Wladimir. P. $183 \overline{5}$

GOROMBOLY, a vil. Hungary, Hither Theiss, co. Borsod, on the Sajo: with a Greek church. Pop. 1070.

GORONTALO, or Goonang Tella, a spacious bay, E. coast isl. Celebes; with a breadth of 55 m . at the entrance, widened towards its inner extremity, which is very little known, to 100 m . On the N. side of the bay, and not far from its entrance, is Gorontalo river and village; lat. $0^{\circ} 28^{\prime}$ $30^{\prime \prime} \mathrm{N} . ;$ lon. $123^{\circ} 15^{\prime} \mathrm{E}$. The river has two small coves just within the entrance on the E. side, in either of which small vessels may moor. The village is about 2 m . up the stream, and the natives, who are chiefly Mahometans, carry on a considerable trade in wax and gold dust. Refreshments of all kinds are to be obtained here, including buffaloes, bullocks, sheep, goats, and poultry; horses also may be procured.

GORRAN, par. Eng. Cornwall; 4660 ac. Pop. 1188.
GORREDIJK, a market tn. Holland, prov. Friesland, 18 m. S.E. Leenwarden, consisting of one street, on either side of a canal, and another built on the highway, and intersecting it at right angles. It has a Calvinistic and a Baptist church, a aynagogne, and a large school ; corn, saw, and walk mills;

Yol. I.
boatbuilding yards, distilleries, tanneries; a good trade, espe oially in grain ; and two annual fairs. Pop. 1720.

GORRON, a tn. France, dep. Mayenne, 23 m. N.N.W. Laval; with some remnants of an old castle. In the environs also is the old castle of Bailleul. Pop. 1634.

GÖRSBACH, a vil. Prussia, prov. Saxony, gov. of, and about 35 m . E.N.E. Merseburg; with a church. Flax is grown in the neighbourhood. Pop. 965.

GORSCHEN (Gross), a vil. Prussia, prov. Saxony, gov. of, and 10 m . S.E. Merseburg, on the Flossgraben, and in the vicinity of Luitzen. A battle was fought here in 1813, between the French under Napoleon and the Allies under Bliicher and others. The former had rather the advantage. Prince Leopold of IIesse-Homburg, to whom a monument has been erected on the spot, was killed; the Prussian general Scharnhorst mortally, and Bluicher severely wounded. Though the Prussians have given this battle the name of Gross Görschen, it is better known by that of Lützen.

GORSEL, a vil. Holland, prov. Gelderland, 5 m . N. Zutphen, on the road to Deventer. It has a Calvinistic church and a school. Pop., agricultural, 629.

GORT, a market tn . Ireland, co. of, and 17 m . S.E. Galway. It consists of three wide and spacious strects, diverging from a square where the markets are held; houses substantially built of stone, and of a comfortable and respectable appearance. It has an elegant parish church, R. Catholic chapel, courthouse, bridewell, constabulary and military barracks, a union workhouse, and a national and other schools. It has no manufactures, and little trade. Market day, Saturday; four annual fairs. Viscount Gort, the proprietor, takes his title from the town. Pop. 3056.-(Local Correspondent.)

G()RTROE, par. Irel. Cork; 9043 ac. Yop. 2832.
GÖRTZKE, a tn. Prussia, prov. Saxony, gov. of, and 27 m. E. Magdeburg, on the Buchau. It has a Protestant church, manufactures of stone-bottles, and several saw and other mills. Pop. 1434.

GORUCKPUOR, a tn. Hindoostan, prov. of, and 104 m . N.N.E. Benares, cap. dist. of same name, l. bank Rapty lat. $26^{\circ} 46^{\prime} \mathrm{N}$.; lon. $83^{\circ} 19^{\prime} \mathrm{E}$. It is reckoned one of the most healthy stations in India. In its W. suburb is a temple of Gerannath, a Hindoo deity in high repute in these quarters.

The district has an area of 7346 sq . m., or $4,677,792 \mathrm{ac} . ;$ of which $1,945,533 \mathrm{ac}$. are cultivated, and nearly as much more is capable of being cultivated. It is generally flat, and traversed by numerous streams, of which the principal are the Rapty, and larger Gunduck, both large, particularly the last, which is also remarkable for the magnificence of the scenery on its banks. The sheets of water to be met with here do not entirely resemble either the lakes or marshes of Europe. In the rainy season they are of great extent, and pretty deep; but even then they are in many parts hid by recds, some aquatic trees, and many aquatic herbs, while in the dry season they nearly altogether disappear. The soil is moderately fertile, but requires much watering. This attended to, it yields large crops, two annually for the first three years after a fallow of two years. The villages are always built in high places, and each usually occupies the bighest spot that is near the centre of its territory. The land nearest the village, and therefore the highest, usually extends from the village 400 or 500 yards, and receives the chief attention of the inhabitants; and being generally more or less manured, and carefully watered, usually gives two crops in the year. The lands next to these generally produce only one crop. The most remote and lowest lands are cultivated with winter rice, or with some kinds of pulse. The jungle forests abound in game of all descriptions. Elephants, tigers, rhinoceroses, bears, and buffaloes are also numerous. The Goruckpoor district came into the possession of the British in 1801, when it was ceded by the Nabob of Oude in commutation of subsidy. Pop. 2,376,533.-(Trigonometrical Survey of India.)

GÖRZ, Görıtz, or Gonizia [I,atin, Goritia], a tn. Austria, Illyria, prov. Carinthia, cap. circle of its own name, on the Isonizo, 23 m . N.N.W. Trieste. It occupies a very picturesque site, being built in the form of an amphitheatre, on a mountain slope, and consists of the high town, surrounded by walls, and defended by an old castle; the new town, situated in the plain on the 1 . bank of the river; and several suburbs. The houses are generally substantial, and in the

Italian style; but the streets are irregular, and most of them are unpaved. Görz is the seat of an archbishop, of courts of civil and criminal jurisdiction, and of several public offices; contains a cathedral, a fine building with a beautiful chancel and sacrarium; an elegant bishop's palace, a courthouse, townhouse, hospital or Casa della Beneficenza, a theatre, a general and ecclesiastical seminary, an old Jesuits' college, now converted into barracks; an old castle, used chiefly as a prison; and several schools, and literary, musical, and benevolent institutions. The manufactures are of considerable importance, and consist chicfly of leather, confectionary, earthenware, rosoglio, refined wax, and refined sugar. There are also several silk mills. Charles X. of France died here 1836. Pop. (1846), 10,428.-The circle, area 814 geo. sq. m., is in its N. part bleak and mountainous; but in the S . mild, pleasant, and fertile, raising much corn, wine, and silk. Pop. 179,100.

GORZE, a tn. France, dep. Moselle, 8 m . S.W. Metz, on the Moselle, picturesquely situated in a mountain gorge; long a flourishing town, it fell into decay from the ravages of war. In the 16th century it was a stronghold of the French Protestants, and here Farel laboured some time. Pop. 1810.

GOSBECK, par. Eng. Suffolk; 1530 ac. Pop. 316.
GOSBERT(ON, par. Eng. Lincoln; 8820 ac. Pop. 2094.
GOSCHE, a vil. Austria, Croatia, co. Agram, on the Save, 15 m . from Petrinia; with a parish church. Pop. 1700.

GOSCHÜTZ, or Goszyce, a market tn. Prussia, prov. Silesia, gov. of, and 23 m . N.E. Breslan. It has a castle with a fine garden, a Protestant and a R. Catholic church, a copper, two paper, and several other mills. Pop. 1198.

GOSFIELD, par. Eng. Essex; 2990 ac. Pop. 653.
GOSFORTH, two pars. Eng.:-1, Cumberland; 8400 ac . Pop. 1113.-2, Northumberland; 6010 ac. Pop. 3020.

GOSHEN, a vil., U. States, New York, 105 m . S. by W. Albany; with a courthouse, a jail, two churches, two seminaries, a tannery, and several stores. Pop. about 900 .

GOSIER, or Gozier (Le), a maritime tn. French W. Indies, isl. Guadeloupe, on S. coast of Grande-Terre, 3 m . E.S.E. Pointe-à-Pitre, on the little Cul-de-Sac. Pop. 3567.

GOSLAR, a tn . Hanover, principality of, and 26 m . S.E. Hildesheim, at the foot of the Rammelberg, on the Gosa, in a valley, hemmed in on three sides. It is ancient; surrounded by lofty walls; and, though once holding the rank of a free imperial city, is greatly decayed, and has a dull, deserted look. A few houses, interesting from their antiquity, have survived the fire, which, in 1780 , destroyed the greater part of the town. The buildings most deserving of notice are the townhouse, of the 15 th century, adorned with fine carvings; the imperial palace, a mere ruin, of which, however, the part still remaining possesses some interest; the market church, in the Gothic style, with a library, which possesses a considerable number of Luther's MSS. ; St. Stephen's church, the large $R$. Catholic church of St. James's, a chapel, formerly the porch of the old cathedral, and the whole of that structure which now remains; and the poorhouse, an antique building, of venerable appearance. The manufactures consist chiefly of copper and iron warcs, carpets, playing cards, glue, leather, and tobacco; and there are numerous distilleries, and oil and other mills. In the neighbourhood are several furnaces for smelting the ores of the Rammelberg, the mines of which, including gold, silver, copper, lead, and zinc, have been worked for nearly 800 years; but are now nearly exhausted. An adjoining hill contains inmense slate quarries. Pop. 7179.

GOSPICH, a market tn. Austria, Croatia, 67 m. S. Carlstadt, on the Novchicza. It is the head-quarters of the Sikkara regiment; contains a R. Catholic parish church, an old castle, with fine gardens, a high school, and gunpowder maga-

GOTHA, from the North East.-From a recent Print, after a Drawing by H.R.H. Prince Albert. zinc. Pop. 1280.

GOSPOR'T, a market tn. and seaport, England, co. Hants, W. side of the entrance to Portsmouth harbour, and directly opposite the town of Portsmouth, on a level piece of ground, and surrounded by a fortified wall and ditch, forming part
furt and Cassel to Leipzig. It consists of the town proper, and four suburbs, the former occupying the side of a hill, in the form of an irregular polygon, surrounded by ramparts, which have been converted into promenades; and by a wall,
with four gates. The houses are generally well built; and the streets wide, tolerably straight, and well paved. The principal buildings are the Ducal castle or palace, called Friedenstein, occupying the crown of the height on which the town is situated. It is a large, and, from its elevated site, a conspicuous edifice, not possessed of much architectural merit, but surrounded by fine terraces; and containing an interesting museum, a good picture gallery, and large library. There are also other two palaces occupied by members of the ducal family; seven churches, none of them particularly handsome; a gymnasium, and numerous other schools; the new mint, arsenal, theatre, house of correction, lunatic asylum, infirmary, and several hospitals. The manufactures consist chiefly of woollen, linen, and cotton tissues, hats, carpets, leather, porcelain, musical instruments, and articles in gold and silver; and there are several tile-works, and numerous mills. Pop. 14,228.

## gotha (principality of). See Coburg.

## GOTHAM, par. Eng. Notts; 2740 ac. Pop. 747.

GOTHARD (St.), a mountain range, Switzerland, on the confines of can. Tessin and Uri, belonging to the Lepontine or Helvetian Alps, which it connects with the Bernese Alps, and forming a kind of central nucleus in the great watershed of Europe; each of its slopes giring rise to an important river-the N. to the Reass, the S. to the Tessin, the W. to the Rhone, and the E. to the Rhine; all which rivers rise within a circuit of 10 m . from its centre. Its culminating point has a height of $10,600 \mathrm{ft}$; and at least three of its other summits are beyond the limit of perpetual snow. The Col of St. Gothard, which, at its summit level, where the Hospice stands, is 6808 ft . high, was long the principal pass over the Alps into Italy, and, though only a bridle path, formed a very important line of traffic, from which the cantons of Uri and Tessin derived great benefit. On the completion of the Simplon road, this traffic was almost annihilated; and these cantons, with the view of recovering it, have, at their joint expense, completed an excellent carriage road, in which, particularly on the Italian side, formidable difficulties have been surmounted, and much engineering skill displayed.

GOTHENBURG, tn. Sweden. See Gottenburg.
GOTHLAND, isl. Sweden. Se Gottland.
GOTKEE, a small tn. Scinde, 6 m . from l. bank Indus, 27 m . W. Subzulcote; lat. $28^{\circ} 10^{\prime} \mathrm{N}$. ; lon. $69^{\circ} 17^{\prime}$ E. The houses, built of mud, are mean; but there is a showy bazaar, with numerous verandahs; and, likewise, a mosque of considerable size. The vicinity is infamous on account of the predatory and sanguinary character of its inhabitants.

GOTO, or the Five Islands, a group of isls. Japan, isl. Kiusiu, prov. Fizen; lat. (S.W. extremity) $32^{\circ} 35^{\prime} \mathrm{N}$. ; lon. $128^{\circ} 44^{\prime} \mathrm{E}$. (r.); extending thence to lat. $33^{\circ} 5^{\prime} \mathrm{N}$. The principal are Fukuje, the largest; Fisago-sima, Narusima, Nisi-sima, and Figasi-sima; besides three others smaller, named Amisima, Misakisima, and Ukonosima.

GOTTEN BURG [Swedish, Göteborg], a co. or län, Sweden, of irregular shape, on the E. shore of the Skager Rack. lt is about 60 m . long, by an average breadth of 14 m .; bounded, N. by Norway, E. by län Wenersborg, and S. by Halmstad. Its coast is rocky, much indented by bays and sea-arms, and lined by an immense number of islands, generally small. The län generally is of granite and gneiss formation, though tertiary liniestone also occurs. It is well wooded, and abundantly watered by nnmerous small streams, of which the most important is the Göta, which conneets Lake Wener with the sea at Gottenburg; and, with the Olla, forins the harbour of that town. Agriculture has made considerable progress in recent years, though still the quantity of grain raised does not equal the consumption. Oats, rye, beans, potatoes, and flax, are the chief crops; and, in some parts, wheat is grown. Since the herring fishing has fallen off, the fisheries have lost much of their importance. Manufactures consist chiefly of coarse woullens and tiles. The principal export is timber. For administrative purposes, the län is divided into five fögderi and 20 districts. Gottenburg is the capital. Pop. 158,000.

GOTTTENBURG, or Gothenburg [Swedish, Güteborg; Latin, Gothoburgum], a seaport tn . Sweden, the second in the kingdom in respect of population and trade, cap. län of eame name, picturesquely situated on the Gotha, or Göta, here nearly 1 m . wide, 5 m . E. of its mouth, in the Kattegat, and

255 m. W.S.W. Stockholm ; lat. $57^{\circ} 41^{\prime} 18^{\prime \prime} \mathrm{N}$. ; lon. $11^{\circ} 54^{\prime} 30^{\prime \prime}$ E. (R.) It consists of the town proper, originally surrounded by walls, of which only fragments now remain ; and of several suburbs; and is defended by two forts, placed on the opposite sides of the river, so as completely to command it. The houses, either of brick, faced with stucco, or of stone, have always a substantial, and often an elegant appearance ; the streets, generally spacious and well paved, intersect each other at right angles; while several canals, branching off from the river, traverse the town in different directions; and by the numerous and often handsome bridges which cross them, and the rows of trees which line their banks, produce a very pleasing effect ; so that Gottenburg, on the whole, is generally regarded as the best built place in Sweden. The principal public buildings are the cathedral, a simple but elegant structure, in the form of a cross, with a tower, an excellent organ, and a richly sculptured chancel; two other churches, one of them handsome, and crowned by a dome; the townhouse, new exchange, governor's residence; bishop's palace, gsmnasium, with library attached; infirmary, several lospitals, and other benevolent institutions; theatre, baths, and artillery barracks. The manufactures include sailcloth, linen, printed calicoes, leather, tobacco, and vinegar ; and there are also oil-presses, cotton-mills, dye-works, and build-ing-yards, at which a considerable number of vessels are launched; but by far the most important industrial establishments are tobacco factories, porter breweries, and sugar refineries, all of which are on a very large scale. The trade is very extensive; though the want of a sufficient harbour is much felt-the only harbour at present being a kind of natural haven, formed by the river, where vessels drawing 17 ft . lie in perfect safety; but at such a distance from the shore, that they cannot load or unload without employisg lignters. The chief exports are iron and steel, copper, wood, tar, linseed, bark, bones, juniper berries, cranberries, and the above articles of manufacture; the chief imports-colonial produce, wine, salt, seal oil, cotton yarn, and twist. A considerable proportion of this trade is in the hands of the inhabitants, who possess shipping, which, some years ago, amounted to 23,000 tons; and has since rapidly increased. In 1842, the vessels of all nations which entered the port were 853 , tonn. 115,232 ; and cleared, 708, tonn. 90,232. Gottenburg is the residence of a governor, the see of a bishop, the seat of several courts and public offices; and possesses numerous societies-literary, scientific, musical, and benevolent. It was founded by Gustavus Adolphus, in 1610; but its history possesses no interest. Its environs are well laid out in planted walks; and its extensive communication, both with the interior by the Gotha canal, and with other places by regular steam packets, make it a desirable residence; but its site is said to be somewhat unhealthy. Pop. 26,000.

GOTTLERN (Grossen), a vil. Prussia, prov. Ssxony, gov. of, and $24 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Erfurt, near the Unstrut; with two Protestant churches, a considerable trade in garden produce, and an annual fair. Pop. 1843.

GOTTESBERG, a tn. Prussia, prov. Silesia, gov. of, and 42 m. W.S.W. Breslau. It has a Protestant church, two poorhouses; manufactures of calico and hosiery, tileworks, and several mills. In the vicinity is a coal-field, from which about 40,000 tons are annually raised. P. 2571.

GOTTESGAB [Latin, Theodosium], a tn. Bohemia, circle Elnbogen, in the highest part of the Erzgebirge, near the frontiers of Saxony, 75 m . W.N.W. Prague. It has a town church, and an lospital. Iron and tin are worked in the neighbourhood. Pop. 1222.

GÖTTINGEN (PRINCIPALITY of), a political and administrative division of Hanover, in the landrostei of Hildesheim; area about $800 \mathrm{sq} . \mathrm{m}$. It forms the most S. part of Hanover, and is separated from the main portion of the kingdom by a part of the duchy of Brunswick. It is generally covered with mountains, mostly basaltic, belonging to the chain of the Harz; but seldom of great elevation. The principal river is the Weser, which partly bounds it on the W., and is formed within it by the union of the Werra and Fulda. In the E. it is watered by the Leine, and its tributary Ruhme. There are several lakes; but none of large extent. The mountainous districts are much encumbered with stones; but, notwithstanding, yield tolerable crops; and the valleys are of great fertility. Potatoes are a favourite and abundant crop; and

## GOUDA

tobacco, flax, and rape are extensively grown. Cherries grow well in the open fields; but the other orchard fruits are confined to gardens. The pastures are rich, and feed great numbers of sheep; but the horned cattle are few; and horses, though chiefly used in agriculture, are not generally homebred, but obtained by importation. The minerals include silver, copper, lead, iron, salt, and alum. The principal manufactures are woollen and linen cloth, leather, delft-ware, glass, and paper. The forests furnish a large export of timber. The other exports, in addition to the above articles of manufacture, are corn, thread, and metals. Almost all the inhabitants are Protestants. Pop. 113,646.

GOTTINGEN, a th. Hanover, prov. Hildeshcim, cap. principality of same name, in the bcautiful and fertile valley of the Leine, surrounded by gardens and country seats, 59 m . S.S.E. Hanover. It is a place of great antiquity, and was early fortified; but the ramparts have been planted, and converted into agreeable promenades. It consists of three parts-the Altstadt, separated by the Leine from the Masch, and Neustadt; communication is maintained between them by six bridges. The town is generally well built, having wide and spacious streets, four public squares, and houses which are almost always substantial, and often elegant. The public edifices include seven churches and a synagogue; a

townhouse, courthouse, merchant-house, infrmary, orphan and other hospitals; but they are all eclipsed by the university, which has long enjoyed a European reputation. Though greatly fallen off, it still numbers several distinguished names among its professors, and has an average attendance of about 600 students ; the principal building, to which William IV. of England contributed $£ 3000$, was completed in 1837; and connected with it are a museum, with extensive and valuable collections; an observatory, an anatomical theatre, botanical garden, and a library possessed of 330,000 printed volumes, and 5000 MSS. The manufactures are of very little importance; and consist chiefly of a fev woollen tissues, tobaceco,
leather, paper, books, and phillosophical instruments. There is scarcely anything which deserves the name of trade. Among the distinguished men whom Göttingen has produced, may be mentioned Eichorn, Mosheim, Michaelis, Ieyne, and Blumenbach. Pop. 10,644.

GOTTLAND, or Gothland [Swedish, Gütaland], one of the large sections into which Sweden was originally divided, and including the whole of that country S. of lat. $59^{\circ} 20^{\circ} \mathrm{N}$, It contains about one-fourth of the whole surface, and formed nine provinces, two of which had the names of $E$. Gottland
and W. Gottland; but is now divided into the ten counties or län-Malmö, Christianstad, Carslkrona, Wexiö, Jönköping, Calmar, Linköping, Mariestad or Skaraborg, Wenersborg, and Götaborg or Gottenburg.

GOTTLAND, or Gothland, the largest isl. in the Baltic, belonging to Sweden, from the coast of which it is at its nearest point 55 m. E.; lat. (S. point) $56^{\circ} 55^{\prime} 12^{\prime \prime}$ N.; lon. $18^{\circ} 9^{\prime}$ E. (r.) It is of an irregular shape, bulging out considerably near its centre, and thence tapering gradually towards its N. and S. extremities; greatest length, N.N.E. to S.S. W., 78 m .; central breadth, 34 m . It consists generally of a limestone plateau from 80 to 130 ft . above the sea, and intersected, particularly towards its centre, by a range of rocky heights, which nowhere rise higher than 200 ft ., though their abruptness often gives them a greater apparent elevation. The coast is for the most part rocky, and is deeply indented by bays, forming numerous harbours, of which that of Slite, on the N.E. coast, is the best, and is not surpassed by any other in the Baltic. The climate being insular is much milder than its latitude might seem to indicate, and many plants which cannot live on the mainland opposite to it thrive well. Even the walnut, mulberry, and vine ripen their fruit in the open air. The soil is fertile, but the culture which it receives is very indifferent. The grain produced, however, more than equals the home consumption, and might easily be increased so as to leave a large surplus for export. Domestic animals are neither numerous nor of a good description, and manufactures have made little progress. Wood is abundant, and not only furnishes excellent timber and fuel, but gives great richness and beauty to the general scenery of the island; the plantations are chiefly of fir, but with a considerable mixture of hardwood, descending to the shore, and forming a fringe along the water's edge. The principal exports are corn, lime, timber, pitch, sandstone, and the so-called Gottland marble. Gottland attained its highest prosperity during the Hanse League, of which its town of Wisby was an important member. It then possessed above 100 churches, most of which, though in a ruinous state, still exist, and form objects of antiquarian interest. Administratively, Gottland, with the islands along its coast, including Faro and Gottska, forms a län, which takes the name of Wisby. Pop. 37,418.

GOT'TLIEBEN, a vil, and par. Switzerland, can. Thurgau, cap. circle of same name, 2 m . W. Constance. It has a Protestant parish church, a R. Catholic chapel, and an old castle, in the dungeons of which John Huss and Jerome of Prague were confined. Pope John XXIII., the chief instigator of the deed, was shortly afterwards sent to the same dungeons, by order of the Council of Constance. Pop. 285.

GOTTO, a country of central Africa, between Bambarra and Timbuctoo; formerly divided into several petty states, dependent on Bambarra; but now an independent kingdom, of which Mossidoo is the capital.

GOTTSCHEE, or Hatschevie, a tn. Austria, Illyria, cap. duchy of same name, almost encircled by the Riese, 37 m . S.S.E. Laibach. It has a fine castle and church, and manufactures of linen and earthenware. Part of the inhabitants travel about selling wooden articles, fruit, ironware, and household utensils. Pop. tu., 750; of duchy, 20,000; arca, 224 geo. sq. m.

GOTTSKA-SAxDöE, a small isl. Sweden, in the Baltic, N. of isl. Gottland ; lat. (W. point) $58^{\circ} 22^{\prime} 12^{\prime \prime} \mathrm{N} . ;$ lon. $19^{\circ} 19^{\prime}$ E. (r.) It is chiefly composed of sand, has on it two hamlets, and is known for its seals.

GOUDA [pronounced Howda], or Der Goude, contracted Ter-Gow, a tn. Holland, prov. S. Holland, 11 m . N.E. Rotterdam, separated into two unequal parts by the Gowe, which here unites with Hollands Ijssel on the r. bank. It is nearly round in shape, and naturally defended by the ease with which the surrounding country, which is laid out in beautiful gardens, can be laid under water. The town is entered by five gates, is composed of neatly built houses, and every street, large and small, has a canal in its centre. The great market is a large, irregular triangle, with the townhouse in its centre -a spacious, substantial edifice, with a tower and spire. Other public buildings are-the prison, weigh-house, butter-house, and post-office. The Calvinistic church of St . John is noted for its painted glass windows, executed by the brothers Wouter
and Dirk Krabeth, and said to be nearly the finest in Europe. There are also an evangelical Lutheran, two R. Catholic, and a Jansenist church, and a synagogue. The charities and henevolent institutions are various, including several general hospitals, one for old men, and one for orphans, and several (ther special foundations and associations; and schools of different kinds and grades, including Latin, drawing, poor, \&c., are numerous. Cloth and bombazines were at one time manufactured to a considerable extent in Gouda; and, in 1751, there were 374 pipe-works, employing 3000 hands; and pottcrics and breweries were likewise at one time numerous. The cloth manufactures no longer exist ; and there are now only 16 pipe-works, 10 potteries, and two breweries. The other mannfactures carried on are bricks, which are largely made, from clay obtained from the bed of the Ijssel; cotton-weaving, parchment, leather, white lead; and there are three boatbuilding yards, two soap-works, three snuff, four corn, and several other kinds of mills. Excellent pike and smelts are caught in the river. Gouda communicating directly, by canal, with Amsterdam, Rotterdam, \&c., has a considerable transit trade. It is, likewise, a market for flax, but more especially for cheese, large quantities of which are brought here to the market, and sold under the name of Gouda cheese. There aro several annual fairs. Pop. (1850), 13,791.

GOUDIIURST, par. Eng. Kient; 9820 ac. Pop. 2711.
GOUFFRE, a river, Lower Canada. It rises in some rocky hills, called Mont-des-Roches, co. Saguenay, and falls into the St. Lawrence, opposite the isl. Coudre; lat. $47^{\circ} 25^{\prime}$ N.; lon. $70^{\circ} 30^{\prime} \mathrm{W}$. It is winding, tortuous, and full of rapids, but none either violent or formidable. The estuary of this river, with exception of its bed, is almost dry at low water.

GOUGII'S ISLAND, or Diego Alvarez, an island S. Atlantic, S.S.E. Tristan d' Acunha; lat. $40^{\circ} 19^{\prime}$ S.; lon. $9^{\circ} 41^{\prime} \mathrm{W}$. (R.) It is 15 to 16 m . round, and rises about 4385 ft . above the sea; is covered mostly with mossy grass, and small bushy trees. The steep cliffs rise almost perpendicularly from the sea, having several beautiful cascades of water issuing from the fissures between them.

GOUGICHIN Lake, Upper Canada, a continuation of Lake Simcoe, about 12 m . long, and from 3 m . to 5 m . broad. The scenery around it is very romantic; the shores being indented with many beautiful bays, and the lake itself studded with islands.

GOUKCHA, a lake, Russian Armenia. See Gütkscife.
GOULBURN, a tn. New S. Wales, co. Argyle, 125 m. S.W. Sidney, near an angle formed by the junction of the Mulwaree with the principal branch of the river Wollondilly, called Goulburn plains. Pop. 1171.

GOULBURN Islands, two isls. N. coast of Australia, between Cape Cockburn and Cape Brathwaite, the one called North Island, the other South Island; the N. point of the former is in lat. $11^{\circ} 26^{\prime} \mathrm{S}$. ; lon. $133^{\circ} 24^{\prime} \mathrm{E}$. (R.) 'The S. island, as described by Captain King, is covered to a great extent with luxuriant grass, 6 ft . high, and the sides of the hills with wood, principally a eucalyptus, of small size. Flowers and shrubs also abound, including a superb grevillea, with scarlet flowers. The only edible fruit found on the island was a small black grape, of inferior quality.

GOULCEBY, par. Eng. Lincoln; 1440 ac. Pop. 347.
GOUNDIAM, a vil. of W. Africa, Ipper Galam, r. bank Falémé; lat. $14^{\circ} 40^{\prime} \mathrm{N}$. ; lon. $12^{\circ} 12^{\prime} \mathrm{W}$. ; inhabited during the season of cultivation; but after harvest it is evacuated, in consequence of the incursions of the Bambarras and Moors.

GOUNIAM, two vils. of W. Africa, Bondou:-1, (-Sisse); lat. $14^{\circ} 50^{\prime} \mathrm{N}$. ; lon. $12^{\circ} 24^{\prime} \mathrm{W}$. It is of considerable size, and is well supplied with good water.-2, (-Amadou), about $2 \frac{1}{2} \mathrm{~m}$. S. by W. the former.

GOUl, or GaUr, a ruined city, IIindoostan, anc. cap. of Bengal, dist. Dinagepoor, 50 m . N. Moorshedabad; lat. $24^{\circ}$ $53^{\prime} \mathrm{N} . ;$ lon. $88^{\circ} 15^{\prime} \mathrm{E}$. It extended about 7 m . along the banks of the old Ganges, or, including suburban villages, about 15 m ., with a breadth of 2 m . to 3 m ., and was a populous and flourishing eity upwards of 2000 years ago. Its decay proceeded from a change in the course of the Ganges, which, about two centuries since, deserted its old channel close by the city, and took that which it now occupies, distant 4 m . to 5 m . The principal ruins of this ancient capital are those of a magnificent mosque, 170 ft . long by 130 ft . broad, built of brick, and faced with a kind of black porphyry, two
picturesque gates, and a large edifice faced with bricks of various colours. This edifice contains a noble apartment, about 36 ft . square, and 40 ft . to 50 ft . in height. There are several other mosques in tolerable preservation, and an obelisk or tower, of about 100 ft . in height, with a stair inside. The numerous tanks and reservoirs, some of them very large, which supplied the ancient city with water, are now swarming with alligators, mosquitos, and all sorts of vermin. Several villages now stand on the site of the city.

GOURDON, a tn. France, dep. Lot, on the Bleu, 20 m. N. by W. Cahors, on a sandy slope, backed by a rock, and once strongly fortified. It has a communal college, au old church, with lofty towers, the ruins of a chateau, founded in 960 ; manufactures of linen, hats, and woollens; and a trade in wine and walnuts. Pop. 2703.

GOURIEV, a tn. and fortress, Russia, gov. Orenburg, r. bank Ural, at its embouchure in the Caspian. It contains three churches, and 400 houses; and has an active trade in fish, caviar, and furs. Pop. 2000.

GOURNAY-en-Bray [Latin, Gonacum], a tn. France, dep. Seine-Inférieure, 28 m . E. Rouen, finely situated on the Epte. It is well built, and begirt with agreeable boulevards; has an old church, a tribunal of commerce, a public library; tanneries, leather-works, glass-houses, and potteries, and a trade in excellent butter, made in the vicinity. Pop. 2540.

GOULOCK, a pleasant maritime vil. and watering place, Scotland, co. Renfrew, 1. bank Firth of Clyde, 3 m . W. Greenock. It consists chiefly of a row of houses, many of them elegant villas, facing the sea, and extending along the shore more than a mile; is inadequately supplied with water, but kept in good order, and well lighted with gas. It has an Established, a Free, and U. Presbyterian church, and three schools. Gourock was the first place in Britain where red herrings were prepared; the process having been introduced there towards the clese of the 17 th century. Some of the inhabitants are engaged in fishing, but the greater number support themselves by house-letting; Gourock being greatly resorted to during the summer months, especially by the inhabitants of Glasgow. In 1822 a sailing vessel was sunk off Gourock, when 42 persons perished; and in 1825 a steamer (the Comet) went down near the same spot, through collision with another steamer, and 60 persons were lost. Resident pop. (1851), 2194.

GOUS, a river, Russia, which rises in the gov. and about $27 \mathrm{~m} . \mathrm{S}$. Vladimir, and flowing S. enters gov. Riazan, and empties itself into a lake, after a course of 60 m . Important iron-works have been established on its banks.

GOUSTA, or Gousta-Fjeld, a mountain, Norway; lat. $60^{\circ} \mathrm{N}$. , belonging to, and on the E. side of the Langfield range; height 6354 ft .; and compared, in respect of the magnificence of its scenery, to some of the loftiest summits of the Alps. It is composed of gneiss and schist, covered in many places with masses of quartz and porphyry. The white lirch is found growing on its sides to a height of 3700 ft .

GOUVEA, a tn. Portugal, prov. Beira-Baixa, on a height near the foot of the serra da Estrella, 40 m . E.N.E. Coimbra. It has two parishes, a convent, a nunnery, and an important annual cattle fair. Pop. 1740 .

GOUY-Le-Piéton, a vil. and com. Belgium, prov. IIainaut, 9 m . N. W. Charleroi. Inhabitants chiefly engaged in agriculture; but some are employed in coal-mining and nailmaking; and there are a brewery, a distillery, and some flour mills. Pop. 3043.

GOUZEAUCOURT, a vil. France, dep. Nord, 11 m . S.S.W. Cambray. It has a fair every month. Pop. 2350.

GOVAN, a vil. and par. Scotland, cos. Larark and Renfrew. - The village is prettily situated, l. bank Clyde, 2 m . W. Glasgow. At its W. end, and about 100 yards from the river, stands the parish church, a neat structure, with a tower and spire. A few ycars ago, Govan was a quiet, secluded village; brought within the sphere of Glasgow energies, it is now the site of extensive shipbuilding yards, of a large dyework, and of a factory for throwing silk, the first established in Scotland. The salmon fishery here was at one time considerable, but is now all but extinct. This ancient little village was classed amongst the largest in Scotland, in the 16 th century.-The Parish contains about 10 sq . m., the most populous portion of which is included within the boundaries of Glasgow. Pep. of vil. (1851), 1187.

GOVERNADOR, an isl. Brazil, in the bay, and $8 \mathrm{~m} . \mathrm{N}$. Rio-de-Janeiro. It is very irregular in shape, its coast being much indented by creeks, and is about 8 m . in breadth, and 28 m . in circuit. The soil is sandy, and favourable to the growth of the pitangueiras, a kind of fruit, from which a jelly of a somewhat acid, but agreeable taste is made. In some parts, where the soil is of a more substantial nature, sugarcanes, mandioc, millet, and haricots are grown. The island contains a church and a primary school, and a building which, though little deserving it, bears the name of imperial palace.

GOVERNOR'S ISLAND, U. States, in the harbour of New York. It comprises 70 ac., and contains two fortsCastle Williams and Fort Columbus; the former a round tower, 600 ft . in circumference, and 60 ft . ligh, with three tiers of guns; the latter, a star fort, occupies the summit of the island, and mounts 105 heavy cannon; there is also a battery on the S.W. part, and extensive barracks.

GOVONE [Latin, Govo], a tn. Sardinian States, Piedmont, div. of, and 37 m . N.E. Coni, 1. bank Tanaro. It was once fortified, and is still partly surrounded by a wall; is the seat of a court of justice, contains a magnificent castle, with fine gardens; an ancient parish church, of Gothic architecture; and a Capuchin convent; and has a weekly market and an annual fair. Pop. 2838.

GOWER, or GWYr, a peninsular dist., S. Wales, forming the most W. portion of Glamorganshire, and lying between the Burry and the Bristol Channel. It is between 40 m . and 50 m . in circumference, has rocky shores, deeply indented with bays, and contains numerous antiquities and natural curiosities. The E. part of it is fertile and well cultivated. A colony of Flemings settled here in the time of Henry I.; their descendants still preserve, to a considerable extent, their original language and dress, and rarely intermarry with the Welsh.

GOWER ISLAND, one of the Solomon group; lat. $7^{\circ} 53^{\prime} \mathrm{S}$.; lon. $160^{\circ} 55^{\prime} \mathrm{E}$. In shape it resembles an arrow; it is low, and covered with wood.

GOWRAN, a market tn. and par. Ireland, co. Kilkenny. The town, 8 m . E.S.E. Kilkenny, contains the interesting ruins of Gowran abbey and castle. Market day, Thursday. Area of par., 6337 ac. Pop. 2934.

GOWRIE (Carse of), a rich and fertile dist. Scotland, Perthshire, extending for about 15 m . along the 1 . bank of the Tay, between Perth and Dundee.

GOXHILL, two pars. Eng.:-1, Lincoln; 5860 ac . Pop. 892.-2, York (E. Riding) ; 880 ac. Pop. 64.

GOYANNA, a tn. Brazil, prov. of, and 46 m . N.W. Pernambuco, cap. com., and r. bank river of same name. It is a large, well-built place, adorned with various fountains, and containing five churches and two convents. It has a tannery, a weekly cattle market, and a considerable trade in cotton, sugar, rum, hides (dressed and undressed), timber, dye-woods, and oil of mamona.-The rort of Goyanna is 12 m . from the sea, and has sufficient depth of water for the largest class of coasting vessels.-The DIstrict is one of the most fertile in the province. Pop. of dist. 30,000 .——The river is formed by the union of the Tracunhaem and Capibaribe-Mirim, takes an E. direction, passes the town of Goyanna, and, about 16 m . below, falls into the Atlantic. It is both wide and deep.

GOYAVE, a tn., isl. Guadaloupe, on bay of same name, at the mouth of a small stream called the Petit-Goyave.

GOYAZ, a central prov. Brazil, between lat. $6^{\circ}$ and $20^{\circ} \mathrm{S}$., and lon. $46^{\circ}$ and $52^{\circ} \mathrm{W} . ;$ bounded, N. by Para ; N.E. Maranhão ; E. Piauhi, Bahia, and Minas Geraes ; S. São-Paulo; and W. Mato-Grosso. In shape it somewhat resembles a parallelogram, the longer side of which stretches, N. to S., 960 m .; average breadth, about 260 m .; area, $360,750 \mathrm{sq} . \mathrm{m}$. The surface is mountainous, being traversed by lofty ridges, generally stretching from S. to N., and maintaining a considerable degree of parallelism. One principal chain, ealled the Cordillera Grande, forms the watershed between the Tocantins, on the E., and the Araguaia, which bounds the province on the W.; and another principal chain, bounding the province on the E., takes in succession, from S. to N., the names of Serra Mata Gorda Cristacs, Araras, Tabatinga, Duro, Mangabeiras, and Covoados; and forms the watershed between the Tocantins, on the E., and the São Francisco and Paraiba, on the W. A branch from the latter chain, stretching W. from near its centre, takes the name of the Pyrenees, and has the
loftiest summit in the province. The space between the chains is occupied by vast plains and mighty rivers. Of these, the Tocantins and Araguaia, already mentioned, flow N.; each receiving in its course numberless mountain torrents, and carry the water of the province to the Para, and through it to the N. Atlantic Ocean; but in the S., where a watershed is formed by the Pyrenees, serra Escalvada, and serra Martha; the rivers take a S.W. direction, and, joining the Parana, belong with it to the S. Atlantic. The climate is healthy, excepting in the neighhourhood of some of the rivers, where extensive swamps have been formed. The hot season, during which violent thunder-storms are frequent, continues without interruption from November to April; the remainder of the year, during which there is a frequent alternation of sunshine and rainy weather, is regarded as winter. The low lands of the province are generally sandy, and very unproductive; the high lands, on the contrary, and those on which there is much wood, are of great natural fertility; and, when under proper cultivation, produce large crops of millet, mandioc, rice, and haricots. In the same localities, the cotton plant, sugar cane, coffee, tobacco, water melons, bananas, and oranges, find a genial soil. The grape yields two vintages in the year; and all kinds of fruit are in superabundance. Sarsaparilla, rhubarb, senna, and other valuable medicinal plants grow spontaneously; and, in every quarter, numerous varieties of the family of palms occur. Here, too, grow the angico, from which a gum resembling amber is obtained; the tree which produces gum copal, the indigo, and the cochineal plant. The forests are of vast extent, but the want of the means of tran iport makes it impossible to turn them to account. There are immense herds of horses and cattle; swine are very numerous; and in the woods are multitudes of antas, ounces, wild boars, guavas, a species of wolves; cotias, or wild rabbits; various kinds of monkeys, and birds without number. The lakes tcem with alligators, and other aquatic animals. The mineralogy of the province is little known, but among the minerals which have been actually found are gold, iron, diamonds, and various other precious stones and crystals, granite, limestone, rock salt, and different kinds of potters' clay. For administrative purposes, the province is divided into eight comarcas-Arrayas, Carolina, Cavalcanto, Flores, Goyaz, Palma, Porto-Imperial, and Santa Cruz. It sends two deputies to the general legislative assembly, and one senator The provincial legislative assembly is composed of 20 members, and holds its sittings in the town of Goyaz. Pop. 185,000.

GOYAZ, or Villa-Boa-de-Goyaz, a tn. Brazil, cap. of above prov., in a valley, surrounded by wooded mountains, on both sides of the Vermello, here crossed by two bridges, $680 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Rio-de-Janeiro ; lat. $16^{\circ} 21^{\prime} \mathrm{S}$. ; lon. $50^{\circ} 35^{\prime} \mathrm{W}$. It occupies a centrical position, almost in the very heart of the empire; its site is uneven, its streets are straight and clean, but ill paved, and its houses mostly of earth. It is the see of a bishop, the seat of the provincial assembly, and a provincial court of justice; and the residence both of a civil pre sident and a military governor. The buildings most deserving of notice are the governor's palace, the courthouse, the parochial and seven other churches, the hospital, and the establishment for smelting and refining gold. It has a supcrior and two primary schools. There are no manufactures deserving of the name, and the trade is confined to the ordinary articles of consumption. Owing to the lowness of its site, the town is liable to inundation; from which it suffered severely in 1839, when a number of buildings, including a churelh, were swept away. Pop. 7000 to 8000 .

GOYCK, a vil. and com. Belgium, prov. S. Brabant, 12 m. S.W. Brussels. Inhabitants chiefly engaged in agriculture, but there are also some breweries and corn-mills. P. 3043 .

GOYTREY, par. Eng. Monmouth; 3730 ac. Pop. 567.
GOYZUETA, a tn. Spain, prov. Navarre, valley of Basaburua, on an affluent of the Ururuca, 27 m . N.N.W. Pampeluna. It contains a parish church, good townhouse, and primary school; and has iron-works and a flour-mill. P. 1460.

GOZZANO [Latin, Gaudianum], an anc. tn. Sardinian States, Piedmont, div. of, and 22 m . N. by W. Novara, in a plain. It has steep, winding, and angular streets, some good modern houses, a large and handsome parish church, of the Corinthian order; and the remains of a strong castle. Pop. 1763.

GOZO, or Gozzo:-1, [anc. Gaulos], A small isl. in the Mediterranean, belonging to Great Britain, to the N.W. of

Malta, from whieh it is separated by a channel scarceiy 4 m . wide, in which lies the small island of Comino. It is about 9 m . long, by 5 m . broad; area, about $40 \mathrm{sq} . \mathrm{m}$. ; lat. (Cape Dimitri, or N.W. point) $36^{\circ} 4^{\prime} \mathrm{N}$. ; lon. $14^{\circ} 8^{\prime}$ E. (R.) It is surrounded by rocks and shoals, with openings through them to several small harbours. The interior is rocky, and contains several hills; the most conspicuous of which, near the centre, is crowned by the fort of Rabatto. The soil is very thin, and in many places scarcely covers the bare rock. It is, however, of great natural fertility, and much grain and fruit are raised; but the most important crop is cotton, the spinning of which is one great source of employment. There is also an alabaster quarry in the N.W. part of the island; and, on the S. side, at Port Maggiore, there are salt-works. - The town of Gozzo, the prineipal place, has about 2000 inhabitants; and there are a number of villages. Pop. 15,000.-2, A small isl. in the Mediterranean, off the S.W. coast of Candia; lat. (W. point) $34^{\circ} 52^{\prime}$ N. ; lon. $24^{\circ} 2^{\prime} 15^{\prime \prime}$ E. (n.); inhabited by a few Greeks. A little N. of it is the still smaller island of Anti-Gozzo.

GRAAF-REINET, or Reynet, a division and tn., Cape Colony. The division, between lat. $29^{\circ} 30^{\circ}$ and $33^{\circ}$ S.; lon. $23^{\circ}$ and $26^{\circ} \mathrm{E}$. ; bounded, N. by the territory of the Bushmen; and surrounded on other sides by Beaufort, Uitenhage, and Somerset. Area, about $10,000 \mathrm{sq} . \mathrm{m}$. The Sneeuwbergen, or Snow Mountains, intersect the S. part of the country, S.W. to N.E.; and from this elevated region proceed the head streams of the Camtoos, Sunday River, and Great Fish River, which flow S.; and of the Zekoe, and other rivers, which flow N. Great numbers of cattlo are raised, the district being principally devoted to grazing. Pop. about 10,000 .

The town, cap. of the division, is situated on Sunday River, 108 m. N.N.W. Uitenhage. It is regularly laid out with streets at right angles-the intervening squares being filled up with vineyards and gardens. The place of worship belonging to the Duteh Reformed Chureh has a lofty tower and neat spire. The town is said to be unhealthy in summer. Pop. about 3000 .

GRAAT, or Ghrant, a tn. Central Africa, country of the Tuaricks, finely situated at the foot of a low hill, in a valley of same name, 193 m . W.S.W. Murzouk, about lat. $25^{\circ} \mathrm{N}$. ; lon. $11^{\circ} \mathrm{E}$. It is surrounded with walls of sand and whitish clay, and the houses are built of the same material ; it is a clean place, and has a superior mosque. Pop. about 1000 .

GRAAUW, a vil. Holland, prov. Zeeland, 15 m. S.W. Bergen-op-Zoom. It has a R. Catholic ehurch, a school, and a small harbour, frequented by country boats carrying grain to Rotterdam and Belginm. Pop. 812.

GRABALOS, a tn. Spain, Old Castile, prov. of, and 35 m . S.E. Logroño. It is tolerably well built; has steep streets, a square, parish churel, several ehapels, a ruinous townhall, prison, storehouse, cemetery, and two schools. In the neighbourhood are mineral baths, mueh resorted to. Pop. 991.

GRABER, or Grahern, a tn. Bohemia, circle Leitmeritz, 38 m. N. Prague. It contains a parish church and an hospital. A good deal of flax is here hand-span. Pop. 965.

GRABOW.-1. A tn. Meeklenburg-Sehwerin, l. bank Elde, 24 m. S.S.E. Schwerin. It stands partly on an island, is entered by two gates, contaius a handsome church, and has manufactures of woollen cloth and tobacco, several mills, a considerable trade in butter, and four annual fairs. Pop. $5130 .-2$, A tn. Trussia, prov. of, and 11 m . S.E. Posen, 1. bank Prosna. It contains a R. Catholic parish ehurch, and a Franciscan monastery; and has a trade in cattle, and four annual fairs. Pop. 1245.

GRABUSA, a small isl. Grecian Archipelago, off N.W. coast of isl. Crete; lat. $35^{\circ} 38^{\prime} \mathrm{N}$. ; lon. $23^{\circ} 35^{\prime}$ E. (r.) ; about $1 \frac{1}{2} \mathrm{~m}$. in circumference. Between it and Crete a kind of harbour is formed, deep enough for the largest vessels, and protected by a fortress.

GRACAY, a tn. France, dep. Cher, 27 m . W. by N. Bourges. It is ancient, ill built, and has some remains of its old defences; and near it is a rude, probably a Druidical monument. Pop. 1105.

GRACLAS-A-DION.-1, A city, Central America, state IIonduras, 40 m. N.W. Comayagua; lat. $14^{\circ} 55^{\prime} \mathrm{N}$. ; lon. $88^{\circ} 18^{\prime} \mathrm{W}$.; on a fertile plain, but now in a state of decay.2, A cape, Central America, Mosquitia; lat. $14^{\circ} 59^{\prime} \mathrm{N}$. ; lon. $83^{\circ} 11^{\prime}$ W.-3, A bay, near Cape Gracias a-Dios, of which
the latter forms the E. point ; with 20 ft . water at the entrance, and 16 ft . within ; bottom clean, and of slimy clay.

GRACIOSA, one of the Azores ; lat. $39^{\circ} 5^{\prime}$ N. ; lon. $28^{\circ} 4^{\prime}$ W. It is 6 to 8 m . in length, 2 and 3 m . in breadth, and is the most productive of all the islands; but is destitute of wood, and is much frequented by smngglers. It exports brandy and wine. Santa Cruz is the chief town. Pop. about 8000 .

GRACIOSA (LA), a small isl., one of the Canaries, N.E. Lanzarote, from which it is separated by the channel of Rio; length about 10 m . and breadth about 5 m . Its nucleus is wholly volcanic; but a third part, near the $S$., consists of a limestone, full of marine shells. The interior is lofty, and consists chiefly of two lofty volcanic mountains, with a plain between them. On this plain, some barley and barilla are grown. The rest of the surface, where not bare, is covered by a low brushwood, among whieh rabbits are very numerons.

GRADACHA'TZ, a tn. European Turkey, Bosnia, chicf place of dist., 67 m. N. by E. Bosnia-Serai. It is surrounded by walls, and has a great trade in cattle and timber. Pop., within the walls, about 3500 ; with extensive suburbs, inhabited by Greeks.

GRADE, par. Eng. Cornwall; 2420 ac. Pop. 333.
GRADIFES, a vil. and com. Spain, prov. of, and 16 m . E. Leon, in a plain, r. bank Esla. It is well supplied with water, contains a parish chureh, and a convent ; and has an annual fair. Pop. 1935.

GRADISKA, several places, Austria, particularly:-1, [anc. Servitium], A tn. Illyria, r. bank Isonzo, 23 m . N.W. Trieste. It is very picturesquely situated, consists of the town proper, surrounded by ancient walls, flanked with towers, and a suburb; contains an old castle, now used as a house of correction; a parish church, normal school, and theatre ; and has a silk-mill. P.1140.-2, $(O$-, or $A l t)$, [old], a tn. Selavonia, generalship Peterwardein, l. bank Save, cap. regimental dist., and opposite the Turkish fortress of same name, $33 \mathrm{~m} . \mathrm{S} . W$. Posega. It is a place of some strength, contains a cathedral, a Greek church, and custom-honse ; and carries on a considerable trade with Servia and Bosnia. P. 2299; of regimental dist. (area, 486 geo. sq. m.), 71,300.-3, (Uj-, or Neu), [new], a tn. Sclavonia, about 9 m. N.E. of the former, near the Sumetlicza. It contains a R. Catholic and a Greek non-united ehurch, and a German school; and has several mills. Pop. 2000.

GRADISKA, or Berbir, a fortified tn. Enropean Turkey, Croatia, r. bank Save, 29 m. N. by E. Banjaluka, and opposite the Austrian fortress of Alt-Gradiska. It was fortified in 1774 by French engineers.

GRADLITZ, or Hradisko, a market tn. Bohemia, cirele of, and 15 m . N. Königgrätz, cap. lordship of same name. It contains a parish clureh and four mills. Pop. tn., 1090 ; lordship, 8873.

GRADO, a tn. Austria, Illyria, on a rugged and precipitous cliff on the sea-coast, at the mouth of the Natisa, 19 m. W. Trieste. It contains a handsome chnrch, and two chapels; and has a small harbour, much frequented by small vessels engaged in the tunny fishing. Pop. 2200.

GRAEMSAY, an isl. Scotland, co. Orkney, $1 \frac{1}{2} \mathrm{~m}$. S. Stromness. It is nearly 2 m . long, by 1 m . broad; generally level, and produces a considerable quantity of grain. P. 214.

GRAENA, a tn. Spain, Andalusia, prov. of, and 28 m . E.N.E. Granada. It has a parish church, a palace belonging to the Marquis of Peñaflor, a courthouse, primary school, and a trade in corn, wine, and cattle. About 1 m . E. are thermal baths, visited annually by about 800 persons; temperature of the water $84^{\circ}$ to $104^{\circ}$. Pop. 445.

GRÄFENBEIGG.-1, A tn. Bavaria, cirele Upper Franconia, between two hills, on the Peller and Fischbach, 25 m . S.W. Bairenth. It is the seat of a court of justice, has a Protestant parish chureh, and a castle ; vinegar-works, a brewery, three mills, and a trade in fruit and vegetables. Pop. 1039. -2, A vil. Austria, Moravia, cirele Troppau, near Freiwaldau, famed for its much-frequented hydropathic establishment founded by Priessnitz.

GRAFENHAUSEN, a vil. Baden, cirele Upper Rhine, bail. Ettenheim with a R. Catholic parish church. Chicory, beet-root, and tobacco, are extensively grown in the vicinity. Pop. 1273.

GRÄFENHAYNCHEN, a tn. Prussia, prov. Saxony, gov. of, and 34 m . N.E. Merseburg, in a marshy district. It
has a church, manufactures of woollen and linen cloth, and leather ; a trade in tobacco, hops, and cattle; and four annual fairs. Pop. 2742.

GRAFENOR'T, a vil. Prussia, prov. Silesia, gov. Breslau, circle Habelschwerdt. It has a R. Catholic church, an elegant castle, belonging to the Count of Herberstein; limekilns, tile-works, two saw, and other mills. Pop. 1210.

GRÄFENTHAL, a tn. Saxe-Meiningen, cap. bail. of same name, in a bleak district in the forest of Thuringia, in a narrow valley on the Zopte, 18 m . W. Saalburg. It has a church, the ruins of an old castle, townhouse, and two schools; manufactures of cloth, a blast furnace, with steel and iron works, several mills, a trade in cattle, a weekly market, and seven annual fairs. Iron is mined in the vicinity. Pop. 1422. Area of bail. 64 geo. sq. m. Pop. 11,171.

GRÄFENTONNA, or ToNNA, a tn. Saxe-Coburg, principality of, and 11 m. N. Gotha, cap. bail. of same name, on the Unstrut. It has a church and a castle; and manufactures of tobacco. There is a sulphur spring in the vicinity. Pop. tn. 1480; bail. 9390.

GRAFENWÖRTH, or Grafenwerd, a market tn . Lower Austria, on the little river Kamp, near its junction with the Danube, about 8 m . from Krems. It contains a handsome parish church, with fresco paintings. Pop. 878.

GRAFFHAM, two pars. England:-1, Huntingdon ; 2380 ac. Pop. 307.-2, Sussex ; 1550 ac. Pop. 390.

GRÄFRATH, a tn . Rhenish Prussia, gov. of, and 11 m . S.S.E. Duisseldorf, on the Itter. It has a Protestant and a R. Catholic parish church; manufactures of cotton goods, silk ribbons, and ironware; a trade in these articles, several polishing mills, and an annual fair. Pop. 1420.

GRAFTON, two pars. Eng. Northampton :-1, (-Regis $)$; $1510 \mathrm{ac} . \quad$ Pop. 266.-2, $(-$ Underwood $) ; 2050 \mathrm{ac} . ~ P o p .281$.

GRAFTON.-1, An isl. N. Pacific Ocean, one of the Bashees, small and steep ; lat. $20^{\circ} 41^{\prime} 30^{\prime \prime}$ N.; lon. $121^{\circ} 57^{\prime}$ E. (r.) -2, A cape, N.E. coast, Australia; lat. $16^{\circ} 51^{\prime}$ S.; lon. $145^{\circ} 56^{\prime}$ E. (r.)

GRAGLIA, a tn. Sardinian States, Piedmont, div. of, and 38 m. N.N.E. Turin. It is the seat of a court of justice, contains two parish churches, a gymnasium, and primary school; and has a weekly market. In the vicinity is a magnificent shrine, in the form of a Greek cross, and surmounted by an octagonal cupola, dedicated to the Madonna di Loretto, which attracts numerous pilgrims. Pop. 2875.

GRAGNANO, a tn . and com. Naples, prov. of, and 19 m . S.E. Naples, in a plain. It contains several churches, one of them collegiate, and a convent; and has manufactures of woollen cloth, and two annual fairs. Pop. 8508.

GRAHAM LAND, a tract of lofty and continuous land in the Antarctic Ocean; discovered in 1832 by Biscoe, who took possession of it for Great Britain. It stretches from N.W. to S.E., between lat. $63^{\circ}$ and $68^{\circ}$ S., and lon. $61^{\circ}$ and $68^{\circ}$ W.; and is supposed to be of great extent.

GRAHAM ISLAND, or Ferdinandea, a new volcanic island, which sprung up in 1831, in the Mediterranean; in lat. $37^{\circ} 8^{\prime} 30^{\prime \prime}$ N., and lon. $12^{\circ} 41^{\prime} 15^{\prime \prime}$ E. ; about 30 m . S.W. Sciacca, in Sicily. In the spot where it rose Captain Smythe had, a few years before, found a depth of more than 100 fathoms. On the 18 th July it was 12 ft . above the water, and had a crater in its centre emitting volcanic lava and immense columns of vapour; and on the 4th of August had attained a height of 200 ft ., and a circuit of 3 m . It afterwards gradually lowered, and finally disappeared; but when examined, near the end of 1833 , was found to have left a dangerous reef, of an oval form, and about of m . in extent.

GRAHAMSTOWN, a tn. Cape Colony, dist. Albany, about 40 m . N.E. Algoa Bay, and 480 m . E. Cape Town; lat. $32^{\circ} 40^{\prime} \mathrm{S}$.; lon. $26^{\circ} 22^{\prime} \mathrm{E}$. It is the second town in the colony, has a handsome church, several dissenting meetinghouses, and various other public buildings; a barracks, several tanneries, and breweries. It is the centre of one of the five judicial circuits of the colony, and a place of great trade. The population, consisting of the civil and military servants of Government, merchants, mechanics, European labourers, and Hottentots, is between 3000 and 4000.

GRAIGUE, two tns. Ireland:-1, (or Graiguemanagh), A market tn . and par., co. Kilkenny. The town, 14 m . S.E. Kilkenny, r. bank Barrow, consists of four streets and several lanes, irregularly built, and indifferently kept. It has a mar-
ket-house, a plain parish church, a R. Catholic chapel, a national school, and the ruins of an abbey of Cistertian monks, founded in 1212. The principal trade of the place is con nected with the navigation of the Barrow. Pop. 2248. Area of par. 12,423 ac. Pop. (1841),5141.-(Local Correspondent.) -2, A tn., Queen's co., r. bank Barrow, over which there is a bridge connecting it with Carlow, of which it may be regarded as a suburb. It has a handsome church, a R. Catholio chapel, two schools, two tanyards, a flour-mill, and a distillery. Pop. (1841), 1675.

GRAIN (Isle of), an isl. and par. England, co. Kent, formed by the Thames, Medway, and Yantlet creek, $1 \frac{1}{2} \mathrm{~m}$. W. Sheerness. It has extensive salt-works on the side next the Medway, and is unhealthy. Area, 3160 ac . Pop. 337.

GRAIN COAST, a region of W. Africa, Upper Guinea, extending $W$. from the Ivory Coast, and comprising the greater portion of Liberia; between lat. $4^{\circ}$ and $7^{\circ} \mathrm{N} . ;$ lon. $7^{\circ}$ and $11^{\circ} \mathrm{E}$.

GRAINSBY, par. Eng. Lincoln; 1390 ac. Pop. 103.
GRAINTHORPE, par. Eng. Lincoln ; 4280 ac. P. 556.
GRAITNEY, par. Scot. Dumfries; 6 m. by $3 \mathrm{~m} . \mathrm{P} .1761$.
GRAJAL DE CAMpos, a tn. Spain, prov. of, and 35 m . S.E. Leon, chiefly of earthen houses. It has an ancient and interesting parish church, a fine castle, townhouse, with prison, an old convent, and an hospital ; mannfactures of linen and serge, and a trade in wine and cattle. Pop. 1233.

GRAJEHU, a river, Brazil, which rises in the serra-doNegro, in the W. of prov. Maranham, pursues a N.E. direction; passes Codo, Chapada, and the little town of its own name; receives the Santa Anna, by which its volume is doubled; and, after a course of about 240 m . parallel to the Mearim, gradually approaches, and ultimately joins the l. bank of that river, several miles above the town of same name.

GRALLAGH, par. Irel. Dublin; 792 ac. Pop. 149.
GRAMAT, a small tn. France, dep. Lot, 27 m . N.E. Cahors, on the Alzon, in a glen, shut in by precipitous rocks, through which the river has forced its way, forming a fine cascade below the town. It has a trade in grain and wool ; and in the vicinity are a mineral spring of some repute, and a Druidical monument. Pop. 1788.

GRamMICHELE, or Gran Micheli, a tn. Sicily, 31 m . S. W. Catania, on the N.E. side of a mountain range. P. 7800 .

GRAMMONT [Flemish, Geeraerdsbergen], a tn. Belgium, prov. E. Flanders, 22 m . S.S.E. Ghent. It is built on a slope, at the foot of which flows the Dendre, dividing the place into the High Town and Low Town. It has two churches, four chapels, a to wnhouse, an hospital, an orphan asylum, a prison, a cantonal college, and a number of schools; manufactures of thread, lace, linen, tobacco-pipes, \&c.; soap-works, tanneries, breweries, distilleries, bleacheries, an iron-foundry, and a paper-mill. Pop. 7342.

GRAMPIANS (The)- -1 , A well-known range of mountains, Scotland, stretching across the country diagonally S.W. to N.E., for a distance of about 150 m . Its limits are not well defined; but it may be said to commence near the S.W. end of Loch Awe, on W. coast, Argyleshire, whence the main ridge runs, in a well-marked course, along the N . boundaries of Perthshire to Cairn Ealer; lat. $56^{\circ} 58^{\prime}$ N.; lon. $3^{\circ} 50^{\prime}$ W.; where it separates into two distinct branches-one stretching N.N.E. on the N. side of the Dee, and terminating near Huntly ; the other rumning nearly due E. on the S. side of that river, and terminating between Stonehaven and Findhorn. The offsets of the Grampians are diffused over a wide extent of country, both N. and S. of the principal ranges; extending on the latter to Stirlingshire and Dumbartonshire, and including a large portion of the surface of Perthshire. With exception of Ben Nevis, the Grampians comprise all the highest mountains in Scotland. Amongst these are Ben Cruachan, 3669 ft .; Ben Lomond, 3240 ft ; Ben Lawers, 3945 ft .; Schiehallion, 3514 ft ; Ben Macdhuie, 4305 ft ; Cairngorm, 4050 ft ; C Cairntoul, 4223 ft. \& c . The more remarkable passes are those of Leney, Aberfoyle, Glenshee, and Killicrankie. The main ridge of the Grampians forms the watershed of the Spey and the Dee, on the N.; and of the Tay and Forth, and their tributaries, on the S. They are composed chiefly of granite, porphyries, primary schists, quartz, and marble; and are in general remarkable for their sterility and desolate aspect, although not without some redeeming features -their S. slopes sometimes presenting gentle acclivities and
fine pasture, while scenes of wild, but romantic beauty, are if no unfrequent occurrence.- 2 , A mountain-range, New $S$. Wales, in Vietoria, Portland Bay district, discovered, in 1836, by Sir T. L. Mitchell. It is about 60 m . in length, N. to S., between the parallels $36^{\circ} 50^{\prime}$ and $37^{\circ} 40^{\prime}$ S.; and the meridians $142^{\circ} 10^{\prime}$ and $142^{\circ} 30^{\prime}$ E. Mount William, the principal eminence, rises 4500 ft . above sea-level, and is generally accessible, but cold and bleak on the summit.

GRAMPOUND, a decayed bor. and market tn. England, co. Cornwall, 13 m. N.E. Falmouth, on the Fal, here crossed by a good stone bridge. It sent two members to the House of Commons till 1824, when it was disfranchised for bribery. Market day, Saturday. Pop. (1851), 589.

GRAN [IIungarian, Estergom; anc. Begretium; Latin, Strigonium], a free, royal th. Hungary, cap. co. of same name, 25 m. N. W. Pesth, r. bank Danube, at the confluence of the Gran, the former here crossed by a flying bridge. It consists of the town proper, and seven suburbs; is the see of the primate of all Ilungary, and the seat of several courts and public offices; contains a cathedral, sitnated on a lofty precipitous rock, overlooking the town and river; the most splendid building in Hungary, commenced in 1821; an archbishop's palace and chapter-house, both adjoining the cathedral; a townhouse, occupying the centre of a square, adorned with a fine obelisk; a Franciscan monastery with an elegant church; a gymnasium, a courthouse, and well-adorned lospital. The manufactures consist chiefly of woollen cleth; and a considerable trade is carried on in wine. Gran is supposed to be of Roman origin, was long the residence of the Hungarian monarchs, and was considered as their finest city, till it was destroyed by the Turks, who, having made themselves masters of it, retained possession for 70 years. It was finally wrested from them in 1683 . Pop. (1846), 12,700.

The county, area, 306 geo. sq. m., is flat in the centre, and in several places marshy; but is enclosed and partly traversed by the Bakonyer-wald hills, which yield limestono and variegated marble. The Danube, traversing the county W. to E., receives all its drainage. The soil, particularly in the low ground, is fertile. Fruit, game, and potters' clay, are plentiful. The inhabitants are chicfly R. Catholics; and a very large proportion of the land belongs to their clergy, particularly to the archbishop of Gran and to his chapter. Pop. 62,000.

GRAN [anc. Granus], a river, Hungary, which rises in Mount IIrona, a branch of the Carpathians, in the N.W. of co. Gomör, about lat. $48^{\circ} 47^{\prime}$ N.; Jon. $20^{\circ} 10^{\prime}$ E., flows S.W. and S., passing Brezno-Banya, Neusohl, and Altsohl ; and, after a circuitous course of about 150 m , joins r . bank Danube, almost opposite the town of Gran. Its principal affluents are, on the r., the Bisztra and the IIermanecz; and on the l., the Cserna, Szlatina, and Szeklencze. It is partly navigable.

## GRAN-Canama. See Canary (Great.)

GRAN-Sasso-D'Italia, a mountain, Naples. See Corno.
GRANA, a vil. and com. Sardinian States, Piedmont, div. Alessandria, prov. and 12 m . S. Casale, r. bank Grana. It has a chureh, school, three palaces, the remains of an old castle, and some trade in wine, corn, hemp, and hay. Pop. 1363.

GRAÑ (San-Andres-de-la), a seaport tn., Spain, Galicia, prov. Coruina, on a stcep height facing the E., on the Ria, and nearly 1 m . W. Ferrol. It is built in the form of the letter $\mathbf{Y}$; and consists of a public square, and several very steep strects; but contains several good buildings, a handsome parish church, and a primary school. It was once a flourishing place; but depending entirely on Ferrol, has suffered mueli by its decay. Its trade is now confined to a few articles of primary necessity. Its inhabitants are almost all sailors; and many of them live by fishing. Pop. 1250.

GRANADA, an extensive tract in the S. of Spain, forming one of the four kingdoms which the Moors established in Andalusia, and the last from which they were driven-their final expulsion not having been effected till 1492. It now constitutes the provinces of Granada, Almeria, and Malaga.

GRANADA, a prov. Spain, forming one of the three provinces into which the Moorish kingdom of Granada has been divided; and bounded, N. by provs. Jaen and Albacete, E. Alneria, S. the Mediterranean, and W. Malaga and Cordova; greatest length, N.E. to S.W., 166 m. ; greatest Vol. I.
breadth, N. to S., 84 m . ; area, 4225 geo. sq . m. The coast, which has a leugth of 66 m ., is, for the most part, rocky and dangerous, from the shoals which line it; but has several small bays in which vessels find tolcrable shelter. The interior is generally mountainous, being traversed chiefly from E. to W., by several ranges, particnlarly the sierra Nevada, whose culminating point, Mulhacen, is $11,977 \mathrm{ft}$. high, and is the loftiest summit in Spain. The mountains are gencrally composed of micaceons schist, which passes into gneiss and argillaceons schist ; above these, on the $\mathbf{S}$. slope, occur black calcareous rocks, often rich in the sulpburate of lead. Between the mountain ranges are numerous valleys, many of them distinguished by their beauty and fertility: The province is divided by the mountains into two principal basins, the one of which carries its waters N. to the Guadalquivir, and the other S. directly to the Mediterranean. The principal streams are the Genil, Darro, and Guadalfeo. From the rocky nature of the surface, the extent of arable land is limited, and on many spots the soil has no great depth; but industry has done much for its improvement ; and many spots, apparently of little natural fertility, present the appearance of large gardens. The principal crops are wheat and barley; next are those of maize, beans, haricots, hemp, and flax. Both the olive and vine are extensively enltivated; and fruit, in great variety and of excellent quality, is very abundant. The sugar-cane thrives well in some parts, particularly at Almunecar, on the coast. Neither manufactures nor trade are of much consequence. The former include silk and woollen goods, hair-cloth, and soap; the latter is chiefly in wheat, wine, brandy, oil, and frnit. For administrative purposes, the province is divided into 15 districts. Granada is the capital. Pop. 427,250.

GRANADA [Latin, Granata; French, Grenade], A tn. Spain, Andalusia, cap. prov. of same name, beautifully situated, lartly on two spurs of the sicrra Nevada, and partly on the flat between them forming the extremity of the rich plain of Vega, at the junction of the Darro or Dauro, and the Genil:

tite fonimess of the alhambra, granada.
From Roberu' Spanish Sketches.
lat. $37^{\circ} 18^{\prime} \mathrm{N} . ;$ lon. $3^{\circ} 50^{\prime} \mathrm{W}$. Its site, about 2445 ft . above the sea, and the snowy mountains which form its back ground, give the air a delicious freshness even in the hottest seasons; the sky is generally serene, and the whole district ahounds
141
in scenery, whose beanty and grandeur amply justify the choice of the Moors in making Granada their favourite residence. In their time it was surrounded by lofty walls, flanked by 1030 towers, and was entered by 20 gates. The most of these have disappeared, with exception of a small portion of the N. enclosure, still in tolerable preservation, and the town consequently is now open. It is divided into four quarters -Alhambra, a celebrated fortress and palace, occupying one of the hills; Albaicin, a suburb, occupying the other ; Antequeruela, another suburb, the residence chiefly of the working classes, and the town proper, the largest and most important of all, covering the space between the two bills, and extending into the plains. When seen from a distance the appearance of the town is very imposing, but the impression thus produced is scarcely confirmed by an inspection of the interior Fountains and gardens, spacious squares, and handsome mansions, are seen in many quarters, and even where the houses are of an inferior description, their antiquity and oriental structure make it impossible to view them without interest, but the far greater part of the streets are extremely narrow and tortuous. The most remarkable buildings are the Alhambra, an immense Moorish structure, of simple and rather forbidding exterior, but within gorgeous almost beyond description, partly remaining as the Moors left it, with its splendid Court of Lions, so called from the beautiful fountain

the court of the lions, in the alhambra, granada. From Baron Taylor's Voyage Pittoresque en Espagne.
in its centre, supported by 12 lions, surrounded by a gallery resting on 120 pillars of white marble, \&c., and bearing ample testimony, by the magnificence and taste which it displays, to the high state of refinement to which that ingenious people must have attained, and partly occupied by an unfinished palace, in which Charles V. appears to have wished, without having been able to eclipse them; the cathedral, a heavy and irregular building, profusely ornamented with jasper and marble, surmounted by a dome resting on 12 arches, upheld by as many pilasters, and containing in the adjoining Royal chapel, among its numerous fine monuments, those of Ferdinand and Isabella; the church of Nostra Señora de las Angustias, with two beautiful towers, and splendid high altar; the church of San Jose, a modern edifice, built on the site of one
of very great antiquity, the tower of which still remains; tho old Carthusian convent, finely situated on a height in the suburbs, and adorned with fine paintings by Cano, Murillo, and Morales; the monastery of San Geronimo, founded by the great Captain Gonzalo de Cordoba, whose remains lie deposited in a splendid mausoleum contained in its church; the Generalife, a beautiful Moorish palace, surrounded by fountains and gardens; the Episcopal palace, the general hospital, college, \&c.

The manufactures of silk and of sail-cloth, once very important, were almost extinguished by the loss of Spanish America, and the annhilation of the Spanish fleet, and the only manufacture now deserving of notice, is that of coarse woollens, still carried on to a considerable extent in the suburbs of Albaicin. The trade is insignificant. Granada is the see of an archbishop, the residence of a captain-general, and of civil and military provincial authorities, and the seat of several courts of law, thongh it has lately lost the most important of all, the supreme court of appeal, by its removal to Albacete. It was first founded by the Moors in the 10th century, near the site of the ancient Iliberis, and belonged to the kingdom of Cordova. In 1235, it became the capital of a new kingdom, and attained to almost matchless splendour. Its population at this period has been estimated as high as 700,000. In 1491, it remained the last stronghold of the Moors in Spain, and mnstered 60,000 men to defend itself against Ferdinand and Isabella, who had now arrayed the flower and strength of their united kingdoms, and encamped before it. The defence proved unavailing, and the besiegers took possession of it in 1492. The great body of its inhabitants still were Moors, and its prosperity continued almost without diminution for another century, till 1610, when the decree expelling the Moors from all parts of Spain was nowhere more severely felt than in Granada, whichimmediately sunk and has never recovered. Pop. 61,610.

GRANADA, a tn. Central America, Nicaragua, on the N.W. border, and about 100 ft . above the level of Lake Nicaragua; lat. $11^{\circ} 57^{\prime} \mathrm{N}$. ; lon. $86^{\circ} \mathrm{W}$. It was founded in 1523 ; is regularly built; streets at right angles, and roughly paved. It has several churches and convents, all of ancient date ; and private houses, in the old Spanish style, are of one story, but many of them spacious and commodious. It is advantageously situated for trade, having easy access to the Pacific, and constant water communication with San Juan or Grey Town, on the Caribbean Sea; and exports chiefly indigo, hides, and Brazil wood. The climate is for the most part pleasant, and provisions abundant and cheap. Pop. about 10,000 .

GRANADA (New) [Spanish, Neuva Granada; French, Nouvelle Grenade; Latin, Castella Aurea], an independent state of S. America (cap. Bogota or Santa Fé de Bogota), for merly a viceroyalty under the Spanish Crown, but subsequently part of the Republic of Colombia, the middle and W . provinces of which it now embraces. Its N . shores are washed by the Caribbean Sea, with the gulfs of Santa Martha and of Darien. On the W. it has the Pacific Ocean, with the bays of Panama and Choco. Between the two seas, on the N.W., it is bounded by Costa Rica; Venezuela and Brazil confine it on the E. and S.E., and the republic of Ecuador on the S . It extends through nearly 10 degrees of latitude (from $1^{\circ} 40^{\prime}$ to $11^{\circ} 30^{\prime} \mathrm{N}$.), and 10 degrees of lougitude $\left(68^{\circ}\right.$ to $78^{\circ} \mathrm{W}$.) ; area, $480,000 \mathrm{~m}$. This country was at first included by the Spanish conquerors under the general name of Tierra Firme, which is applied at the present day only to the E. part of the coast of Venezuela. King Ferdinand named it Castella de Oro [the golden Castile]. This title soon fell into disuse, and gave way to that of the New Kingdom of Granada ; but the viceroyalty included, besides the territories of the present republic, the kingdom of Quito also, which now forms the separate state of Ecuador.

This country is the most equally diversified in soil and climate of all the S. American States. Neither plain nor mountain can be said to predominate; the sea-coasts are ample and commodious, and, owing to the wide ramifications of the Andes, there is an unusual extent of country at that elevation-from 5000 to $10,000 \mathrm{ft}$.-which, in such a climate, is most favourable to industry and the increase of civilized man. Yet the insalubrity of the zone surronnding this favoured region, the comparative inaccessibility of the tem-
perate valleys, and the great difficulties which the first efforts of industry have to encounter in a country where every natural feature is on a vast scale, have hitherto counterbalanced its apparent advantages, and prevented the development of its varied and abundant resources.

Divisions.-New Granada is now divided into five departments, namely, Cundinamarea, lying chiefly up the valley of the Magdalena; Boyaca, comprehending the E. branches of the Andes, and the llanos adjoining; Magdalena, along the coast, with the lower valleys of the rivers Magdalena and Cauca, and a tract of matchless fertility along the foot of the hills; Istmo, the situation of which is revealed by its name, and in one place-between the Bay of Panama and that of Mandinga, in the Gulf of Darien-is but 22 m . wide; Cauca extends over the upper portion of the valley of the Cauca, and that of the Atrato, and resembles Cundinamarea in its general character. These departments are divided into 18 provinces, as follows:-

Mountains.-A little N. of the town of Pasto, on the borders of Leuador (lat. $1^{\circ} 20^{\prime} \mathrm{N}$. ), the ridge of the Andes separates into two branches, the western of which, running parallel to the sea-shore, is cutitled la cordillera de la Costa; the other, on the E., contains several paramos or high plains, and the sources of the rivers Putunayo and Japura, which join the Marañon; and further N., from the paramos of Las Papas and Socoboni, spring the great rivers Cauca and Magdalena, flowing N. Here, in lat. $1^{\circ} 50^{\prime} \mathrm{N}$., the E. Cordillera again divides, and forms two chains nearly parallel, between which extends the broad valley of the Magdalena. The most E. of these chains, stretching along the r. bank of the Magdalena to the sierra Nevada of Merida, is called the E. cordillera of Cundinamarea; the central cordillera separates the valleys of the Magdalena and the Cauca, while the W. cordillera divides the valley of the Cauca from the metalliferous districts of Choco. But the first of these mountain-clains is by some named the cordillera de la Suma Paz, from the colossal group of this name near Santa Fé de Bogota; the second is often called the Quindiu chain, while the third takes the name of Choco. So long as the middle chain rises to the height of rerpetual snow, the E.cordillera never exceeds an elevation of $13,000 \mathrm{ft}$.; but it rises to the limits of snow at the point (lat. $5^{\circ} 5^{\prime} \mathrm{N}$.), where the W. Nevados cease, and is collectively the loftiest of the three chains. But to the middle or Quindiu chain belongs the Peak of Tolima (lat. $4^{\circ} 46^{\prime} \mathrm{N}$.), whieh reaches the absolute height of $18,270 \mathrm{ft}$., and is the loftiest summit of the Andes, properly so called, in the N. hemisphere. The sierra Nevada of Santa Martha is not considered as belonging to the Andes, though it extends along the coast between the cordilleras of Cundinamarea and Quindiu. It rises abruptly about 30 m . from the sea-shore, from the level plains which extend between the Gulf of Darien and the Sea of Maracaybo, to the height of at least $19,000 \mathrm{ft}$. These mountains all oppose serions restraint on internal communication. The Choco or maritime chain, though comparatively low, have but few and difficult passes. The roads from Santa Fé de Bogota to Popayan, by the passes of Guanacas and Quindiu, are dangerous from their height and liability to snow storms. The province of Antioquia, rich in mineral treasures, is hardly accessible without the aid of native carriers.

Valleys.-Alternating with the mountain chains here described, are plains and valleys, all luxuriant, but varying in character from W. to E. The W. sea coasts, and the isthmus generally, are covered with impenetrable forests, and are but imperfectly known. The continual heavy rains, and noxious climate, discourage European settlers. Hence no advantage has been taken of the circumstance that the Atrato, which falls into the Gulf of Darien, rises in a swampy plain, often inundated, where its waters mingle with those of the San Juan, which flows into the Pacife Ocean. By means of a canal, dug in the ravine of Raspadura, between the two rivers, under the direction of an a:tive-minded monk, the navigation between the two seas has been practicable here for boats, at all seasons, since 1788. On the E. side of New Granada, the
plains or llanos, extending to the Orinoco, are alternately 8 swamps or hard and sun-burnt deserts. The intervening valleys of the Cauca and Magdalena have a middle character between those of the W. coast and the llanos, growing continually more equable, humid, and insalubrious towards the W. and N.

Rivers.-The chief rivers of New Granada are the Magdalena and the Cauca, which both rise in the cordillera, in lat. $2^{\circ} \mathrm{N}$., pursue a nearly parallel course till they unite in lat. $9^{\circ}$, and reach the Caribbean Sea through many mouths, in lat. $11^{\circ}$. The Magdalena, whieh has a course of nearly 700 m ., is navigable in flat-bottomed boats, with great labour, up to Honda, in lat. $5^{\circ} \mathrm{N}$. The Cauca, though a great river, descends with the impetuosity of a mountain torrent, its valley being generally 1500 or 2000 ft . above that of the Magdalena. The numerous streams which descend from the W. cordillera into the Pacific Occan, are unimportant. The E. Cordillera sends the Guaviare, Vichada, and Meta to the Orinoco, while the Uaupe and Rio Negro flow into the Marañon. There is no deficiency of small streams. The Funza or river of Bogota, which flows by the capital, is famed for its cataract at Tequendama, where it falls at once from the region of oaks, willows, and wheat, to that of palms and sugar-cane. It is supposed that the plain of Bogota, 8600 ft . above the sea, was formerly the bed of a lake, and was drained by the opening of the chasm-the work of an earthquake perhaps-through whieh the river now descends. Sinall lakes are numerous throughout the cordilleras. One of these, the lake of Guatavita, not far from Santa Fé, is remarkable from the circumstance that the Indians flung all their treasures into it when about to abandon the country to the conquerors. The attempts made to drain it have not, we believe, sueceeded; but many curious and valuable articles have been, at different times, drawn from its depths.

Minerals.-The mineral wealth of New Granada is various and abundant, though, as yet, imperfectly explored. Fine coal occurs on the plain of Bogota, 8000 ft . above the sea. Platina is found in Choco, but only on the W. side of the cordillera; whereas gold is collected both on the E. and W. sides, in Antioquia, and the valley of the Cauca. The annual produce is worth about half a million sterling. The tract of country so productive of the precious metal, is, however, a wilderuess, inhabited only by a slave population, of mixed origin, and lawless labits, always suffering from the dearth of provisions, and the deadly climate. It is said that rich veins of silver ore exist at Marquetones, and elsewhere in New Granada; but the mines are not worked. There was formerly a pearl fishery at Rio de la Hacha. The chief emerald mines are situate in the valley of Tunja, near Bogota, in strata of argillaceous schist. Sinall diamonds are found with the gold of Antioquia; and in the same district the sulphate of mercury is abundant. These productions are either wholly neglected, or very indolently sought after. The civil wars exhausted all the capital of the country, and left the business of mining to the poor and ignorant.

Climate.-The climate of New Granada presents the most remarkable contrasts. At Honda, nearly 1000 ft . above sealevel, so intense is the heat that the hand cannot be held on a stone exposed to the sun's rays, and even the waters of the Magdalena are lukewarm. At Mompox, near the head of the delta of the Magdalena, the sea breeze ceases, and the remainder of the voyage up to Honda, 350 m ., is made under the most oppressive atmosphere conceivable, and through myriads of mosquitoes, and other stinging insects, the attacks of which allow no respite; the bariks, at the same time, being guarded by caymans or alligators, jaguars, venomous snakes, and boas. The water of the Magdalena is said to be productive of goitre, with which the inhabitants of Mompox are afflicted. Among the scanty iuhabitants of the valley, higher up towards Honda, malignant uleers are frequent; the mortality is great, and few children are reared. The yellow fever is endemic at Cartagena, and on the W. coasts; and, in general, the lowlands of New Granada are as dangerous to the inhabitauts of the highlands as to Etropeans. But on the elevated conntry, as the plain of Bogota, 8000 ft . above the sea, the air is perfectly salubrious, and the temperature (from $56^{\circ}$ to $70^{\circ}$ Fah.) scems that of perpetual spring. Here the rains in the wet season darken the sky only for a few hours daily in the afternoon. At Mompox, the day is always cloudy, the
night clear. The summits of the cordilleras are often shrouded in mists; torrents of rain fall unceasingly in the forests of Darien; the Gulf of Choco is perpetually vexed with violent storms; but these excesses of the clements are all unknown in the middle regions or Templeadas, and, excepting the earthquakes, which have left here as elsewhere in the Andes, deep traces of their destructive visitations, there is nothing which detracts from the general benignity of nature. Even up to the limits of perpetual congelation the climate continues healthy, though it may cease to be agreeable.

Zoology.-To the stranger ascending the Magdalena, the alligators seem entitled, by their numbers and formidable appearance, to be considered as the true possessors of the country, though the flies levy the heaviest tribute on the new comer; pumas, jaguars, and several smaller species of the feline tribe, occasionally show themselves in the forests; but they are few in comparison with the plagues of the river. These, however, cease to annoy at an elevation of a few thousand feet, while the woods are still densely peopled with monkeys, of which the New World has many species, all peculiar to it; in general less strong, fierce, and mischievous than those of Africa and Asia, and distinguished also by having prehensile tails. At the height of 3000 ft ., where the boa constrictor and crocodile cease, the tapir, the largest wild quadruped of the country, makes its appearance. The sloth, armadillo, ant-eater (a bear), and cavy, inhabit the lowland forests; deer of different species are distributed at all heights; bears and marmottes approach the limits of perpetual snow. The condor soars above the snowy heights; while countless varieties of the feathered tribes animate the woods below. The tropiale (Oriolus), the nightingale of these countries, deserves especial mention.

Botany.-The remarkable equability of the climate in this part of the world, where the seasons differ little the one from the other, seems unfavourable to the multiplication of vegetable species. Each kind seizes on some locality or region, wherein it predominates, to the almost total exclusion of others. On the plains of Bogota, in the region of perpetual spring, though vegetation is most luxuriant, the species are not numerous. Yet the woods, imperfectly explored, team with valuable productions. The wax palm, 200 ft . high, clothes the sides of Tolima to an elevation of 8000 ft . The forests of Popayan yield china or cinchona (the cascarilla of commerce or Jesuit's bark), in abundance. Rice, cotton, tobacco, cacao, sugar-cane, with all tropical fruits, are among the productions of the coast ; while the elevated plains yield maize, wheat, and all the fruits of Europe. With nature so bountiful, the wants of the population so few, and the demands of commerce very moderate, the cultivation of the soil is carried on, as might be expected, very remissly, and the reclaimed land bears but a small proportion to the whole.

Productions.-The industry of New Granada amounts to little. In the llanos, towards the Orinoco, the people are occupied wholly with the rearing of cattle and horses. The Llaneros are mostly Creoles. Agriculture is chiefly in the hands of the converted Indians, who evince a decided predilection for these tranquil labours. Manufactures can hardly be said to exist in the state. Straw hats, carpets, and some other articles, are indeed made in Bogota, and the other chief towns; but in no case does the native industry satisfy the demand of the country, and nearly all the manufactured articles in use are imported. The principal ports are Santa Martha, Cartagena, Rio de la Hacha, and Porto Bello, on the Caribbean Sea; and Buenaventura and Panama, on the Pacific Ocean.

Population.-The population here, as in the other American states of Spanish origin, is composed of different racesSpaniards, Indians, and Negroes, with theirmixed progeny, distinguished into five or six different classes. The Mulattoes and Mestizoes are supposed to be together equal in number to the whites-that is, the Spaniards and Creoles. The Indians are rather more numerous; the Negroes make but a fiftieth of the whole population, which may be estimated, in round numbers, at $1,500,000$. Under the republican institutions, all races and colours are politically equal, but the influence of the white men still predominates. Slavery has ceased entircly in the state; and care has been taken, so far as it lies within the power of legislation, to secure the equal rights and liberty of all; but, where civil discord rages, it cannot be ex-
pected that the laws will be impartially administered. The freedom of the press, the inviolability of the private dwelling, trial by jury, and religious toleration, are all established by law. The religion of the State is the R. Catholic; but the Pope's supremacy is denied, and, in New Granada, the head of the church is the Archbishop of Bogota.

At Cartagena, and other places on the coast of New Gra nada, the white population generally exhibit the effects of the pestilent climate, in want of energy and of colour. Their teeth decay at an early age. On the plains of Bogota, on the other hand, the ladies are famed for their fine complexion. In the city of Bogota the better class dress in the French fashion; the ladies, however, go barefoot in the house, and the gentlemen often wear, for morning dress, a great cloth cloak, which hides their dishabille. But, from the capital down to the sea-coast, the dress and domestic habits vary much, according to local situation and class of life. The Llanero is full dressed in light drawers and shirt, wide straw hat, and sandals of bark. He rides without a saddle, and lives on beef, taking the wild bullocks with the lasso. Red pantaloons, great boots, and spurs, with enormous rowels, a broad-brimmed hat, and ample mantle, distinguish the high-bred cavallero. At Cartagena and Mompox the day is usually spent in the hammock, the night in the open air. The inhabitants of the highlands incline to the imitation of European manners. In one respect all are alike; the love of gaming is universal, and cock fighting, in particular, is the favourite sport of all classes. England supplies the game fowl. There is, at present, no want of education in New Granada. The constitution provides for the support of public schools; the Lancasterian sys tem is generally adopted. There are two colleges in Bogota and a public library. Among the ornaments of the churches of Bogota, not the least remarkable are the paintings by Basques, a native artist, who studied in Italy, in the beginning of the last century, and attained a high degree of excellence.

When New Granada became, on the dissolution of the Co lombian republic, in 1832 , an independent state, it retained the form of government which had been devised for the latter and which was a close copy of the constitution of the United States of North America. It has a president, senate, and congress of representatives, all elected, and admits no hereditary rank or office; but as to the modifications which the original constitution may have undergone since that epoch, we have no information, the internal history of the state being wrapped in profound obscurity.-(Geo. and Hist. Account of Colombia, 1822; Mollien's Travels, 1825; Hamilton's Travels 1827; J. Steuart's Bogota in 1837; Joaquim Acosta's Compendio Hist. del Descubrimento del Nueva Granada, 1848.

GRANADELLA, a tn. Spain, Catalonia, prov. and 19 m . S.S.E. Lerida, with a chureh, townhouse, primary school hospital, several oil-mills, and an annual fair. Pop. 1714.

GRANADILLA, a tn. Spain, Estremadura, prov. of, and 70 m. N. Caceres, r. bank Alagon, on a bare, almost inacces sible, slate rock. It is surrounded by ancient but massive walls, and entered by two gates. The streets, ill paved, mostly radiate from the public square, in which is the public store house. There are also a parish church, townhouse, prison and primary school. Pop. 712.-2, A tn. Canaries, isl. Tenerife, 30 m . W.S.W. Orotava, possessing a church, townhall, prison, school, and storehouse; and a small manufacture of coarse cloth and linen. Pop. 2563.-(Madoz.)

GRANARD, a market $t n$. and par. Ireland, co. Longford. The town, 13 m. E.N.E. Longford, has one main street, about half a mile long, with several subordinate ones, all very indifferently kept; houses stone, the greater part of them slated; but many of them wretched hovels, and of late years decreasing in number. It has a parish church, a R. Catholic chapel, three or four school-houses, a large market-house, and a barrack. Coarse linen was formerly, but is no longer manufactured. Market day, Monday. Pop. 2408.-Area of Parish, 17,773 ac. Pop. 9998.-(Local Correspondent).

GRANATULA, a tn. Spain, New Castile, prov. of, and 14 m. S.S.E. Ciudad-Real, in a small valley surrounded by lofty hills, near the Jabalon. It is built with considerable regularity, and consists of two squares, and several level and well paved streets, has a handsome modern parish church, a townhouse, primary school, and prison; manufactures of esparto, blonde, and bombazine, and a trade in corn, wine, and dairy produce. Pop. 2025.

GRANBY, par. Eng. Nottingham; 2420 ae. Pop. 516. GRAND-Burnand [Latin, Bornantium Auniciense], a vil. and com. Sardinian States, div. Savoy, prov. Genevese, on the Le Bornes, 15 m . E.N.E. of Anneey. It has an ancient parish church, a trade in horses, mules, eattle, sheep, and goats, a weekly market, and five annual fairs. Pop. 2143.

GRAND Chartheuse (Le). See Cinabtreuse.
GRAND GULF, a vil., U. States, Mississippi, on the Mississippi, 50 m. by road above Natehez. It has two churches, a townhall, market-house, hospital, theatre, and some manufactures. Pop. 1000.

GRAND IIAVEN, a vil. and port, U. States, Miehigam, 132 m. W. by N. Detroit, on Grand River, about a quarter of a mile above its entrance into Lake Miehigan. It has a courthouse, several mills, and an excellent harbour.

GRAND ISLAND, an isl., U. States, New York, Nia gara Strait, and within 3 m . of Niagara falls. Length, 9 m .; greatest breadth, 6 m . It has a level surfaee and an excellent soil, but is chiefly covered with a heavy growth of timber.

GRAND-Luce, a small but neat $t$. France, dep. Sarthe, 15 m. S.E. Le Mans. It is regularly built, with a square in the centre, and has manufactures of linen and canvas. Close to it is a handsome chateau. Pop. 1126.

GRAND RIVER.-1, U. States, Michigan, the largest river ruming wholly within the peninsula. It pursues a N. and W. course, and falls into Lake Michigan. It is 270 m . long, and admits vessels drawing 12 ft . water, and is navigable for steamers 40 m ., and for batteaux, $240 \mathrm{~m} .-2$, (or OUse), Upper Canada, rises in the district of Gore, flows S. and S.E., and falls into the N.E. end of Lake Erie, at Sherbrooke. It is very tortuous in its course, making sudden bends to the E. or W., and as suddenly curving back again in the opposite direction. It is navigable for large vessels as far as Dunnville, about 12 m . from its mouth; and for smaller boats, 60 m . further. In order to render the river navigable above Dunville, five locks have been built, to overcome an ascent of 43 ft . A large pertion of the land on the banks of this river is well settled and cultivated.

GRANDAS-de-Salime, a vil. and par. Spain, Asturias, prov. of, and 50 m . W.S.W. Oviedo, l. bank Navia, here crossed by two bridges. It stands in a small valley enclosed by mountains, and is poorly built, has a parish chureh, a townhouse, slate-quarries, several mills, and a trade in wine and dairy produce. Pop. 1426.

GRANDBOROUGH, two pars. Eug.: - 1, Bucks; 1560 ac. Pop. 345.-2, Warwick; 4100 ac. Pop. 532.

GRANDE, or Ilha-Grande, an isl. Brazil, 70 m. W.S. W. Rio-de-Janciro; greatest length, E. to W., 20 m .; greatest breadth, 12 m . It is traversed longitudinally by a chain of lofty heights, on the slopes of which are extensive coffee plantations. In the lower grounds, the sagar-cane, mandioc, millet, and haricots, thrive well. It contains a parish church. The want of a harbour is a serious obstacle to its prosperity; but vessels find good anchorage, and tolerable shelter, in the bay of Palmas, on the N.E., and in those of Abrahão and Estrella on the N. Pop. above 2000.

GRANDE.-1, A river, Brazil, which rises in the serra du Mantiqucira, in the S. of prov. Minas Geraes, near the frontiers of prov. Rio-de Janciro, and procceds first N. thenW.N.W. through Minas Geracs, constantly angmented in its course by a succession of small streams. On reaching the frontiers of São Paulo, it receives, on the left, its first important tributary. the Supncahi ; and, turning round, pursues a W. course, forming the boundary between provinces São Paulo and Goyaz, and receiving again on the left another important tributary, the lara. Proceeding still W. it reaches the confines of Mato Grasso, where it joins, or is joined by, the Paranaiva. The united streams form the Parana. The direct conrse of the Grande, W. by N., is 600 m . During the greater part of its. course it is large enough and deep enough to be navigable, but its channel is obstructed by numerons cataracts.-2, A river, Brazil, which rises in the serra Paranan, on the E. frontier of Goyaz, and, proceeding N.E. through prov. Bahia, joins 1. bank São Francisco, at the town of Barra-do-RioGrande. Its whole course is about $2 \overline{50} \mathrm{~m}$., of which no less than 150 m . may be navigated uninterruptedly. Its principal tributary is the Rio Preto on the left, but it receives numerons minor streams, of which the most important are the Mosqnito, Femeas, Ondas, and Branco. It is well stocked with fish.

GRANDE (Rio), or Rio Bravo del Norte, a river, N. America, which rises in the U. States, in the sierra Verle, a branch of the Recky Mountains, abont lat. $40^{\circ} 30^{\prime} \mathrm{N}$. ; lon. $107^{\circ} 40^{\circ} \mathrm{W}$. It flows S.E., and, at lat. $33^{\circ}$ N., where it enters New Mexico, it is already a navigable stream : continuing a S. course, it crosses New Mexico, and, froin lat. $32^{\circ} \mathrm{N}$., where it leaves that state, it forms the boundary between Mexico proper and the U. States, following a S. and S.E. course, and falls into the Gulf of Mexico at El Refugio, lat. $25^{\circ} 25^{\prime}$ N., after receiving many affluents, of which the most important are the Puercos, Conchos, Revilla, and San Juan. It traverses a rich fertile country, frequented by those lawless Indian tribes the Comanches and Apaches; total course about 1500 m . Its mouth is 1200 feet wide, but is barred so as to admit only boats, which, however, can ascend to Pas, del Norte, lat. $32^{\circ} 9^{\prime}$ N., where rapids and shoals commence; but it is said these could, with little expense, be overcome, and the river thus be rendered navigable to Santa Fe. Tho rains begin in April. The river is highest in May, and lowest in August and September.

GRaNDE-Terre. Sce Guadeloupe.
GRANDOLLA, a tn. and par. Portugal, prov. Alemtejo, com. of, and 29 m . S.S.E. Setubal, in a plain W. of the serra of same name. It has tile-works, and an important annual fair. In its vicinity are the ruins of an old castle. Pop. 2000.

GRANDSON [German, Gransee], a small decayed tn. Switzerland, can. Vaud, on the S.W. shore of the Lake of Neufchatel, $20 \mathrm{~m} . \mathrm{N}$. Lausanne. It is built on a hill, overlooking the lake; and has an antique church, and an old manor-house, formerly possessed by the barony of Grandson. Near it, March 3, 1476, the Swiss defeated the Burgundians, under Charles the Rash, with great loss. Pop. 830.

GRane, Gran, or Quade [Arabie, El Kueit], a seaport, Arabia, dist. El Alisa, on bay of same name, near the N. extremity of the Persian Gulf, about 85 m . S. Bussora; lat. $29^{\circ} 23^{\prime} \mathrm{N}$.; lon. $47^{\circ} 57^{\prime} \mathrm{E}$. (r.) It lies on a peninsula jutting out into the bay, is composed of clay-built houses, and badly supplicd with water, the country around being arid, and almost destitute of verdure. It is inhabited by numerous rich merchants, who possess about 800 bagalas (native vessels), in which they trade to the Red Sea, and to Scinde, Gujerat, and other parts of India, whence they import grain and other goods, with which, and with coffee, they supply the interior of A rabia. The bay, abont 60 m . in circuit, is safe, and well protected by the island Felihe or Pheliche, and it has water for the largest vessels. The anehorage is good. Pop. above 8000.- (Chesney's Euph. Exped. ; Ritter's Erdkundc.)

GRANEY, par. Irel. Kildare; 5229 ac. Pop. 1265.
GRANGE, par. Scot. Banff; 6 m. by 5 m . Pop. 1661.
GRANGE, several pars. Irel.:-1, Kilkenny; 1935 ac. Pop. 542.-2, Limerick; 2839 ac. Pop. 708.-3, Armagh; 6759 ac. Pop. 3823.-4, Galway; 4697 ac. Pop. 1038.5, (Grangeclare), Kildare; 533 ac Pop. 70.-6, (Grangeford), Carlow; 3504 ac. Pop. 1027.-7, (Grangcgeeth), Meath; 4448 ac. Pop. 1352.-8, (Grangegorman), Dublin; 877 ac. Pop. 5643.-9, (Grangekilree), Kilkenny; 992 ac. Pop. 205. -10, (Grangemaccomb), Kilkenny; 3486 ac. Pop. 1224.11, (Grangemockler), Tipperary; 2084 ae. Pop. 1106.-12, (Grangenosrolvan), Kildare; 1393ae. Pop. 107.-13, (Grangesilvia), Kilkenny; 4797 ac. Pop. 2413.

GRANGEMOUTH, a small seaport tn . Scotland, co. Stirling, S. shore Forth, about 13 m . above Queensferry, and 20 m. N.W. Edinburgh, at the E. entrance of the Forth and Clyde Canal ; lat. $56^{\circ} 1^{\prime} \mathrm{N}$; lon. $3^{\circ} 42^{\prime} \mathrm{W}$. It is regularly laid out, the houses gencrally neat and substantial, some of them handsome, is airy and cleanly, and has a cheerful and thriving appearance. The only places of worship are a Free church and a Baptist meeting-house. The most important features of Grangemouth are its harbour, warehouses, docks, and quays, all of which are spacious and commodious. The wet dock, which is large, is eapable of admitting vessels of the largest class, the entrance lock being 55 ft . wide, and 24 deep. The trade consists principally in the export of conl, glass, bricks, pig-iron, cast-iron, cotton, manufactures, \&e.; and in the import of timber, corn, tallow, flax, hemp, matting, tar, bark, cheese, madder, \&c. Ship-building is carried on to a considerable extent, as are also the manufacture of sails and ropes. There is a custom-house here, the only public building in the place. Pop. 1488.

GRANICUS [modern, Karakasu], a small but celebrated river, Asiatic Turkey, pash. Anatolia, rises N.W. Mount Ida, and falls into the Sea of Marmara, W. side of the Gulf of Antaki, after a course of about 45 m . On the banks of this stream, Alexander the Great gained his first decisive victory over Darius; b. с. 334.

GRANICZ, or Hranownicza, a market tn. Hungary, Hither Theiss, co. Zips, at the foot of the Carpathians, 14 m . W.S.W. Leutschau, with a castle and a R. Catholic church. Pop. 1200.

GRANJA-de-Torreilermosa, a tn. Spain, Estremadura, prov. of, and 70 m . from Badajoz. It is indifferently built, the houses being generally of only one story, with a loft above. It has a large and two small squares, a parish church, townhouse, prison, and primary school ; manufactures of woollen and linen cloth, and some trade in corn, wool, and cattle. Pop. 1780.

GRANJA (La), a royal palace, Spain. Sce Ildefonso (St.)
GRANNOCH (LOcH), a lake, Scotland, stewartry Kirkcudbright, par. Girthon. It is about 3 m . long by half a mile broad, and abounds with excellent trout.

GRANOLLERS-del-Valles, a tn. Spain, Catalonia, prov. of, and 19 m. N. by E. Barcelona, l. bank Besos. It is indifferently built, has narrow and badly-paved streets, four squares, a large parish church, chapel, two schools, a townhouse, prison, hospital, and storehouse. Manufactures:linen, woollen, and cotton fabrics, earthenware, and hempen shoes. Trade:-grain, fruits, and manufactured goods. Two annual cattle fairs. Pop. 3032.

GRAÑON, a tn. Spain, prov. of, and about 30 m . from Logroño, on a height. It was once surrounded by a wall, and defended by a castle, but of both only vestiges now remain. It has a parish church, primary school, old hospital, several flour-mills, and a trade in corn and cattle. Pop. 1077.

GRANOZZO, a vil. and com. Sardinian States, Piedmont, div. and 6 m. S.S.W. Novara, near the Agogna. It has a church, and a trade in rice and corn. Pop. 1300.

GRANSDEN, two pars. Eng. :-1, (Great), Huntingdon; 3200 ac. P. 622. -2 , (Little), Cambridge; 1896 ac. P. 273.

GRANSEE, a tn. Prussia, prov. Brandenburg, gov. of, and $42 \mathrm{~m} . \mathrm{N}$. Potsdam. It is walled, has two gates, two squares, in one of which is a bronze statue of Queen Louisa of Prussia; two churches, a Gothic chapel, and two hospitals; manufactures of woollen and linen cloth, a trade in cattle, and four annual fairs. Pop. 2626.

GRANSTON, par. Wales, Pembroke. Pop. 164.
GRAN'TA, a river, England. See Cam.
GRANTCIIESTER, par. Eng. Cambridge; 1591 ac. Pop. 606.

GRANTIIAM, a parl. and municipal bor., market tn., and par. England, on the ancient Ermine Street, co. and $22 \frac{1}{2} \mathrm{~m}$. S.S.W. Lincoln; a station on the Great Northern Railway. It is well built, principally of brick, well paved, lighted with gas, and amply supplied with water; has a beautiful Gothic church, of the 13 th century, with a lofty tower, and spire of 273 ft . high; two other churches; and places of worship for Independents, Wesleyans, Calvinistic Methodists, and R. Catholics. At the free grammar-school of this town, Sir Isaac Newton received his classical education, previous to entering Trinity College, Cambridge. There are, besides a large commercial academy, a free national school for boys, another for girls, and several other schools; a philosophical and a literary institution, and a number of benevolent and charitable societies. About 24,000 quarters of malt are made here annually; and there is a good general trade. Some corn is exported, and coal imported. Market day, Saturday; several fairs annually. The borough has returned two members to the House of Commons since the 7th of Edward IV. Registered electors (1851), 752. P. 8786.-(Local Correspondent.)

GRANTLEY HARBOUR, an inlet, Behring Strait, Russian America, about lat. $65^{\circ} 15^{\prime} \mathrm{N} . ; 10 \mathrm{~m}$. long, $2 \frac{1}{2} \mathrm{~m}$. broad, and 2 to 3 fathoms deep.

GRANTON, a vil. and seaport, Scotland, belonging to the Duke of Buccleugh, S. shore of the Firth of Forth, co. of, and 3 m. N.W. Edinburgh, and about the same distance W. Leith, with both of which it is connected by railway. Being of but recent formation, it has little yet to beast of but its fine pier and handsome hotel. The houses are mostly of brick, but there are also some elegant stone buildings; forming, as
regards situations, very pleasant residences. Steamers of large class ply regularly between Granton and London, and the importance of the place, generally, is rapidly increasing. There is a good school in the village. Her Majesty Queen Victoria landed and embarked here on the occasion of her visit to Scotland in 1842.

GRANTOWN, a vil. Scotland, co. of, and 25 in . S.E. Inverness, picturesquely situated within $\frac{1}{2} \mathrm{~m}$. of the Spey. It has one principal street, with a large square in the centre, where the cattle markets are held; houses generally two stories, built of blue granite, slated, and with $\frac{1}{2} \mathrm{ac}$. of ground attached to it. There are an Established and a Free church, and a Baptist meeting-house; an orphan hospital, school, library, jail, and courthouse. In the vicinity are several saw-mills, a carding, and two meal mills. Pop. (agricultural), upwards of 1000.- (Local Correspondent).

GRANVILLE [Jatin, Grannonum], a seaport tn. France, dep. Manche, 15 m . N.W. Avranches, at the mouth of the Boseq, in the English Channel ; lat. $48^{\circ} 50^{\prime} 6^{\prime \prime}$ N.; lon. $1^{\circ} 36^{\prime} 45^{\prime \prime}$ W. (R.) It is built, in terraces, on the side of a promontory projecting into the sea, and crowned by a fort, and is surrounded with strong walls. It consists of houses of dark granite, roofed with black slate, and of steep, narrow strcets, the whole having a very dull and unattractive appearanco, aggravated by the abominable filthiness which prevails, and, in hot weather, becomes almost pestilential. It is the seat of a court of commerce, and of a hydrographical school of the third class; contains a parish church of gray granite, with sculptured capitals, and in the late flamboyant style; and an hospital; and has a harbour with a noble pier, so strongly built as to be capable of mounting cannon, and in which, though it is left dry at low water, the tide rises occasionally from 40 to. 44 ft . The chief employments are coasting, fishing, and shipbuilding, and the trade is in wine, brandy, oil, salt provisions, rennet apples, iron, and pitch. There is an annual fair. Granville was attacked, without success, by the Vendéans in 1793, and bombarded by the British in 1803. It is much frequented for bathing quarters. Pop. 8315.

GRAU (Villanueva del), or Grao de Valencia, a seaport tn . Spain, prov. of, and 4 m. E. Valencia, of which it is the port, at the mouth of the Guadalviar or Turia. It has a townhall, parish church, prison, and two schools. Inhabitants chiefly fishermen. Pop. 2736.

GRAPPENHALL, par. Eng. Chester; 2550 ac. P. 2498
GRASBY, par. Eng. Lincoln; 1720 ac. Pop. 374.
GRASIIOLM, or Gresholm, an isl., S. Wales, co. Pembroke, $13 \frac{1}{2} \mathrm{~m}$. N. W. Milford Haven; lat. $51^{\circ} 43^{\prime} 54^{\prime \prime} \mathrm{N}$. ; lon. $5^{\circ} 28^{\prime} 45^{\prime \prime}$ W. ( n. ) ; about $\frac{3}{4} \mathrm{~m}$. in circumference, and 146 ft . high; generally the first land seen or approaching Milford from the W. -2 , An islet, Orkneys, S. of Shapinsay.

GRASLITZ, Greklis, or Gradlicze, a tn. Bohemia, circle Elbogen, in a valley, between high hills, at the confluence of the Silberbach with the Zwoda, 89 m . W.N.W. Prague. It has a handsome chureh; manufactures of musical instruments, woollen and cotton cloth, lace, spoons, and various articles in wire and brass, and an extensive bleachfield. Near it are some mines. Pop. 3600.

GRASMERE, a par., vil., and lake, England, co. West-morland.-The Village, picturesquely situated at the head of the lake, $3 \mathrm{~m} . \mathrm{N} . W$. Ambleside, contains an ancient church, in the churehyard of which is the grave of Wordsworth the poet.-The LAKE is of an oval form, about 1 m . long, by $\frac{1}{2} \mathrm{~m}$. broad, and completely surrounded by mountains, presenting beautiful scenery. Area of par. 24,550 ac. P. 1681.

GRASMERE FELL, a mountain, England, co. Cumberland, near Crummock Water, height 2756 ft .

GRÄSO , an isl. Sweden, at the entrance of the Gulf of Bothnia, and only separated from the mainland, on which the town of Oregrund stands, by a narrow channel ; in lat. $60^{\circ} 25^{\prime}$ N. It consists of a long narrow tract, stretching S.S.E. and N.N.W., and very much indented on its E. side; greatest length, about 18 m ., and average breadth not more than 3 m .

GRASSANO.-1, A tn. Naples, prov. Basilicata, 25 m . E. by S. Potenza, r. bank Carmine. It has a church, a convent, and a benevolent association for endowing poor girls. Pop. 3370.-2, (or Grazzano), A vil. and com. Sardinian States, Piedmont, div. Alessandria, on the Rotaldo, about 8 m . from Casale. It has an ancient parish, and several minor churches; a tannery, and a trade in wine. Pop. 1360.

GRASSE, a tn. France, dep. Var, beautifully situate on the S. slope of a hill, on which the town rises in the form of an amphitheatre, 23 m. E.N.E. Draguignan. The unevenness of the site makes the streets stcep and winding, but, on the whole, it is well built, is abundantly supplied with water from several fine fountains, is the seat of a court of first resort and commerce, possesses a communal college, a secondary ceclesiastical school, and an agricultural socicty ; contains a large Gothic church of ungainly appearance, a handsome and well-arranged hospital, a public library, and a theatre; and has, next to Paris, the largest manufactures of perfumery in France. The materials are furnished by the flowers of roses, orange, lemon, heliotrope, \&c., which are cultivated on so extensive a scale in the surrounding districts, that the nurseries of Cannes alone are said to be sold, on an average of years, at £8000. Pop. 6706.

GRASSINGTON, a vil. and township, England, co. York (W. Riding), $8 \frac{1}{2} \mathrm{~m}$. N.N.E. Skipton, with mines yielding nearly 1000 tons of lead annually. Pop. 1056.

GRASVILLE-L'Heure, or Grivilie, a vil. and com. France, dep. Seine-Inferieure, 3 m . E.N.E. Havre. It was originally situated on a height commanding a bay, to which the Norman pirates used often to resort, but the bay has been completely silted up, and the village is now about 2 m . from the sea. It contains two churches, finely situated on a plateau, but one of them a mere ruin. Pop. 8481.

GRA'TALLOPS, a tn. Spain, Catalonia, prov. and about 24 m . from Tarragona, with a parish chureh, townhouse, primary sehool, and a trade in wine. Pop. 1177.

GRATELY, par. Eng. Hants; 980 ac. Pop. 141.
GRATWICH, par. Eng. Stafford; 800 ac. Pop. 119.
GRÄ'T'/, or Grodzisko, a tn. Prussia, prov. of, and 22 m . S.W. Posen. It has a Protestant and a R. Catholic church, a Bernardine monastery, mannfactures of leather, woollen and linen cloth, a trade in cattle, and four annual fairs. P. 3321.

GRÄTZ, [Jatin, Gratium; Slavonic, Nimetzki-Grad], a tn. Austria, cap. duchy Styria, on both sides of the Mur, at the end of a long but narrow plain, called the Grätzer Feld, surrounded with gentle hills, covered with gardens and fine villas, $90 \mathrm{~m} . \mathrm{S}$. W. Vienna, on the railway thence to Trieste. It consists of the inner town, l. bank of the river, surrounded by a wall with six gates, and onee defended by a citadel, strongly placed on a hill near its centre, but now demolished, and converted into a promenade; and of three suburbs, with which a communication is maintained by three bridges. It is irregularly built, and has generally dark, narrow, and steep streets, well paved, but by no means clean. The houses are, for the most part, large and substantial, and not a few are remarkable for their clegance. The Murgasse, the widest and finest street, is lined with good shops and other buildings, of a substantial and showy appearance; and the principal squares, the Hauptewacheplatz, inclosing a large space, of a triangular form, and the Franzensplatz, so called from con taining a statue of the Emperor Francis I., are both regular and handsome. The public edifices include no fewer than 22 churches, 4 monasteries, and 3 nunneries. The most deserving of notice are-the Dom, or cathedral, built in 1456, a majestic Gothic structure, with a pavement of marble, a superb high altar, and several fine frescoes, statues, and paintings; near the cathedral, the mausoleum of the Emperor Ferdinand II., a neglected chapel, in the Italian style, where, through an opening in the coffin-lid, is shown a little dust, the only mortal remains of that relentless persecutor of the Protestants; the Refectory, the largest building in Gratz, now converted into a public school; the parish chureh, conspicnous by its handsome, lofty tower; the Burg, an old palace of the Styrian dukes, an irregular structure, now forming the governor's residence, the Landhaus, in which the Estates hold their meetings, and in one wing of which there is an arsenal, with a curious collection of old armour; the university, founded in 1586, possessed of an extensive library and good botanical garden, and attended by about 800 students; and the Johanneum, so called from its founder, Archduke John, a noble institution, designed to encourage art and science generally, and the manufactures of the duchy in particular, by the delivery of gratuitous lectures, and the formation of a library and a collection of minerals and other productions. The educational establishments, in addition to the university, include 15 superior schools for general
education, 9 Sunday schools, a normal high school, gymna sium, ecclesiastical seminary, military school, swimming school, music school, and school of design, \&c. The benevolent institutions include a general infirmary, with a lying-in institution and a lunatic asylum attached; an Elizabeth, military, burgher, and several other hospitals. The manufactures consist of woollen, cotton, and silk tissues; leather, and numerous articles of ironware. The trade is chiefly in iron, timber, flax, hemp, and seeds. The two annual fairs are numerously attended by dealers from distant quarters. Gratz is the see of a bishop, the seat of the superior courts and offices of the duchy, and possesses literary, agricultural, musical, and other societies. The environs afford numerous fine promenades; but great devastation is often committed by the flooding of the Mur. The celebrated orientalist, Von Hammer, is a native of Gratz. Pop. (1846), 51,349. The circle is for the most part hilly, but is well wooded; contains much arable land, numerons orchards and vineyards, and is rich in minerals, including some coal, and valuable mines of argentiferous lead. Area, 1568 geo. sq. m. Pop. 335,700 .

GRAT'ZEN, or Böumisch Gratz, a tn. Bohemia, circle of, and 19 m. S.E. Budweis, on a height above r. bank Danko. It is surrounded with walls and ditches, contains an old castle, seated on its highest point ; two other castles, a church, and Servite monastery ; and has three mills, a weckly market, and three annual fairs. Pop. 1572.

GRAUBÜUDEN, Switzerland. See Grisons.
GRAUDENZ, or Grudziadz, a th. W. Prussia, gov. of, and 18 m. S.S.W. Marienwerder, cap. circle of same name, r. bank Vistula, here crossed by a bridge of boats. It stands in a fertile plain, and is a place of considerable strength, being both surrounded by walls and ditches, and otherwise fortified; contains a Protestant and five R. Catholic cburches, a normal and superior burgher school, a nunnery, house of correction, and two hospitals; and has manufactures of cloth, tobacco, and carriages; breweries and distilleries; a trade in cloth and corn, some shipping, and four annual fairs. Pop. 8607. -The circle, for the most part flat, is watered by the Vistula and Ossa, and is fertile. Area, 253 geo. sq. m. P.47,195.

GRAULHET, a tn. France, dep. Tarn, 14 m . S. W. Alby, agreeably situated, l. bank Adou. It has manufactures of linen, hats, and leather; numerous tanneries and bleacheries; and a considerable traffic in horses. Pop. 2684.

GRAUN, a vil. and par. Austria, Tyrol, circle and 30 m . S.S.W. Imst, near a lake of same name, and more than 4500 ft . above the sea. It contains two churches, one of them adorned with a fine altarpiece; and a school. Pop. 736.

GRAUPEN, or Kraupen, a tn. Bohemia, circle Leitmeritz, in a deep valley, 2 m . N.E. Teplitz. It contains threo churches, a townhouse, and remains of an ancient nunnery; and has manufactures of hosiery, and two annual fairs. Tin is worked in the vicinity; and on an adjoining hill stand the ruins of the old castle of Rosenburg. Pop. 1408.

GRAUS, a tn . Spain, Aragon, prov. of, and 36 m . E. Huesca, on a height, above r. bank Esera. It is well built and well paved, has lighted strects, and a large and handsome square; a large but somewhat ungainly parish church, a townhonse, with prison; a Latin and a prinary school; manufactures of paper and leather; a trade in wine, fruit, and silk; and three large annual fairs. Pop. 1783.

GRAVE, or Graaf [Latin, Gravia], a tn. Holland, prov. N. Brabant, $7 \mathrm{~m} . S . W$. Nijmegen, on the Maas. It is walled, and recently fortified anew, and surrounded by a wide, deep ditch, filled with water from the river. The land round about is low, and annually flooded, so as to render the site of the town, for the time being, an island. It has three gates; one of which, the Hampoort, is a strong bomb-proof building, estecmed the finest of the kind in the kingdom; and so large, that, in time of siege, it will hold concealed two battalions of infantry. Of twelve streets of which the town is composed, fuur open out on a large open area or market-place, surrounded by good houses, and in which stand the townhouse, an elegant building; the watchhonse, and the R. Catholic church, founded in 1290 . There are several charitable and benevolent institutions, and several schools. Some common stripes are woven, and there are cotton-printing factories. Lace is made; and there are several silver and gold smiths, four breweries, and a gin distillery. Pop. 2478.

GRAVEDONA, a tn. and par. Austrian Italy, prov. and 27 m . N.N.E. Como, on the Lario, near lake Como. It is well built, and is terminated at one extremity by a beantiful parish church, and at the other by the palace of the Duke of Alvito. It is the seat of a court of justice, and residence of many Italian nobility; and has several silk mills. Pop. 3200 .

GRAVELAND [Dutch, 'S Graveland], a vil. Holland, prov. N. Holland, 16 m. S.E. Amsterdam. It is a regularly built, neat place, with a Calvinistic church and a school. Near it are numerous linen bleacheries. Pop. 1207.

GRAVELINES, a seaport tn . France, dep. Nord, 11 m . W. Dunkirk, in a marshy country, near the mouth of the Aa, in the English Channel ; lat. $50^{\circ} 6^{\prime \prime} \mathrm{N}$. ; lon. $2^{\circ} 6^{\prime} 45^{\prime \prime}$ E. (r.) It is tolerably well built, but has a desolate and deserted look, and is only deserving of notice for its fortifications, which are themselves of great strength, and may be rendered almost impregnable by opening the sluices, and laying the surrounding country under water. It makes a considerable figure in the wars of Flanders. Pop. 1838.

GRAVELLONA, a tn. Sardinian States, Piedmont, div. of, and 10 m . S.E. Novara, r. bank Terdoppio. It is the seat of a court of justice, has a parish church, and two monasteries: a weekly cattle market, and a trade in rice, corn, wine, and vegetables, particularly asparagus, which is sent as far as Milan. Pop. 1904.

GRAVELY, two pars. England:-1, Hertford; 2110 ac. Pop. 403.-2, Cambridge, 1558 ac. Pop. 294.

GRAVENDEEL, a vil. Holland, prov. S. Holland, 3 m . S. Dordrecht. It is a neat, beautiful place, with a church, a school, and an annual fair. Pop. 928.

GRAVENEY, par. Eng. Kent; 1920 ac. Pop. 214.
GRAVENHAGE (S'), Holland. See Hague.
GRAVENHURST, two pars. England, co. Bedford:-1, (Lower-), 1240 ac. Pop. 50.-2, (Upper-), 385 ac. Pop. 373.
GRAVENSTEIN, or Grasteen, a vil. Denmark, Schleswig, in a fertile and well-wooded district of same name, on the Nübel-Roer, 11 m . N.N.E. Flensborg. It contains a castle, with a chapel and fine garden. Pop. 500.

GRAVERE [Latin, Glarearia], a vil. and com. Sardinian States, Piedmont, div. Turin, r. bank Dora-Reparia, not far from Susa. It stands exposed to the ravages of a torrent called the Gelasca, from which it is defended by a number of strong embankments; contains an ancient parish church, a minor church, and a palace; and has a trade in wine, wood, chestnuts, and other kinds of fruit. Pop. 1756.

GRAVESEND, a municipal bor., river port, tn. and par. England, co. Kent, r. bank Thames, 21 m . E. by S. London, on the N. Kent railway, and on an acelivity rising from the river. The older and lower part of the town is irregular, streets narrow, and not very clean. In the upper and newer portion the streets are more spacious, and the houses much handsomer, with a number of neat detached villas. The town is generally paved, lighted with gas, and tolerably well supplied with water. The townhall is a neat and conspicuous structure, in the Doric style of architecture; the literary institution and assembly-rooms is also a tasteful building in the Grecian style. There are, besides, a theatre, commodious market-house, custom-house, and bazaars; likewise several picrs, two of which, both very handsome and convenient structures, are mostly of cast-iron. The church, which stands near the centre of the town, is a neat brick building. There are also a chapel of ease, and places of worship for Independents, Baptists, Wesleyans, and R. Catholics. The charitable bequests for the relief of the poor are numerous, and comprise a free school, and several almshouses. Shipbuilding is carried on here to a considerable extent, and ropes and twine are manufactured; but the principal trade of the place arises from supplying the numerousships which,on their passage outward, stop to take in stores, \&c.; and furnishing the seamen with slop-clothing. The convenient distance of Gravesend from London, the mildness and salubrity of its air, and the beauty of its scenery on all sides, attract numerous visitors, for whom every accommodation is provided-excellent inns, numerous lodging-houses, baths, assembly and reading rooms, libraries, \&c. Abont a mile from the town a new cemetery has been formed, occupying 5 or 6 ac., tastefully laid out.

Gravesend is the boundary of the port of London, where all vessels arriving from foreign countries deliver in their mani-
festos, and take on board the revenue-officers, \&c. On the opposite side of the river, which is licre about 1 m . broad, is Tilbury fort, with which there is communication by a steam ferry. Pop. of par. 6414.

GRAVEZANDE [anc. Arena Comitis, and formerly shortened Zande or Sande], a vil. Holland, prov. S. Holland, 8 m . S.W. the Hague, on the sand-downs on the sea-coast, and near the Hook of Holland. It was formerly walled, and larger than it is now, and had also a harbour, but it now stands back from the shore, and consists cliefly of a broad, well-paved street; and has a church, townhouse, and school. Pop. 1346.

GRAVINA, $a \mathrm{tn}$. Naples, prov. and 34 m. S.W. Bari, 1. bank Gravina. It is a bishop's see, has a cathedral, several churches, convents, a college, and two large annual fairs. It was anciently a place of considerable strength, and was besieged unsuccessfully by the Saracens in 975 . Pop. 8690.

GRAY [Latin, Greium], a tn. France, dep. Haute-Saône, on a hill overlooking a beautiful meadow watered by the Saône, here crossed by a handsome bridge, 27 m . N.W. Besançon. It is built in the form of an amphitheatre, and at a distance presents an attractive appearance; which is, however, belied by a nearer inspection; the streets being so narrow and irregular, as to make walking in them anything but agreeable. It is the seat of a court of first resort, and commerce; possesses a communal college and an agricultural society; contains a parish church, townhouse, courthouse, public library, cavalry barrack, and an ancient castle; and has manufactures of hair-cloth, Paris paint, starch, glue, leather, and refined wax; and an elegant quay, serving both as a promenade, and furnishing great facilities for trade, which is chicfly in iron, corn, wine timber, and colonial produce. There are also six arnual fairs. - Pop. 6448.

GRAYINGHAM, par. Eng. Lincoln; 1930 ac. Pop. 157.
grays Thurrock. See Thurrock Grays.
GRAYSTOWN, a par. Ireland, Tipperary; 7802 ac. Pop. 2546.

GRAZALEMA [anc. Lacidulemium], a tn. Spain, Andalusia, prov. of, and 58 m . E.N.E. Cadiz, on a slope at the foot of the sierra of same naune. It is indifferently built, and has only one square, of small extent, but well laid out in flowery walks ; contains a parish church, a large and handsome Gothic structure; another church, which belonged to a suppressed Carmelite monastery; a townhouse, four primary schools, and four hermitages, one of them called Aurora, a strong, massive structure, in which, during the Peninsular war, a number of the inhabitants successfully defended themselves and part of the town against an incursion of the French. The manufactures, of more importance than usual in Spanish towns, consist of woollen and linen cloth, flannel, soap, leather, ordinary and cordovan; and there are several dyeworks, carding machines, fulling, walk, and thread mills. The above articles of manufacture employ about 4000 persons, and furnish the materials of a considerable export tradc. The chief import is grain. Pop. 8388.

GREAN, par. Irel. Limerick; 7191 ac. Pop. 3755.
GREASLY, par. Eng. Notts; 8010 ac. Pop. 5184.
GREAT and LITTLE TOMBS, two small isls. Persian Gulf; the former lat. $26^{\circ} 15^{\prime} \mathrm{N}$. ; lon. $55^{\circ} 23^{\prime} \mathrm{E}$.; and the latter lat. $26^{\circ} 15^{\prime} \mathrm{N}$. ; lon. $55^{\circ} 12^{\prime} \mathrm{E}$. (r.)
great bear lake, America. See bear lake.
great britain. See Bratisi Empire.
GREAT FALLS, a vil. U. States, New Hampshire, at Quamphigan falls, Salmon Falls river, 40 m. E. by N. Concord. It contains four churches, and extensive cotton and woollen factories. Ships of 250 tons come within a mile of the village. Pop. 2500.

GREAT FISH BAY, an inlet of the Atlantic, W. coast Africa; lat. (Tiger point) $16^{\circ} 30^{\prime} 12^{\prime \prime}$ S.; lon. $11^{\circ} 46^{\prime}$ E. (r.)
great Fish river. See Fish River (Great).
GREAT ISLAND.-1, An isl. Ireland, co. Cork, the largest in Cork harbour. It is about 5 m . long, by 2 m . broad; has much fine scenery, a productive soil, and many beautiful seats. On the S. side is situated the town of Cove, or Queenstown (which see). Pop. 10,681.-2, An islet, Ireland, co. of, and $1 \frac{1}{2} \mathrm{~m}$. N.E. Wexford, on the N. side of Wexford harbour.-3, An isl. Bass's Strait, between Australia and Van Diemen's Land, being the largest of the Furneaux group. It is 40 m . long, by about 15 m . broad, and is much frequented by sea-fowl and seals.

GREAT SALT LAKE.-1, A lake, U. States, Utah or Mormon territory, intersected by lat. $41^{\circ} \mathrm{N}$. and lon. $113^{\circ} 20^{\circ}$ W. It is 4000 ft . above sea-level, $70 \mathrm{~m} . \mathrm{N}$. to S., and 48 m . L. to W. Five gallons of its water yield, by evaporation, fourteen pints of salt. It has several islands, which, with its shores, are whitened by the salt; and it receives the Bear, the Utah, and several other streams, but contains no fish.-2, A county, same territory, and the most populous of the seven into which it is divided. Pop. 6157.

GREA'T SOUTH BAY, a navigable bay, U. States, New York, S. side of Long Island, 50 m . long, and 5 m . wide, with a lighthouse on its W. end.

GREATCTNNELLL, par. Irel. Kildare; 4848ac. P.2212.
GREATFORD, par. Eng. Lincoln; 1540 ac. Pop. 264.
GREATHAM, three pars. England:-1, Durlam; 2430 ac. Pop. 687.-2, Hants; 4230 ac. Pop. 205.-3, Sussex; 1030 ac. Pop. 64.

GREA'TWOR'TH, par. Eng. Northamp.; 1010 ac. P. 184.
GREBE, or Grift, a small river, Holland, forming part of the boundary between provs. Utrecht and Gelderland, tlowing S.E. and S.W., and falling into the Rhine, near the village of same name, 2 m . E. Rheenen.

GREBENS'TEIN, a tn. IIesse-Cassel, prov. Niederhessen, 11 m. N.N.W. Cassel. It is walled, has six gates, a church, clapel, hospital, and infirmary; manufactures of linen, and four annual fairs. Pop. 2455.

Grecian arcilipelago. See Ggean sea.
GREDING, a th. Bavaria, circle Middle Franconia, I. bank Schwarzach, 33 m . W.N.W. Katisbon. It has three churches, two eastles, one of them in ruins, and a poorhouse; inanufactures of tobaceo-pipes and coarse woollens; and several breweries and mills. P'op. 1075.

GREECE [Greek, Ifellas (Eג ${ }^{(1) a s) \text {; Latin, Grecia; French, }}$ Grèce; German, Griechenland; Arabic, Roum], a kingdom in the S.E. of Europe, between lat. $36^{\circ} 23^{\prime}$ and $39^{\circ} 13^{\prime} \mathrm{N}$. ; Ion. $20^{\circ} 45^{\prime}$ and $26^{\circ} \mathrm{E}$.; separated from Turkey, on the N., by an irregular line which stretches between the Gulf of Arta, on the W., and the Gulf of Volo, on the E., in the direction of Mount Othrys; and bounded on all other sides by the seathe Ionian Sea on the W., the Mediterranean proper on the S., and the Egean sea on the E. (cap. Athens.) It consists partly of mainland, and partly of islands. The mainland forms two peninsulas, united only by the narrow Isthmus of Corinth; a N. peninsula, called N. Grecee, or Livadia; and a s. peninsula, called the Peloponnesus or Morea. The islauls are chiefly on the E. and S.E. The far largest is Euboa, ouly separated from the mainland of Livadia by the narrow channel of Euripo. The other islands form three principal groups:-The N. Sporades, on the N.E. of Negropont, including Skiatho, Kilidromi, Skopelo, Polognesi, and Skyro; the W. Sporades, chicfly in the Gulf of Egina, or between it and the Gulf of Nanplia, ineluding Hydra, Spezzia, Poros, Egina, and Koluri or Salamis; and the whole of the Cyclades, with exception of Chios, Samos, Lestos, and some islands on the coast of Asia Minor, which still belong to Turkey. The Cyclades are divided into three groups-a N., a middle, and a W. The N. includes Andro, Tino, Myconi, Syra, Thermia, Zea, and Serpho; the mildle-Naxia, Paro, Nio, Sikyno, Policandro, Milo, Argentiera or Kimelos, and Siphanto or Siphos; and the S.-Amorgo, Stampalia, Anaphi, and Santorin. Area estimated, by some authorities, at 14,368 geo. sq. m.; by others at 11,480 geo. sq. m. Pop. (1840), 956,000 .
By the enactment of June 22, 1838, Greece was politically divided into 24 departments or govermments, and 7 subdepartments or governments; but in the end of 1845 it was resolved to revert to the arrangement established April 15, 1833; according to which the country is divided into 10 nomes or nomarchies, and 49 eparchies or dioceses :-

Physical Features.-On looking at the map of Greece, the first thing which strikes the eye is the comparatively vast extent of its coast line, formed by numerous gulfs, which penetrate into it in all directions, and give it a remarkably broken and ragged appearance. Proceeding round the coast, from the N.W. to the N.E., we are presented in succession with the gulfs of Arta, Patras, continued inland by that of Corinth; Arcadia, Koron, Kolokythia or Marathon, Nauplia, Egina, Molo or Zeitoun, and the channels of Talanti and Tricheri. Another characteristic feature is the mountainous character of the interior. The range of the Pindus, which in the N. is linked to the Dinaric Alps, proceeds S.; and, on reaching the N . fronticrs of Greece, divides into numerous minor clains, which, with their ramifications, extend over the whole length and breadth of the country, and cover the far greater part of its surface, leaving little intermediate space for valleys and plains. The principal branch, stretehing $\mathbf{E}$. and W. along the N. fronticr, attains, in Veluchi, near the sources of the Ellada and in Cheledonia, near Karpenitza, heights varying from 7000 to 8000 ft . Further E., in the chain of Oeta, is Mount Guiona, 8240 ft ., the culnninating point of Greece. Another branch, stretching in an E.S.E. direction towards Attica, forms the celebrated range of Parnassus, which, in Liakhura, its loftiest summit, exceeds 8000 ft . Other summits, continucd in the same direction, though more distinguished for their classic celebrity than their elevation, attain, in Cithæron, Parnes, Pentelicus, and Ilymettus, the respective heights of $4630,4640,3640$, and 3370 ft . Ant other range, to the N . of the former, and nearly parallel to it, stretches longitudinally through the island of Euboea; and in the Delphi Mountains, not far from the N.E. coast, attains the height of 5400 ft . Several other summits of this range exceed 3000 ft . Quitting N. Grecee, a branch from Mount Citharon proceeds across the Isthmus of Corinth into the Morea, and stretches over it in all directions. Many of the summits exceed 5000 ft ; and Taygetus, W. of ancient Sparta, forming part of the range which proceeds S. to the extremity of the Morea, attains in its culminating point, Makryno or St. Elias, 7829 ft . The rock most largely developed in the mountains of Greece is limestone, where it often assumes the form of the finest marble, and has been extensively used, both for building and statuary. To the E. of Attica mica slate ocenrs in connection with the limestone; and also is scen in the mountains, both of the S.E. and N.W. of the Morea. Granite and gueiss are found only in the N., in the E. ramifications of the P'indus. Tertiary formations prevail in the N.E. of the Morea; and in the N.W., along the shores of Elis, are considerable traits of alluvium. Volcanic rocks are not seen on the maiuland, but form considerable masses in some of the islands; one of which, Santorin, is indeed only a recently extinct volcano. In addition to marble and limestone, already mentioned, the minerals include traces of gold, argentiferous lead, copper, lignite, sulphur, saltpetre, alum, asbestos, millstones, whetstones, serpentine, fullers', and porcelain earth.

Rivers, de.-Owing to the nature of the surface, the rivers are more remarkable for their number than for their inportance. The largest is the Aspropotamos [anc. Achclöus], which, rising in Albania, on the W. slope of the Pindus, enters Greece in lat. $39^{\circ} 9^{\prime}$ N.; flows S.S.W. through the W. part of N. Greece, and falls into the Ionian Sca opposite to the isle of lthaca. The only others deserving of notice-not so much ou their own account, as of the interesting associations connected with them-are, the Ellada or sperehius, the Gavrioz or Bootian Cephissus, the Cephissus of Attica, the Ilissus, all, likewise, in N. Gireece; and the Rhoupha or AIpheus, and the Eurotas, in the Morea. The principal lakes are, in N. Greece, the Topolias or Copais, Vrachori, Ainbrakia, and Ozeros; and in the Morea the lagoons of $\Lambda$ golinitza, Kaiäpha, and Muria, famous for their fisheries.

Climate. This is mild but variable. None of the mountains attain the limit of perpetual snow; but several of them are so lofty as to retain a covering of it after the summer has far advanced. In general, the first snow falls in October, and the last in April. In the lower grounds it often becomes six inches deep, but melts quickly away ; and winter, properly so called, cannot be considered as lasting beyond two months. summer is extremely warm. The thermometer often rises above $100^{\circ}$; and the lieat would become almost mnsupport

Vol. I.

## GREECE

able, were it not greatly modified by breezes from the sea. At this season rain scarcely ever falls, and the channels of almost all the minor streams become dry. The air is then remarkably clear, and a month will sometimes pass away without a cloud being seen. A sudden change, however, takes place towards the end of harvest. Rains become frequent and copious; and the streams which had been dried up not only fill their chamels, but frequently overflow them, and lay considerable tracts under water. In this way stagnant pools and marshes are occasionally formed; and, as the heat increases, the vapours arising from them become almost pestilential, and intermittent fevers prevail. Even the plague has sometimes made its appearance; but, on the whole, there cannot be a doubt that few countries in the world can boast of a climate better adapted for the vigorous development, both of animal and vegetable life.

Vegetation, Agriculture, de.-Beyond the height of 5500 ft . vegetation is almost confined to wild alpine plants. Below this height, magnificent forests, principally of pine, with a considerable mixture of hard wood, including oak, clothe the sides and summits of the mountains; and, notwithstanding the havoc which mismanagement and gross waste have made, are still capable of yielding large supplies of excellent timber. Still lower down both the chestnut and walnut are frequently met with. It is not, however, till we descend to a height not exceeding 1500 ft . that the full force of vegetation is displayed. The extensive zone reaching from this height to the level of the sea constitutes the proper agricultural range, and exhibits as great a variety of valuable cultivated trees, shrubs, and plants, as is to be found within the same limits on any other portion of the earth's surface. All the fruits of the latitude-figs, almonds, dates, oranges, citrons, melons, \&c.-are grown in abundance, and of excellent quality, without receiving any great share of attention. The vine also grows vigorously; and, with a little more skill and care in the management of its produce, would not only suffice for the home consumption, as it even now does, but leave a valuable surplus for export. Another article, the culture of which attracts considerable attention, is the currant. But, unquestionably, the culture which in Greece takes precedence of all others is that of the olive. Both the soil and the climate are alike favourable to it; and amid all the changes to which the country has been subjected, the favour with which the olive was regarded in the earliest times has never been withdrawn, and still continues unabated. It would seem, however, that the processes of pressing and refining the oil are susceptible of great improvement; since the greater part of it is of secondary quality, and ranks far below that of Provence. The culture of the mulberry, for the production of silk, has recently been greatly extended, and already promises important results. Owing to the mountainous nature of the country, the arable land is of limited extent, and much of the soil of a thin, and by no means fertile nature. Even under a proper system of agriculture, the produce, in such circumstances, could not be abundant; and hence it is easy to understand how, under a system so antiquated, that the plough in use differs in no respect from that which Hesiod described 3000 years ago, the grain raised barely suffices for two-thirds of the consumption. The principal crops are wheat, barley, and maize. The domestic animals are neither numerous nor of good breeds. The raising of artificial grasses for their maintenance may be said to be unknown; and the scanty herbage which natural pasture affords, in a country where the scorching heat of summer is seldom mitigated by a shower, must be alike incapable, either of rearing good stock or of preventing it from degenerating when it may have been imported. Accordingly, asses are almost the only beasts of burden employed; and the only animals from which dairy produce is obtained are the sheep and the goat. The latter manage to pick up a subsistence among the barest rocks; and the former, of which numerous flocks are often kept, are moved alternately to the mountains and the plains, so as always to be provided with a tolerable supply of food. No attention, however, is paid to the improvement, either of the carcass or the fleece; and though the quantity of wool produced is considerable, it is of a coarse description, and is chiefly worked up for domestic use. The only exceptions are in some parts of N. Greece, and in Arcadia, where a kind of Darbary sheep, and also merinoes, are frequently kept, and
yield a wool which is much admired, both for its length and its fineness. In the same districts, goats of a superior description are kept, and, having long fine hair, are regularly shorn.

Manufactures and T'rade. - The former are extremely limited, and are chiefly confined to clothing and other articles of domestic use, which can be prepared at home by the females. or at spare hours by the males. In some of the large towns, however, the weaving of woollen, cotton, and silk tissues, forms the regular employment of many of the inhabitants, and to them may be added embroidery in gold, silver, silk, and cotton; earthenware, leather, harness, cutlery, and firearms. But unquestionably, the most important branch of manufacturing industry is shipbuilding, which is carried on to a considerable extent on various points of the coast and on various of the islands, particularly at Galaxidi, a town on the N. shore of the gulf of Corinth, at the islands of Syra, Hydra, Spezzia, and Skiatho. The Pireus, also, which was anciently famous for its ships, has again begun to distinguish itself; and at two building-yards recently established in it, a considerable number of merchant vessels, of large burden, have been built. Several of them built there and elsewhere, are from 600 to 700 tons register, a much larger number between 300 and 400 tons, but the great majority are mere boats of from six to seven tons. The whole have been roughly estimated at 4000 vessels, measuring 150,000 tons, and employing 30,000 seamen. Much of the trade carried on is merely coasting, but the foreign trade also is of considerable extent, having advanced with wonderful rapidity since the independence of the country was established. It consists of three principal branches-the corn trade of the Black Sea and Alexandria, carried on on an extensive scale wherever open markets can be found, but chiefly with Turkey, Italy, Spain, France, and England; the export trade of the countries bordering the Levant, principally to London, Trieste, and Marseilles; and the import of the cotton and woollen manufactures of England and Germany, into Greece, Turkey, and Persia. In regard to the last branch, the peculiar advantages which the Greeks possess, in their knowledge of the language, and acquaintance with the labits and wants of the people of these countrics, have given them almost a complete monopoly. Even the English, who have long tried to compete with them, have begun to find it hopeless. The principal exports of Greece are valonia, oil, emerystone, silk, dried figs, currants, raisins, honey, wax, madder, \&c.; the imports cotton, woollen, and silk goods; colonial produce, indigo and other dyes, iron and other metals, hardware, earthenware, corn, \&c.

The Weights and Measures of Grecce have for their basis the Pik, which is the standard lineal measure, and is very nearly $\frac{3}{4}$ of an Euglish yard. For minor leugths, the Palmé $={ }_{1}^{1}$ th Pik, and for greater lengths, the Stadion $=1000$ Piki are used. The principal square measure, forming a multiple of the square Pik, is the Strema, nearly equal to $\frac{1}{3}$ of an English acre. The principal weight is the Oké, about 3 lb . 5 oz . avoirdupois; 20 Okés make a Kilo, the common corn measure, and 44 Okes, the Cantar or Quintal. The money standard is the Drachmé, consisting of nine parts silver and one part copper, and having a value of about $8 \frac{1}{2} d$. English. It is coined into pieces of five drachmés, a half drachmé and a quarter drachmé. Gold drachmés are also coined in pieces having the value of $10,20,40$, and 50 silver draclimés. The principal copper coin is the Lepta, so minute in value, that 100 are contained in one silver drachmé. It is coined in pieces of $1,2,5$, and 10 Lepte.

Government and Feople.-The government is a hereditary monarchy, established, in the line of Prinee Otho of Bavaria, under the express condition that the crown can never be united with that of Bavaria or with any other. As first drawn up by the allied powers, the monarchy was nearly absolute; but, in 1844, important modifications were made, and a constitution granted, in the framing of which those of Great Britain, and of France under Louis-Philippe, were taken as models. By this constitution, the executive power belongs solely to the king; the legislative jointly to the king, a senate, and a representative chamber. The Greek church alone is established, and is governed by 10 bishops, but all other forms of religion enjoy toleration. Justice is administered, on the basis of the French civil code, by a supreme court (A@sios חayos', which has its seat at Athens; two royal couts (Eфirtory), one at Athens, and another at Nauplia; 10 courts
of primary resort (Ifootodixitov), one in each principal town; and three courts of commerce ( $\mathrm{E} \mu \pi$ тogoर̆ıxsiav), one each at Syra, Patras, and Nauplia. The public revenue, derived ehicfly from the rent of national property, the prodnce of forests, indirect and direct taxation, was estimated, in 1850 , at $20,670,285$ drachmé $(£ 732,000)$. Of this, $£ 2.03,000$ were required to meet the interest of debt. The army is estimated at 8918 men, and the navy consists of a few armed sailing vessels, only two of which mount each 26 guns; and two steamers, one of which mounts six guns. The impoverished condition of the finances eripples all the powers of the state, and is the great obstacle to the advance of the national prosperity, the Government obviously feeling paralyzed, and incapable of giving effect to many enlightened views which it is understood to entertain. The population, in 1840, estimated at 956,000 , contains a considerable intermixture of foreign stoeks, among which the Albanese are the most numerous; but the great majority, though not without some taint in their blood, are of genuine Greek extraction, and, both in physical and mental features, bear a marked resenblance to their celebrated forefathers. It is true that the degrading bondage, to which they were subjected for centuries, has sumk them far below their natural level, and too often substituted sycophancy and low eunning for the intellectual superiority whieh, in earlier and better times, displayed itself in immortal productions of the chisel and the pen; but that the original clements of greatness still exist, has been proved by the noble struggle which they made for independence, and the readiness with which they have availed themselves of their altered circumstances, to form schemes and execute measures of improvement. The national dress of the Greeks resembles the Albanian costume. In the males

Country people of the neighbourhood of athens. From Stackelberg, Costumes de la Grece Moderne.
it consists of a tight jacket, generally scarlet, wide trousers descending as far as the knee, and embroidered gaiters; in the females it consists of a vest fitting close to the slape, and a gown flowing loosely behind. Sueh means of edlucation as the limited resources of Government enabled it to afford, have been generally embraced with the greatest eagerness, and not a few of the more wealthy Greeks have come liberally forward to assist in the establishment of schools both for ordinary and superior education. The langnage, too, named Romaic, though somewhat encumbered with barbarisms, and deprived of several of its peculiar graces, makes a nearer approach than any other living language to its dead original, is still sonorous, flexible, and rich; and, though no genius has yet arisen to test its powers, is obviously eapable of conveying the lofticst conceptions in the most attractive form.

History.-The early history of Greece, like that of all ancient nations, is involved in great unecrtainty, notwithstanding the extraordinary ingenuity and learning that have been employed in attempting to unravel it. The original in-
habitants, consisting of varions tribes, now generally classed under the common name of Pelasgi, were gradually expelled or drawn into inaccessible fastnesses by the Itellenes, apparently a people from the East, who are said to have first arrived in the year b.c. 1384. So little is known of them for two centuries after, that the whole period extending to the war of Troy, in 1184, is designated the Heroic Age, and the most authentic records relating to it must be sought for in the poems of Homer. Some centurics later, Greece is found divided into a number of independent states, in all of which, with the important exception of Sparta, a republican form of government was established. The ambitious aims and mutual jealousies of these states led to almost incessant warfare, till the appearance of a foreign oppressor, in the person of the King of Persia, obliged them to bury their animosities, and unite in one general league, as the only means of saving their independence. The first great battle, fought at Murathon, B.c. 490 , was only the commencement of a serics of glorions victories, which issued in the eomplete discomfiture of the Persians, and left them no inclination to renew their aggressions. The epoel embracing the next century and a half (480-336 b.c.), is the most illustrious in Greeian annals. During this period all its greatest writers, orators, seulptors, and architects appeared; and it was not only able to repel attacks on its own independence, but to assume the offensive, and enrich its treasury with foreign spoils. As usual, prosperity provell more trying than adversity had been. Wealth introduced luxury; and the process of degencracy once begun, advanced with fearful rapidity. Not only were the jealousies and enmities of the different states revived, but each state became unscrupulous as to the means of its aggrandizement, and hesitated not to seek the oppression of its neighbours by calling in foreign aid. It was not necessary to go far to obtain it. Immediately on the outskirts of Greece a power had been grallually rising into importance. While the Grecks were wasting their energies in acts of mutual oppression, Plilip of Macedon was calmly maturing his plans; and, had not death overtaken him, must shortly have made himself as absolute master of the destinies of Grecee, as his eclebrated son Alexander afterwards became. Notwithstanding Alexander's death, and the dissolution of his empire, the power of the Macedonian sovereigns continued permanent in Grecce till the Roman conquest, в.c. 146. The early spirit of independence which had animated the Grecks appeared to be now completely broken, and they were ready to be handed over from master to master without even the semblance of a struggle. The erowning disaster commenced A.D. 1438, when the Turks first obtained a footing. A long series of exterminating wars ensued, during which the Venetians and Turks contended for the mastery. The latter ultimately prevailed; and, in 1718 , the highest honour which Greece could claim was that of being a Turkish province. Nearly a century of the grossest misrule followed; but, in 1821, when degralation seemed to have reached its lowest possible limit, a strong reaction commeneed, a new spirit began to appear, and the Greeks, as if throwing off their lethargy, declared their determination to be free. A protracted struggle took plaec, but the issue was still doubtful, when the great European powers interfered, and eompelled the Turks, in 1829 , to acknowledge Grecee as an independent state. The constitution, framed in a spirit of absolutism in 1832, has since been greatly improved; and Prince Otho of Bararia, on whom the crown was bestowed, is now a constitutional monarch.

GREEN BAY, a bay, U. States, E. side of Wisconsin territory, in the N.W. of Lake Michigan. It is 100 m . long, and 15 to 30 broad; receives the Fox and Menomine rivers, and is navigable throughont for vessels of any burthen. At its entrance is a succession of islands extending for 30 mm .

GREEN CAS'TLE, two vils., U. States:-1, Pennsylvania, 56 m . from Harrisburg. It contains five churehes, and several factories. Pop. 1500.-2, Indiana, 42 m . W. by S. Indianopolis, with a courthouse, jail, seminary, and two churches. 1'op. 500.

GREEN ISLAND.-1, One of the Philippines; lat. $12^{\circ} 3^{\prime} \mathrm{N}$. ; lon. $119^{\circ} 49^{\prime} \mathrm{E}$. It is of moderate height, may be scen 15 m . off, and is covered with trces. A coral reef, extending about one-third of a mile, surrounils the island.2. An isl. China Sea, lat. $0^{\circ} 43^{\prime} \mathrm{N}$., in a direet line between the Tambelan and casternmost St. Esprit Islands, rather
nearer than mid-channel to the latter. It is of a square form, with a sandy beach, and covered with trees.-3, Two small isls. China Sea, S. coast of China, called by the Chinese Tsang-Chow, at the entrance to Bias Bay; lat. $22^{\circ} 22^{\prime} \mathrm{N}$.; lon. $114^{\circ} 40^{\prime}$ E.-4, An isl. Australia, N.E. coast, Trinity Bay; lat. $16^{\circ} 46^{\prime}$ S.; lon. $145^{\circ} 56^{\prime}$ E. (R.)-5, A small isl., N . America, in the St. Lawrence, 115 m . below Quebec; lat. $48^{\circ} 3^{\prime} 24^{\prime \prime} \mathrm{N}$. ; Ion. $69^{\circ} 26^{\prime} \mathrm{W}$. (r.) -6, An isl. British N. America, Hudson's Strait, near its E. entrance, N.E. point ; lat. $61^{\circ} 2^{\prime}$ N. ; lon. $67^{\circ} 25^{\prime}$ W. (r.)

GREEN MOUNTAINS [so called from the forests of green trees with which they are covered], a mountain range, U. States, commencing near Newhaven, Connecticut, and extending N. through Massachusetts and Vermont, between Lake Champlain and the Connccticut River. The highest summits are Mansfield Mountain and Camel's Rump, both in Vermont, respectively 4279 , and 4188 ft . high.

GREEN RIVER, U. States, Kentucky, flows generally W. and N.W., and enters the Ohio, 200 m . below Lonisville. It is 200 yards wide at its mouth, and is navigable for boats for about 200 m .

GREENBUSH, a vil. and township, U. States, New York, l. bank Hudson, nearly opposite Albany. It has two churches, a tannery, a distillery, two flour-mills, and several stores. Pop. 3701 .

GREENFIELD, several places, U. States:-1, A vil. and township, Massachusetts, 3 m . W. by N. Boston. The village is neatly bnilt, has four churches, a seminary, and considerable manufactures and trade. Pop. 1756.-2, A township, New York, 40 m . N. by W. Albany, with several mills and factories. Pop. 2803.-3, A vil. Ohio, W. bank Paint Creek, 72 m. S.W. Columbus. It contains four churches, and several manufacturing establishments. Pop. 600.

GREENFORD (Great), par. ling. Middlesex ; 2070 ac. Pop. 588.

GREENIIITIIE, a hamlet, England, co. Kent, pleasantly situated on the Thames, 3 m . E.N.E. Dartford. It has a small pier, from which great quantities of lime and flints, procured in the neighbourhood, are conveyed in barges to London and other places. Pop. 1056.

GREENLAND [Danish and German, Grönland; French, Groënland], an extensive territory, N. America, belonging to Denmark, but, from the inaccessible nature of much of its coast, so imperfectly known that it still remains to be ascertained whether it is partly joined to the Continent, and forms a large peninsula, or cntirely separated from it, and consists of one large and several smaller islands. Part of its boundaries is thins unknown. Its W. coast, which has been most acenrately examined, is washed by Davis' Straits and Baffin's Bay, and stretches from lat. $59^{\circ} 48^{\prime}$, commencing at Cape Farewell, to abont $78^{\circ} \mathrm{N}$. Its E. shore, commencing at the same cape, is washed by the N. Atlantic, but, from the immense quantities of drift ice which cover the whole of the adjoining sea, and render navigation impossible, it is only the $S$. part of this coast that can be considered as explored. The Danish colony extends N., on the W. coast, to the Bay of Disco, in lat. $69^{\circ}$ N., where the sun remains below the horizon from November 30, to January 12, though the long darkness is much reduced by bright moonshine, the stars, and the N. lights. In summer, on the other hand, the light of the sun is continued, without intermission, for a similar period. Farther S., where the sun regularly rises and sets thronghont the year, a short but warm summer, during which the snow does not melt even in the valleys before July, is followed by a long and dreary winter, the cold of which, theugh verry great, particularly in February and March, is greatly modified on the coast by the sea, and therefore not so extrene as the latitude might seem to indicate. The interior is lofty, and has the appearance of one vast glacier, with occasional spots of a dark or grayish luee, on which, from their smoothness and steepness, snow and ice have not been able to accnmulate, and some heaths and mosses succeed in maintaining an existence. The whole of this interior is uninliabitable, and all the villages, whether of natives or Enropeans, are confined to the coasts, which are generally rocky and precipitous, but occasionally flattened down and open into low valleys, are lined with numerous islands, and deeply penctrated by fiords. In the low shores and valleys vegctation is confined, and amounts to nothing more than grass and stunted brushwood. In the
most sheltered spots, the birch and alder gain a height of about 6 ft ., and a stem from 3 to 4 inches in thickness. The attempts to raise oats and barley have failed, but potatoes have been grown towards the S. extremity. Turnips attain the size of a pigeon's egg, and cabbages grow very small. The radish is the only vegetable which seems not to be checked in its growth. With the exception of about 250 , the inhabitants, in 1851, stated to number 9400 , are all Esquimaux (which see). The hardships endured by the missionaries who undertook their conversion, and the success which suddenly crowned their labours after they had almost resolved to abandon them in despair, form one of the most interesting chapters in the history of missionary enterprise. The number of native Christians is estimated at about 1100. For administrative purposes, Greenland, or rather its coast, is divided into the two inspectorates of N. Greenland and S. Greenland, each subdivided into six colonies or districts. Godhavn, pop. 250, on the island of Disco, and Godthaab, pop. 740, where Hans Egide, the Norwegian clergyman, established the first European colony, being the residences of the N. and S. inspectors, may be regarded as the capitals; but the best inhabited district is that of Juliansbad, in S. Greenland: its pop. is 2200.

GREENLAW, a tn. and par. Scotland, Berwickshire. The Town, 17 m. W. by S. Berwick, is on the Blackadder, between two rising grounds, is cap. of the co., and has straight and tolerably well-kept streets ; is well supplied with water, and improving. The county hall is an elegant Grecian edifice, and there are a jail, Established, Free, and U. Presbyterian churches; two schools, a friendly society, and a public library. The manufacture of coarse woollen goods is carried on to a small extent, but the iuhabitants, generally, are employed in agriculture. There are two annual fairs. Pop. 814. Area of par., about 25 sq. in. Pop. (1851), 1450.(Local Correspondent.)

GREENOCK, a parl. bor. and scaport tn. Scotland, co. Renfrew, on the S . shore of the estuary of the Clyde, which is here between 3 and 4 m . wide, abont 20 m . W. by N. Glasgow ; lat. $55^{\circ} 56^{\prime} 54^{\prime \prime} \mathrm{N}$. ; lon. $4^{\circ} 45^{\prime} 15^{\prime \prime} \mathrm{W}$. (r.) It stands partly on a narrow level tract of land, stretching along the margin of the sea; and partly on some fine commanding beights, which rise behind, and to the W. of the lower parts. of the town. The view from these eminences is singularly beautiful, comprising the extensive bay in front, with the shores and hills of Dumbartonshire and Cowall in the distance; while the neat and tastefnl villas with which they are crowded, impart to them a very pleasing and picturesque appearance, when viewed from the sea. A number of elegant residences, also, line the shore to the $W$. The lower and older parts of the town are mean and crowded; the lanes and streets narrow, crooked, and indifferently kept, though recently drained, and much improved; but in the more modern portions, the streets are spacions, airy, and clean, and the houses all of the better class; many of them remarkably handsome. The town is well lighted with gas ; and amply supplied with water by the Shaws Water Company, from a large reservoir situated on the high ground behind the town, and which also furnishes water-power to several mills and factories. The principal public bnildings, exclusive of the churches-some of which are very beautiful structuresare tlie Cnstom-house, a handsome, oblong, Grecian edifice, with a fine portico, situated on the quay; the Tontine and Exchange; the Watt monument, in the Elizabethan style, occupied as a muscum, library, and lecture-rooms, and containing a marble statne of Watt, by Chantrey ; Townhall, Infirmary, Glasgow Railway station, Gas Works, \&c. There are in Greenock five churches in connection with the Establishment, one of which is Gaelic; six Free chnrches, one of which also is Gaelic; four U. Presbyterian, and one each Reformed l'resbyterian, Evangelical Union, Episcopal, R. Catholic, and Catholic Apostolic; with an Independent, a Baptist, a Methodist, and a Seaman's chapel. The schools comprise the Grammar School, Mathematical school, Highlanders' Acadeny, School of Industry, Ragged School, parochial schools, a number of schools in connection with the different churches in the town, several charity, and about 40 private schools. The principal charitable institutions are the Greenock IIospital or Infirmary, and the Marincr's Asylnm; the latter, an elegant Ehzabethan building, endowed by the trnstees of the late Sir Gabriel Wood, for masters, mates, and seamen belonging to the
countics bordering the Clyde; but besides these there are several others, though of less prominence. The literary and scientific institutions comprise a pnblic library; a mechanics' institute, with library; several libraries counected with the churches in the town; a medical and chirurgical association, and two public reading-rooms. S.W. of the town, overlooking the Clyde, is a beantiful well-laid out cenetery. Recently Sir M. R. Shaw Stewart has gifted to the town the grounds of Well Park, near the centre of Greenock, to be laid out as public walks; and the same beneficent donor has granted a piece of ground towards the E . end of the town for games for the working-elasses.

The manufactures of Greenock include 11 sugar-refineries, some of them on a large scale; five ship-building yards, six iron-fonndries and machine establishments, for the construction of land and marine engines, locometives, and iron steamers; two iron-forges, a cotton, a worsted, a woollen, a flax, and a paper-mill; three dyewood, six grain, four saw, and sundry other mills ; two sail-cloth factories, five roperies, and five sail-making establishments; an extensive biscuitbakery, a distillery, two breweries, five tanneries, two soap and candle works, a pottery, \&c. There are, besides, chemical works, where sulphate of zinc, sulphate of copper, phosphate of soda, and saltpetre, are made; the only manufactory of these substances in Scotland.

In addition to the mannfactures, Greenock carries on a considerable foreign and coasting slipping-trate; importing large quantities of sugar, molasses, timber, grain, and a more limited quantity of cotton; and exporting pig-iron, dry goods, machinery, beer, \&c.; and numerons ships annnally elear out with emigrants for Ameriea and Anstralia. The following table exhibits the increase which has in late years taken place in the shipping trade:-

This does not include the tonnage of steamers or other craft trading on the river inside of the Cumbraes.

The following table exhibits the progressive increase in the imports of the prineipal articles:-

|  | 1830. | 1810. | 1850. |
| :---: | :---: | :---: | :---: |
| Sugar, tons | 15,300 | 13,741 | 24,598 |
| Molasses, tous | 3,057 | 9,131 | 20,917 |
| Timber, toads | 21,245 | 47,048 | 51,1+1 |
| Deals and battens, hundreds. | 283 | 1,973 | 3,336 |

The harbours of Greenock are spacious, and possess every accommodation for shipping, including dry docks, \&c. The F. quay is 530 ft . in extent; entrance to the harbour, 105 ft ; -custom-house quay, 1035 ft .; entrance to the harbour, 105 ft ;-W. quay, 425 ft .; extreme length, 2201 ft .; Albert quay, 605 ft ; quays of the new Victoria Harbour, about 350 ft . ; entrance, 150 ft ; breadth of piers, 60 ft . On the quay of the last-mentioned harbour there is a crane capable of lifting 75 tons' weight. The quays can be approaehed by steamers at any state of the tide; and vessels of the largest elass can enter the harbours. The Victoria Harbour has 14 ft . of depth at low water of spring-tides.

Greenoek, little more than a century ago, possessed but few slated houses. James Watt was born there, January 19, 1736. It sends one member to Parliament; constituency (1851), 1165. Pop. (1841) 38,860; (1851), 39,391.

GREENOGE, par. and th. Irel. Meath; 1488 ac. P. 274.
GREENORE.-1, A headland and fishing station, Ireland, co. Louth, S. shore of Carlingford Bay, 2 m. E.S.E. Carlingford. It has a lighthouse.-2, A headland, co. Wexford, 7 m . S.S.E. the entrance to Wexford harbour.

GREENS-NOR'TON, par. Eng. Northampton.; 2490 ac. Pop. 822.

GREENSPON1), an isl. and maritime vil., N. America, off E. coast Newfoundland, 29 m. N.W. Bonavista. The tsland, of granitic formation, is about 4 m . aeross; and the little harbour is formed by several other smaller islands. The viliage, a straggling plaee, has a decent church, and some large stores; and the fishermen's houses are neat and clean. Fresh water has to be obtained from the mainland, about 3 m . off. A considerable trade in dried fish is carried on.

GREENSTEAD, par. Eng. Essex ; 2610 ac. Pop. 159. GREENW ICII, a parl. bor. and par. England, co. Kent, r. bank Thames, $3_{4}^{3}$ m. E.S.E. London Bridge, the W. terminns of the Greenwieh Railway ; lat. (Observatory) $51^{\circ} 28^{\prime} \mathbf{3 8}$ N.; lon. $0^{\circ} 0^{\prime} 0^{\prime \prime}$; partly on an acelivity, but chiefly on low, marshy ground, a large portion of which is below the level of the Thames. The strects, 157 in number, are in general narrow and irregular, and many of the houses mean in appearance; though, recently, numerous handsome new houses have been built. The town is well lighted with gas, and amply supplied with water. It contains four handsome Episcopal churches, one of which, St. Alphege's, was one of the fifty churches appointed, in the reign of Queen Anne, to be built in London and its suburbs from the proceeds of the tax on coal and culm. There are, also, places of worship for Baptists, Independents, Wesleyan Methodists, R. Catholics, and Scotch Presbyterians. The educational institntions, public, private, and charitable, are numerous; as are also the benevolent and charitable institutions; among the latter may be named Norfolk cellege, supporting 20 decayed tradesmen.

The object of by far the greatest interest in Greenwich, is its magnificent Hospital for the maintainance of veteran, wounded, or unfortunate scamen. This noble structure, originally a palace of Charles II., and erected on the site of the ancient 'Greenwich House,' which, so far baek as the year 1300, had been a favourite residence of royalty-in which Henry VIII. and his queen daughters, Mary and Elizabeth, were born; and where, too, Edward VI. breathed his last-was converted to its present purpose in the reign of William and Mary, although not opened for the reception of inmates until 1705, when 42 were admitted. Commenced at the Restoration by Webb, son-in-law of Inige Jones, it was carried on under the superintendence of Sir Christopher Wren, and finished after his designs by his successor, Sir John Vanbrugh. It stands on the bank of the river, on an elevated terrace, 865 ft . in length, and covers, with the schools, civil offices, lawns, and burial-ground attached, a space of 40 ac . It consists of four quadrangular piles, built principally of Portland stone, each bearing the name of the sovereign in whose reign it was erected-namely, King Charles, Queen Anne, King William, and Queen Mary. Two of the wings frort the river, and two the park. In the N.W. wing, or that erected by Charles II., are the governor's residence, and the officers' and pensioners' libraries. The N.E., or Queen Anne's, is appropriated as a residence for the officers and men. In the S.W., or King Willian's, is the Painted IIall, a noble apartment, 106 ft . long by 56 ft . broad, and 50 ft . high, painted by Sir James Thornhill, and containing a fine collection of pictures, consisting of portraits of naval heroes, and representations of sea fights. The fourth, or S.E. wing, commonly called Queen Mary's, contains the chapel, the interior of which, designed by Athenian Stuart, is richly and elaborately ornamented. The complement of in-pensioners, or of those who reside in the hospital, is about 2710; each of whom, besides clothing, food, \&c., receives a shilling a week, as tobacco-money. To a section of them, averaging about 450 , an allowance is given in place of rations; this, which varies with the price of provisions, is at present (1852), £15, 4s. 8d. a-year. Though many of the pensioners attain a great age, the annual mortality among them is 12 per cent. There are, besides, numerous out-pensioners, who receive each abont $£ 11$ or $£ 12$ a-year. The whole revenue of the hospital from property, freightage charged on treasure conveyed by II. M. ships, \&e., amounted, in 1849 , to $£ 148,731,6 s .5 d$.; expenditure the same year, $£ 146,957,18 s .2 \frac{1}{4} \mathrm{~d}$. The establishment is managed by a governor, lieutenant-governor, two chaplains, and numerous other officers. The office of governor (once filled by Captain Cook) is generally held by some eminent naval commander. Connected with the hospital is the royal hospital-sehool for the children of decayed non-commissioned officers, seamen, and marines, and for the sons of commissioned and ward-room warrant officera; of which last there must always be 100 in the school. It numbers, in its two sections of upper and lower, 800 pupils; and is now the first nautical seminary in the world. It is conducted by a chaplain, a staff of 15 masters, 16 youths brought up in the school, who are being educated as seamen's schoolmasters and navigation teachers in the outports, and I a lieutenant and eight sergeants of marines. In the upper

## GRENADA

school, which sends every year at least eight officers to the naval service of the country, the education is carried as far as nautical astronomy and the theory of navigation; while the principles of engineering and practical navigation form the limit of the instruction in the lower. These boys are instructed, also, in gymnastics and naval tactics, and remain in the school four years. The mortality per cent. is 0.22 yearly. There are extensive iron-works, and steam-engine factories, roperies, silk-weaving, gold-lace, and chemical factories, and two noted pleasure fairs.

Greenwich Park, an open, undulating piece of ground behind the town, area, 180 ac., is finely wooded, well stocked with deer, and, having a diversified surface, its appearance, altogether, is exceedingly picturesque. The celebrated Observatory of Greenwich stands upon an eminence in the park, 160 ft . above the river. It was erected by Charles II., for Flamstead, the well-known astronomer. The work here performed is principally dedicated to one branch of astronomynamely, that depending on meridional obscrvations, and the calculations connected with them; latterly, however, meteorology and magnetic pheromena have occupied a considerable slare of attention. The longitude of all British maps and charts, and also of those issued by the government of the United States of Ameriea, is computed from this observatory, which is $2^{\circ} 20^{\prime} 23^{\prime \prime}$ W. (r.), from the Observatory of Paris; and $18^{\circ}$ E. (r.), from the meridian of Ferro. The bor. sends two members to Parliament ; constitueney (1851) 6347. P.34,801.

GREET', par. Eng. Salop; 1040 ac. Pop. 112.
GREETHAM, two pars. England:-1, Lincoln, 1180 ac. Pop. 177.-2, Rutland; 1630 ac. Pop. 583.

GREETWELL, par. Eng. Lincoln; 1300 ac. Pop. 42.
GREGAPOJEE, or Greejee, a tn., Dahomey, about 10 or 12 m . N.W. Whydah; lat. $6^{\circ} 12^{\prime} \mathrm{N} . ;$ lon. $1^{\circ} 32^{\prime}$ E. On a rising ground overlooking the great lagoon which runs along this part of the coast of the Bight of Benin. It has the most extensive market of any of the settlements on the lagoon, except Whydah. Well supplied with cotton, both raw and manufactured, by the natives; with Manehester cottons, and a great varicty of usefnl native manufactures and products. P. 1200.

GREGORIO, a tn. Naples, prov. Principato Citra, 18 m . E. Campagna, in a fertile valley, in which excellent wine is produced. Pop. 4000.

GREGORY (St.), par. Eng. Suffolk; 1250 ac. P. 1893.
GREIFENBERG, several places, Prussia, particularly : -1 , A $\mathrm{tn} .$, prov. Silesia, gov. of, and 35 m . S.W. Liegnitz, r. bank Queiss. It is walled; and has a Protes tant and a R. Catholic chureh, two schools, and an hospital; and important manufactures of linen, dye-works, a weekly market, and four annual fairs. Pop 2717.-2, A tn., prov. Pomerania, gov. of, and 41 m . N.E. Stettin, cap. cirele of same name, l. bank Rega. It is surrounded by walls, with three gates; is the seat of a court of justice and several publie offices, contains a castle, church, and three hospitals; and has manufactures of woollen and linen cloth and hats, a trade in cattle, and four annual fairs. Pop. 4461. The chrcle is flat, and somewhat sandy, but fertile. Area, 222 geo. sq. m. Pop. 35,090.

GREIFFENHAGEN, a tn. Prussia, prov. Pomerania, gov. and 11 m. S. by W. S. Stettin, cap. circle of same name, r. bank Regelitz. It is partially walled, has two gates, is the seat of a law court, and several public offices ; has two churehes, a town and burgher school, manufactures of woollen and linen cloth, a distillery, brewery, fishery, some general trade, a trade in cattle, and three annual fairs. Pop. 5389.-The circle is flat, well watered, contains many lakes, and is fertile. Area, 278 geo. sq. m. Pup. (1846) 34,427.

GREIFSWALDE, a tn. Prussia, prov. Pomerania, gov. of, and 18 m . S.E. Stralsund, cap. circle of same name, on a lake formed by the Ryckgraben, which communicates with the Baltic. about 3 m . below, and is navigable by small vessels. It was early fortified, and is still surrounded by a wall, with three gates; is the seat of a superior appeal court, with extensive jurisdiction, and several public offices; contains three churehes, a university, founded in 1456, attended by about 225 students, and possessed of a library of 20,000 vols.; a museum, observatory, anatomical theatre, and botanical garden; a gymnasium, ecclesiastical seminary, and several other schools; a theatre, house of correction, orphan asylum, three
hospitals, and other benevolent endowments; and has manufactures of pins, soap, candles, tobacco, and leather; a small building-yard, some shipping, and shipping trade; several distilleries and oil-works, and four annual fairs. Pop. 12,691. -The circle is flat, well watered, and fertile, producing much corn, and feeding large numbers of cattle and sheep. Area, 290 geo. sq. m. Pop. (1846), 47,468.

GREIN, or Gregna, a tn. Upper Austria, l. bank Danube, 27 m . E.S.E. Linz. It is tolerably well built, has two churches, an old castle, a townhouse, theatre, and hospital ; and manufactories of tobacco. Near it the Danube forms an island, close to which is a dangerous whirlpool. Pop. 1420.

GREINORD, a bay, Scotland, N.W. coast Ross-shire, S.W. of Loch Broom ; 4 m . wide, extending inland about tho same distance; with an island of same name at its entrance.

GREINTON, or Grenton, a par. England, Somerset; 1140 ac. Pop. 213.

GREIZ, or Greitz, a tn. Germany, principality Reuss, and cap. lordship Greiz or Reuss-Greiz, belonging to the elder branch of the Reuss family, in a valley, r. bank Elstor, $16 \mathrm{~m} . \mathrm{S}$. Gera. It is the residence of the prince, and seat of several courts and public offices; is walled, and for the most part well built ; contains a castle, finely situated on a height; church, theological and normal seminary, and lyceum; and has several tannerics, dye-works, and bleachfields; a worsted, paper, and other mills. Pop. 6215.—The londship is richly wooded, and is watered by the Elster, Golzsch, and Weida. Area, 66 geo. sq. m. Pop. 22,000.

GRENAAE [oftener Grinaae], a tn. Denmark, Jutland, bail. of, and 32 m . E. by S. Randers, l. bank Grenaue, about 1 m . above its mouth in the Kattegat. It has a church, and, at the mouth of the river, a winter haven of the fifth class, with 6 ft . water. The chief employment is agriculture. Pop. above 1000 .

GRENADA [French, Grenade], one of the British W. Indian islands; lat. (S. point) $11^{\circ} 59^{\prime} \mathrm{N}$. ; lon. $61^{\circ} 45^{\prime} \mathrm{W}$. (r.) It is of an oblong forin, $24 \frac{1}{2} \mathrm{~m}$. long, N. and S., and 10 m . broad; arca, $80,000 \mathrm{ac}$. There are several bays and creeks

on both sides of the island, affording good and safe anchorage. The principal of these are-St. George's Bay, near the S.W. part ; Egmont Harbour, on the S. coast ; and Grenville Bay, on the E. Grenada is one of the most beautiful of the W. India islands, rugged and picturesque in the interior, being traversed, N. to S., by an irregular mass of volcanic moun-

## GRENOBLE

tains, which attains elevations of 3000 and 3200 ft . above sealevel; and from which hills of less height branch off in lateral directions. Between these lie valleys, which contain some alluvial tracts of great fertility. On the S.E. coast there is a considerable extent of low, swampy gromid, rendering this locality extremely unhealthy-particularly in antumn. In the centre of the island, about 1700 ft . above sea-level, there is a circular lake, $2 \frac{1}{2} \mathrm{~m}$. circumference, inclosed by lofty mountains. Rivers and rivulets are extremely mumerons; and most of the former capable of working sugar-mills. The climate is oppressively hot on the low lands, though greatly tempered by the sea-breeze; but cool and pleasant on the hills. The island is not much subject to hurricanes-three only having oceurred since 1650 ; and these were by no means so violent as those that visit the more northerly islands. July, Angust, September, and October, are more sultry and rainy than the other months. There are no venomous reptiles, excepting a few scorpions and eentipedes; and the bite of these is not dangerous. But, in the latter part of the last century, an ant, most destructive to the sugar cane (Formica saccharivora), appeared in such infinite hosts in this island, as to put a stop, for a time, to the cultivation of that vegetable. They also destroyed nany domestic quadrupeds, and even birds; until at length ammihilated by torrents of rain, accompanied by a dreadful hurricane. The soil varies; but consists principally of a rich black or reddish-coloured mould, well adapted to every tropical production. Cotton was fornmerly the chief article of cultivation; but at present fugar, rum, and molasses, stand first in the exports, which amounted, in 1849, to $£ 104.228$, and the imports to $£ 101,054$. During the same year, 7654 tons of shipping were entered inwards from Great Britain.

The island is divided into six districts, and, like the other W. India islands, has a lieutenant-governor, and a local legislature, consisting of a council, and a house of assembly, of seventeen elected members. The common statute law of England is in force, unless particular laws of the island interfere. The revenue for 1849 was $£ 19,091$, and the expenditure $£ 12,777$. The Established elureh has seven clergymen, six churches, and two chapels; the R. Catholies six, and varions Dissenters have seven ministers. The capital is St. ( x oorge 'lown (which see). Grenada was discovered by Columbus in his third voyage, in 1498, at whieh time it was inhabited by Caribs, who were subsequently exterminated by the French, by whom the island was colonized, about the middle of the 17 th century; and in whose possession it remainel till 1762 , when it was taken by the British. It was recaptured by the l'rench in 1779 , and restored to Britain in 1783. Pop. 28,927; of which about 5000 are whites and persons of colour, the remainder blacks;males, 13,732 ; females, 15,195 .

GRENADE, two places, France:-1, (-sur-Garonne ), [anc. Granata], A tu., dep. HauteGaronne, in a fertile district, r. hank Save, a little above its confluence with the Garonne, 16 m. N.N.W Toulouse. It is huilt of brick, with great regularity; and has manufactures of coarse woollens and serge, a trade in corn, and four annual fairs. Pop. 2783.-2, (-sur-l'Adour), A tn . and com., dep. Landes, 9 m . S.S.E. Mont-de-Marsan, r. bank Adour. It has manufactures of woollen stuffs, fustians, linseedoil, and leather; and three annual fairs, at which great numbers of swine are sold. P. 1500.

GRENADINES, a chain of small islauls and rocks, West Indies, between the islands of Grenada and St. Vincent; lat. $12^{\circ} 30^{\circ} \mathrm{N} . ;$ lon. $61^{\circ} 30^{\circ} \mathrm{W}$. The two principal islands, Carriaco and Becouya, are inhabited, and produce coffee, indigo, cotton, and sugar. The islands contain a few springs, but no rivers. Pop., altogether, about 3000 .

GRENAGII, par. Irel. Cork; 13,558 ae. Pop. 2660.
GRENCHEN [French, Grange], a vil. and par. Switzerland, can. of, and 7 m . W.S.W. Solothurn, beantifully situated near the S. foot of the Jura, in a valley traversed by a rapid torrent. It is well built, contains a church, finely scated on a height, and one of the handsomest village churches of Switzerland; a large schoolhouse, with two schools; and has a trade in wine. In a beautiful valley, in the vicinity, is the bathing establishment of Bachthalenbad. Pop. 1423 .

GRENDON, five pars. Eng. :-1, Northamp.; 3120 ac. Pop. 595.-2, Warwick; 1650 ac. Pop. 529.-3, (Bishop's - ), Hereford; 1800 ac. Pop. 231.-4, (-Under-wood), Bucks; 3670 ac. Pop. 384.-5, ( Warren-), llereford; 630 ac. Pop. 34.

GRENELLE, or Beau Ghenelle, a vil. France, dep. Seine, I. bank Seine, here crossed by a suspension-bridge, about 3 m . S.W. Paris. It is situated on an extensive plain, contains a handsome modern chureh and a theatre, and has manufactures of glue, starch, paints, wax-tapers, varnished leather, wax-cloth, chemical products, \&c. In 1793 , extensive powder-mills which had been established here blew up with a fearful explosion, and killed many persons An artesian well, sunk in the plain of Grenelle, yielded no water till the depth of 1800 ft . was attained, when a copious stream burst forth, and continues still to flow. Pop. 3938 .

GRENNA, a tn. Sweden, län of, and 20 m . N.N.E. Jönköping, picturesquely situated at the foot of a mountain, on the S.E. shore of Lake Wetter. It consists chiefly of one street, the honses of which have rows of cherry-trees in front of them; and contains a handsome church. Inhabitants chiefly employed in agriculture. Pop. 638.

GRENOBLE [Latin, Cularo], a th. France, cap. dep. Isère, agreeably situated in a fertile, well-watered, and wellwooded basin, surrounded by lofty mountains, on the Isère, near its confluence with the Drac, 60 m. S.E. Lyons; lat. $45^{\circ} 11^{\prime} 57^{\prime \prime}$ N. ; lon. $5^{\circ} 43^{\prime} 43^{\prime \prime} \mathrm{E}$. (L.) It was regularly fortified by Vauban; but the heights which commanded it made it incapable of standing out against any enemy who should obtain possession of them. Considerable improvements, however, have recently been commenced; and by extending the works, and including some of the more commanding heights within them, it is expected to make Grenoble one of the strongest places in the country. It consists of two parts, separated by the river. The part on the right bank, oceupying a narrow space terminated by the heights, consists of a single street, of considerable width, but lined, generally, by irregular and mean houses, though great improvements have been made, by the construction of fine quays, and the forma

grenoble.-Firuu Voyages dans l'Ancienne Fiance.
tion of a fine walk along them. A chain-bridge leads to the left bank, where the other part of the town is situated. It contains several good squares, and the houses are of three or four stories, with flat, tiled roofs; but the streets, thougb well paved and regular, are far too narrow. The whole town
is lighted with gas. The public buildings are few, and not possessed of much merit. Among objects deserving of notice may be mentioned the cathedral, a heavy, ungainly structure, partly ancient, partly modern; the public library, of 60,000 volumes; the college, with muscum attached; the bishop's palace; the courthouse, an interesting old building, originally the palace of the dauphin; the bronze statue erected in one of the squares to the Chevalier Bayard, the theatre, and arsenal. One of the finest features in the town is its public garden, which is both extensive and well laid out. The manufactures consist of leather gloves, which may be considered the staple ; linen goods, and fine liqueurs. There are also uumerous tanneries, especially for the preparation of tawed leather; and a great number of hands are employed in the carding of hemp, which bears a high name, and is largely exported. The trale includes, in aldition to it and the other articles of manufacture, iron, marble, and timber; and there gre four annual fairs, each of which lasts four days. Grenoble is the see of a bishop, and seat of a royal court for departments Isère, Drôme, and Hautes-Alpes, and of courts of first resort and commerce; and possesses a consulting chamber of manufactures, corn exchange, a royal college, with courses of medicine, surgery, and botany; a gratuitous school of design, and societies of agriculture, science, and art. Its foundation is of ancient date. It existed in the time of Cæsar, but never acquired much importance under the Romans; though Gratian, who had improved it, withdrew its ancient name of Cularo, and called it, after himself, Gratianopolis. Its subsequent history possesses no interest. During the last European war it was twice occupied by the Allies. Pop. 23,227.

GRESFORD, par. Wales, Deubigh; 12,000 ac. P. 3928.
GRESHAM, par. Eng. Norfolk; 1220 ac. Pop. 340.
GRESHOLM, a small isl. off the coast of S. Wales, co. Pcmbroke, between St. Bride's Bay and Milford Haven, 12 m . W.N.W. St. Ann's Head. It is lofty, precipitous, and nearly circular, and is gencrally the first land seen on approaching Milford from the W.

GRESIK, tn. Java. See Grisseir.
GRESSENHALL, par. Eng. Norfolk; 2520 ac. P. 957.
GRESY [Latin, Gressiacum], a tn. Sardinian States, div. Savoy, r. bank Isère, 16 m . E. Chambery. It has an ancient and a modern parish church, the latter very liandsome; an old castle, a trade in corn, hemp, and vegetables, and an annual fair. Pop. 1486.

GRESY-sur-Arx, a vil. and com. Sardinian States, div. Savoy, prov. Savoja-Propria, 1. bank Sieroz, 11 m. N. Chambery. It has a parish chureh, a trade in corn and wine, and a large annual fair, chiefly for horses, mules, and cattle. Near it are quarries of black and variegated marble. Pop. 1441.

GRETA, two small rivers, England:-1, Co. York (N. Riding), rising in Stainmoor Forest, and, after an E. course of 15 m ., falling into the Tees, $2 \frac{1}{2} \mathrm{~m}$. E. by S. Barnard Castle. -2, (or Greata), Co. Cumberland, an affluent of the Derwent. which rises near Thirlemere, and passes Keswick.

GRETNA, or Graitnex, a par. Scotland, co. Dumfries; $18 \mathrm{sq} . \mathrm{m}$. Pop. 1761; with vil. of Gretna Green 22 m . E.S.E. Dumfries, a station on the Caledonian Railway. The village lies on the Sark, here crossed by a bridge, near its junction with the Solway Firth, and 9 m . N.W. Carlisle. 1ts proximity to England rendered it, for many years, a favourite place of resort for run-a-way marriages from the sister kingdom, by parties who wished to be united more summarily than was practicable according to the law of England.

GRETTON, par. Eng. Northampton ; 4450 ac . Pop. 859.
GREUSSEN, a tn.Germany,Schwarzburg-Sondershausen, l. bank Helbe, 10 m . S.S.E. Sondershausen. It is walled, and tolerably well built; has a church and a lyceum, manufactures of flannel and frieze, a spinning, and several other mills, tile-works, and three annual fairs. Pop. 2165.

GREV E. $-1, A \mathrm{tn}$. and com. Tuscany, prov. of, and 11 m . S.S.E. Florence, 1. bank Greve near the S. base of a lofty hill. It is an ancient but well-built place, contains a fine square, the houses of which are supported on arcades, and a parish church; is the seat of a court of justice and several public offices, and has a much-frequented weekly market, and some transit trade. Pop. tn., 1057; com., 10,143.-2, A river, Tuscany, which rises in the W. slope of a hill called Stinche, flows N.W., and, after a course of about 24 m ., joius 1. bank Arno, 3 m . below Florence.

GREVEN, a tn. Rhenish Prussia, gov. and 22 m. E. Münster, r. bank Enis, with a R. Catholic church, school, infirmary, poorhouse, and a considerable transit trade. Pop. 1160.

GREVENBICHT, a vil. Holland, prov. Limburg, 12 m . N. by E. Maastricht, with an old chapel. Inhabitants engaged in agriculture, and in shipping on the Maas. Pop. 942.

GREVENBROICH, a tn. Rhenish Prussia, gov. of, and 13 m. S. W. Duisseldorf, cap. circle of same name, on the Erft, with a R. Catholic church, a castle, and manufactures of woollen, linen, and cotton goods, and a spinning-mill. Pop. 854.-The ciRcle, area, 69 geo. sq. m., is flat, well watered, and tolerably fertile. Pop. 34,192

GREVENMACHER, a th. Holland, grand duchy of, and 15 m. E.N.E. Luxemburg, near the Prussian frontier, and at the foot of a vinc-planted hill. It has a R. Catholic church, a respectable townhonse, and a school; three factories of playing cards, a trade in cattle, wine, and grain, and six annual fairs. A third part of the town was destroyed by fire in 1820. Pop. 2500.

GREVISMUHLEN, a tn. Mecklenburg-Schwerin, circle of, and 18 m . N.W. Schwerin, cap. bail. of same name, on the Glocken and Vieldeck Lakes. It is entered by two gates, contains a triangular market-place, an ancient church, townhouse, and courthouse, and has four annual fairs. The poet Theobul Rosegarten was born here. Pop. 2660. Area of bail., 36 geo. sq. m. Pop. 5547.

GREWELL, par. Eng. Hants ; 850 ac. Pop. 280.
GREY.-1, An inland co., W. Australia, about 65 m . E. to W., its limits N. not yet defined. In the E. parts are some extensive open downs. It contains a large and beautiful sheet of water, called Lake M'Dermott.-2, (Cape), A headland, N. Australia, W. coast Gulf of Carpentaria, forming the S. side of Caledon Bay; lat. $13^{\circ}$ S. ; lon. $136^{\circ} 42^{\prime}$ E. (r.) ; remarkable for the round hummock on its extremity.

GREY ABBE Y, a vil. and par. Ireland, co. Down. The village, 6 m . N.E. Newtonards, has a neat church, and the interesting remains of the once-celcbrated abbey from which it derives its name. The weaving of muslin is carried on. Area of par., 7689 ac. Pop. 3890.
gREY TOWN, or San Juan de Nicaragua, a scaport to. Central America, Mosquito 'Territory, on the river San Juan ; lat. $10^{\circ} 55^{\prime} \mathrm{N}$. ; lon. $83^{\circ} 43^{\prime} \mathrm{W}$. (r.) It has a considerable trade in the export of hides, indigo, and specie; and though its population is at present small, it is rapidly inereasing, and many new houses and stores are in course of erection. Its inhabitants consist of emigrants from England, the U. States, Germany, France, and Spain, besides the native ludians; and thousands throng hither on their way to California by the San Juan River, and the Lake of Nicaragua. Two steamers from New York, and two from New Orleans, arrive monthly with passengers, while a Bremen ship occasionally fetches a load of Germans. The harbour is one of the finest on the coast of Central America, and was declared a free port on January 1,1851. The communication with the Pacific Ocean is through a healthy and eminently picturesque country, and, by aid of stcamers on the rivers and on Lake Nicaragua, the transit has been accomplished in 36 hours.

GREYSTOKE, par. Eng. Cumber.; 47,940ac. Pop. 2786.
GREZ-Doiceav, a vil. and com. Belgimm, prov. Brabant, 16 m. S.E. Brussels. It has manufactures of chicory, a paper-mill, limestone quarries, and limekihs, and a trade in tobacco grown in the distriet. Pop. 2589.

GRIASOWETZ, a tn. Russia, gov. of, and 33 m . S.S.E. Vologda, cap. circle of same name, in an open arable district, on the Rhowetz. It has a church, and manufactures of hosiery, and iron and copper ware; dye-works, and three inportant annual fairs. Pop. 1011.-The circle, undulating and tolerably fertile, produces corn equal to the consumption, and good crops of flax, hemp, and hops. Area, 2432 geo. sq. m. Pop. 67,700.

GRILSBACH.-1, A watering place, Baden, circle Middle Rhine, 22 m. S. Baden, in the valley of the Rench, about 1500 ft . above the sea. The water is alkaline, temperature of $50^{\circ}$; and the bathing establishment, which is large, is much frequented.-2, A market tn . Lower Bavaria, 15 m . W.S.W. Passau, with two churches, a castle, and a trade in horses and corn. Pop. 740.

GRIESHEIM, a tn. Hesse-Darmstadt, prov. Starkenburg, 4 m . from Darmstadt. It contains a Protestant deanery
church, and has a trade in corn and seeds. Great quantities of peats are cut here. Pop. 2859.

GRIESKIRCHEN, a tn. Upper Austria, pleasantly situated N. of a hill near the Tratnachbach, 22 m . W.S. W. Lintz. It consists of the town proper and two suburbs, and has a church, three chapels, and a school. Pop. 1600.

GRIE'IH, a tn. Rhenish Prussia, gev. Düsseldorf, cirele of, and 5 m . E. Cleves, on the Rhine. It contains a R. Catholic church, and has a trade in corn and cattle, and an annual fair. Pop. 898.

GRIETHAUSEN, a tn. Rhenish l'russia, gov. Düsseldorf, on an arm of the Rhine, 3 m . N.N.E. Cleves. It is well built, has several public offices, a R. Catholic church, and a trade in corn and eattle. Pop. 667.

GRIFFEN's COVE, a small inlet, Lower Canada, Gulf of St. Lawrence, N. coast of Gaspe dist., N.W. Cape Rosier.

GRIFI (DE), a river, Holland, prov. Gelderland, flowing N.N.E., and joining l. bank Ijssel, 2 m . S. Hattem. By deepening, and sluices, it has been rendered navigable for small vessels.

GRIGAN, one of the Ladrone or Marianne isls., N. Pacific Ocean ; lat. $18^{\circ} 48^{\prime} \mathrm{N}$. ; lon. $145^{\circ} 40^{\prime} \mathrm{E}$. (к.) It is about 8 m . wide, has the form of a dome: height supposed to be about 2300 ft . : shores almost perpendieular. There is only one small village in the island, S.W. side.

GRIGNANO, a vil. Austrian Italy, gov. Venice, 3 m . S.W. Rovigo. It has a parish chureh, and a trade in silk, which is produced extensively in the neighbourhood. P. 1900.

GRIGNASCO, a vil. and eom. Sardinian States, Piedmont, div. of, and 21 m. N.N.W. Novara, 1. bank Sesia. It las a handsome parish church, and a trade in wine. Kaolin and steatite are found in the vicinity. Pop. 1765.

GRIGNO, or Gringo, a vil. Austria, Tyrol, circle of, and 4 m. E.S.E. Trent, in the Brenta, in the Val di Sugana. It has a parish church, and a ruined castle. Much silk is produced in the district. Pop. 818.

GRIGORIOP(OL, a to. Russia, gov. Kherson, l. bank Dniester, 80 m . N.W. Odessa. It is regularly built, has two churches, manufactures of morocco leather, and is inhabited chiefly by Armenians, who have received large grants of the land of the surrounding district, yet neglect its cultivation, and occupy themselves with trade. Pop. 2500.

GRIJO, a tn. and par. Portugal, prov. Douro, 14 m . S.S.E. 0porto. Pop. 2111.

GRIJO'TA, a tn. Spain, Leon, prov. of, and 4 m. N.W. Palencia, in a beautiful and well-wooded district, on the canal of Campos, which eneircles it on the N.W. and S. It is tolerably well built, has a parish church, townhouse, with prison attached, a primary school, numerous flour-mills, and a trade in flour and game. Pop. 1170.

GRIJP'SKERK, a vil. IIolland, prov. of, and 9 m . W.N.W. Groningen. It consists of a single, broad, closely-built street; has a Calvinistic church, and a good transit trade to Friesland. Pop. 611.

GRIM (Care), the N.W. extremity of Van Diemen's Land, and the S. boundary of the W. entrance to Bass' Strait ; lat. $40^{\circ} 43^{\prime} \mathrm{S} . ;$ lon. $144^{\circ} 42^{\prime}$ E. ; a low, steep, black headland, having two contiguous rocks of similar aspect, and directly to the s. of Hunter lalands.

GRIMALDI, a vil. and com. Naples, prov. Calabria Citra, 12 m. S.S.W. Cosenza. It contains two churches and a convent. Pop. 2719.

GRIMAUD (Gulf of), an inlet of the Mediterranean Sea, S. coast of France, dep. Var, called also the Gulf of St. Tropez. It is named from the small town and castle of Grimaud or Grimaldo, on its shore, 15 m . S.S.E. Draguignan. Here Napoleon embarked for Elba in 1814.

GRIMBERGIIEN, a vil. and com. Belgium, prov. Brabant, 6 m . N. by W. Brussels, on an affluent of the Senne. It has several mills. The inhabitants are chiefly employed in agriculture and rearing cattle. Pop. 3344.

GIIIMLEY, par. Eng. Worcester; 2250 ac. Pop. 723.
GRIMLINGHAUSENN, a vil. Rhenish Prussia, gov. of, and 4 m . S. Düsseldorf, with a R. Catholic church, and several distilleries. Pop. 830.

GRIMMA, a tn. Saxony, circle of, and 17 m . E.S.E. Leipzig, cap. bail. of same name, in a deep valley, l. bank Mulde, here crossed by a long and massive bridge. It is surrounded by walls with five gates, and consists generally
Vol. I.
,
of spacious streets, lined with well-built houses. It contains five churches, the principal one a long and narrow structure without towers, in a kind of bastard Gothic, with some tolerable sculptures; a normal, and four other schools, one of them called the Landes or Fuirstenschule, with a library and some good collections; and an old castle, once strongly fortified. It has manufactures of woollen and linen eloth, calicos, flannel, starch, and tobaceo pipes; a bleachfield, two printfields, several dye-works and mills, a trade in wine, fruit, and cattle, and three annual fairs. Pop. 5034. Area of bail., 128 geo. sq. m. Pop. 25,377.

GRIMME, or Gmmmen, a tn. Prussia, prov. Pomerania, gov. of, and $15 \mathrm{~m} . \mathrm{S}$. by W. Stralsund, cap. circle of same name, on a kind of peninsula, on the Trebel. It contains a chureh and a castle. Pop. tn., 2384 ; circle, 23,884.

GRIMOLDBY, par. Eng. Lincoln; 1850 ac. Pop. 267.
GRIMSBY (Great), a parl. bor., market tn., and seaport, England, co. of, and 30 m. N.E. Lincoln, the E. terminus of the Lincolnshire, and of the Manchester, Sheffield, and Lincoln Railways; on a plain, S. shore, and near the mouth of the estuary of the Humber. The principal streets extend along the W. side of the old haven or dock: they are well built, amply supplied with water and gas, but are indifferently drained. The houses are of brick, and mostly tiled, but since the opening of the railways, by which slates are brought, the latter are now preferred for covering. The chureh is an ancient, spacious stone building, of light and elegant appearance. The other places of worship are one Wesleyan, one Primitive Methodist, and one lBaptist chapel. 'There are a graminar, preparatory, and girls' schools, the last for the gratuitous education of freemen's children, a mechanics' institute, and some benefit societies. The new dock works comprise an area of about 150 ac . of land reclaimed from the sea; the dock itself having a water area of upwards of 25 ac ., including a timber-pond. The works are now completed; and the dock was opened on March 23, 1852; with entrances from the Humber by two spacious locks, the larger being 70 ft . wide, 200 long between gates, and capable of admitting the largest war-steamers; average depth on sill at half-tide, 16 to 17 ft . at three-quarters, 20 to 22 ft . Coke is manufactured, and there are flour and saw-mills. Principal trade in timber, coals, and salt. In the vicinity of the town are some remarkable natural springs, called 'blow wells,' consisting of deep, wide, circular pits, in some of which the waters rise to the surface only, while in others they overflow copiously. Great Grimsby returns a member to the House of Commons; registered electors (1851), 824. Pop. 3700.

GRIMSEL, a mountain, Switzerland, Bernese Alps, of which it is one of the principal summits, situated on the frontiers of Bern and Valais, about 15 m . W. of Monnt Gothard, not far from the source of the Rhine, composed chiefly of granite. A pass across it leads from Oberhasli in Bern, to Obergesteln in Valais. The summit of the pass is 8400 ft . (see Alps, p. 104) ; and nearly 1000 ft . below, in a rocky hollow, one of the dreariest spots imaginable, is a hospice, converted into a regular inn, with about 40 beds, all of which, during the summer months, are usually occupied. Below the hospice is a black tarn or lake, whieh never freczes, becanse supplied by a warm spring. In 1799 , a corps of Austrians encamped on the Grimsel, and could not be dislodged, till, by the treachery of a peasant, a path, leading to a commanding position in their rear, was shown to the French. The whole corps perished by the sword, or in the chasms of the rocks, where bones, weapons, and tattered clothes are still seen. To the W. of the hospiee, the Aar has its sources in two enormous glaciers called the Ober and the Unter Aar Gletscher. In the centre of the latter rises the lofty FinsterAarhorn, and near the Sehreckhorn also is eonspieuous.

GRIMSTAD, or Grömstad, a seaport, Norway, on the Skagerrack, bail. Nedenæs, 28 m . N.E. Christiansand, 11 m. S.S.W. Arendal. It has a chureh, two sehools, and a savings'-bank; carries on ship-building, 10 to 15 of the larger class being built amually. A bout 8000 tons of shipping are engaged in the foreign trade-the prineipal exports consisting of iron and wood. Pop. (1845), 712.-(Kraft's IIaunulbog).

GRIMSTEAD (WEST), par. Eng. Wilts; 1430 ac. P. 227 .
GRIMSTONE, three pars. Eng.:-1, Leicester ; 920 ac . Pop. 175.-2, Norfolk; 4240 ac. 1’op. 152.-3, (Nurth),
York (E. Riding) ; 1350 ac. Pop. 175.

GRINDELWALD, a vil. and par. Switzerland, can. of, and 36 m . S.E. Bern, in a valley of the same name, 3250 ft . above the sea, and in the vicinity of some of the most magnificent Swiss scenery. It consists of a large number of picturesque wooden cottages, scattered over the valley, the S. side of which is formed by three lofty mountains, the Eiger [giant], Mettenberg [middle mount], and Wetterhorn [weather or tempest horn]. Between these mountains, and on either side the Mettenberg (the nearest mountain seell in the accompanying illustration, the Wetterhorn being that most distant), two immense glaciers, forming part of the great field
are built with raw brick, plastered with clay and cow-dung. Lime enters largely into the composition of the clay, and, consequently, the brick will not stand when burnt, but in the raw state it endures the weather well. The Griquas are a tribe of recent origin, descended from the Hottentots by Dutch fathers, inhabiting an undefined tract N. of the Orange river, about lat. $29^{\circ} \mathrm{S}$.; lon. $24^{\circ}$ E. They are indolent, apathetic, and content with little, but have made considerable progress in civilization and improvement. They are regular in their attendance at religious worship, and are distinguished by taste and skill in vocal music.

GRIS-NEZ (CAPE), [anc. Itium pro-

THE GLACIERS OF GRINDELWALD.-From Rarnard's Shethes in swatz riand.
of ice which occupies a large portion of the highlands of the Bernese Alps, issue out and descend to the bottom of the valley, below the level, and within a stone-cast of the village. In extent the Grindelwald glaciers are inferior only to the Mer-de-Glace of Chamouni; while in beauty they yield to none, being fringed by green pastures, and a graceful border of forest firs. The inhabitants are all employed in rearing cattle and making dairy produce. Pop. 2550.

GRINDON, two pars. England:-1, Durham; 3900 ac. Pop. 337.-2, Stafford; 3240 ac. Pop. 414.

GRINGLEY-on-The-Mill, a vil. and par. England, Notts; 4280 ac Pop. 790.

GRINSDALE, par. Eng. Cumberland; 890 ac. P. 115. GRINSHILL, par Eng. Salop; 970 ac. Pop. 255.
GRINSTEAD.-1, (East-), A market tn. and par. England, co. Sussex. The Town, 26 m . S. London, on an eminence on the road to Brighton, is irregularly built, but contains many good houses, and a handsome church, with a finely proportioned tower, two chapels for Dissenters, a fine quadrangular building, called Sackville College, founded, in 1616 , by Sackville, Duke of Dorset, for 24 aged persons, of both sexes, and a free grammar school. Market on Thursday, and several fairs annually. Area of par. 13,390 ac. Pop. 3586.-2, (West), A par. England, co. Sussex; 6110 ac . Pop. 1225.

GRINTON, par. Eng. York (N. Riding); 49,810 ac. Pop. 4811.

GRION, a vil. and par. Switzerland, can. Vaud, on a height above the Grionne, 2800 ft . above the sea, 27 m . E.S.E. Lausanne. There is much fine scenery in the district, and in the vicinity is a remarkable rock, bearing a considerable resemblance to the human form, and known by the name of La Pierre du Sauvage. It forms the subject of a romance by Bridel. Pop. 436.

GRIQUA, or Kiaarwater, a tn. S. Africa, Griqua country, N. from the Gariep or Orange river, about 510 m . N.E. Cape Town; lat. $28^{\circ} 50^{\prime}$ S.; lon. $24^{\circ} 30^{\prime}$ E.; on the edge of an extensive limestone plain, and at the foot of a range of low hills of silicious schist, producing yellow asbestos. It contains the houses of the missionaries and teachers, with schools, a chapel, and other buildings. Many of the houses

GDISONS tumuli. Pop. 1758.
GRISONS [German, Graubünden or Bünden], the largest can. of Switzerland; bounded N. by cans. Glarus, St. Gall, principality of Liechtenstcin, and the Tyrol ; E. the Tyrol; S.E. Lombardy ; S. Lombardy, and can. Tessin; and W. can. Uri ; greatest length, E. to W., 90 m. ; greatest breadth, $52 \mathrm{~m} . ;$ area, 2629 geo. sq. m. Its limits are determined almost throughout by lofty mountain ranges, and a great part of the interior, particularly toward the E., is covered by their ramifications, and including more than 20 peaks above 9000 ft . The valleys which lie betwcen the ranges are generally narrow, though, in a few instances, they attain a considerable breadth, as those of the upper and lower Engadine. Only a small portion of the E. and S.E. of the canton belongs to the S. side of the great watershed of Europe, and is drained chicfly by the Inn, and by small affluents of the Adige and Adda. The boundary of this portion is determined, on the W., by a continuous mountain range, which commences on the S. a little E. of the Splügen, and stretches across the cariton in a N.N.E. direction to the Tyrol. The rest of the Grisons W. of this range, amounting to at least two-thirds of the whole, belongs to the basin of the Rhine, whose two head streams, the Vorder and the Hinter Rhine, which here originate, with their affluents the Glenner, Albula, Plessur, Lanquhart, \&c., are the principal water-courses of the canton. The lakes also are numerous, and many of them present scenery of the most magnificent description, but individually they are of limited extent. The most deserving of notice are those of the Sils, Silvaplana, St. Moritz, and Poschiavo. The climate is much more diversified than is usual even in the Alpine districts of Switzerland. Often, after travelling for days over bleak and elevated tracts, where perpetual winter seems to reign, the traveller suddenly arrives at some deep valley, where the air is not only mild, but may almost be said to be Italian. In the loftier districts, situated at the height of nearly 6000 ft ., the snow lasts to the end of May, and in some years continues late into July, while in the lower valleys, situated on the S. slopes, the labours of the plough commence in the middle of February or beginning of March. In general, however, the plough has a very limited range, and the whole
is eminently pastoral, feeding large numbers of cattle and sheep, and producing much excellent dairy produce. In some lower districts not only cereals, but maize are grown. Hemp and flax, too, are cultivated to some extent; and, though figs and almonds attain maturity only on part of the Italian side of the mountains, cherries, apples, and chestnuts abound in many quarters. In a few spots a little indifferent wine is produced. On the mountains, particularly in the N., are dense forests, chiefly of pine and birch. At lower altitudes the oak, beech, and elm are common. The mountains on the N. side of the canton are chiefly composed of argillaceous schist and limestone; those in the S . and near the centre, chiefly of primitive rocks. Minerals of value, particularly iron, oceur in extensive seams, but are not worked. Considerable quantities of gold have been gathered at different times, and in 1813 about 160 gold pieces were coined with the arms of the canton. White marble of excellent quality, fit for statuary, might be worked to any extent. There are no manufactures of any consequence, but a considerable transit trade is carried on between Italy and Germany. The principal exports are cattle and wood. The constitution is very demoeratical, the legislative power being lodged in a council elected by a universal suffrage, which includes all citizens who have attained the age of 17 . The canton is the 15 th in the confederation (cap. Coire), and is divided into three prineipal parts or Bünden-the Ober, or Graue-Bund, subdivided into eight districts (hochgerichte); the Gotteshaus-Bund, subdivided into eleven districts; and the Zehngerichten-Bund, subdivided into seven districts. Both the Calvinistic and the R. Catholic religion are established. The language of the public acts is German, and of the pcople three-eighths speak German, onehalf Romansh, and one-eighth Italian. Pop. (1849) 89,840.

GRISSEH, Grisse, or Grissee, a maritime tn., isl. Java, prov. of, and 12 m. W.N.W. Soerabaya, on the Strait of Madura. It is a populous, bustling place, inhabited chiefly by Javanese and Chinese, the latter of whom have an elegant temple. The principal inhabitants dwell along the shore, ant in a large plain, and the honses are agreeably shaded by large tamarind trees; the part of the town farther inland is mueh scattered, but it is not very healthy. The house of the Dutch resident is large and commodious. There are here several ship-building yards; and numerous vessels, both for war and commerce, are built. The roadstead is spacious, and the safest on the coast. In the neighbourhood are salines; in the hills saltpetre is found; and in caves hard by the nest of the edible swallow. Grisseh is one of the oldest towns in Java; here Mahometanism first took root, and in its vicinity are numerous graves much revered by the Islamites.

GRISTON, par. Eng. Norfolk; 1370 ac. Pop. 227.
GRITA (LA), a tn. Venezuela, on river of same name, prov. of, and $55 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Merida; greatly fallen off since the revolution. The river rises about 12 m . S.E. the town, flows N. W. and joins the Zulia. Total course, about 80 m .

GRITTLE'TON, par. Eng. Wilts; 2060 ac. Pop. 351.
GRIVEGNEE, a vil. and com. Belgium, prov. of, and about 2 m . S.E. Liége, r. bank Ourthe. It has extensive manufactures of articles in iron, steam-engines, nails, copperwire, and musical strings; briek-works, worsted and fulling mills. Coal is worked in the vieinity. Pop. 2655.

GRIZON, one of the smaller Grenadines, W. Indies, between Grenada and Cariacou; lat. $12^{\circ} 18^{\prime} \mathrm{N}$.; lon. $61^{\circ} 40^{\prime} \mathrm{W}$. It is uninhabited, having no fresh water.

GROAHIRAS, a lake, Brazil, prov. Rio-Grande-do-Norte, about 16 m . S. Natal. It is about 12 m . in circuit, of considerable depth, and well supplied with fish. The town of Arez stands on its shore, and it contains several islands, one of which was fortified by the Dutch.

GROA1S, a small isl. off the coast of Newfoundland; lat. (N. point) $50^{\circ} 19^{\prime} \mathrm{N}$. ; lon. $55^{\circ} 30^{\prime} \mathrm{W}$. (R.)

GROBBENDONCK, a vil. and comn. Belgium, prov. of, and 18 m . E. Antwerp, on the Little Nethe. It has a salt refinery, a brewery, ropeworks, several mills, and a trade in corn and timber. Pop. 1028.

GRÖBMING, a market tn. Austria, Styria, circle of, and 40 m . N.W. Judenburg. It contains a church, hospital, and poorhouse, and has two annual fairs. Pop. 1000.

GROBOGAN, a dist., isl. Java, with vil. of same name, in the E. part of prov. Samārang. It is hilly, but fertile, and has several volcanoes, among which is Padan, 4101 ft .
high. The village lies at the junction of the Tjidocrian with the Tjibeurum; lat. $6^{\circ} 45^{\prime}$ S.; lon. $110^{\circ} 45^{\prime}$ E.

GROBZIG, a tn. Germany, Anhalt-Dessau, on the Fuhne, 15 m. N.N.W. Halle. It contains a church and an hospital, and has a brewery, mill, and four annual fairs. Pop. 1283.

GKOCHOW, a vil. Russian Poland, 3 m . E. by S. Warsaw, the scene of a combat between the Poles and Russians, February 19 and 21, 1831.

GRÖDE, a vil. Denmark, off W. eoast Schleswig, 10 m . W. Bredstedt, and about 3 m . long by 1 m . broad.

GRODEK, or Grudek, two places, Austria, Galicia :1, A tn. circle of, and 18 m . S.S.W. Lemberg, situated partly on a height between two lakes, and partly on three small islands. It contains a Greek parish church and a synagogue, and is inhabited chiefly by German colonists, though a particular quarter is allotted to the Jews, by whom a trade in flax is carried on. Pop. 3780.-2, A market tn. circle of, and 30 m . S.S.E. Czortkow, at the confluence of the Seret with the Dniester. It contains a Russian church. P. 3800 .

GRODDEN, or Gardena, one of the most remarkable valleys of the Tyrol, circle Botzen, about 15 m . E. Klausen. It stretches W. to E. about 12 m ., and is hemmed in by mountains of dolomite, which do not occur in any other part of the Alps, and assume the most fantastic forms, sometimes starting up in pinnacles and needle-like obelisks, and at other times extending in serrated ridges, or opening into chasms toothed like the jaws of an alligator. Many well-built villages are scattered over the valley, occupied by about 3500 inhabitants, most of whom are employed in making the animals and other figures of unpainted wood which fill the toy-shops of many of the principal towns of Europe. The trade in these has been valued at nearly $£ 10,000$ per annum.

GRODNO, a W. gov. Russia in Eırope, between lat. $51^{\circ} 30^{\prime}$ and $54^{\circ} \mathrm{N}$., and lon. $24^{\circ}$ and $27^{\circ} 56^{\prime}$ E., 270 m . N. to S. , and 230 m . at the broadest part ; area, 11,552 geo. sq. m.; bounded, N. by gov. Wilna, E. by Minsk, S. by Volhynia, and W. by Poland and prov. Bialystock. The surface, with exception of a few chalk hills, is nearly an entire level, and a great portion of it covered with forests of pine and swamps, the former belonging chiefly to the Crown. There are, however, extensive tracts of fertile land, which produce heavy crops of rye and barley, exceeding the home consumption. Hops, hemp, and flax, are also raised in considerable quantities. Fruits and vegetables are grown, but do not abound. The cultivation of bees occupies much attention, and large quantities of excellent honey and wax are obtained. The forests abound with wild boars, wolves, and bears. Elks and roebucks are also met with. The principal rivers are tbe Niemen, Bug, and Narew. 'The climate is extremely rigorous in winter, and the air is often damp and misty. Horned eattle and sheep are raised in considerable numbers. The minerals, of which there are few, consist of iron, limestone, building stone, clay, and saltpetre. The manufactures, not very extensive, consist chiefly of woollen stuffs, hats, and leather. The principal articles of exportation are grain, cattle, wool, leather, hops, honey, and wax, sent chiefly to Memel, Riga, and Königsberg. The inhabitants of the N. parts are of Lithnanian descent, the greater portion of the remainder are Russniaks, with about 74,000 Jews, some Tartars, and German colonists. The prevailing religions are the $R$. Catholic and the united Greek church. The government is divided into eight districts. Principal towns-Grodno, the capital ; Novogrodek, and Slonem. Pop. (1850), 925,000.

GRODNO, a tn. Russia, cap. of above gov., on an eminence, and partly in a valley, r. bank Niemen, 210 m . N.E. Warsaw. It is irregularly built, and consists of stone and wooden houses intermingled. Two or three of the streets are well paved, and tolerably well kept, but the others are in great disorder, and excessively dirty. It contains three handsome palaces, one of which was erected by Augustus III., king of Poland. The market-place is spacious and convenient. There are nine R. Catholic churches, two Greek, one Lutheran, and a synagogue; a gymnasium, a medical school, with a library; a cabinet, containing objects of natural history; and is botanie garden. Woollens, silk stuffs, linen, hats, cards, firearms, \&c., are manufactured, and there are three annual fairs. There is also a considerable traffic on the Niemen. Grodno is as old as the 12 th century, and was formerly considered the second town of Lithuania. Pop. 16,000.

GROEDE, a decayed vil. Holland, prov. Zeeland, 10 m . S.S.W. Middelburg. It has an old Calvinistic church, a small dissenting chapel, an Evangelical Lutheran, and a R. Catholic church, and two schools; limited manufacture of huckram, and four corn-mills. Pop. 2408.

GROENENDIJK, a vil. Holland, prov. Zeeland, 15 m. S.E. Goes, with a R. Catholic church. Pop., agricultural, 573.

GROENLO, shortened to Grol or Grolle [Latin, Grolia], a tn. Holland, prov. Gelderland, 19 m . E.S.E. Zutphen. It was formerly fortified, and a deep, broad ditch still surrounds it. It has a respectable townhouse standing in the marketplace, a Calvinistic and a R. Catholic church, and a synagogue; a Latin and a town school, and formerly there were two convents. Some cotton spinning and weaving are carried on, but the principal trade is in eggs, which is very extensive. There are six annual well-frequented cattle fairs. Pop. 1850.

GROESBEEK, a vil. Holland, prov. Gelderland, 6 m . S.E. Nijmegen, in a beautiful and elevated situation, rendering the land in the immediate vicinity difficult to cultivate from want of water in dry summers. It has a Calvinistic and a R. Catholic Church, and a school. Pop. 733.

GROHNDE, a tn. Hanover, prov. Calenburg, cap. bail. of same name, l. bank Weser, over which there is here a ferry, 7 m. S.S.E. Hameln. It contains a castle, and has a customhouse and building-dock. A battle was fought here in 1421. A monument marks the spot. Pop. tn., 836; bail., 6566.

GROISY, a vil. and com. Sardinian States, div. Savoy, 7 m . from Annecy. It has a parish charch, an old castle, once the property of St. François de Sales; a trade in corn and fat cattle, and three annual fairs. Pop. 1337.

GROITZSCH, a tn . Saxony, circle of, and 15 m . S. Leipzig, 1. bank Elster. It contains a castle, and has a spinningmill and two annual fairs. Pop. 2351.

GROIX, Groaix, or Groais, an isl. France, dep. Morbihan, about 3 m . off the coast, $32 \mathrm{~m} . \mathrm{W}$. Vaunes; lat. (light, which is 193 ft . high) $47^{\circ} 38^{\prime} 54^{\prime \prime} \mathrm{N}$. ; lon. $3^{\circ} 30^{\prime} 30^{\prime \prime} \mathrm{W}$. (r.) It is about 4 m . long, by $1 \frac{1}{2}$ broad, rocky and moorish, but with some fertile spots, on which wheat and lentils are grown. The population is mostly seafaring, and their chiel occupation is fishing. Pop. 3153.

GRÖMITZ, a small seaport, Denmark, Holstein, bail. Cismar, on the shores of the Baltic, 24 m . N.E. Lïbeck. It has a parish church, situated on a considerable height, and some coasting trade, but the inhabitants live chiefly by fishing and agriculture. Pop. 1000.

GROMO, a vil. and com. Austrian Italy, prov. of, and 20 m . N.E. Bergamo, on an isolated height, above l. bank Serio, in the Val Seriana. It contains a parish chureh, and the remains of two strong castles, which figure in the early history of Italy; and has steel-works, and manufactures of cutlery. The sword-blades of Gromo once competed with the best of those of Spain, but the manufacture has been extinct for more than a century. Pop. 769.

GRONAU.-1, A tn. Hanover, prov. Hildesheim, cap. bail. of same name, on a small isl. of the Leine, opposite to the confluence of the Dep, $20 \mathrm{~m} . \mathrm{S}$. Hanover. It contains a Protestant and a R. Catholic church, a synagogue, and an old Dominican monastery, now nsed as a prison. Pop. 1919. Area of bail., 40 geo. sq. m. Pop. 8242.-2, A tn. Rhenish Prussia, gov. of, and 29 m. N.W. Münster, r. bank Dinkel ; with a Protestant and a R. Catholic church, manufactures of linen, a trade in cattle and horses, and two annual fairs. Pop. 993.

GRONDSVELD, a vil. Holland, prov. Limburg, 3 m . S.E. Maastricht, with a church and school, and an annual fair. Pop. 607.

GRONE, a tn. Hanover, prov. Hildesheim, on a small stream of same name, at its confluence with the Leine, near Göttingen. It contains a parish church, and an old castle, formerly an imperial palace. Pop. 986.

GRONE, a river, France, formed in the S. of dep. Saône-et-Loire, by the union of two torrents which descend from the mountains of Beaujolais. It flows circuitously N.N.E., through a mountainous district, and joins r. bank Saône, about 5 m . below Chalons, after a course of about 40 m . A great number of paper-mills have been erected on its banks.

GRÖNENBACH, a market tn. Bavaria, circle Swabia, on the Aach, $46 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Augsburg. It has a Protestant and a R. Catholic church, a chapel, castle, and hospital; ma.
nufactures of flannel and calico, tile-works, an oil and other mills. The Kleferer baths are in the vicinity. Pop. 1712.

GRONINGEN, the most N.E. prov. of Holland; bounded, N. and N.E. by the North Sea and the estuary of the Ems, E. by Hanover, S. and S.W. by prov. Drenthe, and W. by Friesland; extreme length, N.W. to S.E., about 50 m .; extreme breadth, in its N. part, S.W. to N.E., 34 m. ; area, 682 geo. sq. m. It is generally flat, and in some parts marshy; and is watered by the Hunse and the Ahe, which enter it from Drenthe, and unite at the town of Groningen, and by other small streams, flowing to the Dollart, the Ems, and the North Sea; and it has numerous canals, among which are the Damsterdiep, Hoendiep, Boterdiep, \&c. The soil is, in general, of clay, and is very fertile; so much so, that the N. parts, where meadow and arable land alternate, are among the most densely populated in the kingdom. In the S.W. parts, considerable tracts have been cleared of turf, and now are excellent arable and meadow lands. The horses of Groningen are of the Frisian race, and are somewhat sought after ; cattle are extensively reared, and exported to the other provinces; and sheep and pigs are bred in considerable numbers. The principal crops are cole and linseed, and the usual cereals and legumes, and potatoes; various kinds of fruit are likewise successfully grown. The principal trade of the province is in horses, cattle, sheep, wool, pigs, pork, honey, wax, seeds, and grain. Butter is imported from Westphalia, then mixed with Groningen butter, and afterwards sent, by Stroobos, to Friesland. There are several extensive ship-building yards, and there are also distilleries of various kinds, tanneries, and saw, oil, fulling, and other mills ; manufactures of white lead, \&c. The inhabitants nearly all belong to the Calvinistic church. In 1849, there were 200 public schools in the province, attended by 32,216 pupils. Pop. (1850), 188,806.

GRONINGEN [Latin, Groninga; French, Groningue], a tn. Holland, cap. above prov., 92 m . N.E. Amsterdam, at the junction of the Ahe with the Hunse, forming here the Reitdiep, which is navigable for tolerably large vessels, and enables the town to carry on a direct maritime trade with various parts of Europe; other canals communicate with Leenwarden, Delfzijl, Winschoten, \&c. It is pear-shaped, the broad end being S., and consists of the old town, within the line of the former walls, now planted with trees; and the new town, which forms extensive and well-built suburbs. It has eight gates, is well and regularly, but not closely, built ; the town being beautified with numerous gardens and open spaces. It has straight, broad streets, traversed as usual by canals, whose banks are planted with trees, and which are crossed by eighteen bridges. Nineteen of the seventy streets, of which the town is composed, terminate in the two principal markets-the Great Market, called also Breede-markt, and the Fish-market, which lie close to each other; and the former of which, laid off in 1447, is the largest in the kingdom. Besides these markets, the Ossen-markt [Oxen market] is also very large, and is surrounded by well-built houses; among which are conspicuons the academy printing-office, and the deaf and dumb institution, of whose founder-Henri Daniel Guyot, : French clergyman-it contains a marble statue, erected in 1828. The most important public building in Groningen is the townhall [Stad-huis], in the Breede-markt, a large elegant Gothic edifice, completed in 1810. The province-house [Pro-vincie-huis], used for the meetings of the provincial government, is a very old building; besides which the stamp-office, courts of justice, civil and military prison, arsenal, weighhouse, butter-house, and corn exchange, are all noteworthy of their kind. The Calvinists have five churches; of which St. Martin's, a Gothic structure, with elegant lofty towers, is the finest in the town. There are also French, Baptist, Evangelical Lutheran, and R. Catholic churches, and a synagogue; and, prior to the Reformation, there were several monasterics and numneries. The charitable and benevolent institutions are exceedingly numerous, and include the deaf and dumb institution, already adverted to, and founded in 1790 ; town and military hospital, and a large number of hospitals for the poor and for orphans, both under the local authorities, and under the different religious bodies. The principal educational institution is the academy or high school, founded in 1614, and in 1849 attended by 216 students, of whom 109 were studying law, 55 divinity, and 45 medicine; connected with it are a botanical and an economical garden, school of anatomy,
hospital, library, museum of natural history, cabinet of agricultural implements, and riding sehool. There are also a Latin school, an academy of art, arehitecture, mechanics, and naval tactics; two town, two poor, and numerous common schools; and societies of natural history and of art. The mannfactures of Groningen include wool-combing, blue dying, small-shot founding, flax spinning and weaving, tanning, brush, hat, rope, and cord making ; printing, brewing, vine-gar-making, soap-boiling, \&e.; besides which, there are six ship-building yards, and oil, fulling, saw, and other mills, in considerable numbers, driven both by wind and by steam. The grain trade is extensive; in some years Groningen being the greatest corn market in the kiagdom. About 600 vessels arrive and leave the port aunually. Pop. (1850), 33,695.

GRÖNINGEN, a tn. Prussia, prov. Saxony, gov. of, and 26 m . S.E. Magdeburg, on the Bode. It is entered by three gates; has two Protestant parish churches, two schools, a synagogue, and hospital ; manufactures of paper, two distilleries, numerous breweries, and two annual fairs. Pop. 2364.
(iRÖNSUND, a clannel, Demmark, separating the island of Falster, on the E., from that of Moen, on the W., and giving a commnnieation between the Baltic and the Great Belt. Its length is about 6 m ., and its mean brealth little more than 1 m . Two sandbanks at its E . outlet divide it into three channels, whieh, in their shallowest places, will not float vessels drawing more than 12 ft . Owing to the strong eurrent which runs through the Grönsund, it very seldom freezes.

GROOMSPORT, a fishing vil. and coast-guard station, Ireland, co. Down, at the S. side of the entrance to Belfast Lough, 5 m . N.W. Donaghadee. It has a good harbour for small eraft, and a small pier, where the Duke of Sehomberg landed with his army in 1690. Pop. 568.

GROOTE EYLAND'T' [great island], an isl., N. Anstralia, Gulf of Carpentaria; lat. (Central 1lill) $13^{\circ} 57^{\prime}$ S.; lon. $136^{\circ} 42^{\prime} \mathrm{E}$. (r.) Greatest length, N. to S., 45 m .; average breadth, 25 to 30 m . It is of irregular form, its N . end terminating in three distinct peninsulas, while other two project E. and W. respectively, from its S. extremity; the latter terminating in a high rock, the former in a sandy hill. The coast at this end of the island is lined with sandy, sterile hills. At many other points, particularly N. and E., it is beset with reefs and rocky islets.

GROOTEBROEK, a vil. Holland, prov. N. Holland, 3 m . W. Eukhuizen. It has a Calvinistie and a R. Catholic church, an orphan hospital, and a school. Inlabitants chiefly engaged in clieese and butter making. Pop. 1046.

GROOTEGAS'T, a vil. IIolland, prov. of, and 12 m . W. Groningen. It is a scattered place, but shaded with trees, and agreeable; and las a Calvinistic chureh, a sehool, and an aunual fair. Pop. 785.

GROI'ELLO, a vil. and com. Sardinian States, div. Novara, about 8 m. from Mortara; with two churches and an almshouse; and a trade in corn, rice, wine, and silk. P. 2672.

GROS-Bliderstroff, a vil. France, dep. Moselle, near Sarreguemines, with manufactures of cigar cases, pianos, and iron furnaces. Pop. 2124.

GROSIO, a vil. and com. Austrian Italy, in the Valtelline, prov. of, and 20 m . E.N.E. Sondrio, 1. bauk Adda, here crossed by a bridge. It stands in a narrow hollow, in a valley, contains a parish and an auxiliary chureh, and lias tanneries, numerous mills, and an annual fair. Pop. 2127.

GROSMONT, a vil. and par. England, co. Monmouth. The viliage, 10 m. . by W. Monmouth, consists of some scattered cottages, but was formerly a town of great importance. It contains a fine cruciform church, and the remains of an old castle; fairs are held several times annually. Area of par. 5810 ae . Pop. 682.

GROSOTTNO, or Grossotto, a vil. and com. Austrian Italy, in the Valtelline, prov. Sondrio, r. bank Adda, about 2 m. below Grosio, and 6 m . N.N.E. Tirano. It has a parish and four anxiliary churches, and an annual fair. A wholesale massaere of 600 Italian Protestants was perpetrated here in 1620. Pop. 1651.

GROSS'AUPA, a vil. Bohemia, circle and 34 m . N.E. by W. Küniggrätz, in a mountainous district on the river in a deep valley of its own name. It has a parish chnreh, a school, four nills, and a limestone quarry. Near it are mines of copper and arsenic. Pop. 2426.

GROSS Bieberan. a market tn. Hesse-Darmstadt, prov. Starkenburg, circle Dieburg, with a Protestant parish clurch, parsonage, and townhouse; tile-works, two mills, and four annual fairs. Pop. 1498.

GROSS-Bitesch, a tn. Moravia, circle and 18 m . W.N.W. Brünn. It is walled, has a parish church, a court-louse, an hospital, and six annual fairs. Pop. 2200.

GROSS-Glockner, a peak, Noric Alps. See Alps, p. 102.
GROSSBO'TT'WAR, a tn. Würteniberg, circle Neckar, bail. of, and 5 m . from Marbaeh, in the valley of the Bottwar. It contains a church and a Latin sehool. Pop. 2481.

GROSSE ISLE, an isl., U. States, Michigan, in Detroit river, near its embouchure in Lake Erie. Length, 6 m ; breadth, $1 \frac{1}{2} \mathrm{~m}$. The soil is alluvial, and remarkably fertile.

GROSSENEHRIG, a tn. Germany, Sehwarzburg-Sondershausen, on the Benne, at its confluence with the Helbe, $8 \mathrm{~m} . \mathrm{S} . \mathrm{S} . \mathrm{W}$. Sondershausen. It contains a church, and has an oil and numerons other mills, and an annual fair. P. 865.

Grossenhain, tn. Saxony. See Hain.
GROSSENLINDEN, a tn. Hesse-Darmstadt, Oberhessen, cirele, and 4 m . S. Giessen. It has a Lutheran rarish church, a townhouse, and sehool; important dye-works, an oil, and several other mills. Pop. 992.

GROSSENLÜDER, a tn. Hesse-Cassel, prov. of, and 5 m. N.W. Fulda, eap. bail. of same name, l. bank Lüder. It contains a church and a chapel, and has a salt spring, from which mueh salt is annually nade; two mills, and an annual fair. Pop. of tn., 1567; of bail., 4079.

GROSSETO, a city, Tuscany, cap. prov. of same name, and see of a bishop, 45 m . S.S.W. Sienna, near the r . bank Ombrone. It is tolerably well built, surrounded by walls, entered by two gates; and has a large and handsome square, wide and well-kept streets, a spacious cathedral, parish chureh, hospital, municipal offices, a barrack, two convents, and, in the centre of the square, a colossal statuo of Leopold II. Manufactures :-silken and woollen fabrics, leather, paper, soap, and glass. Pop. 2315.-The Province, bounded, N. by prov. Sienna, E. and S.E. by the Papal States, and S.W. and W. by the Mediterranean; area, $1801 \mathrm{sq} . \mathrm{m}$. ; inchudes the isl. Giglio, and is divided into 26 communes. It is hilly and well wooded towards the N. and N.E., but lowers down towards the coast, where it becomes marshy, and presents numerons salt pools. The valleys are fertile, and are watered by the Ombrone, Alberga, and Fiori. The climate is temperate and healihy, except in the vicinity of tho marshes. Besides cereals, oil and wine are produced, and silkworm3 reared. Manufactures unimportant. Pop. 67,539.

GROSSGERAU, or Gerau, a tn. 1Iesse-Darmstadt, prov. Starkenburg, cap. circle of same name, on the Sehwarzbach, $16 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Framkfuit. It is the seat of a law court and other publie offices, and contains an old churel and an hospital. Pop. of tn., 1996; of cirele, 37,107.

GROSSRÖLIRSDORF, a vil. Saxony, circle Dresden, 8 m . from lirna. It has a large and handsome parish chureh, and is one of the most important localities in Saxony for the manufacture of linen and ribbons. Pop. 3150.

GROSSWARDEIN,or Nagy-VArads [Latin, Varadinum], a tn . Nungary, cap. co. Bihar, on the rapid Körös, 38 m . S.S.E. Debreczin, in a beautiful, but somewhat marshy and unhealthy plain. It consists of the town proper, surronnded with walls, and otherwise fortified; and of eight suburbs, or rather distinet villages. It is tolerally well built, is the see of a bishop, and seat of several courts and public offices; contains a R. Catholic cathedral, three other R. Catholic parish, two Greek non-united, and three Protestant chnrches, a synagogue, several monasteries and nunneries, an ecelesiastical seminary, gymnasium, national school, a courthouse, in which the county meetings are held; an orphan, and other hospitals; and has extensive manufactures of earthenware, a considerable trade, chiefly in wine and other agricultural produce; a marble quarry, and six large annual fairs. In the neighbourhood are thermal baths, well-frequented. l'op. 19,700.

GROTON, par. Eng. Suffolk; 1580 ac. Pop. 624.
GROTON, several places, U. States:-1, A vil. and township, New York. The vil., 162 m . W. by S. Albany, contains two churches, a flourishing academy, and various manufacturing establishments. l'op. township, 3618--2, A township, Connectient, 45 m. S.E. Hartford. It has a good harbour on Mystie river, and several whalers and other
vessels are owned in the township. Pop. 2963.-3. A township, Massachusetts, 33 m . N.W. Boston. It has paper factories, and a variety of mills. Pop. 2139.-4, A township, Vermont, 29 m. E. by S. Montpelier. Pop. 928.-5, A township, New Hampshire, 42 m . N. N.W. Concord. Pop. 870.

GROTTA-MINARDA, a tn . Naples, prov. Principato Ultra, 6 m. S.S.W. Ariano, near l. bank Ufita. It has two colleges, a convent, and two annual fairs. Pop. 2500.

GROTTAGLIE, a tn. Naples, prov. Otranto, 12 m . E.N.E. Taranto. It has a college and four convents. P. 6000 .

GROTTAMARE, a tn. Papal States, deleg. of, and 14 m. S.E. Fermo, near the Adriatic. It contains a large sugarhouse, and has manufactures of cream-of-tartar and liquorice. Pop. about 4000 .

GRO'TTAU, or Krotau, a tn. Bolemia, circle Bınzlau, r. bank Neisse, 60 m. N.N.E. Prague. It has a parish church, school, and poorhouse, manufactures of linen and yarn, a bleachfield, a saw and a flour mill. Pop. 1473.

GROTTE, a tn. Sicily, dist. and 10 m . N.N.E. Girgenti. Near it sulphur is extensively obtained. Pop. 4470.

GRO'TTERIA, a tn. and com. Naples, prov. Calabria Ultra I., dist. of, and 7 m. N.N.E. Gerace, in a fertile valley covered with vineyards and oliveyards. It contains two parish churches. Pop. 4497.

GROTTKAU, a tn. Prussia, prov. Silesia, gov. and 28 m . W.N.W. Oppeln, cap. circle of same name. It is walled, has three gates, and three suburbs; courts and offices for the circle, a Protestant and a R. Catholic church, two schools, an hospital, infirmary, and poorhonse ; and manufactures of vinegar, potass, and tobacco; tile-works, two mills, several dyeworks, and four annual fairs. Pop. 3083.-TThe circle, watered by the Neisse and several smaller streams, has both good arable and pasture land; area, 152 gco. sq. m. Pop. 37,469.

GROTTOLE, a tn. Naples, prov. Basilicata, 30 m . E.S.E. Potenza. It has a college, a parish church, and an annual fair. Pop. 2216.

GRÖ'TZINGEN.-1, A tn. Würtemberg, circle Black Forest, on the Aich, 10 m. N.N.E. Reutlingen. It is surrounded by lofty turretted walls; contains a church with a fine tower, and several monuments, and has a bleachfield. Pop. 1030.-2, A tn. Baden, circle Middle Rhine, on the Pfinz, 4 m . E. Carlsruhe; with manufactures of sugar and metal buttons. Pop. 2061.

GROUW, formerly Growe, a vil. Holland, prov. Friesland, 8 m . S. Leenwarden, nearly surrounded by water, E. by lake lik, and N. and W. by the river Grouw. It has a Calvinistic and a Baptist church, a school, a weigh-house, a paved cattle-market; trade in butter, checse, and grain; cattlebreeding, watch and rope making, and boat-building, sundry mills, and six tan-yards. Pop. 1429.

GROVE, two pars. England:-1, Buck3; 210 ac. P. 25. -2, Notts; 1500 ac. Pop. 91.

GRUB, two places, Switzerland:-1, A vil. and par., can. of, and 10 m. N.E. Appenzell, in a level and fertile valley; with a parish church and parsonage, finely situated on a height, and has manufactures of linen. Pop. 934.-2, A vil. and par., can. St. Gallen, but near the former, the two parishes forming the frontiers of the two cantons. Pop. 605.

GRUBE, a vil. Denmark, Holstein, bail. Cismar, on the S. shore of the lake of same name, 33 m . N.E. Liibeck. It was once a place of more importance than at present, and had a castle, it which Count Gerard of Holstein resided. It contains a parish church and an hospital. Pop. 700.-The LaKE of Grube is about 4 m . long, and varies much in breadth. It is very shallow, and contains several small islands. It discharges itself into the Baltic by two outlets.

GRUBENHAGEN, a principality, Hanover, landrostei Hildesheim. It consists of three distinct parts-one on the W., enclosed between principality Göttingen, and the duchy of Brunswick; another in the E., enclosed betwixt the same ducliy and Prussian Saxony; and the third and largest, bounded N. by territory Klausthal and Brunswick, E. Brunswick and Prussian Saxony, S. Prussian Saxony, and W. Göttingen; area of the whole about $376 \mathrm{sq} . \mathrm{m}$. The surface is generally mountainous. In particular the second and third parts are covered by the Harz mountains, which have here, in the Ackenberg, one of their loftiest summits. The first, or most W. portion, has few hills of great elevation. The principal streams are the Leine, Ruhme, Oder, Sieber, and Söse,
and several considerable lakes are embosomed among the extensive forests of the Harz. In one or two valleys open to the S., and protected by lofty hills from the northern blasts, hops and tobaceo are extensively grown, and in some other districts apples and cherries are so abundant as to be exported. Still, on the whole, the quantity of good arable land is small, and the quantity of corn grown is very limited. The minerals are valuable, and the working of them, and the cutting of timber in the forest, are the great sources of employment. Among the metals are gold, silver, copper, lead, zinc, and iron, and the quarries furnish in abundance, marble, alabaster, and roofing slate. The principal manufactures are woollens, linens, and lace; and, in addition to these articles, and the produce of the mines and forests, a considerable trade is carried on in cattle and dairy produce. The capital is Eimbeck. Pop. 77,002.

GRUDEK, or Grodek, a tn. Russia, gov. Podolsk, circle and 34 m. N.N.W. Kamenetz, on the Smotritza. Pop. 2772.

GRUGLIASCO, a vil. and com. Sardinian States, Piedmont, div. and 5 m . W. Turin. It contains a number of beautiful villas, adorned with gardens, irrigated by a canal from the Dora Riparia; a handsome parish church, with some fine paintings; a monastery, with a church; an old square tower, and an hospital; and has a trade in excellent silk, produced within the district. Grugliasco was once strongly walled, and was considered as a kind of outer defence of Turin. Pop. 2074.

GRUISSAN, a vil. France, dep. Ande, 6 m. S.E. Narbonne, on a small lake, about a mile from the sea-shore, with some coasting and fishing trade. Pop. 2510.

GRULICH, a tn. Bohemia, circle of, and 41 m . E.S.E. Königgrätz, on an elevated plain not far from the Schrenberg, in which the March has its source. It has a parish church, a courthouse, manufactures of woollen cloth, two mills, a weekly market, and four annual fairs. On the Muttergottesberg, in the vicinity, there is a Servite monastery, with a church, to which numerous pilgrimages are made. P. 2388.

GRUMBACH, numerous places, Germany, particularly -1, (Ober and Nieder), A vil. Saxony, circle Dresden, bail. Gryllenburg. It has limekilns, and several stone quarries. Pop. 1402.-2, A vil. Rhenish Prussia, gov. Treves, bail. Wendel, on the Gran. It is the seat of a local court, and contains a Protestant and a R. Catholic church. In the vicinity are mines of iron, copper, and quicksilver. P. 587.

GRUMELLO del Monte, a vil. and com. Austrian Italy, prov. of, and 12 m . S.E. Bergamo, on the S. slope of a hill covered with vineyards. It consists of a number of wellbuilt, but somewhat scattered houses; contains a large and handsome parish church, an hospital, and two old castles, and is famous for its wine. Pop. 1650.

GRUMO, two tns. Naples:-1, Prov. of, and 6 m . N Naples; with a church and two convents. Pop. 3000.-2, Prov. of, and 12 m. S.W. Bari. Pop. 3136.

GRƯNA, a vil. Saxony, circle Zwickau, bail. Chemnitz. It contains several well-built houses, roofed with slates, and provided with lightning conductors, and a handsome turreted school-house, and has manufactures of silk and cotton hosiery, several large bleachfields, quarries, saw and other mills. Pop. 2240.

GRUNAU-Camenz, a vil. Prussia, prov. Silesia, gov. Breslau, circle Frankenstein, r. bank Pausebach. It has a large and handsome church, built in the form of a cross, several mills, and a trade in corn and cattle. Pop. 986.

GRUNBACH, a vil. Würtemberg, circle Juxt, on the Rems, 30 m. S.W. Elwangen. It contains a parish church. Much wine is grown in the district. Pop. 1398.

GRÜNBERG, a tn. Hesse-Darmstadt, prov. Oberhessen, cap. circle of same name, 35 m . N.N.E. Frankfurt. It is walled, has two suburbs, an old castle, church, an hospital, and manufactures of woollen goods, a tannery, tile-works, dyeworks, a trade in cattle, several mills, and six annual fairs. Pop. tn., 2439 ; circle, 30,703.

GRUNBERG, a tn. Prussia, prov. Silesia, gov. and 59 m . N.N.W. Liegnitz, cap. circle of same name, on the golden Lunze. It is walled, has four suburbs, several courts and public offices, a Protestant and a R. Catholic parish church, several schools, a townhouse, poor-bouse, house of correction, infirmary, hospital, and orphan asylum; important manufactures of woollen and linen cloth, silk goods, and leather; numerous spinning and other mills, two weekly markets, and
four amnual fairs, chiefly for wool and cattle. Some indifferent wine is made, used chiefly for making vinegar. Pop. 10,682. ——Area of circle, $255 \mathrm{geo} . \mathrm{sq} . \mathrm{m}$. Pop. (1846) 49,579.

GRUND, a tn. Hanover, principality Grubenhagen, dist. Klausthal, at the foot of the IIübichenstein and lberg mountains, 24 m. N.E. Göttingen. Near it are extensive mines, and most of the inhabitants are miners. Pop. 1416.

GRUNDISBURGII, par. Eng. Suffolk; 1421 ac. P. 874.
GRÜNHAIN, a tn. Saxony, circle of, and 16 m . E.S.E. Zwickau, cap. bail. of same name, in a wooded district. It has a fine forest house, and some brewing, turf-cutting, and mining, three annual fairs, and a little trade. Pop. 1666. Area of bail. 64 geo. sq. in. Pop. 23,841.

GRUUNHAINICHEN, a vil. Saxony, circle Zwiekau, bail. Augustusburg, on the Flöha, here crossed by a bridge. It has several mills, and extensive manufactures of wooden articles, many of which are exported to N. America. P. 1076.

GRÜNINGEN, a tn. and par. Switzerland, can. of, and $13 \mathrm{~m} . \mathrm{S} . E$. Zürich, cap. bail. of same name. It was once surrounded by walls, though now open, and is well built. It has a new parish church, and a castle, situated on a commanding height, but now converted into the parsonage; manufactures of cotton, and three large amnual fairs. Pop. 1583.

GRÜNSFELD, a tn. Baden, circle Lower Rhine, on a small affluent of the Tauber, $10 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Wiazburg. It contains a parish chureh, and has five large annual fairs. Much wine is grown in the district. Pop. 1165.

GRUNSTADT, a tn . Bavaria, Palatinate, cap. can. of same name, r. bank Liss, 10 m . S.W. Worms. It is the seat of a justice-of-peace court; contains a R. Catholic, and two Protestant parish clurches, a Latin school, and two old castles, once the residence of the counts of Leiningen-Westerburg; and has manufactures of delft and stone-ware, and a trade in corn, wine, and cattle. Pop. tn. 3522; can. 23,745.

GRUSBACH, or Hrusowany, a market tn. Austria, Moravia, circle of, and 16 m . E.S.E. Znain, with a parish church, a castle, a mill, and four annual fairs. Pop. 1117.

GRUSIA. See Georgia.
GRUTLI [properly Riedli, a little meadow], a meadow Switzerland, can. Uri, about 2000 ft . above sea-level, on the E. slope of mount Seelis, W. shore of upper lake Luzern, 7 in. N.N.W. Altorf. Here it is alleged the first three Swiss confederates, Walter Fürst of Uri, Werner Stauffacher of Schwyz, and Arnold an der Halden of Unterwalden, met in 1307, and formed the first compact for the deliverance of their country from Austrian thraldom. This compact was renewed in the same place in 1313; and again in 1713, by 360 deputies of the three original cantons.

GRU YERES [Gerinan, Greyerz], a vil. and par. Switzerland, can. of, and 16 m. S. Fribourg, on a hill crowned by one of the oldest and best preserved feudal eastles in the country. It contains a church and an hospital, and gives its name to the well-known chcese, of which about 40,000 cwts. amually are made in the surrounding districts. Pop. 904.

GRYBOW, a tn . Austria, Galicia, eircle of, and 12 m . E.N.E. Sandec, on the Biala. It contains a fine castle, and has 12 annual fairs. Pop. 1400 .

GRYFE, a rapid streanlet, Scotland, co. Renfrew, falling into the Black Cart near Paisley.

GSTEIG, two vils. Switzerland, can. Bern:-1, A vil. and par., 29 m . S.E. Bern, near Interlacken, close under the lofty and precipitous Mittaghorn. Pop. par., 5522.-2, A vil. in the upper Gsteig valley, 39 m. S. Bern, with a massive church, and so close under Mount Sanetsch, that the sun is not seen for six weeks during winter.

GUACALERA, a small tn. La Plata, prov. of, and 95 m . N.N.W. Salta, near r. bank Jujuy.

GUACARA, a tn . Venezuela, prov. Carabobo, 10 m. E. Valencia, near W. end of Lake Tacarigua. Pop. 4000.

GUACHINANGO, a tin. Mexico, dep. Puebla, 103 m . N.E. Mexico, in the vicinity of whieh a large quantity of excellent vanilla is raised. Pop. about 6000 .

GUACHIPAS, or Guachipe, a river, La Plata, prov. Salta, rising in the Andes, near lat. $24^{\circ} 30^{\circ} \mathrm{S}$. ; lon. $67^{\circ} \mathrm{W}$.; flows S., then E.N.E., and is joined by the Arias, 32 m . S. by E. Salta, and forms the main head stream of the Salado (which see). Conrse about 225 m .; principal affluents, San Carlos and the Negro.

GUACUBA, or Leon, a river, New Granada, rising in
the sierra de Veneta, and, after a N.W. course of about 150 m ., falling into Choco Bay, Gulf of Darien.

GUADAJOZ, a river, Spain, Andalusia. It is formed near Baena, prov. Cordova, by a number of small streams proceeding from the sierras of Alcala-la-Real and Priego, traverses the $\mathbf{E}$. and central part of the prov., and, about $3 \mathrm{~m} . \mathrm{S}$.W. the town of Cordova, joins l. bank Guadalquivir, after a course of alout 50 m . It abounds with fish, particularly eels.

GUADALAJARA, a prov. Spain, New Castile, bounded, N. by provs. Segovia, Soria, and Saragossa ; E. Saragossa and Teruel, S. Cuenca, and W. Madrid; area, 7012 sq . m. The surface in the N. is mountainous, and contains, particularly in the district of Atienza, some of the loftiest summits of the peninsula, and have their culminating point in the Pena de la Bodera. In the E., also, part of the province is covered by mountains belonging to the Iberian system. The greater part of the remaining surface consists of elevated plains. The principal rivers are the Tagus, in the S.E.; the Tajuña and Henares in the centre, and the Jarama in the W. The soil, which is generally of good quality, varies considerably in different districts. In those of Tamajon, it is well adapted for cereals, but not so well for the vine and olive. In the higher districts, covered by sierras, pasture necessarily occupies the larger portion, and furnishes only occasional tracts for the plough. The district of Alcarria, the most fertile of all, matures, in abundance, all kinds of crops common to the latitude. Among minerals, iron is particularly abundant, and has been worked from the earliest periods, as indicated by the extensive galleries left by the Romans in several quarters. Lead occurs in small quantities, and there are some indications of coal. Both manufactures and trade, at one time of considerable importance, have much declined. For administrative purposes, the province is divided into nine districts, of which Guadalajara is the capital. Pop. 199,746.

GUADALAJARA.-1, A city, Spain, New Castile, cap. above prov., 44 m . N.E. by E. Madrid, l. bank Henares. It is, in general, substantially built, has well-paved streets, a spacious principal, and 19 smaller squares; five parish, seven conventual, and other ehurches; four existing, and several suppressed convents; an Ionic town and session houses, erected in 1585 ; a large and handsome theatre, civil, military, and lying-in hospitals; barracks, extensive palace of the Duke-delInfantado, Latin, normal, and various other schools; public library, and a large and elegant structure, with an octagonal tower, founded, in the reign of Francis V., by Don Pedro Astrug, as a cloth factory, but ceded to the national society of engineers in 1832, and now containing a fine museum, extensive library, laboratory, gymnasium, and other offices. There are four public promenades, and six public fountains, supplied with water by an extensive Roman aqueduct. The chef manufactures are woollen fabrics, soap, earthenware, wine, and oil; trade in grain, fruits, silk, and flax. Pop. 5170.

2, A tn. Mexico. See Guadalaxara.
GUADALAVIAR, Blanco, or Tulia, a river, Spain, Aragon, which rises in a small lake in the sierra Molina, prov. Tcruel, flows E. past Albarracin, till it reaches Teruel, when it flows S.S.W., and, shortly after entering Valencia, reaches Ademuz. Here it begins to turn gradually round to the S.E., and falls into the Mediterranean a little below the town of Valencia, after a course of nearly 200 m . Its principal affluent is the Alhambra. It is extensively used for irrigation, and furnishes much valuable water-power.

GUADAlaxara, or Guadalajara, a city, Mexico, cap. dep. of Jalisco or Guadalaxara, I. bank Rio de Santiago; lat. $21^{\circ} 9^{\prime}$ N.; lon. $103^{\circ} 2^{\prime} 15^{\prime \prime} \mathrm{W} . ; 275 \mathrm{~m}$. W.N. W. Mexico, and about 140 m . from the Pacific. It is a large and handsome city, the streets spacious, and the houses excellent. There are 14 squares, 12 fountains, and a number of convents and churches. In the Plaza Mayor is seen the cathedral, a magnificent structure, although its appearance has been much impaired by the destruction of the cupolas of both its towers by the great earthquake of 1818 ; on the right side of the same square is the Government IIouse, in a noble and severe style, and with a fine façade; and the arcades, which line the two sides of the square, are very handsome, and are filled with elegant and well-stocked shops, in which almost every description of European and Chinese manufactures may be obtained. The Alamedla or public walk is beautifully laid out with trees and flowers, with a fountain in the centre, and a
stream of water all round. Various trades are carried on here with success, particularly those of blacksmith, carpenter, and silversmith. There are also manufactures of shawls of striped calico, of paper, and of a particular description of earthen-
N.E., and joins r. bank Ebro, at Caspe, after a course of about 70 m . Its chief affluents are the Pitarque, Calanda, and Gullo.

GUADALOUPE-y-Calyo, a tn. Mexico, prov. of, and 173 m. S.S.W. Chihuahua, in a mountainous district. It derives its importance from the silver mines in its vicinity. The houses are covered with shingles, and the windows glazed in the English manner. Pop. $10,000$.

GUADALQUIVIR [anc. Baetis], one of the principal rivers of Spain. It drains all the N. portion of Andalusia, which it intersects N.E. to S.W. It originates in an offset of the sierra Sagra, on the frontiers of Murcia, and is rapidly increased by the accession of numerous streams from both sides. Its general course is N.E. to S.W., passing Andujar, Villafranca, Cordova, and Sevilla, where, becoming encumbered with alluvial deposits, and dividing into three branclies, it forms the two islands of Isla Minor, and Isla Major, covered with rich pastures, on which great numbers of horses and cattle are fed. The branches form a junction at the $S$. extremity of
ware, and great skill is displayed in leather working. The foreign trade of the place, now very trifling, was formerly carried on through the port of San Blas, on the Pacific, but is now removed to the superior harbours of Mazatlan and Guaymas. Guadalaxara was founded in 1551 , and, in 1570 , was created an espicopal city. Pop. estimated at 70,000 .

GUADALAXARA, dep., Mexico. See Jalisco.
GUADALCANAL, a tn. Spain, Andalusia, prov. of, and 46 m. N. Sevilla. It is, in general, well built, has regular streets, and a spacious public square; three churches, seven chapels, four convents, an hospital, storehouse, cemetery, and some primary schools. Manufactures:-leather, soap, hats, brandy, wine, and oil. Trade:--grain, cattle, and fruits. In the environs, mines of silver were once wrought. Pop. 5466 .

GUADALCANAR, an isl., one of the Solomon group, at the S . entrance to Indispensable Strait; lat. $9^{\circ} 50^{\prime} \mathrm{S}$. ; lon. $160^{\circ} 54^{\prime} \mathrm{E}$. (R.) The S. shore is low, and bordered with cocoa trees, but the interior is mountainous.

GUADALE'TE, a river, Spain, Andalusia. It rises in the sierra del Penal or San Cristobal, prov. Cadiz, flows W.S.W. near the town of Bornos, and past that of Arcos, and falls into the Atlantic near Matagorda, 3 m . E. Cadiz, after a course of about 90 m . Its affluents are, on the right, the Salado, Gato, and Tabajale; and, on the left, the Comares, Majaceite, and Alamillo. It is well supplied with fish. The famous battle which gave the Moors the ascendancy in Spain, was fought on the banks, and bears the name of this river.

GUADALHORCE, a river, Spain, Andalusia, prov. Malaga. It rises on the frontiers of prov. Granada, about 10 m . E. Antequera, flows S.W. and then S.E., and falls into the Mediterranean 6 m. S. by W. Malaga, after receiving numerous affluents. It propels numerous mills, is well-stocked with fish, and is much used for irrigation. Total course, about 80 m .

GUADALIMAR, a river, Spain, formed by the union of several small streams, near Vilaverde, prov. Albacete, New Castile, in the sierra d'Alcaraz. It flows S.W., and joins r. bank Guadalquivir, about 15 m . N. Jaen, after a course of nearly 80 m . It is generally shallow, and abounds with fish. Principal affluents, the Guadarmena and the Guadalen.

GUADALMEZ, a river, Spain, which rises on the N. slope of the sierra Morena, in the N.E. of prov. Cordova, flows W., forming, for some time, the boundary between that prov. and Ciudad-Real, and, after a course of above $50 \mathrm{~m}_{4}$, joins r. bank Zuja. Its principal affluents are, on the right, the Alendin and Valdeazogues; and on the left, the Pedro Moro, Membrillo, Guadamora, St. Muria, and Ciguenuela.

GUADALOPE, a river, Spain, Aragon, which rises near Villroga-de-los-Pinares, prov. Teruel, Hows first W., then

Isla Major, and the united stream, flowing S.S.W., falls into the Atlantic by a broad estuary at the town of Sanlucar de Barrameda. Its whole course is 250 m ., of which above 70 m . are navigable, commencing at Sevilla, up to which, and occasionally for several miles beyond it, the influence of the tide is felt. Its principal affluents are, on the r. bank, the Guadalimar, Guadiel, Rumblar, Escobar, Jandula, and Yeguas ; and, on the left, the Guadiana-menor, Jandulilla, Guadulbullon or Jaen, and the Salado de Porcuna. The basin of the Guadalquivir, about 300 m . long N.E. to S.W., by 125 m . broad, is bounded, E. by the sierras of Huescar, Sagra, Segura, and Alcaraz; S. by the face of the Alpujarras, including the sierra Nevada; and N. by the sierra Morena, and the chain continued W. from it, and forming, on its N. side, the watershed of the Guadiana. In the upper part of its course, the Guadalquivir flows through some very rugged and almost uninhabited districts; but, at Cordova, begins to traverse a flat and fertile, though thinly-peopled country. S. of Sevilla, where it forms the islands already mentioned, the left brancli flows along a strip of land called the Marisma, about 37 m . long, and 5 m . broad, a saline, noxious spot, almost abandoned as uninhabitable: the right branch skirts an equally desolate tract, extending over an area of 150 m . At certain seasons, swollen by melting snows, and retarded in its course by high tides, this river often commits great ravages by inundation. It abounds with fish, the taking of which gives employment to a considerable proportion of the persons who live on its banks.

GUADALUPE, an isl. Pacific Ocean, off the N. part of the peninsula of Lower California; lat. $28^{\circ} 54^{\prime} \mathrm{N}$.; lon. $118^{\circ} 20^{\prime} \mathrm{W}$. (r.) It is of volcanic origin, high, with blnff shores on the $N$. and $W$. sides, and may be seen from a distance of 45 m . At its $S$. end it is very barren, but in the N . part, there are several fertile valleys. Wood and water may be obtained here, and goats are numerous.

GUADALUPE, a mountain-range, Spain, New Castile, belonging, according to Bruguière's classification, to the OretoHerminian chain. It commences with the termination of the sierra de Montanche, and stretches first in a N.E. and then in an E. direction to the source of the Guadarranque, where it is succeeded by the mountains of Toledo. It forms part of the watershed between the basins of the Guadiana and the Tagus. Its culminating point has a height of 5254 ft ., and retains the snow for nine months. In certain exposures there is frost every night throughout the year.

GUADALUPE, a tn. Spain, New Castile, prov. of, and 95 m. S.W. Toledo, on the S. slope of Mount Altamira. It is poorly built; streets very irregular, and so damp, as to render the ground floor of the houses uninhabitable. It has
a fine chureh belonging to the famous monastery of Geronino, a grammar and a primary school, a townhouse, and prison; a few manufactures of linen, leather, and copper-ware; several oil and flour mills, a weckly market, and an annual fair. Pop. 3834.

GUADARRAMA, a river, Spain, which rises in the sierra of same name, New Castile, prov. Madrid, flows S. through that prov., enters that of Toledo, turns S.W. and joins r. bank Tagus, 12 m . below the town of Toledo, after a course of above 70 m .

GUADARRAMA, a monntain-chain, Spain, forming part of the great central chain which separates Old from New Castile, and is continued W. nearly to the coast. It stretches generally between N.E. and S.W., commencing where the Sommo Sierra terminates, near a gorge traversed by the great road from Madrid to Burgos. Its culminating point has a height of 8942 ft . It is almost wholly composed of granite. Through a pass in it, ealled the Lion's Throat ( 4593 ft .), a road from Madrid to Burgos, by way of Valladolid, passes.

GUADARRANQUE, a river, Spain, which rises in a deep valley of the mountains of Alijuclas, a ramification of the Villuercas, New Castile, prov. Toledo, flows N. to S., and joins r. bank Guadiana, after a course of about 45 m . It has a shallow stream, which is often dry in summer.

GUADASUAR, a tn . Spain, prov. of, and 20 m . S.S.W. Valencia. It is well built, has an ancient but large and handsome parish church, a primary school, and a prison; some trade in oil, fruit, and vegetables, and an annual fair. Pop. 992.

GUADELOUPE [Spanish, Guadalupe], a gov. of the Freneh W. Indies, including the isls. of Guadeloupe, Marie Galante, les Saintes, Desirade or Deseada, and about twothirds of Martinique. The island of Guadeloupe lies between lat. $15^{\circ} 47^{\prime}$ and $16^{\circ} 30^{\prime} \mathrm{N}$. ; and lon. $61^{\circ} 15^{\prime}$ and $61^{\circ} 45^{\prime} \mathrm{W}$. It is composed of two portions or distinet islands, separated by an arm of the sca called Rivière Salée [salt river], from 30 to 100 yards broad, and navigable for small vessels. The W.
 perished.

Lamentin, and Lezarde, which are navigable for canoes. Grande-terre has only a few springs of brackish, undrinkable water. The climate is hot and unhealthy, the mean temperature being $79^{\circ}$, the ordinary extremes $71^{\circ}$ and $97^{\circ}$, and the greatest heat $130^{\circ}$, accompanied with a remarkably humid atmosphere. Hurricanes are frequent and destruetive, but the earthquake of 1843 , which completely destroyed the town of Point-à-Pitre, and partly ruined the colony, was the first severe one known since the discovery of the island. The soil is fertile and well cultivated, covered with fine forests in the mountainous, untilled parts, and with mangroves and manchineel trees on the marshy coast of Basse-terre. The produce is similar to that of the other W. Indian islands; the Tahiti sugar-cane is the only kind cultivated. The chief articles of export, sent almost all to France, are sugar, coffee, dye and cabinet woods, rum, taffia, cotton wool, annatto, hides, sweatmeats and preserves, eopper, tobacco, \&c. Imports, cotton manufactures, hides, wheatmeal, salted butter, cod fish, olive oil, wax candles, pottery, glasswares, salted meat, medicines, \&c. The principal anchorages of Guadeloupe are the Bay of Mahault and the roads of Basse-terre; the latter in the S.W part of the island, with the town of same name, the capital, and seat of government on its shore. The anchorage here, however, is unsheltered and inconvenient, with a constant 3 well, while the bottom at the edge is so stecp, that, at two cables' length from the shore, there are from 80 to 100 fathoms' water, with indifferent holding ground. Grande-terre possesses two anchorages, that of Moule and Point-a-Pitre; the latter at the S. entrance to the Rivière Salée, is esteemed one of the best in the Antilles, and on it was situated the important town of St. Louis or Point-a-Pitre, which was destroyed by an earthquake February 8, 1843, on which occasion 4000 of the inhabitants

Guadeloupe was first discovered by Columbus in 1493, and was thus named by him in honour of Sainte Maria de la Guadeloupe. It was taken possession of by the French, in 1635, who kept it till 1759, when it was taken by the English. It was subsequently captured and recaptured several times by these nations, and finally ceded to the French at the general peace in 1814. Pop. (1841), 131,162.

GUADIANA [ancient, Anas], a river, Spain, whieh rises in its central plateau, New Castile, in the lagoons of Ruidera, in La Mancha, on the N. side of the sierra Alcarras, and flowing N.W. through a marshy country for about 10 m. , is lost at Tomelloso, among rushes and flags. About 13 m . further on, it reappears at a place called Los Ojos [The Eyes] of Guadiana, where it gushes forth in large boiling jets, and immediately forms a magnificent stream. It flows first N.W. and then circuitously S. W., till it reaches a point $7 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. of Ciudad-Real, when it turns W.N.W., then S. W. into Estremadura, and afterwards circuitously, but directly, almost due W. across that province, past the town of Merida, to that of Badajoz. ILere it turns S.S.W., forming part of the boundary between Spain and Portugal, and passing the strong town of Jurumenha, proceeds in the same direetion through Portugal, past Monsaras,
and larger portion is Gnadcloupe Proper, divided into Bassesterre, and Capesterre, and is 27 m . long by about 15 m . broad. The E. portion, called Grande-terre, is nearly 30 m . long by 10 to 12 m . broad. Guadeloupe Proper is of volcanic formation, and is traversed N. to S. by a ridge of hills, having a medium height of 2296 ft . The culminating points are La Souffrière, an active volcano, 5108 ft . high; La Grosse-Montagne, les Deux Mamelles, and le Piton de-Bouillante, extinct voleanoes. Grand-terre, on the other hand, is generally flat, composed of madrepores, and marine detritus, and nowhere rises higher than 115 ft . above the sea. Guadeloupe is watered by a number of small streams, running in decply cut beds, but becoming dry in summer; the principal the Goyaves,

Mouraô, Moura, and Scrpa, till it reaches Mertola in province Alemtejo, when it turns first S.E. to Alcoutim, then almost due S. again, forming the boundary between Spain and Portugal, and falls into the Atlantic between the Portuguese town of Castro Marim, and the Spanish town of Ayamonte. Its whole course is above 400 m ., of whieh only 35 m ., commencing at Mertola, are navigable ; further progress being stopped by a cataract in a narrow chasm, not many yards in width. The prineipal affluents are, on the right, tho Giguiela, Bullaque, Valdehornos, and Rubial ; and on the W., the Azuel, and Jabalon. Its basin, about 373 m . long, N.E. to S.W., and 125 m . broad, lies between that of the Tagus on the N., from which it is separated by the chain of moun-

144
tains which stretches across New Castile and Estremadura, and is then continued S.W. through Portugal, and from the basin of the Guadalquivir on the S., by another mountain chain, in which the sierra Morena is most conspicuous. The upper part of its course is through a thinly peopled, monotonous, marshy district, and the country in the lower part of its course, though greatly increased in fertility, is generally flat, causing the current to be both sluggish and muddy. The water is said not to be drinkable, but it abounds with fish of large size, though often not of the finest quality. -2 , (-Menor), A small affuent of the Guadalquivir, which it joins 28 m. E.N.E. Jaen.

GUADIARO, a river, Spain, Andalusia, prov. Malaga, which rises on a slope of the sierra de Tolun; flows S., passing through the town of Ronda, where it rushes impetuously along in a chasm, more than 600 ft . deep; and falls into the Mediterranean, about 10 m. N. Gibraltar, after a course of about 60 m . Its chief affluents are the Jimena, on the right; and the Genal, on the left.

GUADIATO, a river, Spain, Andalusia, which rises to the N. of the hill of Caraveruela, belonging to the sierra Morena, prov. Cordova; flows through that province, in a stream remarkable for its tortuosity, though generally in a S.S.E. direction, and joins r. bank Guadalquivir, 3 m . E. Posadas, after a course of nearly 100 m .

GUADIELA, a river, Spain, which rises in the N.W. slope of the sierra d'Albarracin, on the confines of New Castile, in the N. of prov. Cuenca; flows E.S.E. past Priego; and joins l. bank Tagus, after a course of 70 m . Its chief affluents, all on the left, are the Cuerva, and Huete.

GUADIX [anc. Acci], a tn. Spain, Andalusia, prov. of, and 31 m. E.N.E. Granada, on the N. slope of the sierra Nevada, above l. bank river of its own name. It is an antiquated plaee, consisting generally of indifferent houses, many of them lighted only by the door ; and of ill-paved and illcleaned streets. It is surrounded by ancient walls, is the see of a bishop, said to have been the first erected in Spain; contains a cathedral, a handsome strueture, partly Doric, and partly Corinthian; four other parish churches, one of them with three naves, a fine portal, and a tower; a good courtlouse, a very indifferent prison, a diocesan seminary, four primary schools, two nunneries, four suppressed monasteries, an hospital, occupying the buildings of a Jesuit college; and an ancient castle, finely situated on a height, but almost in ruins; and has manufactures of hempen goods, hats, earthenware, and saltpetre; a trade in silk, wool, flax, cotton, corn, liqueurs, \&c.; two weckly markets, and a much-frequented fair, which lasts eight days. Pop. 10,129.

GUADUAS, a tn. New Granada, dep. Cundinamarea, 50 m . N.W. Bogota, in a fertile valley near r. bank Magdalena. Some of the streets are paved; and in the public square are a church, some handsome buildings, and a fountain. It has some trade in the produce of its vicinity-rice, sugar, coffee, and fruits. Goitre prevails here.

GUAHAN, or GUAm, an isl. Pacific, being the largest and most S . of the Marianne Archipelago; lat. (S. point) $13^{\circ} 14^{\prime} \mathrm{N}$.; lon. $144^{\circ} 45^{\prime} \mathrm{E}$. (r.) It is about 100 m . in circumference, has several safe and commodious harbours, and contains the capital of the archipelago.

GUAHIBE, or Santo-Amaro, an isl. Brazil, off E. coast of prov. São Paulo, from which it is separated by a narrow channel. It forms one side of the bay of Santos, on which the town of that name stands-the island of Enguacu, or São Vicente, forming the other. It is about 16 m . long, by 12 m . broad; has some fertile land, but cultivation is much neglected. It contains no town, and has very few inhabitants.

GUAIANECO, an isl. group, W. coast Patagonia; lat. $47^{\circ} 41^{\prime}$ S.; lon. $74^{\circ} 55^{\prime}$ W. (r.) ; composed of two principal islands, and many smaller islets - the westernmost called Byron Island, and the easternmost Wager Island. The trecs are not of large growth in these islands, neither is the land thickly wooded; but above the beach, and almost round the coast, there is a breastwork of jungle and underwood, from 50 to 100 yds . broad, and nearly impenetrable; beyond which is a great extent of clear, but low and swampy ground. The two larger islands are separated from each other by Rundle's Passage; about $\frac{1}{4} \mathrm{~m}$. wide, perfectly clear throughout its whole extent, but having some detached rocks at its N. entrance.

GUAILAS, or Huailas, a prov. Pern, on the W. side of the Andes, about lat. $9^{\circ} 30^{\prime}$ S.; length, 129 m .; breadth 36 m .; watered by the Salta and other rivers, and yielding grain, fruit, and sugar; and pasture for sheep. The rich gold and copper mines are wrought; but those of gold and silver appcar to be exhausted. Pop. 40,822 .

GUAJABA, an isl. off the N.E. coast Cuba; lat. $21^{\circ} 55^{\prime}$ N. ; lon. $77^{\circ} 36^{\prime} \mathrm{W}$. (R.) It is about 10 m . long, and about 3 m . to 4 m . broad.

GUALAN, a tn. Central America, state of, and 93 m . E.N.E. Guatemala. Pop. 2000.

GUALATIERI, or Schama, a volcanic summit, in the W. Cordillera of the Peruvian Andes, 80 m . S.E. Arica; elevation, $22,000 \mathrm{ft}$. above the sea.

GUALCHOS, a vil. Spain, Andalusia, prov. of, and 46 m . N.E. by E. Granada, tolerably well built, having two squares, clean and well-paved, though steep streets; a parish ehurch, townhouse, prison, storehouse, cemetery, and two public fountains. Manufactures:--linen, coarse cloth, soap, earthenware, hardware, wine, oil, and brandy. Trade:-grain, fruits, esparto, silk, and cattle. A large proportion of the people are engaged in fishing, and curing fish. Pop. 2998.

GUALDO, a tn. Papal States, 22 m. E.N.E. Perugia. Pop. 4464.

GUALILLAS PASS, a passage of the W. chain of the Peruvian Andes, 30 m. N.E. Tacna, crossed by the great commercial road leading from the port of Arica to La Paz, and the interior of Bolivia; elevation, $14,830 \mathrm{ft}$. above the sea.

GUAL'TIERI, a tn. Modena, r. bank Po, near the confluence of the Crostolo, 15 m . E.N.E. Parma. It has two annual fairs. Pop. 4150.

GUAMA, a river, Brazil, which rises S.E. in prov. Para; flows first N. and then W. ; receives the Capim on its l. bank; and, about 40 m . below, falls into the bay of Guajara, near the town of Belem or Para.

GUAMACHUCO, or Huamachuco, a tn. Peru, cap. prov. same name, dep. of, and 66 m . E.N.E. Truxillo, amidst the Andes, with a cold, disagreeable elimate.-The Province, 90 m . by 75 m ., is traversed by the main chain of the Andes; sends its waters to the Marañon; has a cold climate; but yields inaize, wheat, and cacao; and depastures sheep, from whose wool domestic cloth is manufactured. P. 38,150.

GUAMALIES, or Huamilies, a prov. Peru, W. side of the central ridge of the Andes, r. bank Tunguragua; length, 129 m . ; breadth, about 30 m . It yields grain, cacao, dyewoods, quinquina; depastures cattle and sheep; has mercury and silver mines ; and the ruins of ancient Peruvian fortresses, temples, and palaces. Pop. 14,234.

GUAMANGA, or Huamanga, a city, Peru, dep. Ayaeucho, cap. prov. of same name, in an cxtensive and beautiful plain, 220 m . E.S.E. Lima. The houses are of stone, with gardens attached; and there are numerous avenues, adorned with rows of trees. The squares and public places are spacious and handsome. It has a splendid cathedral, two parochial churches, and a number of convents. It is the residence of an intendant, the see of a bishop, and the seat of a university. Guamanga was founded by Pizarro, on the site of an Indian village of the same name. It is sometimes called San Juan de la Vittoria. Pop. 26,000.-_The province, 279 m . N. to S., by 105 m . broad, is intersected by a ridge of the Andes, which divides it into two portions; one of which sends its waters to the Pacific, and the other, through Amazon, to the Atlantic. It yields wheat, dragon's-blood, and cinnamon; depastures numerons flocks of sheep; and has silver, lead, and salt mines. Pop. 111,600.

GUAMOCO, a tn. New Granada, dep. Cundinamarea, 30 m. N.E. Antioquia, on the Alara; mueh decayed, since the silver mines in the vieinity were exhausted.

GUAMOTE, a vil. Eeuador, dep. of, and near Guayaquil, on an island formed by two rivers, and surrounded by lofty mountains. In 1803 it was the scene of a terrible insurrection of the Indians against the Whites.

GUANABACOA, a tn. Cuba, jurisdiction of same name, 3 m . S.S.E. Havanna, on the bay of Guanabacoa, which forms a part of the harbour of Havanna. Pop. 6634.

GUANACACHE (Lagos de), an extensive and irregu-larly-shaped lake, La Plata, prov. San Juan, intersected by lat. $31^{\circ} 50^{\prime} \mathrm{S}$. , and by lon. $68^{\circ} 40^{\prime}$ W.; length, 38 m .; mean breadth, 13 m . It receives several rivers; of which the San

Juan and the Mendoza are the most considerable. It is connected, on the E. side, by the Rio Cruces, with a large morass.

GUANACAS (Parimo de), a mountain-knot, S. America, New Granada, at the sourees of the Magdalena and Cauca; and at the junction of the E., W., and central Cordilleras of the Andes.

GUANAIIANI, or Cat Island, one of the Bahamas. See Salvador (St.)

GUANAJA, an isl. Caribbean Sea. See Bonacca.
GUANAPARO, a large river, Venezucla, which rises S. Truxillo, under the name of Bocomo; flows S., then tortuously E., and joins the Portuguesa, on the r. bank; lat. $8^{\circ} 15^{\prime}$ N.; lon. $68^{\circ} 3^{\prime} \mathrm{W}$.

GUANAPE, a port, Peru, prov. of, and 30 m . S. Truxillo. It is unsafe, and but little frequented. Off the port are several barren islets of same name.

GUANARE, a tn. Venezuela, 45 m. S.E. Truxillo, on the Guanarito. It has broad and straight streets, well-built houses, an hospital, and a large parish church, to which numerous pilgrims resort. A considerable trade is carricd on in cattle and mules. Pop. 12,300.

GUANARITO, a river, Venezuela, which rises in the sierra Rosas; flows S. and then E., and joins the Portuguesa, 153 m. S. W. Caracas.

GUANAXUATO, or CAnaxuito, a dep. Mexico (cap. same name), between lat. $20^{\circ} 20^{\prime}$ and $21^{\circ} 44^{\prime}$ N., lon. $99^{\circ} 59^{\prime}$ and $101^{\circ} 47^{\prime}$ W.; bounded, N. by the states of San Luis, Potosi, and Zacatecas; W. by Jalisco, S. Michoaean, and E. Queretaro. Area, $4116 \mathrm{sq} . \mathrm{m}$. It is mountainous, and traversed, S.E. to N.W., by the Cordillera of Analuac, whose culminating point is 9711 ft . high. The only important river is the Rio Grande. Climate mild, and soil fertile; but not casily cultivated, from scarcity of water. The mines of this state were once the richest in the world, yielding gold, silver, lead, tin, iron, antimony, sulphur, cobalt, ochre, salts, crystals, marble, \&c. From 1796 to 1833 , the gold and silver mines produced, on the average, 73 lbs gold, and $29,269 \mathrm{lbs}$ silver, annually. A falling-off took place after 1810 , and in 1821 the produce was at its lowest. They subsequently inereased rapidly; and in 1833 the amonnt obtained was 80 lbs . gold, and $11,5+7$ lbs. silver. The precious metals and spices form the clicef exports of the state. Guanaxuato is the best peopled state in the Confederation. Pop. (1837), 500,000.

GUANAXUATO, or Guanajuato, a city, Mexican Confeneration, cap. above dep.; lat. $21^{\circ} \mathrm{N}$. ; lon. $101^{\circ} \mathrm{W} . ; 160 \mathrm{~m}$. N.W. Mexico, singularly situated in a deep, narrow, mountain
tortuous, that no idea can be formed of the extent of the town, but by ascending the heights by which it is overlooked. The houses, however, are in general well built; particularly those belonging to the proprietors of the neighbouring mines, nost of which are extremely handsome. But, though of hewn stonc, a practice prevails of painting their fronts with the gayest colours-light green being the favourite-producing an cffect more extraordinary than agreeable. It contains several elegant churches, numerous chapels, and other religious edifices. The Alhondiga, a large square building, used as a public granary, is a remarkable edifice.

Guanaxuato owes its existence and importance to the gold and silver mines in its vicinity, the richest in Mexico. These mines yiclded, between the years 1779 and $1803, \$ 40,000,000$ $(£ 9,000,000)$, in gold and silver, or nearly $\$ 5,000,000$ $(£ 1,125,000)$ amually. The gold and silver coinage of the mint of Guanaxuato, in 1844, amounted to $\$ 4,635,740$ ( $£ 1,043,041$ ) ; being the highest of all the mints of the Mexican republic. There are some manufactories in the town of soap, woollen cloth, linen, powder, and tobacco; also some tanneries. Guanaxuato was founded by the Spaniards in 1545 , constituted a town in 1619 , and invested with the privileges of a city in 1741. P. (1805), 70,600; (1835), 34,000.

GUANCABAMBA, a tn. Ecuador, near the frontier of Peru, 162 m. S. Cuenca, on the river of same name, near its source, between 7000 ft . and 8000 ft . above the sea.-The river, rising in the E. slopes of the Andes, flows S., then E.N.E.; and, after a course of $105 \mathrm{~m} .$, interrupted by numerous falls, joins the Morñon, 29 m . S.S.W. Jaen-de-Bracamoros.

GUANCABELICA, or Huancavelica, a tn. Peru, dep. Ayacucho, cap. prov. of same name, 162 m . E.S.E. Lima, in a valley of the Andes. It is surrounded with rich mines of gold and silver. Situated at a high elevation, the air is always cxtremely cold and penetrating. Pop. 5166.——The province, 144 m . by 102 m ., is watered by the Jauga and its affluents, and has several lakes. The climate is cold, and the products, maize, wheat, and potatoes, and excellent pasture, on which numerous cattle and sheep are fed-the latter yielding fine wool. There are mines of gold, silver, mercury, and copper. Pop. 30,900.

GUANDACOL, a fertile valley, La Plata, dep. Rioja, between the Famatina mountains and the Andes; lat. $29^{\circ} \mathrm{S}$. ; lon. $69^{\circ} \mathrm{W}$.-A vilhage of same name lies in the centre of the valley.

GUANERO, a river, Venezuela, dep. Apurc. It rises on the E. side of the Nierra de Merida, 75 m . W. by S. Varinas; and joins the Apure, on the l. bank, after a S.E. course of about 100 m .

GUANO, a tn. Ecuador, on a small river of same name, in the midst of the Andes, 80 m . N.E. Guayaquil. Woollen stockiugs are extensively manutactured here.

GUAN'TA, or Huanta, a tn. Peru, dep. Ayacucho, cap. prov. of same name, 21 m . N. Guamanga, near the source of the Rio-de-Sal. -The province, 180 m . by 54 m ., is mountainous; has a mild climate, and yields sugar, fruits, timber, end medicinal plants. Salt and silver are mined. Pop. 27,337 .

GUAN'TAJAYA, a rich mining district of S. Peru, in prov. Tarapaca (which sce).

GUANTANAMO, or Cumbemland Hirbour, a spacious harbour, S. coast isl. Cuba, 45 m. E. Santiago; lat. (E. head), $19^{\circ} 53^{\prime} \mathrm{N}$. ; lon. $75^{\circ} 15^{\prime} \mathrm{W}$. It is wide at the entrance, completely sheltered from all winds, and has within it numerous islands, affording safe and excellent harbours. It abounds in fish; but other provisions cannot be readily obtained.

GUANUCO, or Huanuco, a tn. Pera, 165 m . N.E. Lima, l. bank Huallaga; formerly large and handsome, but now fallen into decay. There are here the ruins of some fine cdifiees, which belonged to the Incas.--The province, 60 m . by 39 m ., has a mild and healthy climate; is fertile, and yields in abundance grain, fruit.
defile, 6017 ft . above the sea. It is formed of a number of villages, placed round the mines; and being built on extremely uneven ground, the streets are very steep, and so
cotton, and cacao. Pop. 16,826.
GUANZATE, a well-built vil. Austrian Italy, prov. and 9 m . S.S.W. Como; with manufactures of silk. Yop. 1799.

GUAPEY, or Rio-Grande-de-la-Plata, a river, Bolivia, which rises in S. slopes of the Andes of Cochabamba, about 30 m. N.W. Cochabamba, flows S.E. till, reaching the E. extremity of the mountain range, it turns N., and then flows N.W., receiving in its course numerous affluents, chiefly on its 1 . bank, and from the N. slopes of the Andes of Cochabamba, and ultimately joins the Mamore, in lat. $13^{\circ} 35^{\prime} \mathrm{S}$.; lon. $66^{\circ} 10^{\prime} \mathrm{W}$.; after a course of about 600 m .

GUAPI-Morim, a vil. Brazil, prov. Rio-de-Janeiro, between the bay of Nitherothi and the Serra dos Orgãos. It las a parish church, numerous distilleries of rum, and tileworks, and an important trade in timber, which is floated down the smaller streams into the Guapi-Morim, and thence transported in large barges to Rio-de-Janeiro. Pop. 2000.

GUAPI-Moris, Aquape, or Guapi, a river, Brazil, prov. Rio-de-Janciro, which rises in the Serra dos Orgãos, flows S.S.W., and, after a course of about 28 m ., falls into the bay of Nitherothi, or Rio-de-Janeiro, between the mouths of the Magé and Macacu. Its mouth is unencumbered by shoals, so that large barges can enter and quit it at all times of the tide, or sail up it without interruption, for about 4 m .

GUAPORE, or Itenez, a river, Brazil, which rises in the Serra Aguapehi, a continuation of the Cordillera of Parecis, between the sources of the Juruena and the Jauru, prov. Mato Grosso, in lat. $14^{\circ} 42^{\prime} \mathrm{S}$., and commencing in a series of cascades, which follow in succession for nearly 30 m ., first flows $S$. in a course nearly parallel to that of the Jauru; and then, turning gradually round to the W., reaches the town of Mato-Grosso, or Villa Bella. Here it turns N.N.W., and keeps this direction till it reaches lat. $13^{\circ} 20^{\circ}$ S., when it proceeds first almost due W., and then W.N.W., forming part of the boundary between Brazil and Bolivia, and finally unites with the Mamore, in lat. $11^{\circ} 54^{\prime}$ S., in forming the Madeira. Its whole course is about 1000 m ., and is much interrupted by numerous cataracts, several of which occur immediately before its junction with the Mamore. Its principal affluents on the left are the Verde, Paragan, Bauré or Baurus, Itunama or Tunama, and Ubahi. On the right, the affluents, thongh numerous, are individually insignificant.

GUARAMBARI, a river, La Plata, state Paraguay, which rises in a branch of the Sierra Amambahi, flows S.IV. and joins the Paraguay, 25 m . N.W. Concepcion, after a course of about 150 m .

GUARAPARI, a tn . and seaport, Brazil, prov. EspiritoSanto, on river of the same name, where it falls into the Atlantic, 30 m . S. Victoria. It is very poorly built, contains a parish church, and has a small port, much frequented by coasting vessels. Its principal trade is in cotton thread, timber, and balsam of Peru, which are shipped for Rio-deJaneiro. Both the town and distriet are rendered extremely unhealthy by extensive swamps and standing pools. Intermittent fevers annually carry off numbers of the inhabitants. -The river rises in the Cordillera of Aimores, about 20 m. N.E. Benevente, takes an E. direction, forms in its course a number of lakes. Its mouth is narrow, but deep, and easily entered by coasters. Canoes proceed as far up as the Cordillera. The scenery on its banks is remarkably beautiful.
GUARAPARI, a mountain, Brazil, prov. Espirito-Santo, about 20 m . W. of the town of its name, in the Cordillera of Aimores. On its slopes Peruvian balsam is gathered.

GUARAPICHE, a river, Venezuela, dep. Cumana, formed by the union of several streams, which descend from the E. side of the Bergantin mountains. It flows first S.E. and then N.E., and falls into the gulf of Paria, 98 m. E.S.E. Cumana, after a course of about 120 m . It receives several tributaries, and is navigable 50 m . from its embouchure; the upper part of its course is obstructed by trunks of trees.

GUARAPUAVA, a tu. Brazil, prov. of, and 300 m . S.W. São-Paulo, in the extensive plains of the same name, near the Iguaça, and on the road from São-Paulo to prov. São-Pedro-do-Rio-Grande. It contains a parish church. The inhabitants cultivate the ground and rear cattle, but are much annoyed by the wild Indians in the neighbourhood.

GUARATIBA, a vil. and par. Brazil, prov. of, and 30 m . W.S.W. Rio-de-Janeiro, near the bar of Guaratiba, which forms the $\mathbf{E}$. side of the bay of Angra-dos-Reis. It contains a parish church, and has a small harbour on the sea-coast, at which some export trade is carried on with Rio-de-Janeiro in the ordinary produce of the country. Pop. 4000.

GUARATINGUETA, $a \mathrm{tn}$. Brazil, prov. of, and 120 m . N.W. São-Paulo, r. bank Parahiba. It is very poorly built of mud, but contains a parish church, and two chapels, and is the residence of a justice of the peace. Its situation, on the road from São-Paulo to Rio-de-Janeiro, enables it to carry on a considerable trade in fat cattle and swine, and the ordinary agricultural produce. The district is fertile, and well adapted for the cultivation of tobacco, sugar-cane, and coffee. At a short distance from the town is a chapel, to which numerous pilgrimages are made. Pop. of dist. 7000.

GUARATUBA, or Villanova-de-São-Luiz, a tn. Brazil, prov. and 212 m . S.W. São-Paulo, near r. bank river or creek of same name, about 4 m . from the sea. It contains a parish church, and has a port, which only wants good roads to it from the interior to become of considerable importance. Many of the inhabitants are employed in building boats and sawing timber. Much rice is grown in the district. -The river rises in a serra lying parallel to the sea-coast, in the S. E. of the province, flows E. and falls into the Atlantic, about 4 m . below the town, after a course of about 60 m ., of which about 8 m . are navigable for small vessels, and several more for canoes. The Guaratuba is sometimes improperly called a bay.

GUARDA [anc. Lancia Oppidana], a tn. Portugal, prov. Beira-Baixa, on an elevated plain, on the side of the Serra-da-Estrella, near the sources of the Mondego, 65 m . E.N.E. Coimbra. It is walled, and defended by a castle; is a bishop's see, and has a handsome cathedral, four parish churches, a college, a diocesan seminary, an episcopal palace of great size, but indifferent architecture; two convents, two hospitals, and an annual fair. Several severe struggles took place bere between the English and French, in 1810-11. Pop. 3894.

GUARDA-Migho, a vil. Austrian Italy, prov. of, and 17 m . S.E. Lodi, near l. bank P'o. The scene of a sanguinary battle in 1796. Pop. 2053.

GUARDA-Veneta, a vil. Austrian Italy, prov. Polesine, 1. bank Po, 7 m . S.S.E. Rovigo; with a parish church. P.1700.

GUARDAFUI (Cape), or Ras Jerdaffoon [anc. Aro-matum-Promontorium], the most E. point of Africa, at the entrance of the Arabian Gulf; lat. $11^{\circ} 50^{\prime} \mathrm{N}$. ; lon. $51^{\circ} 21^{\prime}$ E. (R.); the extremity of the coasts of Ajan and Adel.

GUARDAMAR, a tn. Spain. Valencia, prov. of, and 18 m . S.S.W. Alicante, near r. bank Segura, $1 \frac{1}{2} \mathrm{~m}$. from the sea. It is surrounded by ruinous walls, and overlooked by a hill, on the summit of which stand the remains of a once strong and extensive castle. Most of the strects are wide and clean, though unpaved, the houses tolerably well built, and the two squares spacious. It has a large church, two chapels, two schools, a townhouse, prison, hospital, and storehouse. Manufactures:-linen, coarse cloth,wine andoil. Trade: - grain, fruit, cattle, and taking and curing fish. Pop. 2237.

GUARDAVALLE, a tn. Naples, prov. Calabria Ultra, 27 m. S. Catanzaro. Pop. 2920.

GUARDLA, several places, Spain, particularly-1, (Guardia La), A tn. New Castile, prov. and 28 m . E.S.E. Toledo, near l. bank Cedron; tolerably well built, and surrounded by old walls, flanked with towers. It has wide, clean, paved, though steep streets; two principal and six smaller squares; a parish church, four chapels, Latin and primary schools, a townhouse, prison, and two storehouses. Manufactures:-linen cloth, baize and serge, saltpetre, soap, wine, and oil. Trade :-hemp, cattle, and agricultural produce. Pop. 3113.-2, A tn. Andalusia, prov. of, and 5 m . S. by E. Jaen, near l. bank Jaen, on a rock, surmounted by the remains of an old fortalice. It has clean, wide, well paved, though in some cases steep streets; two squares, a spacious and elegant church, a townhouse, prison, two schools, an hospital, and extensive storehouse. Linen, pottery-ware, and shoes, are manufactured ; and there is some trade in grain, fruits, and cattle. Pop. 1443.-3, A tn. and port, Galicia, prov. of, and 37 m . S. by W. Pontevedra, on the Atlantic. It is tolerably well built; has a church, several chapels, a townhall, prison, two schools, a custom-house, and convent. Woollen and pottery are manufactured. Pop. 2000.

GUARDIA, numerous places, Naples, particularly1, (-Alfiera), A tn., prov. Sannio, 6 m . W. Larino, on a slope, above l. bank Biferno. It is the see of a bishop; and has gypsum quarries, a mineral spring, and a fair which lasts two days. Pop. 1900.-2, (-Grele), A tn. and com., prov.

Abruzzo-Citra, 12 m . S.S.E. Chieti. It contains four parish churches and three convents. Pop. 6386.-3, (-Lombarda), A tn ., prov. Principato Ultra, 3 m . N.E. San-Angelo de'Lombardi, r. bank Lombarda. Pop. 2519.-4, (Regia), A tn., prov. Sannio, 20 m . S.E. Isernia, on a slope of Mount Matese. It contains a parish church, an abbey, and an hospital. Pop. 1418.-5, (-San-Framondi, or Delle-Sole), A tu. and com., prov. Terra-di-Lavoro, 13 n . S.E. Piedimonte, cap. circondario of same name. It contains several churches, a convent, and an hospital; and has tanneries. Pop. 4000.

GUARDISTALLO, a vil. and com. Tuscany, dist. Bibbona, among finely wooded heights, in a mountainous conntry, about 35 m. S. Pisa. Its houses were much injured by an earthquake in 1846. It contains an old castle; and has a trade in wine, oil, and cattle. Pop. 1385.

GUARENA, a tu. Spain, Estremadura, prov. of, and about 40 m . E.S.E. Badajoz, in a plain, at some distance from the Guadiana. It contains a parish church, townhouse, prison, school, and old nunnery; and has several mills and distilleries, a trade in corn, a weekly market, and an annual fair, which lasts three days. Pop. 3226.

GUARENE, a vil. and com. Sardinian States, Piedmont, div. of, and 41 m. N.E. Coni, on a hill, l. bank Tanaro. It has a handsome parish church, two monasteries with churches, and a large and splendid palace; several silk-mills, a trade in corn and silk, and a weekly market. Pop. 2368.

GUARICO, a river, Venezuela, dep. Caracas, which rises S.E. Lake Valencia, flows chiefly S., and joins a branch of the Apure, 12 m. E. San Feriando, after a course of about 240 m . Its principal afluent is the Urituco, which it receives on the left.

GUARISAMEY, a mining tn. Mexico, dep. and 70 m . S.W. Durango, situated in a deep, warm valley, in one of the richest mining districts in Mexico. Pop. about 4000.

GUARMEY, a seaport, Peru, 150 m . N.N.W. Lima; lat. $10^{\circ} 6^{\prime} \mathrm{S}$.; lon. $78^{\circ} 13^{\prime} \mathrm{W}$. (r.) The rown lies about 2 m . N.E. from the anchorage, 1. bank, and near the mouth of river of same name; but is nearly hidden by trecs, which grow to the height of 30 ft . It has only one street, and contains about 500 or 600 inhabitants. The harbour is tolerable, having good anchorage everywhere, in from $3 \frac{1}{2}$ to 10 fathoms, over a fine sandy bottom. Fire-wood is the principal commodity here. Fresh provisions, vegetables, and fruit, are also plentiful, and moderate; but water is not to be depended on.

GUARO, a tn. Spain, Andalusia, prov. of, and 20 m . W. Malaga, in an exposed situation, on a mountain slope, near the Grande. It is indifferently built; has many unpaved streets; a parish church, townhouse, prison, and two primary schools; a distillery, several oil and flour mills, and a trade in figs and agricultural produce. Pop. 2129.

GUAROCHIRI, or Ilvarocmri, a tn. Peru, cap. prov. of same name, at the foot of the Andes, 60 m . E. Lima, the supplying of which with snow forms its principal trade.The Province, 135 m . by 42 m ., slopes to the Pacific Ocean; and is watered by the Rimac, Caraballo, and Pasamayo; climate rather cold, but in the valleys temperate ; soil good, and well cultivated-yielding grain and fruits. Silver, antimony, cobalt, and coal, are found, but not extensively wrought, from the difficulty of transpert. Pop. 14,024.

GUASCAMA (Pont), a headland, New Granada, dep. Cauca, 128 m . W. Popoyan; lat. $2^{\circ} 30^{\prime} \mathrm{N} . ;$ lon. $78^{\circ} 30^{\prime} \mathrm{W}$.

GUASE, an isl., Persian Gulf. See Kenx.
GUASILA, or Gor-Esili, a vil., isl. Sardinia, div. and $24 \mathrm{~m} . \mathrm{N}$. by W. Cagliari, on a small height, sloping down into a marshy plain. It has a parish church, adorned with marble and sculptures; several minor churches, a monastery, a handsome rectory and primary school; has a trade in corn, wine, wool, and cattle; and an annual fair. Pop. 1807.

GUASTALLA, a tn. Italy, duchy of, and 17 m . N.E. Parma, r. bank Po. It has a castle, a cathedral, cight other churches, several charitable institutions, a number of schools, a public library, containing 12,000 volumes, and a printing establishment. In the piazza there is a good bronze statue of Don Ferrante Gonzaga I., the only work of art in the town. Silk spinning is carried on here; and silk stuffs and flannels are manufactured. There are three fairs during the year. It is a very primitive place, in which two physicians, two surgeons, and one midwife, are paid out of the public funds to do all that is needful for all the members of the com-
munity.-(Murray's Handbook). Rice is grown in the vicinity in great quantities. Pop. 2000 to 3000.

GUATAVITA, a small tn . and a lake, New Granada, dep. Cundinamarca. The rown, 21 m . N.E. Bogota, before the Spanish conquest in 1537, was one of the richest and best fortified towns in America; but since that period, its importance has greatly declined. Pop. about 1200.-TThe LaKE, near the town, is about 9 m . long, very deep, extremely transparent, and surrounded on all sides by lofty mountains. The Indians had one of their most celcbrated temples on its banks; and it is reported, that in honour of the god who was worshipped here, treasures of immense value were regularly thrown into the lake. Attempts have repeatedly been made to drain it, and a considerable amount of valuable articles has been from time to time recovered from it.

GUATEMALA, or Guatimala, one of the states of the federal republic of Central America, having Yucatan and British Honduras, and the Bay or Gulf of Honduras N., the Pacific Ocean S., IIonduras and Salvador E., and Mexico W.; lat. $13^{\circ} 45^{\prime}$ to $17^{\circ} 45^{\prime} \mathrm{N}$. ; and lon. $88^{\circ} 10^{\prime}$ to $93^{\circ} 12^{\prime} \mathrm{W}$. ; greatest length, N.W. to S.E., about 300 m. ; breadth, about 180 m . ; area, 4420 geo. sq. m . The name was formerly applied to the whole confederation; but is now restricted as above. It is divided into seven departments, each presided over by a corregidor-namely, Guatemala, Solola, Quesaltenango, Sacatepeques, Totonicapan, Vera Paz, and Chiquimula.

The country is, in general, exceedingly picturesque and beautiful; and, like the other states of Central America, it is distinguished by a luxuriant and varied vegetation. 'The change of scene, on entering the state of Guatemala,' says Mr. Dunlop, 'is very remarkable; indeed, it is a singular circumstance that nature, not man, appears to have separated the different states of Central America, each of which is entirely of a different geological and physical character from the rest; and the change from the green undulating hills of San Salvador, to the wild precipitous mountains and rocks of Guatemala, is most striking.'

Guatemala is wholly mountainous, the main chain of the continuation of the Andes traversing it S.E. to N.W., at no great distance from the Pacific, and sending off numerous branches towards the Atlantic; thus forming a great many valleys, but inclosing few plains. Along the main cbain are a considerable number of volcanoes. All of them are near the Pacific; and none of them are found in the interior. Six are said to be active-namely, Amilpas, 13,160 ft.; Sapotitlan, $13,050 \mathrm{ft}$; Atitlan, $12,500 \mathrm{ft}$; Agua, which sends forth torrents of water, $15,000 \mathrm{ft}$; Fuego and Pacaya. The state is well watered by numerous streams, of which the Lacantun, flowing N.W., and forming part of the Mexican boundary, and the Motagua, and the Polochic continued by the Dulce, both flowing N.E. to the Bay of Honduras, and their tributaries, are the largest; but besides these, there are many streams of comparatively short courses, falling into the Pacific. There are, likewise, several lakes, the most important being Dulce, through which the greater part of the foreign trade is carried on; Amatitlan and Atitlan (which see) ; and Peten, near the frontiers of Yucatan, in the little-known province of Vera Paz; and about 30 m . long, by 9 m . broad. On the table-land, of which a considerable portion of the state is formed, the climate is mild, and said greatly to resemble that of Valencia, in Spain; but in more elevated situations, the cold is intense. The soil, generally, is of great fertility, producing maize and wheat of superior quality, excellent rice, legumes, and vegetables and tropical fruits in great variety. But the want of enterprise in the people, and the want of roads through the country, are great drawhacks to agriculture. The most important produce, in a commercial view, is cochineal, the cultivation of which has of late years been rapidly increasing. The total amount of this article produced in the state was, for 1846 , calculated to be 20,000 bales -a quantity greater than the entire annual consumption at that date. Cacao, tobacco, sugar, coffee, vanilla, and cotton, are grown to a greater or less extent; and also considerable quantities of indigo; the silk-worm is cultivated; and caoutchonc is obtained.

In the altos or N . parts of the state, considerable flocks of sheep are raised, the wool of which is manufactured by the natives inte a coarse twilled fabric, called gerga, which, again,
is made into various articles of clothing, including large plaids, called ponchos, in which considerable taste is displayed.

The population of the state has been estimated at about $1,000,000$; of which 800,000 are Indians, 150,000 mestizoes, and between 7000 and 8000 whites. Other estimates make the total number only 600,000 . The natives, of negro blood, are principally found on the N.E. coast, and in Amatitlan. With exception of certain portions of the indigenous Indians, particularly those inhabiting the altos, or N. parts of Guatemala, the inhabitants of this state are characterized by all the vices that distinguish the general population of Central America-indolence, gross immorality, and an utter absence of all principle.-(Dunlop's Central America; Baily's Central America; Jour. Roy. Geo. Soc.)

GUATEMALA (Santiago de), or New Guatemala, a city, Central America, cap. state of Guatemala ; lat. $14^{\circ} 36^{\prime}$ N.; lon. $90^{\circ} 13^{\prime} \mathrm{W}$.; finely situated at the extremity of a plain, 20 m . in length, by 6 m . in breadth, with a deep ravine on three sides. It lies 4372 ft . above the sea; is in the form of a quadrangle, measuring about 1 m . each way; and the streets are wide, straight, and clcan, cross each other at right angles, and are all paved, and many have flagged footpaths. But the houses have a mean appearance, being only one story in height, on account of the frequent earthquakes, with small, grated windows. The city is amply supplied with water of excellent quality, brought, by means of an aqueduct, from a distance of 12 m . The plaza, or market-place, in the centre of the city, is a square of 150 yds . on each side ; on one of which is the cathedral, and archbishop's palace; on the opposite, the government-louse, and some of the law courts; on the third are the guardhouse, barrack, and some shops; on the fourth a corridor, full of shops, where the principal business of the city is done; and in the centre is an ornamental fountain. There are several other squares, each with its central fountain. The churches, 24 in number, are, some of them, good and massive buildings; the cathedral, already mentioned, being a neat, substantial structure, with a handsome façade, and a well-proportioned, chaste interior. Other public buildings are-the University of San Carlos; the Tridentine College; the Hospital of San Juan, outside the city near the cemetery; four public lavaderos, or washing-places; a circus for bull-fights, \&c.; and a slaughter-house. At the S. end of the city a fort, mounting about 20 guns, has been erected; but more for the purpose of overawing the inhabitants than of defence, for it is commanded by a height, at no great distance. There are several private schools, and four or five priuting-offices; and two weekly newspapers are published, and three almanacs are issned.

Provisions, vegetables, fruits, and all articles of ordinary consumption, are abundant and moderate; while many descriptions of British manufacture can be had as cheap as in England. The number of shops exceed 300 ; but the principal trade of the place is carried on by 20 or 30 persons, called importing merchants, who have correspondents in England, and various other countries of Europe.

The following table exhibits the state of the imports:-

| 1840 | £200,269 | 1843 | £88,463 |
| :---: | :---: | :---: | :---: |
| 1841 | 212,421 | 1846 | 138,217 |
| 1842 | 136,627 | 1847 | 173,598 |

The inhabitants are represented as courteous, affable, and hospitable to strangers; but are not much given to visiting each other. They have little desire for public amusements of any kindalmost their only recreation being their religious processions, which are frequent. On these occasions, the streets through which the processions pass are strewed with pine-leaves, and adorned with arches, decorated with evergreens and flowers. The building of the present city was commenced in the year 1776; three years after the earthquake of 1773 , wbich nearly wholly destroyed old Guatemala, the former capital. Pop. 35,000 to 40,000.-(Baily's Central America; Dunlop's Central America, \&c.)

GUATEMALA (OLD), [Spanish, Antigua Guatemala], a city, Central America, the former cap. of the state of Guatemala, 10 m . S.W. the new city of same name, dep. Sacatepeques, close by the Volcano de Fuego and the Volcano de

Agua, in a valley, open to the S.W., but on all other sides inclosed by high mountains. It was founded by the Spanislt conquerors in 1527 , and continued to be the capital of the country till 1773 , when it was nearly wholly destroyed by an earthquake; being left, with exception of a few of the more substantial edifices, little better than a pile of rubbish. It covered an extent of 2000 yds . N. to S., and 2500 yds . E. to W.; and had spacious, regular, and generally parallel streets. A new town is now rising upon the site, on the plan, and built of the materials, of the old. Prior to the earthquake, the population is alleged to have been 60,000 ; it is now about 9000.-(Baily's Central America.)

GUATULCO, a sea-port, Mexico, dep. of, and 110 m . S.E. Oaxaca, on the Pacific ; lat. $15^{\circ} 44^{\prime} 24^{\prime \prime} \mathrm{N} . ;$ lon. $96^{\circ} 10^{\circ} \mathrm{W}$. (r.)

GUAURA, or Huavra, a tn. Peru, intendancy of, and 73 m . N.N.W. Lima, on the Pacifie, near 1. bank river of same name. It consists of one very long street, terminated by a bridge over the river, and by a large tower, defended by a redoubt. It has a church, a convent, and an hospital. The liarbour is safe and commodious. In the environs are extensive salt-works, and some vestiges of ancient edifices. -The river rises on the $W$. side of the principal chain of the Andes, flows W.S.W., and falls into the Pacific near the town, after a course of about 90 m .

GUAVIARE, or GUAblare, a large and navigable river, New Granada, formed of several streams, which, rising in the mountains of Bogota, flow S.E. and unite about lat. $2^{\circ} 47^{\prime}$ N.; lon. $72^{\circ} 30^{\prime} \mathrm{W}$.; thence the united stream flows E.N.E., traversing the plains of San Juan, and, after receiving numerous tributaries, joins the Orinoco, in lat. $4^{\circ} \mathrm{N}$; lon. $68^{\circ} 12^{\prime} \mathrm{W}$.

GUAYAMA, a tn. and port, isl. Porto Rico, S. coast. In 1843,108 vessels, tonn. 12,592, entered; and 119 vessels, tonn. 14,266, cleared. Exports:-tobacco, coffee, and timber. Pop. 5400.

GUAYANA, S. America. See Guiana.
GUAYANILLA, a seaport, isl. Porto Rico, S. coast. In 1843, four vessels, tonn. 724, eutered; and 11 vessels, tonu. 1784, cleared.

GUAYAQUIL, a city and seaport, Ecuador, dep. same name, on the Guayaquil, here, about 2 m . wide; lat. $2^{\circ} 9^{\prime} \mathrm{S}$.; lon. $79^{\circ} 56^{\prime} \mathrm{W}$. It is divided into the old and new towns; the former higher up the river than the latter, and entirely occupied by the poorer classes. The framework of the houses is of wood; they are generally of one story, excepting in the principal street, where they are mostly of two; the groundfloor being divided into small shops, occupied by tradesmen of

gUayaquil cathedral.-From Vaillant, Voyage autour du Monde.
different kinds. Some of the buildings are rather handsome, particularly the custom-house. There are also a cathedral, three convents, a college, and an hospital, all respectable edifices. In hot weather the old town is filled with a pestilential effluvia, proceeding from the mud exposed to the action of the sun by the receding tide. This exhalation is the cause of malignant fevers, which render the city a terror to strangers,
and seriously affect the prosperity of the port. In the rainy season the streets are rendered impassable by accumulations of mild and water, there being no drainage, as the town stands on a dead level. The unhealthiness of the place from these causes is increased by an extensive marsh situated bchind it, and, to add to the discomforts attendant on a residence in it, the houses are filled with noxious vermin, and the supply of potable water very deficient. Guayaquil is the only port in Ecuador. Its principal exports are cacao and cotton. The number of vessels that entered in 1844 was 167 ; tonn. 14,718; value, $£ 209,103,6 s . ;$-cleared, 167 ; value, $£ 196,194,2 s$. European goods are imported in eonsiderable quantities, particularly liquors, and articles of consumption for the table, chicfly Spanish. Pop. 22,000.-The department, ineluding the provinces of Guayaquil and Manabi; area, 14,400 sq. m., is for the most part level, and has the Andes for its E. boundary. It is unhealthy, but extremely fertile, and produces in abundance cacao, cereals, fruit, riee, cotton, and tobacco; while the forests furnish a variety of useful kinds of timber. Principal eities, Guayaquil and Puna. Pop. 90,000 .

GUAYAQUIL (GUlf of), an inlet, Ecuador, part of its S. coast being the N.W. extremity of Peru. Entrance about lat. $3^{\circ} 10^{\prime} \mathrm{S} . ;$ lon. $80^{\circ} 10^{\prime} \mathrm{W}$. It is the largest inlet on the W. coast line of S. America, N. of lat. $42^{\circ}$ S., and extends inland upwards of 50 m ., and is 12 m . wide at the principal entrance. At its $N$. end it divides into two narrow branches, which penctrate several miles into the land, being in part the estnaries of several united streams, on one of which stands the eity of Guayaquil. At the entrance of the gulf is the island of Puna, 30 m . long and about 8 m . wide.

GUAYMAS, a seaport tn . Mexico, state Sonora andCinaloa, E. shore Gulf of California, at the mouth of river of same name; lat. $27^{\circ} 54^{\prime} \mathrm{N}$. ; lon. $110^{\circ} 52^{\prime} \mathrm{W}$. (R.) The harbour is one of the finest on the coast, being sheltered from all winds, and capable of accommodating 200 vessels. It is one of the principal depôts for the commerce between Mexico and China. The houses of the town are mostly of mud, but many of those of recent erection are of more durable materials, large, and well built. Pop. 3000.

GUAYRA (LA) [French, La Goayre], a tn. and seaport, Venezuela, on the Caribbean Sea; lat. $10^{\circ} 36^{\prime} 42^{\prime \prime}$ N.; lon. $66^{\circ} 56^{\prime} 30^{\prime \prime} \mathrm{W}$. (r.) ; 10 m . N. Caracas, closely surrounded by ligh mountains and rocks. The streets are narrow, tortuous, and ill-paved, and the houses ill-built. For nine months in the year the heat is excessive, giving rise to malignant and putrid fevers, which render a residence here eminently dangerous to strangers. It contains no public buildings worthy of notice. Being the principal port of the republic, its trade is extensive. Its ehief exports are coffee, cacao, indigo, and hides; imports, British manufactured goods, provisions, wines, \&c. The number and tonnage of vessels that entered the port in 1847, was 163 , tonn. 28,378; cleared, 164 , tonn. 29,488 . Value of imports, $£ 656,743$; of exports, $£ 590,753$.

The following table shows the quantities of the principal articles exported from La Guayra, for the years 1843-1847:-

| Years. | Coffee. | Caca. | Corton. | Sugar. | Indigo. | Histes. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1813. | $\begin{gathered} \text { Cwt } \\ 139,191 \end{gathered}$ | 96als | ${ }_{4}^{\text {cut }}$ | Cut. 38.5 38.5 | $\begin{gathered} \text { Cut. } \\ 1139 \end{gathered}$ | Number. $3+, 628$ |
| 1844 | 12,225 | 7695 | 211 | 2261 | 724 | 52,361 |
| $18+5$. | 111,747 | 6250 | 691 | 4646 | 480 | 48,009 |
| 1846 | 152,747 | 7026 | 476 | 6378 | 863 | 53,622 |
| 1847. | 114,561 | 8334 | 10,171 | 6171 | 561 | 53,913 |

The port is not a very good one, being unshcltered from N. to E. and W. winds, and the continued E. brecze keeping the sea in a state of constant agitation. The holding ground, however, is good; anchorage, from 6 to 30 fathoms, aceording to distance from the land. The town is defended by a fort, and several batteries judieiously planted along the shore. La Guayra was nearly destroyed, in 1812 , by an earthquake. Pop. 8000 .

GUAYTARA, a river, in the N. of Ecuador, an affluent of the frontier river Patia, whieh it joins after a generally N. W. eourse of about 75 m .

GUAYTECAS, a bay and group of isls. off W. coast, Patagonia; lat. $44^{\circ} \mathrm{S}$. The islands, which form the N . part of the Chonos Arehipelago, are much frequented by seals.

GUBBIO [anc. Igurium], a tn. Papal States, deleg. Urbin and Pesaro, 50 m . W.S.W. Ancona. It is a bishop's see, has
a cathedrall, six parish churches, 21 convents, and manufac tures of silk and woollen stuff. Pop. 4339.

GUBEN, a tn. Prussia, prov. Brandenburg, gov. of, and 23 m . S.S.E. Frankfurt-on-the-Oder, cap. circle of same name, at the confluence of the Lubst with the Neisse. It is walled, has three suburbs, four churehes, a court-liouse, and gymnasium; mannfactures of woollen and linen cloth, tobaeco, leather, iron, and earthenware; a building yard, worsted mill, some shipping trade, and a trade in wool, wine, fruit, and cattle, and three annual fairs. Pop. (1846), 11,663.——The circle is flat, well wooded, and watered, and produces much corn, and depastures large numbers of cattle, sheep, and swine. Area, 327 geo. sq. m. Pop. 45,961.

GUCHILAQUE, a small tn . Mexico, dep. of, and 30 m . S. Mexico, 7000 ft above the sea, on a mountain range of same name, forming a portion of the Cordillera of Anahuac.

GUDEN, or Guden-as, a river, Denmark, N. Jutland, formed by the junction of the Hammermölle-aa and the Stongaard-aa, near Törring, bail. Aarhuus. It flows N.N.E., falls into the N.W. corner of lake Mos; on issuing from which, with its original volume much increased, it passes through a number of small lakes, flows N., and then N.E., passes Randers, and falls into the Randers-fiord, after a conrse of about 80 m . Vessels drawing 7 ft . come up to Rauders, and large barges can proceed up mueh farther.

GUDENSBERG, a tn. Hesse-Cassel, prov. Niederhessen, 11 m. S.W. Cassel. It is walled, contains a chureh, hospital, synagogue, and industrial school, and has a trade in yarn. There is a eolliery in the neighbourhood. Pop. 2097.

GUDOOK, a pass, Persia, 80 m . E. by N. Teheran, one of the greatest leading into Mazanderan from the $S$. It is supposed by Burnes to be the 'Pylae Caspiae,' or the Caspian gates, through which Alexander the Great pursued Darius.

GUEBWILLER, a tn. France, dep. Haut-Rhin, 13 m . S.S.W. Colmar, on the Lauch, at the foot of the round-topped mountain called the ballon of Guebwiller. It is well built, has two remarkable churches, one of which is of the 11th century; manufactures of cloths, woollens, ribbands, cottons, plain and printed; fine cotton yarn, sewing silk, chemicals, and machines; bleaelieries, and a sugar refinery. Near it are coal mines and slate quarries. Pop. 3860.

GUEGUE'TENANGO, a tn. Central America, Guatemala, dep. Totonicapan, 114 m . W.N.W. Guatemala, in a valley, near the source of the Selegua, with a parish church. Pop., ehiefly Indians, 1300.

GUELDERLAND, a prov. Holland. See Gelderland. GUELDRES, a tn. Prussia. See Geldenn.
GUELEA, a tn. Algerian Sahara, 135 m. W.S.W. Gardaia, consisting of 200 well-built houses, inclosed by a wall, situate on a conical hill, and supposed to be constructed of stones hewn for a Roman city that occupied the same site. It has some trade and manufactures, and near it are rich date plantations.

GUELLE, a vil., W. Africa, Foota-Damga, 1. bank Senegal; lat. $15^{\circ} 18^{\prime} \mathrm{N} . ;$ lon. $12^{\circ} 45^{\prime} \mathrm{W}$. It is an extensive mart for millet.

GUELPH, a tn. and township, Upper Canada, Wellington dist. The town, finely situated on the Speed, 38 m . N.W. Hamilton, has a handsome jail and eourt-house, and places of worship for Presbyterians, Episcopalians, British Wesleyans, Congregationalists, and R. Catholics. Pop. 1240 , chiefly English and Scoteh; township, 3400.

GUERANDE, a tn. France, dep. Loirc-Inférieure, 42 m . W.N.W. Nantes, on a vine-covered slope. Though now 3 m . from the sea, it once had a harbour, and was a place of im portance and strength. It has lofty walls, many towers, aud a gloomy aspect ; and near it is a massive castle, formerly an outer defence. It likewise has two well-maintained lospitals, manufactures of linens, cottons, and serges, and wool and cotton spinneries. In the environs are salines, whence much fine salt is extracted. Pop. 2202.

GUERARA, a tn. Algerian Sahara, Oasis of Wady Mzab, 42 m . E.N.E. Gardaia. It is surrounded by a very hight wall, and entered by three gates. The gardens are remarkable for their extent and fertility. All the tribes of the desert frequent this place either to buy or sell horses, asses, sheep, ivory, gold dust, ostrich feathers, cotton, silk, cutlery, \&e., brought chiefly from Tunis and Algiers. Pop. very considerable, said to be little inferior to that of Gardaia.

GUERCHE (LA), a tn . France, dep. Ille-et-Villaine, 24 m . E.S.E. Rennes, with a manufacture of bone-black, and a trade in chestnuts. Pop. 1984.

GUERCINO, a vil. Papal States, deleg. of, and $12 \mathrm{~m} . \mathrm{N}$. Frosinone, r. bank Cosa. Pop. 1100.

GUERET [Latin, Waractum], a tn. France, dep. Creuse, 40 m . N.E. Limoges. It is tolerably well built, is the seat of a court of primary resort; possesses a communal college, and societies of agriculture, natural history, and antiquities; contains a handsome townhouse, a courthouse, library, prison, and hospital; and has a considerable trade in cattle and butter, and numerous annual fairs. Pop. 3924.

GUERIGUY, a vil. France, dep. Nièvre, 8 m. N.N.E. Nevers, on the Nièvre. Here are some State ironworks, for the manufacture of chain-cables, \&c. Pop. 1257.

GUERNSEY, the second largest and most W. of the Channel Islands, lying off the N. coast of France, from which it is about 28 m . distant, and from England about 68 m .; lat. (S.W. point) $49^{\circ} 27^{\prime} \mathrm{N}$. ; lon. $2^{\circ} 41^{\prime} \mathrm{W}$. (R.) It is of a triangular form, about 9 m . long, and 3 to 4 m . broad. The N. part of the island is level, the $S$. more elevated, and intersected by numerous deep and narrow valleys; coast lofty and abrupt, some of the cliffs attaining a height of 270 ft . The island is almost entirely of granitic formation; the rocks are chiefly gneiss, granite, and sienite. The climate, though subject to frequent variations, is extremely healthy; snow is rare, and frosts light, and of short continuance; mean winter temperature, about $41^{\circ} 62^{\prime}$; that of summer, $60^{\circ} 7^{\prime}$. During the spring E. winds prevail, and W. during the rest of the year. The soil is fertile; but, from the minute subdivision of property-almost every farmer being proprietor of the patch he cultivates, commonly varying from 5 to 12 acreslittle improvement has been made in agriculture. Though the land under tillage is rapidly increasing, and wheat is the crop most generally grown, yet the annual growth of wheat and of barley is far short of the consumption; and oats, beans, and rye are seldom raised. Many of the small proprietors who live near the coast combine the pursuits of fishermen and farmers, three or four clubbing in the ownership of a boat; and, while the husband on his return cultivates his ground, the wife carries the fish to market. But, in most cases, the breeding of cattle and the dairy are the principal objects of attention; and the butter made is highly esteemed. Horses of good breeds and pigs are also reared, the latter attaining a great size. Long leasehold tenure is unknown, but a great part of the land is heavily burdened with a species of irredeemable mortgage peculiar to the Channel Islands. The value of land is extremely high, the rent averaging from $£ 5$ to $£ 7$ per ac. The houses and cottages of the country people are generally neat and comfortable. The garden produce, including flowers, is remarkable for its variety and excellence; many beautiful plants, which require artificial heat in England, growing here in the open air. Figs and peaches are abundant, melons also are plentiful, but considered inferior to those of Jersey; and there are also extensive orchards, from the produce of which considerable quantitics of cider are made, both for home consumption and for exportation. The principal articles of export are cider, apples, potatoes, wines, and building-stone, or granite; hardly a day passing without a vessel being despatched to London, laden with granite in a broken state for the repair of roads, \&c., while so many as 15 to 20 vessels so laden have arrived in London in one day. The imports are wheat, flour, British manufactures, wine, sugar, coffee, \&c.

The government of Guernsey, as of the other islands, is in the hands of States; some members of which are named by the crown, while others are chosen by the people, and others sit ex officio. Causes are determined by their own officers; but an appeal may be made to the sovereign in council. Neither parliament nor council, however, interfere on ordinary occasions with the internal regulations of the island. The legal institutions are a mixture of English with Norman law, precedent, and custom. The language spoken in court is French. Juries are unknown. The States vote money for ordinary public expenses; but new taxes must be sanctioned by the crown. The military government of the island is vested in a lieutenant-governor, who represents the sovereign in the Assembly of the States. The effective strength of the militia is about 2600 men, from 16 to 45
years of age, and is divided into four regiments and an artillery battalion.

The natives of Guernsey are a thrifty and saving people. The dialect of the island is the pure Norman of some centuries ago; but among the upper classes a knowledge of English is general. The principal place of education is Elizabeth College, at St. Peter's Port, the capital, and only town in the island. There is also a school in each of the ten parishes into which the island is divided. Pop. 26,649.

GUESTLING, par. Eng. Sussex; 3180 ac. Pop. 803.
GUES'TWICK, par. Eng. Norfolk; 1660 ac. Pop. 200
GUETARIA, a tn. and port, Spain, Biscay, prov. Guipuzcoa, 15 m . N.N.W. Tolosa, on the Atlantic. It is indifferently built, partly surrounded by decayed walls, and has a Gothic church, municipal-house, prison, hospital, and storehouse. Inhabitants mostly employed in fishing, and in weaving linens and woollens. Pop. 1274.

GUEVO UPAS (Valley of Poison). See Java, sec. Volcanos.

GUGGISBERG, a vil. and par. Switzerland, can. of, and S.S.W. Bern, r. bank, Kalte Siense. It consists of the small village of Guggisberg, containing the church and parsonage, and a great number of single houses, scattered over a very hilly district. In one of its valleys, on the $N$. side of the Ganterisch, where the Kalte Sense has its source, there is a sulphur spring, in high repute among the inhabitants. P. 5203.

GƯGLINGEN, a tn. Wïrtemberg, circle Neckar, bail. of, and 1 m. S.W. Brackenheim, l. bank, Zaber. It has a courthouse, and a trade in corn, wine, and fruit. Pop. 1440.

GUGLIONESI, a tn. Naples, prov. Sannio, 7 m . N. Larino. Pop. 3000 .

GUGUAN, an isl., N. Pacific Ocean, one of the Ladrones, or Marianne group; lat. $17^{\circ} 35^{\prime} \mathrm{N}$. ; lon. $145^{\circ} 53^{\prime} \mathrm{E}$. (r.) It lies N. and S., $2 \frac{1}{2} \mathrm{~m}$. long, and is one of the highest in the group. There are two peaks on it, one of which is estimated at 2000 ft . To the S. and E. the slope of the hills is extremely rapid, and the rock, which descends to the sea, is composed of lava. The highest point on the N. side is a vast crater whence smoke has been seen to issue.-(Findlay's Directory for the Pacific Ocean.)

GUHRAU, or Gora, a tn. Prussia, prov. Silesia, gov. of, and 42 m. N.N.W. Breslau, cap. circle of same name, on a height. It is surrounded by walls; is the seat of a court, and several public offices; contains two churches, and two chapels, several schools, an hospital, and infirmary; and has manufactures of linen and tobacco, numerous mills, tile-works, a distillery; a trade in corn, garden produce, and cattle, and three annual fairs. Pop. 3779.-The circle, area 204 geo. sq. m., flat throughout, is watered by the Oder and Bartsch, and has good arable and pasture land. Pop. 37,127.

GUIA, a tn. Canary Islands, isl. Gran Canaria, 11 m . W. by W. Palma. It is well built, and possesses a church, several chapels, two schools, a town-hall, prison, and cemetery. Manufactures :-linen, cloth, baize, hats, and wine. Trade:-grain, fruits, and domestic cattle. Pop. 2230.

GUIAGUILA, a vil. Senegambia, r. bank Senegal, opposite Kounguel ; lat. $14^{\circ} 15^{\prime} \mathrm{N}$. ; lon. $12^{\circ} 20^{\prime} \mathrm{W}$. It is picturesquely situated on a mass of quartz rock, and its central part is surrounded by an earthen wall. The environs are adorned with trees, and with fine plantations of millet.

GUIANA, Guyana, or Guayana, a large territory, S . America, extending between lat. $8^{\circ} 40^{\prime} \mathrm{N}$. and $3^{\circ} 30^{\prime} \mathrm{S}$.; and lon. $50^{\circ}$ and $68^{\circ} \mathrm{W}$.; having the Atlantic and E. course of the Orinoco, N.; the rivers Negro and Amazon, S.; the N. course of the Orinoco and the natural canal of Cassiquiare, W.; and the Atlantic, E. This territory was divided into Brazilian or Portuguese Guiana, Venezuelan, British, Dutch, and French Guiana; but the last three alone are now recognised under this name, and so distinguished on our maps-the other two being absorbed by their respective countries. The three Guianas just alluded to are maritime territories, lying contiguous to each other, N.W. to S.E., in the order in which they are named.

GUIANA (British), one of the three portions of the above territory, about 560 m . long, S.E. to N. W., and about 200 m . broad, having E. Dutch Guiana, W. Venezuela and Brazil, N. and N.E. the Atlantic, and S. Brazil; lat. $0^{\circ} 40^{\prime}$ to $8^{\circ} 40^{\circ} \mathrm{N} . ;$ and lon. $57^{\circ}$ to $61^{\circ} \mathrm{W}$. Neither its W. nor S. limits, however, have been defined. Estimated area,
$76,000 \mathrm{sq} . \mathrm{m}$. Its coast line is about 280 m ., extending froin the river Corentyn to the l'unta llarima, about lon. $60^{\circ}$ W. It is divided into two counties-namely, lierbice, and the united counties of Demerara and Essequibo. The whole surface of the coast lands is on a level with the high-water of the sea. When drained, banked, and cultivated, they consolidate and sink fully a foot below it ; in consequence of which, it becomes necessary to pay unremitting attention to the dans and sluices, to keep out the sea, otherwise great destruction and damage to the land ensues. Shallows, or muddy banks, stretch along the whole line of coast, and run several miles into the sea; they are in some parts dry, in others covered with not more than from 3 to 4 ft . water. The entire absence of all landmarks on these flat and monotonous shores, renders it difficult for strange vessels to ascertain at what partieular point of the eoast they are. The level country extends from 10 m . to 40 m . inland, when it is arrested by a range of sand-hills, of low elevation; the highest not exceeding 200 ft . Behind these hills, the high land stretches out in level or undulating plains, rising here and there into eminences. Notwithstanding the general flatness of the country towards the coast, the interior is traversed, in various directions, by chains of mountains; few of them, however, of any great height. Of these mountains, the Pacaraima range, nearly in the centre of the country, is the most remarkable, and exhibits the loftiest elevations-the culminating point, called Roraima by the Indians, rising to a height of 7500 ft . above sea-level. This group extends about 25 m . N. W. and s.E., is eomposed, in part, of sandstone, and presents a singular castellated appearance-the upper portions consisting of a perpendicular mural precipice, 1500 ft . high, down which magnificent cascades, of equal height, are seen descending. The other prineipal ranges are the Sierra Imataca, in the N. part of the country, rumning also N.W. and S.E., parallel to the coast, at an average distance of 50 m . to 60 m .; the Cannucu or Conocou, and the Sierra Acarai-the last occupying the extreme S.E. corner of the territory, forming its boundary in this direction. They are densely wooded, but do not reach a greater elevation than 4000 ft . The geological composition of the mountains of British Gniana is various. Some of them consist of granite, gneiss, and trappean rocks, and their different modifications; others, as mentioned above, are of sandstone; and others, again, appear to be of white quartz, which, from the quantity of the particles of mica they eontain, shine like gold. Granite, however, is probably the prevailing formation, particularly in the interior; many huge mountains, several thousand feet high, being wholly composed of this substance, frequently traversed by veins of quartz, and consequently almost destitute of vegetation. Some of the detached masses of granite present the most extraordinary forms; they are generally of a conoidal figure, and often of great height-others partake of both cone and pyranid. Amongst the more remarkable of these is an isolated rock, ealled Ataraipu - (which see) -rising 1300 ft above the sea. Another natural curiosity of this kind oecurs at the ontskirts of the l'acaraima mountains, about lat. $4^{\circ} \mathrm{N} . ;$ being a column of granite, in the form of the trink of a decayed tree, about 50 ft . high. Rock erystals and red agate are met with; and very pure white clay is found in the Essequibo. The extensive flats along the shore are composed of alluvial soil and clays, resting upon granite. These alluvial flats are, in many instances, covered with a black vegetable matter, the detritus of numerons rivers.

Rivers.-The principal rivers are-the Essequibo, Demerara, and Berbice, the Corentyn forming the boundary between British and Duteh Guiana. The first is situated about 10 m . W. from the I'emerara river, and is about 15 to 20 m . wide at its embouchure, which is stulded with several low, beauti-fully-wooded islands. The Demerara is about $1 \frac{1}{2} \mathrm{~m}$. wide at the mouth, and has a course of about 200 m . It is navigable by ships of burden for 100 m . up, when the navigation is interrupted by cataracts and rapids. The Berbice river, 57 m . S.E. the Demerara, is about 3 m . wide at the mouth. Mode-rately-sized ships can aseend as far as Fort Nassau, a distance of about 50 m ., in a straight line; but vessels drawing not more than 12 or 14 ft . can, it is said, sail 200 m . np. Above this, dangerous cataracts occur.

Climate.-(iniana has two dry and two wet seasons, each continning for three months; the wet embrace the months of Vol. I.

December, January, and February-and then June, July, and August; the dry the other months. The mean annual temperature is nearly $81^{\circ} 2^{\prime}$. Violent thunder-storms oceur at the change of the seasons; but hurricanes, so destructive in the W. Indies, are unknown. In the dry seasons the climate is agreeable, and in the interior more liealthy than in many parts of the W. Indies.

Soil, Agriculture, Vegetable Products, de.-The soil is, in general, very fertile; and that of Demerara, in particular, well adapted for the cultivation of the sugar-cane; but, in consequence of the numerous largo open drains with which the land is intersected, and which have been rendered necessary by its being below the level of the sea, the plongh cannot be used. Vegetation, however, is singularly vigorous and luxuriant; its forest trees, which eover about one-half its surface, are of the most magnificent description; especially the mira-tree (Mimosa excelsu), described as attaining the height of 130 to 150 ft ., and as appearing, at a distance, from its immense size, like hillocks clothed with vegetation. The timber of this tree is said to be equal to the teak of the $E$. Indies. Among the other prineipal trees are-the green heart (belonging to the family of the Lauriuece), the sawary (Pekea tuberculosa), the bully-tree (Achras balata), the sirwabally, erab-wood (Carapa Guianensis), and purple-heart. Fruit-trees of various kinds also abound. Amongst the indigenous fruits are - the pine-apple, guava, the marmalade fruit, the anona, the sapodilla, and the Brazil and Suvarrow nuts. The cabbage-tree is common, and there are several varietics of palms. Medieinal plants also abound; including quassia, a species of ipecacuanha, gentian, and many others. Cultivation is chiefly limited to sugar, coffee, yams, cassava, plantains, bananas, sweet potatoes, maize, \&c. There are many fibrous vegetables which afford substitutes for hemp and flax; and in the forests dyeing woods, coehineal, gunn copal, and a multitude of other valuable and unknown vegetable productions abound. The flora is rich and varied, and includes the Victoria Regia, the largest of the water-lilies, whose immense bright green leaves, and enormous white and pink flowers, are to be seen floating on the reaches of some of the rivers.

Zoology. - The animals are those of tropical S. America generally-the jaguar, tapir, armadillo, agouti, ant-bear, sloth, deer, a great variety of monkeys, iguanas, large alligators, and turtles; several kinds of parrots, mackaws, and hummingbirds; the flamingo, Muscovy duck, touean, and spoonbill. In the forests the vampire bat abounds. Suakes are numerous, and many of them poisonous; and tronblesome insects are almost intolerably plentiful, as might be expected, from the swampy nature of the coast distriets. The rivers abound with a great variety of kinds of fish, many of them highly prized for the table; they include the silurus, which often measures 12 ft . in length, and weighs upwards of 2 ewt. The domestic animals are-horses, mules, hogs, goats, and fowls. Black cattle and horses are reared on the savannas, but are little attended to.

Inhabitauts.-The population of British Guiana is composed of aboriginal tribes, and of foreign settlers-Dutch, English, Europeans, Africans, and their descendants. The prineipal tribes of the aborigines, now greatly reduced in numbers, are-the Arrawaks, Accawai, Carabisce, Warrows or Warraus, Macusies, and Wapisianas; the last are tall, fine-looking men, with regular features, and large noses. The Arrawaks, living within the immediate vieinity of the plantations, are the most eivilized of all the tribes. They are of small stature, seldom exceeding 5 feet 4 inches in height; are stout and phmp in proportion, but not museular. The Accawais are also of low stature, and their skin of a deeper red than the Arrawaks. They paint themselves with arnotto; are quarrelsome, warlike, capable of enduring eonsiderable fatigue, and are said to be superior in eourage to all the other nations, but are aceused of being singularly filthy in their habits. They are, however, hospitable, and determined humorists. The Caribisce, who are rapidly deereasing, oceupy the upper part of the rivers Essequibo and Cayuni. They are brave, credulons, simple, and obstinate. Nothing comes amiss to them in the way of food; rats, frogs, toads, lizards, and insects being devoured indiscriminately. The Warrows or Warraus inhabit the Pomeroon coast, and are mostly sailors and boat-builders, at which they excel. They

145
are said to be intemperate, quarrelsome, improvident, and dirty in their persons; they are only about 700 in number. The Macusies are a kind and hospitable tribe, and appear to be less indolent than the Indians generally; they inhabit the

vicinity of Pirara, a village far into the interior. There are several other tribes in the interior, of which little is known. Some of those inhabiting the upper regions of the Essequibo are said to be cannibals. The accompanying illustration represents three young natives, who were taken to England by Sir R. H. Sclımburgk, after his first journey through Guiana, and there educated for a time. They were quiet, docile, and attentive to their instructors, exhibiting different tastes and different degrees of aptitude. No. 1 is Saramang, a Macusi, the most intelligent of the three; No. 2 is Sororeng, a Parvilhano, once a powerful tribe, inhabiting the banks of the Rio Branco; and No. 3 is Corrienan, a Warrau. One of them died, but the other two returned to Guiana; and Sororeng was afterwards very useful to Sir R. H. Schomburgk and his brother, Riclard, on a subsequent journey, from his knowledge of English, Creole-Dutch, and sundry native dialects.

Products, Commerce, dc.-Sugar, rum, coffee, molasses, and hardwood, form the principal articles of export. Theexports for 1849 amounted to $£ 674,942$, and the imports to £658,140; the former showing a considerable decrease on preceding years. Cotton was also cultivated formerly to a great extent, especially in Demerara; but is now nearly extinct, in consequence of the paucity of latour. The cultivation of coffee has likewise shrunk greatly of late years-the exports having falten from $4,500,000 \mathrm{lbs}$. to $100,000 \mathrm{lbs}$. A large increase in the tonnage and slipping of the colony, and in the internal traffic, has taken place since 1844 , including a brisk trade in cattle from the Orinoco.

Government.-British Guiana has no legislative assembly or executive council, but a court of policy, consisting of five official members-namely, the governor, the chief-justice, the attorney-general, the collector of customs, the government secretary, and five non-official members. The expenditure of the colony, in 1849 , amounted to $£ 130,701$, while the revenue produced only $£ 94,720$, being made up by a grant in aid.

Towns.-The principal towns are Georgetown, Demerara, and New Amsterdam, Berbice (both of which see.)

History.-Guiana is said by some to have been discovered by Columbus, on his third voyage, in 1498; others attribute the discovery to Vasco Nunez, in 1504 . The first settlement was formed by the Dutch, in 1580, on the river Pomeroon, and called New Zealand, whence they spread E. to the Essequibo and Demerara. In 1781, the colony was taken by Sir George Rodney; but it was restored to the Dutch in 1783. In 1796 it surrendered to the British, and was again restored to the Dutch, by the peace of Amiens, 1801. It
was again taken by the British, on the breaking out of the war in 1803, and has since remained in their possession. Pop. (1851) 127,695.

GUIANA (DUTCH), or SURinam, a Dutch colony, $S$. America, situated between English and French Guiana, having the former on the E., and the latter on the W.; between lat. $1^{\circ} 30^{\prime}$ and $6^{\circ} \mathrm{N}$.; lon. $53^{\circ} 30^{\prime}$ and $57^{\circ} 30^{\prime} \mathrm{W}$. Its coast line extends from the river Corentyn to the river Maroni. The length of the territory, N. to S., is 300 m .; breadth, at the widest part, about 280 m . ; but does not, generally, exceed 225 or 230 m . ; area, about $38,500 \mathrm{sq} . \mathrm{m}$. The general aspect of the country is the same with that of British Guiana above described-flat and swampy on the coast, and mountainous in the interior; well watered by numerous streams, flowing generally S. to N.; and of which the Surinam and its affluents, and the Saramacea with its affluents, and the Coppename, are the chief. It has also a similarly warm, moist climate, is very fertile, and well cultivated, resembling an extensive garden, and yields similar products. On the r. bank of the Surinam river, and about 10 m . from its mouth, is situated the capital of the settlement, Paramaribe; a little N. from which is the fort of Zeelandia, where the governor resides, and where, also, most of the government establishments are situated. The principal exports of the colony are sugar, coffee, cotton, molasses, and rum. Their value in the years 1847-1849, was as follows:-

During the same years the value of the imports amountcd to-
$\stackrel{1847}{\text { £1 } 66,239 .}$ $\qquad$ 1848,
$.151,092$. $\qquad$ 1849.
165,418

The Dutch government have recently emancipated their slaves in this territory; but instead of compensation to the proprietors, the slaves remain indentured labourers for a period of 12 years, and work without pay. The pop. amounts to upwards of 60,000 , of which between 6000 and 7000 are whites, and about 53,000 or 54,000 negroes. The government is vested in a governor-general and council.

GUIANA (French) [French, Guyane-Française], a French colony, S. America, the most E. division of Guiana, its coast line extending from the river Maroni, on the W., to the river Oyapok, on the E., which separates it from Brazil, a distance in a straight line, of about 200 m .; between lat. $2^{\circ}$ and $6^{\circ} \mathrm{N}$. ; and lon. $49^{\circ} 38^{\prime}$ and $54^{\circ} 38^{\prime} \mathrm{W}$. The greatest length of the colony, N. to $S .$, is about 280 m .; its greatest breadth, about 220 m . ; area, $27,560 \mathrm{sq} . \mathrm{m}$. This territory also resembles that of British Guiana, in its physical features, climate, and vegetable productions, with the addition, in the latter case, of pepper, cloves, cinnamon, nutmeg, \&c. The coast is low, consisting of a flat alluvial tract, of great fertility, in some places marshy, and covered with thick forests of mangroves. The highlands, in the interior - the soil consisting of clay, mixed with granitic sand, are also fertile; and the whole country is exceedingly well watered-the principal streams being the Mana, Sinnamary, Oyak, and Apronaque. The territory comprises the island of Cayenne (which see), celebrated for the description of pepper bearing that name. On this island is situated Cayenne (which see), the capital of the colony. The colony is divided into two districts, Cayenne and Sinnamary, and 14 communes or townships. The government is vested in a governor, assisted by a privy council, and colonial council of 16 members, elected by the colonists.

The French first settled in Cayenne in the year 1604. In 1763, the French government, with the view of improving, and otherwise increasing the importance of the colony, sent out 12,000 emigrants; but no arrangements having been made for their reception, or subsequent dispesal, they nearly all perished from exposure to the climate, which was then extremely insalnbrious. In 1809 , the colony was captured by the united forces of the British and Portuguese, and
restored to France at the peace of Paris, in 1814. Pop. (1846), 19,795 , showing a considerable decrease since 1836; but the extensive transportation of political offenders to Cayeune by the French President, in the early part of 1852, holds out a prospect of the population being again increased.

GUIANIA, a river, S. America. Sce Negro (Rio).
GUICOWAR's, Gykwar's, or Baroda Dominion, a state, IIindoostan, in its W. portion, subsidiary to the British, and subordinate to the presidency of Bombay, consisting of most part of the peninsula, and of some other detached portions of the province of Gujerat; the whole between lat. $20^{\circ} 40^{\prime}$ and $24^{\circ}$ N., and lon. $69^{\circ}$ and $74^{\circ}$ E.; bounded, on the S.W., by the ocean; N. by the Gulf and Runn of Cutch, and the territories of Odeypoor, \&c.; E. by some minor Rajpoor states, and a part of the Bombay presidency, which last surrounds the districts on the E. and N. of the Gulf of Cambay; area of the Baroda territory, or that immediately subject to the Guicowar, $4400 \mathrm{sq} . \mathrm{m}$. ; but of the whole, including the dominions of the Kattywar, and other tributary chiefs, $29,400 \mathrm{sq} . \mathrm{m}$. The Sabermutty, Mhye, and Nerbudda rivers, intersect it, flowing S. or W. to the Gulf of Cambay. It is one of the richest parts of India; and its admirable position, with a long line of coast, is highly advantageous to its commerce. Cotton, sugar-cane, indigo, tobacco, oil, pulses, flax, are principal crops; in some parts are fine pasture lands; and the E. districts in particular are productive of various kinds of grain, more of which is produced than required for home consumption. The inhabitants are chiefly Ilindoos; but include many Mahometans, and Parsees, with wild, aboriginal tribes; the Jains, a religious sect of W. India, are here very numerous. Almost all the Hindoo castes are partially occupied in weaving; and cotton fabrics form, with corn and raw cotton, the principal exports. Cambay, and Surat-Baroach, \&c., in the British territorics around its gulf, monopolize most of the foreign trade. The dynasty is Mahratta, and the rise of the Guicowar was coincident with that of the Peishwa, in the Deccan; a treaty was first entered into between him and the British, in 1780; and in 1817, the Guicowar's dominions were enlarged, in consequence of the Peishwa's cession of his previous rights in Gujerat. In the same year, the Guicowar agreed to maintain an armed force, subsidiary to the Anglo-Indian army; and consisting of 4000 native infantry, two regiments of cavalry, and a company of European artillery ; and in 1829, his tribute to the British was fixed at eight lacs of rupees ( $£ 80,000$ ), annually. Baroda is the capital, and the seat of the British resident, who conducts all the foreign relations of the state. Other principal towns are Joonaghur, Poorbunder, Jafferabad, Mallia, \&c., in the peninsula of Gujerat. Pop. of the Baroda district, 325,526; of the entire territory, $2,182,900$.-(Trigonometrical Survey of India; Parliamentary Reports, \&c.)

GUIDAKAR, a vil., W. Africa, Wallo, l. bank Senegal; lat. $16^{\circ} 27^{\prime} \mathrm{N}$. ; lon. $15^{\circ} 43^{\prime} \mathrm{W}$. It is inundated annually, and, after the retreat of the waters, millet, sweet potatocs, and melons are successfully cultivated.

GUIDIZZOLO, a tn . Austrian Italy, prov. of, and 15 m . N.W. by N. Mantua, with manufactures of silk and bombazine. Pop. 2238.

GUienne, or Guyerne, an anc. prov. France, cap. Bordeaux, comprising the Bordelais or Guienne proper, Perigord, Quercy, Rouergue, Gascogne, Pays-de-Landes, duchy of Albret, Basque country. Armagnac, and Comminges. It belonged to the kings of England from 1152 till 1200, and from 1255 till 1453. From 1453 till 1472, it was an independent ducly, but, at the latter date, it was incorporated with France. It is now partitioned among deps. Ariége, HauteGarome, Gers, LIaute-1'yrénées, Lot-et-Garonne, Tarn-et-Garonne, Landes, Basses-Pyrénées, Arveyron, Dordogne, Gironde, and Lot.

GUIELS, a small river, forming part of the boundary between France and Sardinia, separating, in part, dep. Isère of the former, from prov. Chambery of the latter. It is formed, near Les Echelles, by the union of the Guicrs Vif and the Guiers Mort, whieh deseend from the Grande-Chartreuse, flows N.W. past Pont-de-Beauvoisin and St. Genix, and, after a course of about 30 m ., joins r. bank Rhone, near St. Didier.

GUILCAGII, par. Irel. Waterforl; 3950 ac. Pop. 551.
GUILDEN, two pars. Eng.:-1, (Morden), Cambridge; 2506 ac. Pop. 808.-2, (Sutton), Chester; 1130 ac. P. 180.

GUILDFORD (East), par. Eng. Sussex; 2430 ac P. 127. GUILDFORD, a bor., market ti., and par., England, co. Surrey. The rown stands on a declivity which slopes to the Wey, 29 m . S.W. London, at the junction of a branch of the S. Western with the Guildford and Reigate Railway. It is large, well built, and has altogether a substantial and thriving appearance. The streets, of which the principal one is very stcep, are well paved and well lighted with gas; supply of water abundant. The principal public buildings are the churches, of which there are three; an elegant county-hall, guildhall, council chamber, and corn market; a county jail, with a house of correction, and extensive barracks; a hospital, theatre, and several achools and chapels. The churches are old, and one of them, St. Mary's, is a rude structure of chalk and flints. The other places of worship belong to Baptists, Independents, Wesleyans, and Society of Friends. There are several excellent free schools here, the principal of which is the grammar-school, an ancient collegiate establishment, founded in 1509. There is also a blue coat school, and national and infant schools; several almshouses, and other charities. An institution, called the Guildford institnte, was formed, in 1844, by the junction of two literary and scientifie societies previously existing. There is an iron foundry, and on the Wey are several corn and paper mills. The retail trade of the place is very considerable and steady. It has also some trade with London in corn, timber, malt, \&c., sent by the Wey. Near the town there is a good race-course, where a Queen's plate of 100 guineas is annually run for. Guildford returns two members to the House of Commons. Registered electors (1851), 536. Pop. (1841), 4074; parl. bor., 5925.

GUILDFORD, a tn . W. Australia, on the Swan River, 7 m . N.E. Perth, and 4 m . from the foot of the mountains, on a high part of the alluvial flat fringing the river.

GUILLAUMES [Latin, Willelmum], a tn. Sardinian States, div. of, and 33 m . N.W. Nice, 1. bank Varo, here crossed both by a stone and a wooden bridge. It contains two squares, one of them finely planted; almshouse, and the remains of an ancient fort; and has a trade in corn, wine, and wool, and four annual fairs. There are some remarkable caves and cascades in the neighbourhool. Pep. 1351.

GUILLOTIERE (La), a com. France, dep. Rhone, l. bank Rhone, properly a suburb of Lyon, and cap. of one of the six cantons into which that town has been divided. It consists of one principal street, which is very long, and several minor streets, and is the seat of important manufactures. Pop. 29,843.

GUILMI, a vil. and com. Naples, prov. Abruzzo Citra, dist. of, and 14 m. S.W. Vasto. Pop. 2051.

GUILOOM, a small river, Seuegambia, an affluent of the Senegal, whieh it joins about 30 m . below Kaheide, after a course of between 80 and 90 m .

GUILSBOROUG1I, par.Eng. Northamp.; 3080ac. P.939.
GU1LSFIELD, par. Wales, Montgomery. Pop. 2577.
GUIMAR, a tn . Canary Islands, isl. Tenerife, 20 m. S.W. Santa Cruz, in a fertile valley. It has a chureh, four chapels, a school, prison, fountain, cemetery, manufactures of woollen, linen, and cotton fabrics, and a trade in grain, wine, fruit, and cattle. Pop. 3042.

GUIMARAENS [anc. Guimaranum].-1, A fortified city, Portugal, prov. Minho, between the rivers Visela and Sollio, 26 m. N.E. Oporto; lat. $41^{\circ} 24^{\prime} \mathrm{N}$. ; lon. $8^{\circ} 14^{\prime} \mathrm{W}$. It stands on a gentle acclivity, is well built, has several gool streets, and public squares, a fine collegiate chureh, and several other churches, chapels, and hospitals; with manufactures of cutlery, iron-wares, paper, cottons, linen, leather, confeetions, \&c. Guimaraens lias lot sulphurous springs (temperature $161^{\circ}$ ), frequented from the carliest times. It is said to have been first founded about n.c. 500 . In 1107, Henry of Burgundy made it the capital of the kingdom. A1phonso I., and Pope St. Donaso were boru here. Pop. 7210. -2, A th. Brazil, prov. Maranhan, N. shore of the bay of Cuma, 50 m . N. W. São Luiz; with a parish church. and a harbour, which admits largish vessels. Pop. dist., 2000.

GUIMAlRAs, an isl. Philippines, Sooloo Sea, between isls. Parnay and Negros; lat. (S. point) $10^{\circ} 30^{\circ}$ N.; lon. $122^{\circ} 20^{\circ}$ E.; about 20 m . long, N.E. to S. W., and 11 m . broal.

GUINEA, a geographical division of W. Africa, the limits of which have not been precisely fixed. It may be taken, however, as including the coast line between the
frontiers of Senegambia, at Cape Verga, lat. $10^{\circ} 20^{\prime}$ N., and Cape Negro, lat. $15^{\circ} 41^{\prime} \mathrm{S} .$, or Cape Frio, lat. $18^{\circ} 23^{\prime} \mathrm{S}$. It is divided into two distriets, lying N. and S. of Cape Lopez, lat. $0^{\circ} 36^{\prime} \mathrm{S}$.; the former, called N . or Upper Gninea, includes Sierra Leone, Liberia, the Grain, Ivory, Gold, and Slave coasts, the States Ashantee, Dahomey, Benin, \&e.; the latter, called S. or Lower Guinea, includes Congo, Angola, and Benguela.

GUINEA (Gulf of), that portion of the Atlantie Oeean which washes the shores of Upper Guinea, between Cape Palmas, lat. $4^{\circ} 22^{\prime} 6^{\prime \prime}$ N., lon. $7^{\circ} 44^{\prime} 15^{\prime \prime}$ W.; and Cape Lopez, lat. $0^{\circ} 36^{\prime} \mathrm{S} .$, lon. $8^{\circ} 43^{\prime}$ E., and ineluding the Bights of Benin and Biafra. The Guinea current flows into this gulf from Cape Palmas, abreast of whieh, and near the land, it has a veloeity of 2 m . an hour; it is lost in the Bight of Biafra, near Prince's Island, lon. $7^{\circ} \mathrm{E}$. The islands of Fernando Po, Prince's, and St. Thomas, are the only ones of consequence within this gulf.

GUINEA (New), isl. Pacific Ocean. See Papua.
GUINEA COMPANY.-1, A tn. of W. Afriea, Old Calabar. River about lat. $5^{\circ} 30^{\prime}$ N.; lon. $8^{\circ} 30^{\prime}$ E. Pop. about $5000 .-2,($ Little $)$, A tn. on same river, about lat. $5^{\circ}$ $45^{\prime}$ N.; lon. $8^{\circ} 27^{\prime}$ E. Pop. about 1000.

GUINES [Latin, Guina], a tn. France, dep. Pas-deCalais, in a marshy district, 6 m. S. by W. Calais, on the eanal which terminates at this town. It is an aneient place, and was onee stongly fortified. It has manufactures of lace, earthenware, and refined wax; some tanneries, breweries, and saltworks; a trade in eorn, flax, eattle, poultry, timber, and the coal which is worked in the vicinity; and four annual fairs. Pop. 3754.

GUINGAMP, a tn. France, dep. Côtes-du-Nord, picturesquely situated on the Trieux, in the midst of large and beautifnl meadows, 19 m . W.N.W. St. Brienc. It is an aneient place, and was once surrounded by walls, of which part still exists. It has a court of primary resort, and an agricultural society; a parish ehurch, partly Gothie, with a tower and spire; and a handsome trades' hall, with a fine fountain in front of it; manufactures of linen, thread, and hats, several tanneries, a trade in these articles of manufacture, and in wine and spirits, and numerous fairs. Pop. 5787.

GUIONA, mountain. See Greece, page 1129.
GUIPUZCOA, one of the three Basque provs. Spain, bounded, N. by the Bay of Biseay, N.E. France, from whieh it is separated by the Bidasoa; E. and S.E. Navarre, S. Alava, and W. Biscay; area, about 800 geo. sq. m. The coast is bold and roeky, but so much indented, that it counts no fewer than nine harbours, though none of them are important. The interior is generally mountainous, the Cantabrian Mountains, a continuation of the Pyrences, bounding it on the S.. and covering it with its ramifications. The streams are numerous, but not one of them is navigable. They all fall into the Bay of Biscay. The elimate, though moist, is mild, pleasant, and healthy, and the inhabitants often live to a great age. From the nature of the surface, agricultural labours are carried on with eonsiderable diffieulty; but the soil, particularly in the lower valleys, is very fertile, and is cultivated with much industry. The produco in grain, however, falls considerably short of the consumption. The elief riches of the province are in its minerals, particularly iron of exeellent quality, and its woods, whieh are largely used in smelting it. The other minerals of value are argentiferous lead, copper, marble, and gypsum. Fish abound on the coast, and the fisheries employ a considerable number of the inhabitants. The principal manufaetures are iron, and the articles made from it. These also, with chestnuts of home growth, and wool derived from the neighbouring provinces, eonstitute almost the only exports. The inhabitants possess the fine physical forms, simplicity of manners, and bold manly spirit, for whieh the Basques are generally distinguished. It is divided into four districts-Azpeitia, San Scbastian, Tolosa (the eapital), and Vergara. Pop. 141,752.

GUIRIA, a maritime vil. Venezuela, prov. of, and 124 m . E. by N. Cumana, on the Gulf of Paria. It is inhabited by French and Spanish refugees from the island of Trinidad, and is a plaee of eonsiderable trade: 207 vessels, tonn. 4212 , entered, and 617, tonn. 3720, eleared in 1847.

GUISBOROUGH, a market tn. and par. England, eo. York, (N. Riding). The Town, 40 m . N. York, is beautifully
situated in a narrow but fertile valley, extending along the Tees. It consists ehiefly of one broad main street, houses generally neat and substantial, and many of them of freestone. It has a handsome townhall, a chureh, and places of worship for Independents, Methodists, and Friends; a free grammar and endowed school, and an hospital for old men and women. The first alum works in the kingdon were established here in the reign of Queen Elizabeth, by Sir Thomas Chaloner. Area of par. 12,000 ac. Pop. 2015.

GUISE, a tn . France, dep. Aisne, beautifully situated, 1. bank Oise, and traversed by a canal, 12 m . W.N.W. Vervins. It is nearly in the form of a triangle, and is walled, and otherwise defended so as to rank as a fortress of the third class. It contains two ehurches, an hospital, and the remains of an old castle; and has manufactures of linen, brickwork, tanneries, oil and eotton mills, a trade in spun hemp, flax, and brandy, weekly markets, and cight annual fairs. Guise figures mueh in the early wars of France. Pop. 3347.

GUISELEY, par. Eng. York (W. Riding); 8890 ac. Pop. 12,274.

GUISONA [anc. Cissa], a tn. Spain, Catalonia, prov. and 30 m. N.E. Lerida; regularly built; and having an ancient collegiate church, an episcopal palace, now used for public offices, and two primary schools; a trade in corn, wine, and fruit, and several annual fairs. Pop. 1550.

GUIST, par. Eng. Norfolk; 2190 ac. Pop. 425.
GUIXAR, a lake, Central America, San Salvador, between the villages Metapa and Ostua. It reeeives the Mitlan and several other rivers, and discharges its surplus water by the Lempta into the Pacific. It is about 60 m . in circumference, and in the middle is a large island, abounding in game, and containing the ruins of a considerable town.

GUIXOLS (San Feliu de), a tn. and port, Spain, Catalonia, prov. of, and 18 m. S.E. Gerona, on the Mediterranean. with wide and straight streets. It has a parish chureh, several ehapels, a town-hall, prison, hospital, cemetery, and various convents; manufaetures of linen, woollen, and hempen fabrics, soap, corks, earthenware, glass, wine, and oil ; and a trade in grain and cork, much reduced of late years. Pop. 5487.

GUJAN, a vil. France, dep. Gironde, 30 m . S.W. Bordeaux, near the Bassin d'Areachon, on the railway from Bordeaux to Teste-de-Buch. It eontains a large and handsome ehureh of three naves, surmounted by a lofty spire, which forms a eonspicuous object at a great distanee. Pop. 1958.

GUJERAT, Gujrat, Goojerat, or Guzerat [Gurjura Rashtra], a large prov., W. Hindoostan, Bombay Presidency, between lat. $20^{\circ} 45^{\prime}$ and $24^{\circ} \mathrm{N}$., and lon. $69^{\circ}$ and $74^{\circ} \mathrm{E}$. The S.W. portion is in the form of an extensive peninsula, with the Gulf of Cutch on the N.W. side, and the Gulf of Cambay on the S.E. The central distriets form an extensive plain, generally well watered, open, and fertile, but the N. and E. districts are mountainous, rugged, and jungly, and numerous deep ravines interseet many of the flattest portions of the eountry. Gujerat is traversed by several large rivers, of whieh the Nerbudda, Mhye, and Sabermutty are the most important; but, in particular tracts, water is so scarce that wells of 100 ft . in depth must be dug to obtain it. The climate is hot in summer, but mild in winter, and not unlealthy even for Europeans. The highest point to whieh the thermometer has been observed to rise is $102^{\circ}$; in January it sinks as low as $45^{\circ}$. In December and January, E. and N. winds prevail, aecompanied by thick fogs during the night. Dry and hot winds from the W. are general in May and June. At the most S. point of Gujerat, the Portuguesc are in possession of the small island of Diu, where there is a good harbour and a fort. During the hot and dry months, the surface of the country mostly appears sand or dust, and, in the rainy season, a thick mire; but it is extremely fertile. The fields, in general, exeept for particular erops, do not require much manure. The natural productions are the same as those of other tropical countries, including eotton, sugar, indige, tobaceo, saltpetre, hemp, and opium; the latter, however, is grown to a limited extent only. Cotton oeeupies half the eultivated land, the utmost proportion usually given to that plant in India. Ilorses and bullocks, of a superior deseription, are reared on the rich pasture lands of the province. Gujerat is miserably deficient in roads, which has hitherto formed a serious obstacle to the extension of its trade. There was not, in 1850, a single mile of continuous road in the
whole province; a circumstance that entails an amount of labour and expense, in transferring the produce from the interior, which is ruinous to all concerned, besides the damage sustained by property in the transit. The greater portion of this province, ineluding nearly the whole of the peninsular part, is in the Guicowar's dominions; the central portions are British, and the E. in Holcar's and in Scindia's dominions. The population of this portion of India is much diversified, presenting an extraordinary assemblage of sects and castes. The number of inhabitants in the province has been estimated at $6,000,000$, in the proportion of one Mahometan to 10 Hindoos.

GUJURU-Walia, or Gurzeriwala, a tn. and fort, $l^{\prime}$ unjab, 43 m . N. Lahore ; lat. $32^{\circ} 36^{\prime} \mathrm{N}$. ; lon. $74^{\circ} 20^{\prime}$ E. The fort is a large square structure with mud walls, and surrounded by a ditch. The interior is highly decorated, and the garden is one of the finest in India, abounding in fruittrees, especially orange-trees. It contains, also, numerous ornamental buildings, and a fountain.

GUIANE, or Goolane Ness, a promontory, Scotland, co. Haddington, at the entrance of the Firth of Forth, 13 m . W.S. W. the Isle of May. The ancient village of Gulane, on the S. side of the promontory, has a pop. of 270 .

GULDBRANDSDAL, a valley, Norway, bail. Christiana. It commences at Lillehanmer, where the Lougen falls into the lake of Mï̈sen, and continnes upwards, along the course of the stream, in a N.N.W. direction, to the foot of the Dovrefield mountains. Its length is about 163 m . ; its breadth nowhere more than 6 m . or 7 m ., and generally less than 2 m . Its scenery is of the most magnificent description; towering momntains, generally cultivated on their lower parts, and well-wooded far up in their aseent, inclosing it on both sides, while the river, and the numerous torrents which join it, form a succession of rapid and lofty cascades.

GULF S'TREAM. See Atlantic, p. 244.
GULGULA, an ancient, ruined city, of great extent, Afghanistan, in the valley of Bamian, r. bank Koondooz; lat. $34^{\circ} 49^{\prime} \mathrm{N} . ;$ lon. $67^{\circ} 46^{\prime}$ E. The ruins are scattered over and around a conical hill, on the summit of which is a ruined citadel, of great height and skilful construction. Numerous cxcavations everywhere penetrate the hill, and some contain the remains of reservoirs.

GULLEGIIEM, a vil. and com. Belgium, prov. W. Flanders, arrond. of, and 2 m . W. Courtrai, near the Heules. It has mannfactures of linen and cotton goods, several brewcries, and oil and flour mills. Pop. 3921.

GULMI, a th. Nepaul, 80 m . W. Goorkha; lat. $28^{\circ} 11^{\prime}$ N.; lon. $82^{\circ} 17^{\prime} \mathrm{E}$. ; on a hill. It formerly contained 500 houses, mostly thatched; and a castle, built of bricks, and covered with tiles.

GULNAR, port, Asiatic Turkey. Sie Curelndmer.
GULI'EN [French, Galoppe], a vil. IIolland, prov. Limburg, 10 m . ع. by s . Maastricht, in a pleasant valley, traversed by the Gulp, surrounded by lofty hills. It is composed of neatly-built houses; and has a I. Catholic and a Calvinistic elmreh, and a school. Inhabitants engaged in agriculture, cattle-rearing, and paper-making. There are also two tanneries, and as many brewerics and corn-mills-the last propelled by water-power. Pop. 932 .

GULVAI, par. Eng. Cornwall; 3280 ac. Pop. 1941.
CUMBBNNDN, a gov. E. Prussia, bounded, N. by Russia, E. and S. Poland, and W. gov. Künigsberg. Area, 4771 geo. sq. in. It is, almost throughout, a monotonous flat, extensively covered with lakes; the principal of which are-the Spirding, Maner, Löwentin, Talter, Rheinisch, Rosche, Raygrod, and Wysztiten; and watered by numerous streams, particularly the Niemen or Menel, and the Pregel, with its affluents the Inster and Pissa. Much of the surface is densely wooded, and other parts are occupied by morasses and heath; leaving only a comparatively small residue of good arable land. The pastures, though not very rich, feed great numbers of cattle and sheep. Of the latter, a considerable number are merinocs, and yield excellent wool. Neither manufactures nor trade have made much progress. For administrative purposes, the government is divided into 16 eirelesIIeidekrag, Niederung, 'lilsit, Ragnit, lillkallen, Stallupühnen, Gumbinnen (the capital), Insterburg, Darkehmen, Angerburg, Goldapp, Oletzko, Lyk, Lïtzen, Senshurg, and Johannisberg. Pop. (1816), chicfly Protestants, 632,356.

GUMBINNEN, a tn. E. Prussia, cap. gov. of same name, agreeably situated on both sides of the lissa, $68 \mathrm{~m} . \mathrm{E}$. Königsberg. It is regrularly built; contains a Latheran, a German, and French Reformed church; a gymnasium, public library, infirmary, burgher hospital, and soveral elementary schools; is the seat of superior courts and govermment offices; and has manufactures of woollen and linen cloth, a distillery and brewery, a trade in corn, wool, cattle, and linseed; and three annual fairs. Gumbinnen was only a parish village in 1732 , and is the youngest town in the Prussian monarehy. Its rise and prosperity are owing, in a great measure, to the kinlly reception given to Protestants, particularly inhabitants of Salzburg, whom cruel persecutions had driven from their homes. Pop. (1846), 6303 .

GUMBU'T, a tn . Scinde, 12 m . S. Khyrpoor, and 10 m . E. from the Indus; lat. $27^{\circ} 24^{\prime}$ N.; lon. $68^{\circ} 23^{\prime}$ E. It is one of the principal places in the country for the manufaeture of cotton; but the process is rude, and the quantity produced small. Pop. abont 3000.

GUMFRESTON, par. Wales, Pembroke. Pop. 128.
GUMMIA, a small tn. in the N.E. of the Punjab, on the S. slope of the Mori mountains, 22 m . S.W. Sultanpoor; lat. $31^{\circ} 56^{\prime} \mathrm{N} . ;$ lon. $76^{\circ} 33^{\prime} \mathrm{E}$. The houses are built of stones, cemented with mud, and strengthened with timbers of fir laid horizontally. The roofs are of fir spars, covered with slates; but, as these are laid loose, they form a very imperfect protection agrainst the weather. There is here a mine of rock-salt, which is worked to a considerable extent, but in a very rude manner. The salt is of a reddish colour, and is very compact and heavy.

GUMIEL, two places, Spain:-1, (Gumiel-de-Izan), A tn . Old Castile, prov. of, and 45 m . S. Burgos, on the sides of two steep hills. It has uneven, dirty, and ill-paved strects; a beautiful parish church, of the composite order, with three naves; a townhouse, a Latin, and a primary school; a trade in wine, and two annual fairs. Pop. 1417.-2, (Gumiel-delMercado), A tn. Old Castile, prov. of, and about $47 \mathrm{~m} . \mathrm{S}$. Burgos, near Gumiel-de-Izan, on a slope. It contains two parish churches, a handsome townhouse and prison, a primary school, and Moorish castle, in ruins; and has several flourmills, and a trade in wine. Pop. 1171.

GUMISH-KIIANEII [Silver-works], a tn. Asiatic Turkey, on the Karshoot, pash. and 100 m . W.N. W. Erzeroom. The whole district abounds in copper and argentiferons lead ore. Though few of the mines are now worked, yet those of lead formerly supplied ore for forty furnaces.

GUMLEY, par. Eng. Leicester; 1550 ac. Pop. 240.
GUMMERSBACII, a tn. Rhenish Prussia, gov. of, and 28 m. E. Cologne, cap. circle, and on a small stream of same name. It has a Protestant parish church, a superior burgher school, and a courthouse; manufaetures of woollen and coarse eotton goods, and tobaceo; and two annual fairs. Pop. 1031.

The curces is mountainous, being covered by lofty ridges of the Sanerland, and is generally unfertile. Area, 95 geo. sq. in. Pop. 29,180.

GUMIOLDSKIRCIIEN, a market tn. Lower Austria, in a valley, 12 m. S.S. W. Vienna. It has a handsome townhouse, parish chureh, and hospital; manufactures of silk, ganze, erape, buttons, paper, and fancy articles in wire; a silk, and other mills. Pop. 1606.

GUMRI, a frontier tn. Russian Armenia, on the high road to, and 61 m . N.N.W. Erivan; lat. $40^{\circ} 43^{\prime}$ N.; lon. $43^{\circ}$ is' E. Extensive fortifications have been erected by the Russians, on the heights N. W. of the town, consisting of bombproof buildings, barracks, and fiehd-works. l'op. (1842), 9310 .

GUNABAD, or Goonabad, a th. of E. Persia, prov. Khorasan, $135 \mathrm{~m} . \mathrm{s}$. by W. Mushed; lat. $34^{\circ} 20^{\prime} \mathrm{N}$. ; lon. $59^{\circ} 20^{\prime} \mathrm{E}$. It has no regular wall, but is surrounded by ummerons orchards, and its pomegranates are remarkable for their goodness. It has no produce or manufactures of consequence, except that of painted tiles, dishes, bowls, \&c., which are in some estimation. Its population, with that of the dependent villages, is estimated at 30,000 to 40,000 .

GUNBY, two pars. Eugland, Lincoln :-1, (St. Nicholas); 930 ac. Pop. 166.-2, (St. Peter); 600 ac. Pop. 53.

GUNDAGAI, a tn. New S. Wales, district of Jachlan, on the river Mnrrmmbidgee, 244 m . S. W. Nidney. Pop. 87.

GUNDAMUK, a walled vil. $\Lambda$ fghanistan, 60 m . E. by N. Cabool; lat. $34^{\circ} 17^{\prime} \mathrm{N}$; lon. $70^{\circ} 5^{\prime} \mathrm{E} . ; 4616 \mathrm{ft}$. abovo
sea-level. Here, during the disastrous attempt to retreat from Cabool, made by the British army, in the beginning of 1842, the last surviving foree, about 100 soldiers and 300 camp followers, were finally overpowered, one man only eseaping.

GUNDAVA, a tn. Beloochistan, cap. prov. Cutch-Gundava; lat. $28^{\circ} 29^{\prime} \mathrm{N}$; lon. $67^{\circ} 32^{\prime} \mathrm{E}$. It is a small place, surrounded by a high mud wall, and built with some degree of regularity. It has little trade.

GUNDELFINGEN, a tn. Bavaria, eirele Swabia, 1. bank Brenz, here crossed by a bridge, 33 m. N.W. Augsburg. It consists of the town proper and a suburb; contains a ehureh, chapel, eastle, and hospital ; and has two annual fairs. P. 2726.

GUNDELSHEIM, a tn. Würtemberg, cirele Neckar, r. bank Neckar, 7 m . N.N.W. Neekarsulm. It is surrounded with walls, and contains a eastle. Pop. 1111.

GUNDERSHAUSEN, a vil. Hesse-Darmstadt, prov. Starkenburg, eircle Dieburg, with a Protestant chureh, and school, tile-works, and a mill. Pop. 782.

GUNDUCK.-1, A large river, Hindoostan, an affluent of the Ganges, rises in Tibet, on the N. side of the celebrated peak of the Himalayas, Dhawalagiri; lat. $29^{\circ} 30^{\prime}$ N.; lon. $82^{\circ} 45^{\prime}$ E.; whence it flows round the E.side of the mountain, and, cutting through the IIimalayan ehain, proceeds S.S.E. to Hajypoor, near Patua; lat. $25^{\circ} 40^{\prime}$ N.; lon. $85^{\circ} 20^{\prime}$ E.; where it falls into the Ganges, after a course of about 350 m . In the bed of the river, in its earlier course, the remains of ammonites are found, and carried to all parts of India, where they are worshipped under the name of Sal-grams.-2, (Little Gunduck), A river, W. from the former, having a S . course of about 90 m ., and falling into the Goggora about 85 m. W.N.W. Hajypoor.- 3, A dist. Hindoostan, Bejapoor, S. of the Kistna, and principally between the forks of the Malpurba river.

GUNDWANA, a former large province, Hindoostan, in the Decean, extending between lat. $18^{\circ}$ and $25^{\circ} \mathrm{N}$., and lon. $77^{\circ} 30^{\prime}$ and $86^{\circ}$ E.; bounded, N. by Allahabad and Malwah, S. by Hyderabad and the N. Cirears, E. by Bahar and Orissa, and W. by Beeder, Berar, and Candeish; between 400 m . and 500 m . long, and about 300 m . broad. It is now partitioned into the states of Nagpoor and Rewah, and some of the S.W. districts of the Bengal presideney. It is one of the least civilized portions of India, the S. and S.E. portions being inhabited by Gonds. See Nagroor.

GUNGA BAL, a small lake, Cashmere, on the Haramuk mountain; lat. $34^{\circ} 25^{\prime} \mathrm{N}$. ; lon. $74^{\circ} 39^{\prime}$ E.; regarded with the deepest veneration by the Hindoos, who perform pilgrimages to its banks, and throw into its waters sueh fragments of bone as remain undestroyed by the fires in which bodies are consumed. This venerated lake is not more than $1 \frac{1}{2} \mathrm{~m}$. long, and 200 or 300 yds. wide.

GUNGOOTRI, Hindoostan. See Gavges.
GUNNUM, an isl. at the entranee of the Persian Gulf, about 4 m . long, and 1 m . broad. It is very rugged, increasing in height towards the $S$. extrenity, near whieh stands a high eonieal lill, between 600 and 700 ft . high: on a small beach at the S. point are a few families of fishermen.

GÜNS, or Küszeghi, a tn. Hungary, eap. co. Eisenburg. finely situated on a mountain slope, above a small stream of same name, 57 m . S.E. Viemna. It has a very eentral position, being nearly equidistant from Vienna, Pressburg, Raab, and Grätz; consists of the town proper, surrounded by a wall, but of small extent, and of a very large suburb; contaiss a Protestant and two R. Catholie churehes, one of them a very handsome building, formerly belonging to the Jesuits; an old castle, a Piarist college and gymnasium, a Protestant high school, a Benedictine monastery, and two hospitals; and has manufaetures of woollen eloth, largely exported to Croatia and Sclavonia, a considerable trade in wine and fruits, partieularly cherries of remarkable size and flavour, two weekly markets, and six annual fairs. Güns aequired great renown in 1532, by the suecessful defence of its citizens, aided by a garrison of only 800 men, against a powerful army of Turks, headed by Sultan Solyman, the Magnificent. Pop. 8000.

GÜ NSTÄDT, a vil. Prussia, prov. Saxony, gov. and 6 m . W. by S. Erfurt; with a Protestant ehureh and an hosnital, several mills, and a much-frequented annual fair. Pop. 1018.

GUNTERSBLUM, a market tn. Hesse-Darmstadt, prov. Rleinhessen, on a small affluent of the Rhine, $11 \mathrm{~m} . \mathrm{N}$. Worm3. It has a Protestant and a R. Catholie parish church,
a synagogue, castle, townhonse, three sehools, and a poorhouse; several distilleries, a gypsum, and two oil mills, and two annual fairs. Pop. 2592.

GUNTERSDORF, a tn. Lower Austria, $24 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Kornenburg. It is entered by four gates; has a large public square an old ehureh, a castle, and two amnual fairs. P. 1500.

GÜNTHERSBERGE, a tn. Germany, Anhalt-Bernburg. in a narrow valley, 17 m. S.S.W. Halberstadt. It is the seat of a court of justice; has a chureh, castle, townhonse, and hospital, and several mills, a trade in wood and cattle, and two annual fairs. Pop. 843.

GUNTHORPE, par. Eng. Norfolk; 1420 ac. Pop. 334.
GUNTON, two pars. England:-1, Norfolk; 1060 ae. Pup. 69.-2, Suffolk; 560 ae. Pop. 77.

GUNTOOR, a tn. Hindoostan, presid. Madras, eap. dist. of same name, one of the N. circars, 150 m . E.S.E. Hyderabad; lat. $16^{\circ} 20^{\circ} \mathrm{N}$. ; lon. $80^{\circ} 32^{\prime} \mathrm{E}$. It is large, but irregularly built, and composed of mean-looking mud houses.The district, bounded N. by the Kistna, E. the bay of Bengal, S. the Pennar, and W. the Nizan's dominions, area, 4960 sq. m., is mountainons towards the interior, but low and muldy towards the sea, yields rice, Indian eorn, and cotton, and has mines whieh once produced diamonds. Pop. 483,831.

GUNTRAMSDORE, a market tn. Lower Austria, on the Schwechat, and on the Vienna railway, 18 m. S. Vienna. It has a castle, manufactures of paper and printed cloth, a bleachf̣ield, tile-works, and stone quarries. Pop. 1150.

GÜNZBURG.-1, (Ober) [anc. Guntia], A market tn. Bavaria, Swabia, cap. dist. of same name, at the souree of the Giinz, 40 m . S.S.W. Augsburg. It is an ancient place, supposed to be of Roman origin; eontains two churehes and a elhapel, and has manufaetures of lineu and hosiery, a trade in horses and cattle, and five annual fairs. Pop. of tu. 1334; dist., area 80 geo. sq. m., $10,276 .-2, \mathbf{A} \mathrm{tn}$. Bavaria, circle Swabia, cap dist. of same name, at the confluence of the Günz with the Danube, with a bridge over each river, 30 m . W. by N. Augsburg. It has old walls, five churches, an ancient eastle, an English female institute, a Latin school, and hospital; manufaetures of carriages, a bleaelfield, and active shipping trade. Pop. tn. 3103; dist., area 96 geo. sq. m., 24,412.

GUNZENHAUSEN, a tn. Bavaria, circle Midale Franeonia, cap. dist. of same name, on the Altmiill, here erossed by a bridge, 28 m . S. W. Nürnberg. It is walled, has three ehurehes, a eastle, Latin school, and hospital, manufaetures of red leather, stoneware, several mills, and a trade in horses and eattle. Near it are the remains of a Roman camp, known by the name of Teufelsmauer. The reformer Osiander was born here. Pop. tn. 2605; dist. 13,197.

GUR (Lough), a small lake, Ireland, co. of, and 10 m . S. by E. Limerick, about 4 m . in circumferenee, and enclosed by lofty hills. It has one island, eontaining about 60 acres, and three or four islets, but is chiefly remarkable for tho extensive Druidical remains with which it is surrounded.

GURDAN DEWAR, a vil. Afghanistan, near the souree of the Helmund; lat. $33^{\circ} 32^{\prime} \mathrm{N}$. ; lon. $69^{\circ} 12^{\prime}$ E. Elevation $10,076 \mathrm{ft}$.

GURDAU, or Kurdau, a vil. Moravia, circle Brunn; with a ehurch, chapel, and school. Pop. 970.

GURDSCHY, a vil. of W. Asia, khanat of, and 65 m. N.N.E. Khiva, near l. bank Amou-Daria. It is supposed to have been founded the latter end of the last eentury by a people who gave it their name, but is now inhabited by Usbeks, Uigurs, and Sarts.

GUREIN [Moravian, Kurzim], a tn. Moravia, eircle of, and 9 m . N. Brumn; with a ehurchi, a castle, and four annual fairs. Pop. 1003.

GURGUEA, a river Brazil, whieh rises in a serra of same name, on the S. frontiers of prov. Piauli, proceeds N. through the W. portion of that province, forming in its course lake Pernagua, passes the town of Jerumenha, and about 16 m . below joins r. bank Parnahiba, after a course of about 190 m . Its eurrent is rapid, and at its junction with the Parnahiba much obstructed with roeks. Its water is said to be unwholesome, and the inhabitants who live upon its banks suffer during the greater part of the year from interinittent fevers. Its principal affluent is the Parahim.

GURHWAL, Gurwal, or Garhwal, a British Himalayan prov., N. Hindoostan, having S.E. and S. prov. Kumaen and Delhi, N. W. the Sutlej, and N.E. the Himalayas; between
lat. $30^{\circ}$ and $32^{\circ} \mathrm{N} . ; \operatorname{lon} .77^{\circ}$ and $80^{\circ} \mathrm{E}$. The entire province consists of an assemblage of hills, some covered with trees and verdure, others perfeetly bare and stony. The valleys are all narrow, often little more than mere water-courses between the hills. Only a small portion of the country is either inhabited or cultivated. In this, and the adjoining province of Kumaon, some of the loftiest peaks of the Himalayas occur. These are not found on a continuous ridge, but are grouped together in masses, that are separated from one another by deep depressions, through which How the streams that drain those parts of the mountains immeliately contigrous to the N. Five or six of these peaks are above 24,000 ft . high, and the number that exceeds $20,000 \mathrm{ft}$. is very great. They are covered with perpetual snow, and present an inconceivably magnificent appearance, especially in November and December, when the perfect serenity of the antumnal air displays the splendid lights and shadows thrown by the setting sun on the wonderful scene. Glaciers also abound annongst them, some of which are of great magnitude.

The climate, in this elevated recion, is extremely various, passing from the intense heat of the plains of Hindoostan, to the rigours of an unceasing winter. The rainy months are June, July, August, and the first half of September. In November and December, the weather is usually perfectly serene; but as the cold increases, the sky again becomes covered with clonds; and the winter rains, which begin about Cliristmas, have their maximum in February, as in the plains below. The power of the sun's rays, at great elevations, is intense in the extreme, forming one of the chief discomforts of the stranger who visits these regions.

The vegetation of Gurhwal, and of the entire region to which it belongs, is, of course, influenced by altitude. The almost entire absence of palins greatly detracts from the beauty of the forests; but this is eompensated by the exquisitely cut foliage of the acacias and moringas, the gracefully drooping clumps of bamboo, the sanl (vatica), with its tall, erect trunk, and brilliant, dark-green leaves, and a number of others equally beautiful and striking. The larger trees are almost entirely restricted to the plains and more level valleys. 'Tropical vegetation prevails to a height of about 4000 ft .; and in the deep sheltered ravines is carried into the heart of the mountains. In the outer part of the latter, one of the great features of the landscape is the Pinus lonyifolia, which clothes the slopes of almost every lill. A bove the height of 4000 ft ., oaks and rhododendrons gradually increase in number. In the upper forest refion, the trces are oaks, pines, yew, elm, horse-chestnut, walnut, several maples, hazel, \&c. These, again, cease rather suddenly at an elevation of 11,500 ft ., and are succeeded by shrubs, including the mountain-ash, rose, barberry, lilac, willow, juniper, \&e. Higher up, a most luxuriant herbaceous vegetation prevails. In this, and the adjoining province of Kumaon and others, the tea plant has bcen cultivated with great success, flourishing even in sitnations where it is oceasionally covered with snow. The quantity of tea grown in these provinces is yearly increasing; but comparatively little has reached this country, as it sells at a very high price on the spot where it is produced; and the inferior qualities are carried across the British frontier, into Tibet, where they meet with the teas of China. The population of Gurhwal, and of the adjoining provinee of Kumaon, mainly consists of Ilindoos; the most important tribe being the Khasiyans, who constitute about nine-tenths of the whole. They are a strictly agricultural people, speaking a IIIndoo dialcet. Besides the Khasiyans, tribes of Tibetan origin, and others of mixed Tibetan and Hindoo race, are found in the N. parts of these provinces.-(Lieut. Straehey, in Jour. Roy. Geo. Soc.; Official Catalogue of the Great Exhilitiou; Oriental Interpretcr, dec.)

GURIA, or Gukiel, a prov. Asia, one-half of whieh belongs to Russia, and the other to Turkey, on the E. shore of the Black Sea; having Mingrelia and Imeretia N., Akhalzik and pash. of Trebizond S. and E., and the Black Sea W.; area about $900 \mathrm{sq} . \mathrm{m}$., chicfly forest; soil very fertile. The inhabitants are chiefly Georgians, with a few Armenians. Pop. about 37,000 .

GURK, a river, Austria, which rises in a deep chasm in Illyria, $9 \mathrm{~m} . \mathrm{S} . E$. Laybach, flows S.E., then almost due E. past Neustailtl and Landstrass, and joins r. bank Save, opposite the town of Ram, after a course of about 50 m .

GURKFELD, or Kersko, a th. Austria, Illyria, on the Save, 49 m . F. Laybach, in a mountainous district. It has a parish church, a Capuehin monastery, and thermal baths. It is supposed to occupy the site of the Roman Noviodunum. Much wine is grown in the district. Pop. 800.

GÜRI,AN, a tn. of W. Asia, khanat of, and 36 m . N.N.E. Khiva, on a canal led off from the Amou-Daria. It is surrounded by dilapidated walls, and lies so low as to suffer much from inundations. It contains three mosques, and is inhabited by Usbeks and Sarts, or Taulschiks, who cultivate the ground, snd carry on some trade. The soil in the environs is fertile, and chiefly laid out in excellent gardens.

GURRACO'T'TA, a th. and fortress, Mindoostan, presid. Bengal, on the Sonar, 109 m. E.N.E. Bhopaul, formerly capital of a petty state, tribntary to Scindia.

GURRAM, a tn. Hindoostan, presid. Bengal, dist. Gur-rah-Mundlah, in a singular pass, 150 m . N.N.E. Nagpoor, and stretehing for 2 m . along the r. bank of the Nerbudda. -The district was ceded to Britain in 1818.

GURRE, a hamlet, Denmark, isl. Seeland, bail. Frederiksborg, on a lake of same name, 1 m . W. Elsineur. The lake, which is about 3 m . long, and rather less than 2 m . broad, has finely wooded banks, on which stand the remains of an old eastle, which, in the 14 th century, was the favourite residence of King Wlademar IV., who, according to a popular legend, still hunts every right in the surrounding forests.

GURSK, an isl. off W. coast of Norway; lat. $62^{\circ} 25^{\prime} \mathrm{N}$.; and lon. $5^{\circ} 35^{\prime} \mathrm{E}$. It is of a tolerably compact, and somewhat cireular shape, and is about 12 m . long by 9 m . broad.

GURUN, a tn. Asiatic Turkey, pash. Karamania, 84 m . E. Kaisariyah; lat. $38^{\circ} 42^{\prime} 10^{\prime \prime} \mathrm{N} . ;$ lon. $37^{\circ} \mathrm{E} . ;$ picturesquely situated on r. bank Tokmah-Su, in a narrow glen of fossil limestone, from 400 to 500 ft . deep. The houses are whitewashed and clean, and there is much appearance of comfort and prosperity. Its merchants trade with Aleppo, Marash, Sivas, and Constantinople.

GURUPA, a tn. Brazil, prov. of, and 205 m . W. Para, r. bank Amazon. It is pleasantly situated, contains a parish church, an hospital, and an old fort, built by the Dutch when in possession of the province; and has brick and tile works. and a trade in eacao, sarsaparilla, and cloves, which are extensively grown in the distriet.

GURUPATUBA, a river Brazil, prov. Para, ealled by the Indians Iriquiriqui. It rises in the N. part of the province, in the serra Tunucucuraque, flows $S$., and joins $l$. bank Amazon, at the town of Montalegre, after a course of about 240 m . The alluviun deposited on the flats along its banks is extremely fertile, and produces a great quantity of rice of superior quality.

GURUIPI [formerly Vera Cruz], a tı. Brazil, prov. Para, 150 m . E.N.E. Para or Belem, on a bay, and at the month of a river of same name. It is a poor, miserable place.-The bix, bounded on the E. by a cape of its own name; lat $1^{\circ} 2^{\prime}$ S.; lon. $45^{\circ} 53^{\prime}$ W. (r.), is 20 m . wide at the entrance, and stretches about 10 m . inland, width pretty equal throughout; it is gradually silting up.-The river rises as the Vincente, about lat. $4^{\circ} \mathrm{S}$., flows N. , and falls into the bay, after a course of about 250 m .

GURUTUBA, a river Brazil, which rises in the serra Branca, prov. Minas-Geraes, about lat. $16^{\circ} 10^{\prime} \mathrm{S} . ;$ lon. $43^{\circ}$ $10^{\prime}$ W.; flows N.N. W., in a valley formed by a serra of its own name; and, after a course of 140 m ., joins r. bank Verile, an affluent of the São Francisco. Its sands are tolerably rich in gold.

GUSPINI, a vil., isl. Sardinia, div. of, and 33 m . N.W. Cagliari, on a mountain slope, at the W. extremity of a large valley. The gardens, both within and around it, give it a very pleasing appearance; honses, for the most part, cmmodious and well built. It has a large parish and two minor ehurches, a primary school, ancient castle; manufactures of woollen and linen eloth, fire-arms, ant various artieles in iron;' and a trade in corn, cattle, and dairy produce. Pop. 3808.

GUSSAGE, two pars. England, Dorset:-1, (All Suint's); 1400 ac. Pop. 390.-2, (St. Michuel); 2650 ac. Pop. 280.

GUSSAGO, a vil. and com. Austrian Italy, prov. of, and 4 m . N.N.W. Breseia, at the foot of the hills which separate the lake of Iseo, from the Val Trompia. It is well built, eontains a parish and two auxiliary churches, and has manufactures of linen and eotton; and a montlly fair. Pop. 3830 .

GUSSING, or Nemeth Ujvar, a tn. Hungary, co. Eisenburg, cap. dist. of same name, on the Czenitze, 12 m. E. Stadtleberg. It is walled, has a dilapidated old castle, with a conspicuous tower; a R. Catholic parish church, a synagogue, and a Franciscan monastery, in which is the burying-vault of Count Batthyany; and has an annnal fair. Pop. 3000 .

GUSSOLA, a vil. and com. Austrian Italy, prov. of, and 18 n . E.S.E. Cremona, in a very fertile district. It contains two parish churches and two chapels, and has a trade in wine. It onee stood close to the Po, but the collection of alluvium caused a change of channel in 1702. Pop. 3523.

GUSTAVIA, a tn . W. Indies, cap. Swedish isl. of St. Bartholomew, on its S.W. coast. It has a safe and well-protected harbour, a castle, and 800 houses.

GUSTEN, a tn. Germany, Anlalt-Köthen, 1. bank Wipper, 26 m . N.W. Halle. It is entered by two gates, contains a church, townhouse, school, and hospital ; and has a mill, brewery, tile-works, and three annual fairs. Pop. 1665.

GUSTENDIL, sanjak and tn. Turkey. See Ghiustendil.
GUSTON, par. Eng. Kent; 1550 ac. Pop. 237.
GÜS'TROW, a tn. Germany, Mecklenburg-Schwerin, circle Wend, cap. bail. of same name, 1 . bank Nebel, 20 m . S. Rostock. It is surrounded by walls, with four gates, and is well built, having many handsome houses. It is the seat of a law court, with extensive jurisdiction; contains a cathedral, with numerous monuments, a fine altar, and good paintings; two other clurches; a palace, an ancient and beautiful structure; a courthouse, townhouse, school, theatre, and infirmary; and has manufactures of tallow and wax candles, soap, and tobacco; tanneries, machine-works, ironfoundry, numerous mills, and several important annual fairs. Pop. 9004 . Area of bail., 154 geo. sq. m., pop. 12,646.

GU'TENSTEIN, two vils. Austria:-1, Illyria, duchy Carinthia, circle and 32 m . E.S.E. Klagenfurt, with a church. Pop. 1200.-2, Lower Austria, 32 m. S.S. W. Vienn,, in a picturesque country, with the ruins of a church built of tuff. It has a market, and near it are several forges, where shovels, axes, nails, chains, \&c. are made. Pop. 500.

GUTERSLOH, a vil. Rhenish Prussia, gov. of. and 35 m . S.S.W. Minden, near the Dalke. It contains a Protestant and a R. Catholic parish church; and has a considerable trade in fine yarn, hams, and a kind of rye-bread, known in Westphalia by the name of pumpernickel. The annual fars, three in number, are very important. Pop. 5114.

GUTHRIE, par. Scot. Forfar; 4000 ac. P. 530.
GU'TSTADT, or Dobre Miasto, a tn. of E. Prussia, gov. of, and 50 m . S. Königsberg, on the Alle. It has a Protestant and two R. Catholic churches; manufactures of woollen and linen cloth ; a distillery, brewery, a trade in linen, yarn, and feathers; and six annual fairs. Pop. 3039.

GU'T'TENTAG, a tn Prussia, prov. Silesia, gov. and 18 m . E. Oppeln. It has a castle, R. Catholic parish church, synagogue, townhouse, school, and hospital; three distilleries, two dye-works, a weekly market, and an annual fair. Pop. 2283.

GÜTZKOW, a tn. Prussia, prov. Pomerania, gov. of, and 27 m . S.S.E. Stralsund, on a small lake, near the Peene, over which there is here a ferry. It has a church; a trade in corn, horses, and cattle; and three annual fairs. Pop. 1245.

GUUTA, a vil., W. Africa, Bondou, 1. bank Falémé; lat. $14^{\circ} 24^{\prime} \mathrm{N}$. ; lon. $12^{\circ} 18^{\prime} \mathrm{W}$. It has a citadel, erected by the sovereign of Bondou, as a palace and retreat to Sambala, king of Kasson.

GUYANA, region, S. America. See Gulana.
GUYANDOT, a river, U. States, Virginia, W. part ; rising in the Flat-top mountains, flowing N. W., and falling into the Ohio, at the village of its name, 28 m. S.S.W. Gallipolis; total course, about 100 m .

GUYANE Franģaise. See Guiana (Frenci).
GUYENNE, prov. France. See Guienne.
GUYTING, two pars. England, Gloucester - - 1, (Power or Lower); 3380 ac. Pop. $672 .-2$, (Temple); 6180 ac. P. 523. GUZEL-IIIssar, a tn. Asiatic Turkey. See Aidin.
GUZERAT, Hindoostan. See Gujerat.
GWA, or GoA, an isl. Burmah, W. coast ; lat. $17^{\circ} 33^{\prime}$ N.; lon. $94^{\circ} 34^{\prime} \mathrm{E} . ; 1 \frac{1}{2} \mathrm{~m}$. from the shore. It is of moderate
height; and there is, N.E. of it, a harbour for small vessels, at the $S$. part of which is the entrance of the small river of same name, on which is Gwa Town, built with bamboos and mats; with a cultivated country around.

GWADEL (CAPE, or RAS Noo), a headland or peninsula, Beloochistan ; lat. $25^{\circ} 4^{\prime} \mathrm{N}$. ; lon. $62^{\circ} 15^{\prime} \mathrm{E}$. (n.) It is of moderate height, and 6 m . in length. On the W. side of this promontory is an inlet, called West Bay-the promontory of Ras Pishk forming its W . boundary; it is about 9 m . wide, and nearly the same length inland, with regular soundings of 8 to 7 fathoms at the entrance, and 6 to 4 fathoms inside. On the $\mathbf{E}$. side of Cape Gwadel is another inlet, sometimes called G wadel Bay, in which there is a small town of the same name.

GWAENYSGOR, par. Wales. Flint; 792 ac. Pop. 355.
GWALIOR, a state, IIindoostan. See Scindia's Dominions.

GWALIOR, or GUALIor, a city and fortress, IIindoostan, cap. Gwalior, or Scindia's dominions, 68 m . S. Agra; lat. $26^{5}$ $18^{\prime} \mathrm{N}$. ; lon. $78^{\circ} 5^{\prime} \mathrm{E}$. The city stands at the foot of the lofty mass of rock on which the fortress is situated. It is not walled; but at the entrances of the parallel streets, which run up to the side of the rocky liill, are stone gateways, with strong gates, affording a short means of defence against an irregular attack. The houses are built with stone, of which the neighbourhood affords an abundant supply. The general appearance of the streets is somewhat mean, and the public buildings are not distinguisled for architectural beauty. Trees are intermixed among the houses and minarets, as is usual in Indian towns.-The fortress is the largest, the

THE FORTRESS OF GWALIUR, trom the N. W.-From Hodge's Select Views in India.
strongest, and the most magnificent in India. It stands high above the city, on the suminit of a rocky hill, which rises precipitously from the plain, and is perfectly isolated. The entire height is about 350 ft ; and the upper part, which is about 200 ft . high, is nearly perpendicular. The area at the top is nearly level, and is covered with numerous buildings, and with cultivated ground. It contains wells and reservoirs of water, and is inaccessible, excepting by steps up the side of the rock. Formidable, and all but impregnable, as this fortress is, it was taken, in 1780, by a British officer, Major Bruce, at the head of a small party of sepoys, who scaled the rock in the darkness.of night, by means of ladders, leapt the walls, and drove the garrison, composed of Malirattas, out of the fortress.

GWEEDORE, or Guidore, a district and bay, N.W. coast of Ireland, co. Donegal, the latter in lat. $55^{\circ} 3^{\prime} \mathrm{N}$. ; lon. $8^{\circ} 23^{\prime} \mathrm{W}$ The district extends for some miles along the coast, and the scenery is of the wildest description. The coast is studded with numerous little islands, and lined with bold headlands and precipitous cliffs, against which, in stormy weather, the sea breaks with tremendous violence. In 1838, a considerable portion of this district became, by purchase, the property of Lord George A. Hill. Previous to this period, the condition of the peasantry was most deplorable. They were clothed in rags, nost of them without either shoes
or stockings; and whole families had but one bed, generally of straw or dried rusbes, amongst them. Their houses, furniture, agricultural implements, modes of working, stock, \&c., were of the most miserable and rude description. All this is now changed, through the benevolent exertions of Lord Hill. The land has been more equally and judiciously divided; improved agricultural implements and breeds of cattle introduced; roads have been formed; bridges, mills, and stores built; and markets for corn established. The miserable hovels of former times have given place to neat and substantial cettages, with whitewashed walls and well-thatched roofs, clean and orderly within, with comfortable beds and bedding, and other suitable furniture; and the rags of the peasant have been replaced by decent clothing. The socks, stockings, blankets, flamels, and bed-ticking, made in Gweedore, are now amongst the best manufactured in Ireland; while the quantity produced is most creditable to the industry of the female population of that district. According to the report (1848) of the judges appointed to award the premiums given by the Irish peasantry society, the butter made in the district has been also greatly improved, being now equal to any to be seen in the neighbouring market towns.-(Facts from Gweedore, de.)

GWEEK, a maritime vil. England, co. Cornwall, near Helston. The pilelard fishery is here carried on, and copper ore, corn, and oysters, are experted.

GWEN-DDWR (N. and S.), par. Wales, Brecon. P. 522.
GWENNAP, par. Eng. Cornwall; 7940 ac.; containing the most productive mines in the county. Pop. 10,794.

GWERNESNEY, par. Eng. Monnenth; 630 ac. P. 55.
GWETTER, a maritime vil. Beloochistan, prov. Mekran, hay of same name; lat. $25^{\circ} 15^{\prime} \mathrm{N}$. ; len. $61^{\circ} 25^{\prime} \mathrm{E}$.--The may is 15 m . wide at the entrance, with about C fathoms' water, and extends inland 9 m ., depth 2 fathoms close to the shore.

GWYTHERIN, par. Wales, Denbigh. Pop. 403.
GY, a tn. France, dep. Haute-Saône, 21 m . W.S.W. Vesoul. It is built on a slope, amid large vineyards, and is a neat and thriving place; with a manufactory of druggets, cottons, \&c.; and some dyeworks and tanneries. Pop. 2460.

GYALA (O-), a vil. Hungary, co. and 8 m . N.E. Komorn, on the Zsitva. It contains two castles, a Protestant and a R. Catholic parish church, and a synagogue; and has an active trade in cattle. Pop. 1610.

GYALU, or Julia, a market tn. Austria, Transylvania, co. and 10 m . W. Klausenburg, on the Szamos. It has a l'rotestant and a Greek united parish church, and the ruins of an old castle. Near it are saline springs. Pop. 1400.

GYAN, several places, Hungary; particularly-1, (KöteGyan), a vil. Thither Theiss, co. Bihar, 10 m . from Szalonta, on the Gyepes; with a Protestant church. Pop. 1620.-2, (Mezo-Gyan), a vil. near the former. Pop. 1000.

GYANTHA, or Zsinta, a vil. Hungary, Thither Theiss, co. Bihar, about 7 m . from Szalonta, on the Black Körös; with a Protestant and a Greek non-united church. Pop. 1166.

GYARMATH, numerous places, Hungary; particularly1, (Gyarmath-Balassa). See Balassa-Gyarmath.-2, (FejerGyarmath), a market tn. Thither Theiss, co. Szathmar, 21 m . S. Kaszony; with a Protestant and a R. Catholic church. Pop. 1900-3, (Fekete-Gyarmath), a vil. Thither Theiss, co. Arad, on the Black Körös, close to Nagy-Zerend; with a Protestant church. Pop. 950.-4, (Füzes-Gyarmath), a vil. Thither Danube, co. Henth, 8 m . from Leva; with a Protestant and a R. Catholic church, and a flour-mill. Pop. 880. -5, (Füzes-Gyarmath), a vil. Hungary, Thither Theiss, co. Bekes, on the Beretto, 35 m . S.W. Debreczin; with a Protestant churel. Tobacco is extensively grown in the district. Pop. 4070.-6, (Köhid-Gyarmath), a vil. Thither Danube, co. Gran, 2 m . from Kemend; with a parish church. Pop. 840.

GYEKENYES, a vil. Hungary, Thither Danube, co. Sumegh, in a hilly district, 4 m . from Zakany. It contains a P'rotestant and a R. Catholic church. Pop. 1377.
Vol. I.

GYERGYO-Szent-Miklos, a vil. Austria, Transylvania, in a beautiful valley on the small stream Bekeny, 97 m . E. Klausenburg. It has a handsome Greek united church; and is inhabited ciniefly by soldiers belonging to the Szekler military frontier, but partly, also, by Walachians and Armenians. The latter make various articles in wood and leather. P. 5071.

G YERMEL, a vil. Hungary, Hither Danube, co. Komorn, about 12 m . from Tata, in a mountainous district. It has a Protestant and two R. Catholic churcbes, and some trade in wine. Pop. 1098.

GYFFIN, par. Wales, Carnarvon. Pop. 635.
GYIRES, a vil. Hungary, 'Thither Theiss, co. Bihar, on the Körös, about 8 m . from Grosswardein; with a Greek non-united parish church. Pop. 900.

GYOMA, a vil. Hungary, Hither Theiss, co. Bekes, in a plain on the Körös, here crossed by a bridgc. It contains a Protestant church.

GYON, a vil. Hungary, IIther Danube, co. Pesth, about 8 m . from Inares; with a l'rotestant parish church. It is inhabite! chiefly by Slowaks and Jews. P'op. 2040.

GYÖNGYOS, a market tn. Hungary, Thither Theiss, co. and $21 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Heves, romantically situated at the foot of Mount Matra. It is well built, contains a fine castle belonging to Count Orczy, with fine gardens, and an interesting collection of armour; four R. Catholic churches, a townhouse, gymnasium, and Franciscan monastery; and has extensive manufactures of woollen stuffs, several tanneries, an active trade in cattle and chcese, several well-frequented fairs, numerous mills, and a bathing establishment erected over chalybeate springs. There are alum works in the neighbourhood. Pop. (1846), 15,000 .
GYOR, several places, Hungary; particularly-1, (DicsGyor). See Dios.-2, (Kis-Gyor), a vil. Hungary, Hither Theiss, co. Borsod, dist. Erlau, 4 m . from Harsany; with a Protestant parish church. Pop. 1615.-3, (Gyor-Falva or Gergesdorf), a vil. Transylvania, co. and 6 m . from Klausenburg, on the little Szamos, and the side of a large furest. It has a Protestant, R. Catholic, and Greek united church. P.900.

GYÖRGY, numerous places, Hungary.-1, (Bar-SzentGyörgy), a vil. Hither Danube, co. and 9 m . N.N.E. Pressburg. It stands in a mountainous district, and has a parish church. Pop. 3179.-2, (Duna-Szent-György), a vil. Thither Danube, co. Tolna, about 4 m . from Paks. It contains a Protestant church. Pop. 1745.-3, (Felso-Szent-György), a vil. Hither Danube, in the Jazyger-Land, on the Jazyga. It contains a Protestant and a R. Catholic church. Pop. 1485.-4, ( $I_{s z k a}$ -Szent-György), a vil. Thither Danube, co. and 4 m . from Stuhlweissenburg, on the side of a mountain. It contains a I'rotestant and a R. Catholic church. Pop. 1150.-5, (Mezo-Szent-György), Szent-Györyy-Mezeje, or Georgenfeld, a market tn ., co. and so near Gran as only to be one of its suburbs. P'op. 1853.-6, (Sepsi-Szent-György, or Gergesmarkt), a market tn. Transylvania, Nzekler Stuhl, r. bank Aluta, 16 in . N.N.E. Kronstadt. It is the head-quarters of a Szekler regiment, and has a Protestant and a Greek non-united church. Pop. 2000.

GYÖRK, several places, Hungary ; particularly-1, (Heviz-Györk), a vil. Hither Danube, co. Pesth, 4 m . from Bagh; with a Protestant parish church. Pop. 1255.2, (Vamos-Györk), a vil. Hungary, Hither Theiss, co. Heves, dist. and 4 m . from Gyöngyös; with a R. Catholic parish church. . Pop. 1100.

GYÖRKÖNY, a vil. Hungary, Thither Dannbe, co.Tolna, 4 m . from Paks; with a Protestant church. Pop. 1418.

GYOROK, several places, Hungary ; particularly-1, a market tn . Thither Theiss, co. and 12 m . E. Arad. It contains a Protestant and a Greek non-united church. Pop. 1590.-2, (Szollös-Gyürük), a narket tu. Hungary, Thither Danube, co. Sumegh, on a slope surrounded by hills, near 1. bank lake Balaten, 103 m. S.W. Pesth. It contains a R. Catholic parish chureh. Pop. 1660.

GYSWYL, a vil. Switzerland, can. Unterwalden, 5 m . S.S.W. Sarnen. Near it a small lake was drained during last century, and rendered arable; at the same time much improving the salubrity of the locality. The neat church is in a lofty and conspicuous position. Pop. 1324.

GYUla (Magyar and Nemetit), a market tn. Hungary, co. and 12 m . S.E. Bekes, on the Körös, which is here navigable, and traverses a plain between vineyards and morasses. It consists of two distinct villages, on opposite sides of the
river; has a Protestant, a Greek united, and Greek non-united church, a castle, and court-house; a trade in salt, cattle, and wine, which is extensively grown in the district. The climate is said to be somewhat unhealthy. Pop. (1846), 14,700.

GYULAFALVA, or Gyülesty, a vil. Hungary, Thither Theiss, co. Marmaros, in a tolerably fertile district on the

Mara, 9 m . from Szigeth. It contains a Greek church, and the ruins of an old monastery. Pop. 1070.

GYULAJ, a vil. Hungary, Thither Theiss, co. Szabolez, on the boundary of co. Szalthmar, circle of Bathor, and 3 m . distant from Nyir-Bathor. It contains a Protestant and a Greek church. Pop. 1299.

## [ $I$ is sometimes used interchangeably with $G$.]

IIAAG.-1, A market tn . Upper Bavaria, 27 m. E.N.E. Munich; with a parish church, castle, and hospital. Pop. 870.-2, A market tn. Upper Austria, in a gorge of the Hausrïck mountains, 31 m . W.S.W. Linz. It contains a church, parsonage, and school-house. Pop. 1977.

HAAKSBERGEN, a vil. Holland, prov. Overijssel, 25 m. E. by S. Deventer. It has a neat Calvinistic and a R. Catholic church; a synagogue, and a school. Pop., agricultural, 1408.

HAAMSTEDE, a vil. Holland, prov. Zeeland, isl. Schouwen, 8 m. S.W. Brouwershaven. It is one of the prettiest places in the island; its streets are heautifully lined with trees; and it has a Calvinistic church, a school, an old castle, and an annual fair. Pop. 704.

HAAREN, a vil. Holland, prov. N. Brabant, 7 m. S.W. Hertogenbosch; with a R. Catholic church and seminary; and an annual fair. Inhabitants engaged in agriculture and fruit-growing. Pop. 1492.-2, A vil. Hanover, prov. Osnabrïck, bail. and 6 m . S.E. Meppen; with a custom-house, court-house; and a good deal of shipping. Pop. 2030.3, A vil., Rhenish-Prussia, gov. and circle Aix-la-Chapelle; with a parish church, an annual fair, and lead mines. P. 1071.

HaARLEM, or Harlem [Latin, Harlemum], a tn. Holland, prov. N. Holland, 10 m. W. Amsterdam, on the railway thence to Rotterdam; and intersected by the Spaarne, which flows from Lake Haarlem to the IJ ; and along which a considerable traffic is maintained. The town is well and regularly built; kept clean, and lighted with gas; part of its old fortifications, and some of the ten gates it formerly had, are still to be seen; and the ramparts, being well planted, afford agreeable walks. It has broad streets, traversed by canals, crossed by numerous bridges. The principal streets open into the Grootemarkt [Great market], the largest of the numerous market-places of the town, and in which stand the townhall, an old edifice, containing a collection of good portraits of the counts of Holland; the church of St. Bavon, the finest in Haarlem-containing the celebrated organ, long reputed the largest and finest in existence; but now exceeded in size by the organs of Birmingham and York, and rivalled, if not excelled, in tone and power, by Mooser's organ in Fribourg-and the honse and statue of Laurens Janszoon Coster, whom Dutchmen claim to be the inventor of movable types. The Prinsenhof, in which the Estates of N. Holland meet, is an old building behind the townhall; but neither it nor any of the other buildings of Haarlem present peculiar architectural features. There are four Calvinistic, six R. Catholic, and five Baptist churches, a Remonstrant, an Evangelical Lutheran, and a synagogue. The hospitals for the aged, the poor, the infirm, and the sick, and other benevolent institutions, are numerous; and there are a gymnasium, Latin school, normal school for teachers, commercial, industrial, charity, town, and other schools; several literary and scientific societies, with associations for music and art; Teyler's institution for the promotion of learning, with a museum of natural history, and a collection of works of art; a town library, and a gallery of the works of modern artists.
Haarlem was at one time famous for its cotton manufactures, and for its bleacheries; linen from various quarters, even from Silesia, being sent here to be bleached, and subsequently sold under the name of Holland. Along with its population, now not much more than half what it once was, the manufactures have greatly fallen off; still there are here some flourishing cotton factories, several ribbon factories and
bleacheries, a letter foundry, somewhat celebrated for its Hebrew and Greek types; and ship-building, rope-making, and the manufacture of salt, soap, beer, vinegar, Bremengreen, \&c., are carried on; and there are saw, mustard, malt, and corn-mills. Haarlem is also the great mart for bulbous roots, especially hyacinths, tulips, and onions, which are extensively cultivated in the outskirts, and sent to all parts of Europe. There are six annual fairs-chiefly for horses and pigs.

In 1573 it capitulated, after a seven months' siege, to the Spaniards, under Alva, who, in the contest, lost 10,000 men. Contrary to the terms of the surrender, Alva caused upwards of 2000 persons-including the Protestant ministers, the garrison, and many of the citizens, to be put to death. It is the birth-place of the lexicographer, Dirk Schrevel (Schrevelius) ; and the painters Ostade, Jan Weenix, the Wouvermans, E. Van der Velde, Berchem, Van der Helst, Ruisdael, Pieter van Loo, \&c. Pop. (1850), 25,778.-(Van der Aa.)

HAARLEM (Lake of) [Dutch, Haarlemmermeer], an extensive shallow sheet of water, Holland, adjoining and communicating with the IJ, between Haarlem and Amsterdam, about 12 m . long, by 7 m . broad. Previously to the 15th century it can scarcely be said to have existed, excepting that the spot now in its centre, was then a marsh of considerable extent. Towards the end of the 16 th century, it greatly increased in size, by the sudden union of four small lakes, previously at some distance from each other. It subsequently increased still more; and its further encroachments were only restrained by strong dykes, maintained at great expense. Its shores are studded with villas, and its waters with boats. It is only 14 ft . deep- 6 ft . of water, and 8 ft . of mud-the alluvial debris of the Swiss mountains brought down by the Rhine, whence durable bricks, called clinkers, are made. The States-General of Holland having sanctioned a plan for draining the lake, three large steam-engines were made in England, and erected for the purpose of pumping ont the water; and so efficiently do they work, that the Lake of Haarlem may soon be expected to be reduced to its original limits; and upwards of 45,000 acres of excellent arable and pasture land thus be added to the country.

HAASE, or Hase [Latin, Hasa], a river, Germany, which rises in the Teutoburger forest, in the S. of Hanover, 10 m . S.E. Osnabrück, passes that town, and flows N. to Quackenbrück, near the frontiers of Oldenburg, when it turns W., and joins r. bank Ems, at the town of Meppen, after a course of about 100 m . A canal, cut from Quackenbriuck to Haseliume, has cut off a very circuitous part of its course, and considerably inproved its navigation.

HAASTRECHT, a vil. Holland, prov. S. Holland, on the Ijssel, 2 m . E. Gouda; with an elegant townhall, a Calvinistic and a R. Catholic church, a school, and a noted horse fair. Pop. 784.

HABA (La), a tn. Spain, Estremadura, prov. of, and about 55 m . from Badajoz, on a height. It is poorly built; and has very irregular, winding, and ill-paved streets; a parish church and townhouse ; manufactures of linen and baize; and numerous flour-mills. Pop. 2298.

HABAY, two places, Belgium.-1, (-la-Neuve), A vil. and com., prov. Luxembourg, on the Rulles, 10 m . W. Arlon. It has blast-furnaces and other iron-works; two breweries, a weekly market, and two annual fairs. Pop. 1595.-2, (-laVieille), A vil. and com. near the former ; with a blast-furnace and two flour-mills. Pop. 1030.

HABBERLEY, par. Eng. Salop; 1110 ac. Pop. 125.

HABELSCHWERDT, a tn. Prussia, prov. Silesia, gov. of, and 60 m . S.S.W. Breslau, eap. circle of same name, on a height, between the Neisse and Weistritz, at their confluence. It is walled, defended by three forts, and entered by three gates. It has a court of law and several public offices; a lrotestant and a R. Catholic church, an hospital, and a courthouse ; manufactures of tobacco and starch; tile-works, several mills, stone quarries, a trade in flax, a weckly market, and four annual fairs. Pop. 3004.-The clincle ; area, 230 geo. sq. m. Pop. 48,189.

HABERGHAM-EAVEs, a manufacturing township, England, co. Lancaster, 2 m . S. W. Burnley, containing numerous cotton-mills, several extensive print-works, and valuable coalmines. Pop. 85:6.

HABELN, or Mabr [Latin, Mons Fagi], a tn. Bohemia, cirele and 10 m . S.S.E. Czaslau, on the Little Sazawa; with a castle, parish church, synagogue, townhouse, school, and hospital; three mills, a trade in cattle, and monthly fairs. P. 1956.

HABESII. See Abyssinia.
HABROUGH, par. Eng. Lincoln; 1570 ac. Pop. 334.
HABROWA (Unter), a vil. Bohemia, circle Königgrätz, on the small river Kniezna; with manufactures of cloth, a saw and a flour mill. Pop. 1023.

HABSAL, or Ifapzal, a scaport tn. Russia, gov. Esthonia, eap. circle of same name, on the Baltic, 54 m . S.W. Revel. It consists of wooden houses; has a Lutheran chureh, two schools, and the ruins of an ancient eathedral; two large anual fairs; and a harbour, at whieh the principal exports are eorn, flax, wax, and jnniper-berries; imports, salt, wine, eolonial produce, \&e. Pop. ( 1851 ), 2042.--The cirche is flat throughout ; and grows considerable quantities of corn, beans, flax, and hops. Area, 1039 goc. sq. m. Pop. 66,000.

HABSBURG, or Hapsburg, a vil. Switzerland, can. Aargau, dist. of, and 4 m. S.W. Brugg, remarkable as possessing, in its old castle, the cradle of the house of Austria. The only part of the original building now remaining is a square kcep, about 70 ft . high. It stands on a hill, and commands a picturesque and interesting view, not very extensive, but large enough to take in more than all the original domains of a family destined to occupy so conspicuous a place among the dynastics of Europe.

IIACCOMBE, par. Eng. Devon; 290 ac. Pop. 14.
HACCONBY, or Hackenby, par. Eng. Lincoln; 3220 ac. Pop. 406.

HACCOUPT, a vil. and com. Belgium, prov. of, and 7 m. N.N.W. Liége, on the great Aaz; with a brewery and flour-mill. Pop. (agricultural), 1409.

HACEBY, par. Eng. Lincoln; 730 ac. Pop. 64.
IIACHA (La), or Rio-de-ha-Macha, a tn. and small seaport, New Granada, dep. Magdalena, cap. prov. Hacha, and at the embouchure of river of same name, 90 m . E.N. F. Santa Martha; lat. $11^{\circ} 33^{\prime} \mathrm{N}$. ; lon. $72^{\circ} 52^{\prime} 30^{\prime \prime} \mathrm{W}$. The Town, situated on the open coast, lies low, and requires to be approaehed with caution, on account of sandbanks. It has some trade, chicfly with France, in exporting red-wood and fustic.-The river, at one time celebrated for its pearl fisheries, rises in the Sierra-de-Santa-Martha, and enters the Caribbcan Sea at the above town, atter a course of abont 100 m .

HACHENBURG, a tn. Germany, Nassan, cap. bail. of same name, on the Westerwald, 24 m . W.N.W. Weilburg. lt is walled; has a castle, a Protestant and a R. Catholic church, a superior school, and manufactures of linen, red leather, pipe tops, and tobacco. Pop. 1468. Area of bail. 57 geo. sq. m. Pop. 11,754.

IIACHESTON, par. Eng. Suffolk; 1780 ac. Pop. 518.
HACHY, a vil. and com. Belgium, prov. Luxembourg, 7 m . W. Arlon. It has a limestone quarry and limekilns; an oil and a flour mill. Pop. 1839.

HACKENSACK, a vil., U. States, New Jersey, on river of same name, 12 m . N. by W. New York. It has a courthouse, county offices, three churches, and two academies. Pop. about 1000 .-The river, after a S. course of about 40 m. , falls into Newark bay.

HACKETSTOWN, a small market tn. and par. Ireland, cos. Carlow and Wicklow. The rown, on an clevated position, 16 m . E. by N. Carlow, has a neat parish church, R. Catholic ehapel, Methodist meeting-house, two free schools; and a trade in corn and potatoes. Market on Thursday. Pop. 1021. Area of par., $11,618 \mathrm{ac}$. Pop. 5242.

IIACKFORD, two pars. Eng. Norf $s l k:-1,820$ ac. Pop. 264.-2, (-by-Reepham), 820 ac. Pop. 694.

HACKING (Port), a beantiful harbour, New S. Wales, 18 m . S. Port Jackson; lat. $34^{\circ} 4^{\prime} \mathrm{S} . ;$ lon. $151^{\circ} 17^{\prime} \mathrm{E}$.

HACKINGTON, par. Eng. Kent; 1190 ac. Pop. 506.
HACKMYS, par. Irel. Cork and Limerick; 2312 ac. Pop. 507.

HA(KNESS, par. Eng. York (N. Riding); 12,730 ac. Pop. 714.

HACKNESS (CAPE), a headland, Scotland, co. Orkney, on the S.E. coast of isl. Shapinshay.

HACKNEY, a tn. and par. England, co. Middlesex, $2 \frac{1}{2} \mathrm{~m}$. N. by E. London, of which it forms a suburb. The streets are, in gencral, straight, well paved, elean, and lighted with gas; and houses substantial and commodious; supply of water plentiful. There are two Episcopalian churches, several chapels of ease, and places of worship bclonging to various denominations of Dissenters-the greater part of which are large and handsome. The churchyard is spacious, and so tastefully laid out as to form one of the most pleasing parochial cemetcrics near London. There are several parochial, British, and infant schools; a Church of England school, in connection with King's College, London; a theological seminary, and a literary and seientific institution, at which lectures are delivered by the most eminent professors. The London orphan asylum, instituted 1813 , and erected 1823, contains about 400 children of both sexcs. There are also numerous almshouses, and other useful charities. The extensive silk-mills, formerly existing here, have long been discontinued; and the place is not so much the seat of manufactures of any kind, as the residence of gentlemen engaged in business in London. The environs of Hackney are extremely pleasant, being chiefly occupied by well-laid-out nursery grounds and market gardens. Sir Kalph Sadler, a distinguished statesman of the 16 th century, and Howard, the philanthropist, are said to have bcen natives of the parish. Pop. (1841), 37,771.-(Local Correspondent.)

HACTHORN, par. Eng. Lincoln ; 2890 ac. Pop. 246.
HAD (Ras el), or Rasalaett, a prominent headland or cape, Arabia, S.E. coast ; lat. $22^{\circ} 33^{\prime}$ N. ; lon. $59^{\circ} 55^{\prime}$ E. (r.) The mountains overlooking this promontory, called Jebel Huther, or Green Mountains, are uneven, about 6000 ft . high; and may be seen 60 m . in elear weather.

HADAMAR, a tn. Germany, Nassau, cap. bail. of same name, on the Els, 6 m . N.N.W. Limburg. It is walled; has a Protestant and a R. Catholic parish ehurch, a pædagogium, and lying-in-hospital ; manufactures of tobacco, and an ironmill. Pop. 2184. Area of bail. 43 geo. sq. m. Pop. 18,127.

HADDAM, a vil. and township, U. States, Connecticut, 23 m. S.E. IIartford; with a courthouse, a jail, a Congregational chureh, and an academy. Pop. 2599.

HADDEBY, IIEthäby, or Heideno, a vil. Denmark, Schleswig, on the Schlei, opposite the town of Schleswig. Its original church was the earliest founded in Denmark; the archbishop Ansgarius, surnamed the Apostle of the N., having here had a small chapel, in the beginning of the ninth eentury. The present elinreh, composed of unhewn field stones or boulders, was built early in the 13 th century.

HADDENIIAM, two pars. Eng.:-1, Bucks; 3150 ac. Pop. 1545.-2, Cambridge; 9530 ac. Pop. 2103.

HADDINGTON, or EAst Lothinn, a maritime co. Scotland, bounded, N. and N.W. by the Firth of Forth, N.E. and E. by the North Sea, S. by Berwick, and S.W. by Edinburghshire ; about 27 m . long, E. to W.; greatest breadth, 15 m. ; area, $174,080 \mathrm{ac}$., of which about four-fiftlis are arable, or fit for eultivation. The surface rises gently, though not uniformly, from the coast, towards the Lammermuir hills, which form its S. boundary. It is watered by the Tyne, which divides the county, S.W. to N.E., into two nearly equal portions; there are several other streams of less size. The old red sandstone forms a considerable portion of this county, generally resting upon transition rocks, covered by the coal formation. The Lammernuir range, 500 to 1700 ft . high, is composed ehiefly of granwacke, with nearly vertical strata. Coal, limestone, clay-ironstone, clay, and sand-stone-the former suitable for brick-making, and the latter for building-abound; and there are several whin quarries, producing excellent material for road-making. The elimate, though liealthy, is so extremely various, that harvest is somo-
times nearly a month later in one part of the county than another. Haddingtonshire is an entirely agricultural district, in the strictest sense of the word; and has been long celebrated for the skill and success with which its husbandry has been conducted. Along the coast, the soil is a rich, light, reddish loam; it gradually varies to clay towards the upper districts; and its general character is that of a clay bottom. The lower grounds are not surpassed, in point of productiveness, by many places in the kingdom. The principal crop is wheat. Potatoes, also, are extensively cultivated; and turnips attain a perfection here which they reach nowhere else in the United Kingdom. Sheep are bred, but not to any great extent, particularly on the Lammermuir hills; the greater proportion being Cheviots. Few cattle are reared; but fattening stock of all descriptions constitutes a regular part of the economy of every well-conducted farm. Farm buildings, generally, extensive and commodious; and implements of the most improved description. The average size of farms is about 250 ac ., almost universally let on lease for 19 and 21 years. With exception of some considerable distilleries, there are few manufactures of any importance. The county sends a member to Parliament. Registered electors (1851), 716. Pop. (1841), 27,890; (1851), 36,386.

HADDINGTON, a parl. and royal bor. and market tn., Scotland, eap. of above co., on a branch of the N. British railway, 17 m. E. by N. Edinburgh, on the Tyne, by which it is separated from the suburb of Nongate, the communication being maintained by a bridge of four arches. The town consists of four streets, which intersect each other nearly at right angles; lighted with gas; and lined with handsome and well-stocked shops. It has a townhouse, a fine structure, with a spire 150 ft . high; and handsome county buildings, a venerable Gothic parish church of the 13 th or 14 th century, surmounted by a square tower, 90 ft . high; a new parish church, called St. John's, an elegant Gothic edifice; a Free, and two U. Presbyterian churches, an Episcopal chapel, a congregation of Old Light Seceders, an Independent, and a Methodist chapel. The educational institutions are a grammar school, a burgh, a parochial, and several private and Sunday schools. There are other four public libraries, several religious and benevolent societies, and an agricultural and horticultural society.

The chief trade of Haddington arises from its corn-market, held on Fridays-the most important in Scotland, with exception of Dalkeith. There is also some trade in wool. Near it are three distilleries, and three breweries; some considerable iron foundries, tannerics, corn-mills, \&c.

Haddington was the birtlı-place of Alexander II., King of Scotland. It unites with N. Berwick, Dunbar, Lauder, and Jedburgh, in sending a member to the House of Commons. Pop. (1841), 2786 ; (1851), 3883.

HADDISCOE, par. Eng. Norfolk; 2180 ac. Pop. 424.
HADDON, three pars. Eng.:-1, Huntingdon ; 1240 ac. Pop. 121.-2, (East), Northampton; 2990 ac. Pop. 616.3, (West), Northampton; 2900 ac. Pop. 1013.

HADERSLEBEN [Danish, Haderslev], a tn. Denmark, duchy of, and 52 m . N. Schleswig, cap. bail. of same name, in a valley, where the Hadersleben Damm communicates by a small stream with the Hadersleben Fiord, in the Little Belt. It consists of an old and a new town ; contains a parish church in which Danish, and another handsome church in which German is preached; a courthouse, normal school, and wellendowed hospital ; and has several breweries and distilleries; and a trade in corn, spirits, and cheese. The harbonr, at present, is only a winter liaven, of the fifth class, with 7 ft . water; but operations have been commenced to deepen both it and the fiord. The outer harbour is at the custom-liouse of Stevelt. Pop. 6100.-The bail. is the largest and most N. in the duchy. Area, 584 geo. sq. m. Pop. 46,500 .

HADHAM, two pars. Eng. Hertford:-1, (Little); 3070 ac. Pop. 890.-2, (Much) ; 4350 ac. Pop. 1318.

HADHAZ, a tn. Hungary, Thither Theiss, co. Szabolcz, $11 \mathrm{~m} . \mathrm{N}$. Debreczin. It is a privileged town of the IIaiducks; stands in a district which, though scantily wooded, is fertile, producing much corn and rearing many cattle; and contains both a Protestant and a R. Catholic church. Pop. 3700.

HADISAH, or Hadirir, an isl., Asiatic Turkey, pash. of, and 130 m . N.W. Bagdad, in the Euphrates. It contains a town, composed of about 400 houses, built on the ruins of
the ancient Hadith. The river is here about 300 yards wide, and 18 ft . deep. In the season of floods, the current runs at the rate of 4 m . an hour.-(Chesney.)

HADJYPOOR, or Hajeepoor.- 1 , A tn. Hindoostan, presid. Bengal, prov. Bahar, l. bank Ganges, at the confluence of the Gunduck with the latter river, and nearly opposite Patna; lat. $25^{\circ} 41^{\prime}$ N. ; lon. $85^{\circ} 21^{\prime}$ E. Saltpetre is manufactured in the vicinity in large quantities. Hadjypoor is noted also for its annual horse fair, on which occasion thousands of IIindoos wash away their sins at the junction of the waters.-2, A vil. Punjab, l. bank Chenab, 18 m . from its confluence with the Gara, and 42 m . W. Mooltan ; lat. $29^{\circ} 36^{\prime}$ N. ; lon. $71^{\circ} 12^{\prime}$ E.

HADLEIGH, a market tn. and par. England, co. Suffolk. The town, on the Brett, 8 m . W. Ipswich, is a station on the Hadleigh branch of the Eastern Counties railway. It consists of one principal street, and a number of smaller ones diverging from it; lighted with gas, and well supplied with water; houses mostly of an antique appearance, many of them presenting curious specimens of old domestic architecture, though several modern erections have recently been built. It has a large and handsome church, chiefly in the later English style, with an elegant tower and spire; chapels for Baptists, Independents, and Primitive Methodists; a national, and British, and several other schools. The woollen trade, formerly carried on to a considerable extent, has long since declined. There is a large silk-factory, and a considerable business is doue in malt; but the inhabitants, generally, are employed in agricultural labour. Market day, Monday; three fairs annually. On Oldham common, in the vicinity of the town, is a neat monument to the memory of Dr. Rowland Taylor, the martyr, formerly rector of Hadleigh, who was burned in 1555. Area of par., 3440 ac . Pop. 3679.

HADLEIGH, par. Eng. Essex ; 4480 ac. Pop. 366.
HADLEY, a vil. and township, U. States, Massachusetts, 77 m . W. Boston ; with a Congregational church, and a flourishing academy. Pop. 1814.

HADLEY-Monken, a vil. and par. England, co. Middlesex. The village, 12 m . N.N.W. London, contains an ancient church, places of worship for Baptists and Wesleyans; and national and infant schools. Area of par., 2530 ac. P. 945.

HADLOW, par. Eng. Kent; 5930 ac. Pop. 2108.
HADMERSLEBEN, a tn. Prussia, prov. Saxony, gov. of, and 19 m . S.W. Magdeburg, on the Bode, and on the railway from Magdeburg to Brunswick. It is walled; has a Protestant parish church, and a superior burgher school; a trade in cattle, and two annual fairs. Pop. 804.

HADRAMAUT, a division of S. Arabia, bounded, W. by Yemen, N. by the great desert of El Ahkaf, or the billows of sand, N.E. by Omân, and S.E. by the ocean. It is evidently the Hazarmaveth of Scripture (Gen. x. 26), peopled by the posterity of Joktan (Yoktan or Kahtan). The name, Hadramáut, is an ancient territorial appellation-the connection of which, with the political divisions of the country, has long since passed away ; and, at the present day, its application is confined to narrower limits than those which, on the authority of Arab geographers, have been stated above. Mahrah, or the country of the Mahri, extending from Keshín, N.E. along the coast, is no longer included in it ; and the limits of modern Hadramáut, along the coast, though limits in Arabia are nowhere fixed with precision, may be said to be W. the Bay of Glıubbet-Ain, lon. $48^{\circ}$ E. ; and E. Sihut, lon. $51^{\circ} 20^{\prime}$. Thus limited, IIadramáut las, on the seashore, a length of about 200 m .; but there are some who restrict the name to a tract extending only about 60 m . in length, from Makallah E. The interior extent of the country is not so easily defined; but there is reason to believe that the elevated tract, embracing the habitable valleys, and separating the desert of Ahkaf from the sea, has a breadth of about 120 m . Immediately behind the coast rises a chain of mountains which reaches a height of from 2000 to 5000 ft . The hills near the sea are of limestone, but the main range is probably granitic; farther in the interior, probably from 60 to 70 m . in a straight line from the coast, commences a table-land, 8000 ft . in height, and covered with fine sandstone. It is in the valleys and glens of this plateau that the fertile spots are to be found, which may be presumed to have given rise to the early celebrity of Hadramáut. The Baron von Wrede, thus describes the prospect which here met his eyes:

- The sudden appearance of the Wadi Doán took me by surprise, and impressed me much with the grandeur of the seene. The ravine, 500 ft . wide, and 600 ft . in depth, is inclosed between perpendicular roeks-the debris of which form, in one part, a slope reaching to half their height. On this alope, towns and villages rise contiguously in the form of an amphitheatre; while below the date-grounds, covered with a forest of trees, the river, about 20 ft . broad, and inclosed by high and walled embankments, is seen first winding through fields laid out in terraees, then pursuing its course in the open plain, which is irrigated by small eanals branching from it.' The plaee here indicated lies probably 80 m. N.W. Makallah. Several other valleys or wadies open into it, intersecting the elevated land in many directions, and all containing villages and cultivated fields. As all these valleys support a comparatively numerous population, the discovery of their existence fully explains the ancient importance of Hadramáut. The only place of any note on the coast of IIadramáut, is Makallah, which is indeed the chicf commercial depôt of the S. coast of Arabia.

The inhabitants, Hadarémi, of the present day, retain many traces of their aucient industry and eivilization. Like their ancestors, the Chatramotitæ, or Chatramonitæ, of Greek and Roman writers, they are still renowned for courage, as well as for commercial enterprize. Hadramáut exports to India frankincense, myrrh, aloes, and dragon's-blood; to Yemen, carpets, silk shawls, linen, and yambéas or girdleknives. About 70 vessels are employed in the Indian trade. -(Niebuhr's Descr. de l'Arabie; Baron von Wrede, in Jour. Roy. Geo. Soc., vol. xiv.; Capt. Haines, in do., vol. x v.)

IIADRES, a vil. Lower Austria, on the Pulkan, on the frontiers of Moravia. It has a eastle and a poorhouse; limestone quarries, and a trade in wine. Pop. 1560.

HADSOR, par. Eng. Worcester; 940 ac. Pop. 178.
HADSTOCK, par. Eng. Essex; 1870 ac. Pop. 490.
HAEGII'I, a vil. and eom. Belgium, prov. S. Brabant, 7 m . N.N.W. Louvain, a station on the railway to Malines. Pop., chiefly agricultural, 2002.

HAELEN, an agricultural vil. and com., Belgium, prov. Limbourg, $10 \frac{1}{2} \mathrm{~m}$. W. Hasselt. Pop. 2309.

IAEL'TER'T, a vil. and com. Belgium, prov. E. Flanders, 15 m . S.E. Ghent. The spinning of flax and weaving of linen are the chief employments; but there are also two brick-works, an oil and two flour mills, and an annual fair for horses and cattle. Pop. 3482.

HAEMUS, a mountain, Turkey. See Balkan.
HAERLEBEKE, a tn. and com. Belgium, prov. W. Flanders, on the Lys, 4 m . N.E. Courtrai, on the railway thence to Ghent ; once an important fortress. It has manufactures of woollen eloths. Pop. 4486.

HAESIOONCK, a vil. and com. Belgium, prov. E. Flanders, 24 m. E.N.E. Ghent. Pop. 2296.

IIAFF, Stettin, or Pomeranian IIaff, a lagoon, Prussia, prov. Pomerania, separated from the Baltic by a narrow strip of land, and communicating with it through the Swine, at Swincmunde; the Peene, at Peenemunde; and the Dievenow. It is divided into the Gross [great] and Klein [little] IIaff; communicates W. with Achter-water; receives the rivers Oder, Ilma, Ueher, and Pcene; and measures 30 m . E. to W., by about 12 m . N. to S . Its S . arm forms the harbour of Stettin.

HAFNARFIORD [Danish, Havnefjord], a vil. Iceland, Gullbringu-Syssel, on a fiord of same name, in the S. of the isl., S.S.E. Reikiavik. It has a harbour, whieh, though small, being deep, sceure, and free from drift ice, is considered one of the best in Iceland.

HAFNERZELL, or Onernzeil, a market tn. Lower Bavaria, Midlle Franconia, r. bank Danube, 9 m. E. Passau. It has two churches ; and manufactures of linen, porcelain, and earthenware, tobacco, lead pencils, and erucibles. The last two derive their materials from a mine of graphite in the vicinity. Pop. 1264.

HAGBOURNE, par. Eng. Berks; 2830 ac. Pop. 824.
IIAGE, a vil. Hanover, gov. of, and 12 m . N.W. Aurieh, bail. Berum. It has a parish church. Pop. 1835.

HAGEN, a tn. Rhenish-Prussia, gov. of, and $25 \mathrm{~m} . W$. Arusberg, cap. circle of same name, at the conflucnce of the Volme and Empe. It has four churehes and ehapels; manufactures of woollen, linen, and cotton clotl, leather hats, and
ironware. Near it is an alabaster quarry. Pop. 5689.-The curcle is hilly, and of indifferent fertility ; inlabitants chiefly employed in manufactures. A rea, 132 geo. sq. m. 1. 42,204.

IIAGENBURG, a tn. Germany, Lippe-Schaumburg, cap. bail. of same name, not far from the S. shore of Lake Steinhude. It has a parish church; and manufactures of linen cloth and drills. Pop. tn., 1143 ; bail., 4600.

HAGENOW, a tn. Germany, Mceklenburg-Sehwerin, cap. dist. of same name, $16 \mathrm{~m} . S . W$. Schwerin, on the Schmaar, and on a braıch of the Hamburg and Berlin railway to Seliwerin. It is an ancient place; has a chureh, numerous distilleries, and four annual fairs. Pop. tn., 2657. Area of dist., 76 geo. sq. m. Pop. 8436.

HAGERS'IOWN, a vil., U. States, Maryland, pleasantly situated W. bank Antictam Creek, 66 m. W.N. W. Baltimore. It is regularly built of stone or brick; and contains nine churehes, two academies, a handsome courthouse, townhall, almshonse, and jail. Pop. 3750.

HAGE'TMAU, a tn. France, dep. Landes, $19 \mathrm{~m} . \mathrm{S}$. by W. Mont-de-Marsan, agrecably sitnated on the Louts, in a country abounding in feathered game. It has manufactures of coarse linen, potteries, tanneries, and oil-mills; and a trade in the wine of the district, corn, maize, flax, chestnuts, ortolans, leather, and cattle. Pop. 1830.

HAGGARDSTOWN, par. Irel. Louth; 1400 ac. P. 1146.
HAGGERSTONE, a high rocky isl., N.E. coast Australia; lat. $12^{\circ} 1^{\prime} 40^{\prime \prime}$ S.; lon. $143^{\circ} 12^{\prime}$ E. Separated from Sir Everard Ilome's group by a channel 3 m . wide.

HÄGGLINGEN, a vil. and par. Switzerland, can. Aargau, about 5 m . from Bremgarten, in a hilly but fertile and wellcultivated district. It has a parish chureh, and mannfactures of straw-plait. The religious war, usually ealled the Kapellerkrieg, was terminated by a peace made here in 1531. P. 1490.

HAGIA-Deka, a tn. isl. Crete, near the ruins of ancient Gortynia, 20 m. S.S.W. Candia. It contains the remains of a metropolitan Greek chureh. The ruins of the famous labyrinth are at no great distance.

HAGLEY, par. Eng. Worcester; 2830 ac. Pop. 744.
HAGNABY, par. Eng. Lincoln; 640 ac. Pop. 85.
MAGUE (THE) [Dutch, 'S Gravenhage-the Counts'Hedge, Hage, or den Haag; German, Haag; French, La Haye; Italian, Aja; Latin, Haga comitum], one of the chief towns of Holland, cap. prov. S. Holland, 33 m . S.W. Ainsterdam, 24 m. N.W. Rotterdam, on the railway thence to Leyden, within 3 m . of the sea; lat. (St. James's Chureh), $52^{\circ} 4^{\prime} 18^{\prime \prime}$ N.; lon. $4^{\circ} 18^{\prime} 42^{\prime \prime}$ E. (к.) It is the residence of the King, and of the foreign ambassadors, and the scat of the States-General of the Netherlands, and of the principal part of the eentral administration of the kingdom. It is pleasantly situated, defended from the sea-winds on the one side by lofty downs, and on the others surronnded by fine arable or meadow-land, or by a thick shady wood. It is in the form of an irregular quadrangle; and, for width and straightness of streets, and general eleganee of public buildings, will stand comparison with most continental towns. All of its suburban houses, in particular, have a fine appearance; those of an inferior kind being found more towards the centre of the town. It is kept clean; but the water, in its numerous canals, being very stagnant, cmits an offensive smell. One of the finest buildings in the IIague is the palace of King William, Count of Nassau, containing a collcetion of paintings. Other important structures are the Royal Palace, the palace of the l'rince of Orange, the palace of Prince Frederiek of the Netherlands, a plain neat honse; the Binnenhof or the court of IIolland, a large irregular building, in various styles, on the Vijverberg, founded in 1249, and containing the hall of assembly of the States-Gencral, and various government offiees; also the provincial government-house, a large roomy edifiee, the townhall, museum, royal library, with collections of coins; a cannon foundry, one of the largest and most conspicuous buildings in the town, \&c. The museum, formerly l'rins Mauritshuis, contains a picture-gallery, chiefly confined to Dutch masters, some of whose finest works are here; it also contains a fine collection of curiosities from China, Japan, and the Duteh colonies; those from Japan being peculiarly interesting and varied. There are also an arsenal, prisons, theatre (a respectable building), flesh-hall, two butter-houses, and a weigh-house. The cliurehes, 12 in number, are three Calvinistic. St. James's, one of the largest churches in IIolland, and, at the same time,

## HAILSHAM

a very fine building of the 16 th century; the Prince's and the new church; a French Reformed, English Presbyterian, Evangelical Lutheran, Remonstrant, and five R. Catholic, with two synagogues; many of these churches, besides those specified, are large and elegant buildings. The benevolent institutions, including infirmaries, hospitals for the aged, the

the royal palace at the hague.
infirm, and the young, are numcrous; there are likewise many religious and missionary associations, societies for the promotion of the natural and physical sciences, literature, music, the fine arts, \&c.; and several excellent private collcetions of paintings. The Hague, in like manner, is well provided with educational institutions; besides the town gymnasium, the school of anatomy, and the royal music and commercial schools, there are a great number of other schools for the higher and elementary branches, and several charity schools. There are six squares, three of which are planted with trecs, and have pleasant promenades; and several markets, including two fish markets, one of which is well supplied with live sea-fish from Schevingen; in the other, river-fish chiefly are sold. Many of the inhabitants subsist from the traffic created by the presence of the court and the States-General ; but considerable manufactures are likewise carried on. The Hague is the chief book mart in Holland; and has 10 printers, and six lithographers. There are seven ship-building yards, six brandy distilleries, and three breweries; with vinegar, rope, and tan-works, hat, button, and carriage-makers, paper, oil, trass, veneer, malt, and corn mills.

The origin of the Hague may be traced to the bnilding of a hunting seat here of the Counts of Holland in 1250; but it has risen into importance chiefly since the beginning of the present century, and mainly through being made the residence of the court and the foreign ministers, and the seat of the States-General and the Government. It is the birth-place of William II. Prince of Orange, and William III. Prince of Orange and King of England; of Huygens, the mathematician; Boerhaave, the physician; Bilderdijk, the poetess; and it was the residence and death-place of Barneveldt and the De Witts. Pop. (1840), 60,614; (1850), 72,467.-(Van der Aa, Woordenboek der Nederlanden; Statistisch Jaarboekije, 1851.)

HAGUE (LA), a cape, France, often improperly called La Hogue, N.W. extremity of dep. Manche, 16 m . W.N.W. Cherbourg, crowned by a castle. It has a light 160 ft . above the sea, and visible at the distance of 14 m .
haguenau, or Hachneau, a tn. France, dep. BasRhin, 18 m. N. Strasburg, in the forest of Nour, on the Moder, which here divides into two branches, one of which traverses the town, while the other bathes it on the S . It is walled, flanked with towers, and ranks as a military place of the fourth class; contains five churches, a synagogue, communal college, cavalry barrack, and civil and military hospitals; has extensive manufactures of woollen and cotton goods, grease, soap, tar, carthenware, and starch; tanneries, brewerics,
madder, cotton, and hemp mills; a trade in timber, wool madder, and hops; and four annual fairs. Pop. 7743.

HAGWORTHINGHAM, par. Eng. Lincoln; 2430 ac. Pop. 600.

HAI-Fung, two tns. China.-1, Prov. Shantung, cap. dist. of same name, near the confines of Chihle; lat. $37^{\circ} 50^{\prime}$ N.; lon. $117^{\circ} 44^{\prime}$ E. It is thinly inhabited.2, Prov. Quangtong, 82 m . E. Canton; lat. $23^{\circ} 7^{\prime} \mathrm{N}$. ; lon. $115^{\circ} 20^{\prime} \mathrm{E}$.

HAI-Kheou-So, a maritime tn. China, prov. Quangtong, N. coast isl. IIainan, and chief mart of its trade, on a peninsula, 3 m . N. Kiung-Chau-foo, the capital. It is well built, and generally well kept; exports sugar, areca nuts, salt, and tanned hides; and imports English cloths and other articles.

HAI-Tan, an isl. China Sea, strait of Formosa, off the coast of Fokien, from which it is separated by a narrow channel. Surface mountainous, but cultivated.

HAIDE, or HAIDA, four places, Bohemia -1, A tn. circle of, and 29 m . N.E. Leitmeritz; with spacious, regularly-formed streets, a church, and a school. It is the centre of the Bohemian glass trade. Both the weekly market and the annual fair are important. Pop. 1243. -2, Haid or Hayde, A tn. circle of, and 25 m . W. Pilsen, in a marshy district. It is walled; and has a castle and a parish church. Pop. $1530 .-3$, Haid, A vil. circle of, and 22 m . S. Budweis; with a parish church, townhouse, and burgher hospital; a distillery, two mills, and several annual fairs. Pop. 679.-4, A market tn., circle Budweis; with a parish church, townhouse, and school; a distillery, a mill, and several annual fairs. P. 639 .

HAIDHAUSEN, a vil., Upper Bavaria, 1. bank Isar, opposite to Munich, of which it may be considered a suburb. It has two churches, two castles, an hospital of incurables; and manufactures of silk, hats, and paint brushes. P. 3700 .

HAIDUCKEN, or Hajducken-district, a privileged district, Hungary, comprising the Haiduck towns, and consisting of three detached portions, enclosed by cos. Szaboles and Bihar ; area, 284 geo. sq. m. It consists of a plain, almost unbroken by a single hill; and is of remarkable fertility, producing corn, tobacco, and wine in abundance; and fattening great numbers of cattle. The Haiducks, of whom five-sixths are Protestants, used to enjoy important privileges, which were conferred on them by John Corvinus, as a reward for military service. Pop. 61,019.

HAIGER, a tn. Germany, Nassau, bail. and 5 m . W.N.W. Dillenburg, on the Dille; with two Protestant churches, iron and steel works, a bark and two paper mills. Pop. 1125.

HAIGERLOCH, a tn., principality IIohenzollern-Sigmaringen, cap. bail. of same name, in a valley on the Eyach, at the foot of a hill, crowned with an old castle. It has two churches, a synagogue, and an old Roman tower ; a trade in cattle and several large fairs. Pop. 1458. Area of bail. 28 geo. sq. m. Pop. 10,976.

HAIK (LaKe), Abyssinia, Amhara, touching the N. boundary of Shoa and Efat, about lat. $10^{\circ} 40^{\prime} \mathrm{N}$. ; lon. $39^{\circ} 10^{\prime}$ E. ; circumference, about 45 m . The shores in the W. and N. are not high, nor steep; but those of the S. and E. are surrounded by ligh and steep mountains. Aquatic birds of various plumage abound in the lake; fish also are plentiful, and many of them of large size. Near the S.E. shore there is an island called Debra Nagoodguad-Hill of Thunder, on which there is a convent and a chureh, and a pop. of 350 , consisting of monks, priests, scholars, and servants.

HAIL-Weston, par. Eng. Huntingdon; 1860 ac. P. 397.
HAILE, par. Eng. Cumberland; 3220 ac. Pop. 305.
HAILES, par. Eng. Gloucester ; 1520 ac. Pop. 120.
HAILSHAM, a market tn. and par. England, co. Sussex. The town, 18 m. E. Brighton, near Pevensey marsh, about $5 \frac{1}{2} \mathrm{~m}$. from the sea, has a handsome church, with a lofty embattled tower ; places of worship for Baptists and Calvinists, a free, and three other daily schools, benefit and mutual improvement societies, and several small charities. Twine, cordage, matting, and horse hair-cloth for drying hops are made here to a considerable extent; and there is also a large

## IIAIN

## HAKIN-KHAN

brewery; but the great body of the inhabitants are employed in agricultural labour. Area of par., 6350 ac. Pop. 1586.

MAIN, or Grossenhain, a tn. Saxony, circle of, and 20 m. N.W. Dresden, cap. bail. of same name, in a fertile valley, l. bank Röler. It is entered by four gates; has three churches, one of them almost of a triangular shape; a townhouse, with a lofty tower, two hospitals, and the picturesque ruins of an old monastery; manufactures of calico and sarsenet, paper, starch, vinegar, and leather; a printfield, several dyeworks, a large worsted and other mills; and three annual fairs, chiefly for cattle. Pop. tn., 6394 ; bail., 31,249 .

HAIN-zur-Dreieich, or Dheificheniling, a tn. IlesseDarmstadt, prov. Starkenburg, circle and near Offenbach. It is walled; has two gates, a Lutheran and a Calvinistic church, the remains of an old castle, manufactures of hosiery, and several mills. Birth-place of the anthor Ewald. Pop. 946.

HAINA, a vil. Hesse-Cassel, Oberhessen, circle of, and 9 m . from Frankenberg, r. bank Wohra, near its confluence with the Eder. It contains a Gothic church, an old monastery, now used partly as an hospital, and partly as a deaf and lumb and blind asylum; and has four mills. The painter Tischbein was born here. Pop. 772.

HAINAN, a large isl. China. prov. Quangtong, off peninsula Liou-tchou, from which it is separated by channel of same name, 15 m . broad, and difficult of navigation even for junks, being filled with shoals and coral reefs. It separates the China Sea from the Gulf of Tonquin, lies between lat. $18^{\circ} 10^{\prime}$ and $20^{\circ} \mathrm{N}$.; lon. $108^{\circ} 20^{\prime}$ and $111^{\circ}$ E.; and is 185 m . $\mathrm{S} . \mathrm{W}$. to N.E., by 90 m . broad. The E. coast is steep and rocky; on the S. coast are commodious and safe bays, with good anchorage, during the N.E. monsoons; the N.W. coast is low, and bordered with sandbanks. The wild animals are the tiger, rhinoceros, deers of various kinds, and venomous serpents. luland, gold and lapis lazuli have been met with; and in some parts of the coast are salt-pans. The interior is occupied by an extensive mountain range, which forms the source of several considerable rivers, and some of the highest peaks of which rise above the limit of perpetual snow. IIainan is, on the whole, barren; but the level lands along the coast are fertile and well-cultivated, producing areca-nuts, cocoanuts, and other tropical fruits; but the principal productions are rice, sweet potatocs, sugar, tobacco, fruits, medicinal plants, timber, including sandal-wood, braziletto, ebony, and rosewood, besides a variety of dye-woods, and wax; the last obtained from an insect, called pehlah-chung, or white wax insect, which deposits it when laying its eggs.

The fisheries of the island are considerable; and thousands of junks come annually from Canton, to fetch cargoes of dried and salted fish. The inhabitants on the coasts are mostly Chinese from the mainland; but those in the interior are a different and distinct race, supposed to be the aborigines; they claim an entire independence of the Chinese government; and are described as a friendly, cheerful, and kind people, cleanly and industrious in their habits, and very persevering.

The island is subdivided into 13 districts, the respective towns of which are all on the coast. Some of these are very populous, having from 80,000 to 90,000 inhabitants. Capital, Kiung chau-fu. Pop. estimated at $1,500,000$.

HAINAUT, or Halnault, an anc. prov., now forming part of the N.E. of France and S.W. of IBelgium. In the time of Cæsar, it was inhabited by the Nervii, a warlike people, of German origin; and did not, till the 7th ceutury, take the name of IIainaut; supposed to be derived from the small river Haine which waters it. It was then governed by conuts, who, however, were not regarded as hereditary, till the time of one of them, called Regnier Long Neck, who died in 916. The succession continued umbroken till 1436, when Jacqueline, the heiress of William IV., was forced to cede her territory to Philip the Good, Duke of Burgundy. Through his successors it passed to the House of Austria; and afterwards became divided into two parts-Austrian-Hainaut or Hainaut proper, nearly corresponding with the Belgian prov. of that name; and French-Hainaut, ceded to the French by the treaties of the Pyrences in 1659, and of Nijmegen in 1678 ; and now included in the department du Nord.

HAINAUT, or Hainaulit, [Dutch, Hennegoven; German, Hennegau], a prov. Belgium, bounded, N. by Brabant and provs. E. and W. Flanders, E. Namur, and S. and W. France.

Area, $1406 \mathrm{sq} . \mathrm{m}$. Though nowhere properly mountainous, it is very hilly in the S.E., where it is covered by the W. Ardennes. In other directions it is generally flat, though well diversified. It belongs partly to the basin of the Scheldt, and partly to that of the Meuse-the former traversing its W. corner, and also recciving some of its drainage through the Dendre ; and the latter draining a considerable portion of the E. by its tributary Sambre. About three-fourths of the whole surface is arable, and rather more than one-sixth under wood. Scarcely $T_{0}^{\frac{1}{0}}$ is waste. The soil is generally fertile; and produces in abundance cercal and leguminous crops, fruit of various kinds, flax, hemp, hops, oleaginons seeds, tobacco, chicory, hay, and green food. The meadows and pastures maintain great numbers of horses and cattle-the former much valued for draught, and the latter for dairy produce. The forests, situated chiefly in the S., furnish large quantities of timber and fuel. The latter, however, is better furnished by the coal mines, which are very productive, and extensively worked, both for home consumption and export, chicfly to France. The other minerals include iron, marble, millstones, building stone, and pavement. Manufactures are carried on to a great extent. Among others may be mentioned cutlery and all kinds of artieles in iron, woollen and linen goods, hosiery, glass, leather, delft-ware and porcelain, bricks, and tiles, chicory, oil, soap, tobacco, beer, vinegar, spirits, \&c. For administrative purposes, Hainaut is divided into six arrondissements-Mons, the capital, Tournai, Charleroi, Ath, Soignies, and Thuin, subdivided into 32 cantons. Pop. (1846), 714,708.

HAINBULG, or II armnurg, a tn. Lower Austria, beautifully situated l. bank Danube, surrounded by vine-coverel hills, 10 m . S.E. Vienna. It is walled; contains an old and also a fine new castle, to which Napoleon's sister, the wife of Murat, was permitted to retire, after she had lost the crown of Naples; and an ancient townhonse, with a Roman altar; and has very extensive manufactures of tobacco; and some shipping trade, two weekly markets, and three annual fairs. Hainburg was nearly all burned down in 1827 ; and has since been rebuilt in an improved form. Pop. 3844.

IIAINDORF, a vil. Bohemia, circle Bunzlan, about 8 m . from Friedland, on the Wittig, at the foot of the Iscrgebirge; has a large and handsome church, six chapels, a Franciscan monastery, a school, a flour and two saw mills. Pop. 1358.

II AINE, a river, Belgium and France, rising in the Belgian prov. of Hainaut, and entering the Scheldt at Condé, in France, after a $W$. course of about 45 m . It is navigable, by means of sluices, from Mons to Condé. Principal affluents, the Homelle and the Trouille.

HAINE, two places, Belginm.-1, (Saint-Paul), A vil. and com. prov. Hainaut, on the llaine, 10 m . E. Mons. Agriculture and the working of coal are the chief employments. Pop. 1059.-2, (-Saint-Pierre), A vil. and com. near the former; with an important glass-work, a copper foundry, and two flour-mills. Pop. 1148.

HAINEWALDE, a tn. Saxony, circle Bautzen, near Löbau; with a castle, a chureh, two schools, and an hospital; a fishery, mamfactures of linen and woollen cloth, several mills and bleachfields. Pop. 2571.

HAINFORD, par. Eng. Norfolk; 1600 ac. Pop. 570.
IIAINICHEN, a tn. Saxony, circle of, and 41 m . S.E. Leipzig, on the Little Striegitz. It is an old but stirring place; has a chureh, manufactures of woollen, linen, and cotton cloth; and articles of dress in metal, a worsted and other mills, two bleachfields, and two annual fairs. The poet Gellert was born here. Pop. 5580.

HAINSPUCII, a tn. Bohemia, circle of, and 37 m . N. Leitmeritz. It contains a castle, parish church, and hospital, and has manufactures of linen and ribbons, a bleachficld, tileworks, and five mills. Pop. 2261.

HAIN'TON, par. Eng. Lincoln; 2780 ac. Pop. 322.
HAITERBACH, a tn. Wïrtemberg, circle Schwarzwald, 30 m. S.W. Stuttgart. A great deal of wool is prepared and hand-spun here. Pop. 1933.

HAITI, isl. W. Indies. See Haytr.
HAKARI, or HAKIARI, a mountain dist. Turkish Koordistan, occupied by 50,000 families of Nestorian Christians, of which Giulamerk, $65 \mathrm{~m} . \mathrm{S}$. Van, is the capital.

HAKIN-Khan, a small to. Asiatic Turkey, pash. Sivas, r. bank Euphrates, 100 m . N.N. W. Diarbekir. It is extremely
poor, and contains an old castle. The country around is mountainous and arid; the rocks are all limestone.

HAL, or Halle, a tu. Belgium, prov. Brabant, on the Senne, 30 m . S.S.W. Brussels. It contains a fine old clurch, built in the 14th century, in the ogival style, with three naves, a majestic and well-proportioned choir, and an elegant tower; and a large and lofty townhouse, built in 1616; and has manufactures of articles in wood and wicker-work, breweries, distilleries, tanneries, soap-works, a corn, and several oil mills. It is a station on the railway to Brussels, and communicates, by the canal from Charleroi to Brussels, with the Sambre, Kuppel, and Scheldt. Pop. 6399.

HALA MOUNTAINS, an extensive and lofty range, Beloochistan, stretching N. to S., and terminating, in the latter direction, at Cape Monze, in the Arabian Sea; lat. $24^{\circ} 48^{\prime}$ N.; lon. $66^{\circ} 50^{\prime}$ E. Little is known, with certainty, of the heights of these mountains, but they are believed to attain, in some places, an elevation of upwards of $11,000 \mathrm{ft}$. above sea-level. One ascertained peak rises to 6000 ft . Two main passes intersect this lofty range of mountains-the Bolan and Moola passes ; each the channel of a considerable torrent, and each affording a tedious, but not very difficult access, from the plains on the E. to the W. highlands. The Bolan Pass is about 50 m . long, with an ascent of 5000 ft ; the Moola Pass, 100 m . long; ascent, 4500 ft .

HALAM, par. Eng. Notts; 1310 ac. Pop. 411.
HALAS, a market tn. Hungary, dist. Little Cumania, among low hills, on a lake of same name, 80 m . S.S.E. Pesth. It is a poorly built and straggling place, contains a Protestant and a R. Catholic church, and has a trade in cattle and wine, and three annual fairs. In the lake is an island which was once fortified, and was used by the inhabitants as a place of refuge from the incursions of the Turks. Pop. 10,330.

HALBAU, a tn. Prussia, prov. Silesia, gov. of, and 45 m . N.W. Liegnitz, 1. bank Tschirne, and on the railway from Berlin to Breslau. It has an elegant castle, a Protestant, and a R. Catholic church, manufactures of cotton cloth and nails, a printfield, and dyework. Pop. 959.

HALBERSTADT, a tn. Prussia, prov. Saxony, gov. of, and 32 m . S.W. Magdeburg, cap. circle of same name, in a fertile district, r. bank Holzemme, and on a branch railway to Magdeburg. It is a very ancient place, and consists of the town proper, surrounded by walls with seven gates, and of the suburb of Gröperstadt. A number of the houses are tim-ber-framed, and curiously ornamented. The principal buildings are the Dom or cathedral, an ancient and interesting Gothic structure, chiefly in the pointed style, with numerous monuments, and a fine organ; the church of Our Lady, built in the Byzantine style, in the 11th century, with curious basreliefs and wall paintings, and recently restored; several other churches, two synagogues, an old episcopal palace, a townhouse, custom-house, theatre, gymnasium, normal, and other schools, a lunatic asylum, infirmary, and a number of other charitable endowments. The manufactures consist chiefly of woollen cloth, gloves, carpets, refined sugar, common and white leather, tobacco, chicory, and chemical products; and there are numerous breweries and distilleries, a walk, and a worsted mill. Pop. (1849), 19,840. Halberstadt was, in 804, the see of a bishop, and became the capital of a principality, which continued till 1807; had an area of $536 \mathrm{geo} . \mathrm{sq}$. m., and pop. 119,418. -The crincle of Halberstadt consists of a plain much broken by hills, is fertile, produces much corn, and rears many cattle. Area, 135 geo. sq. m. Pop. 50,284.

HALBERTON, par. Eng. Devon; 5960 ac. Pop. 1739.
HALBTHURN, a vil. Hungary, co. Wieselburg, 24 m . N.E. Oedenburg. It has an elegant castle, with a large agricultural establishment, at which fine flocks of merinos are reared. Pop. 1218.

HALD, a vil. Denmark, Jutland, bail. of, and 5 m . S.S.W. Wiborg, on a small lake of same name. It has the extensive ruins of an old strong castle, which belonged to the knight Niel Bugg, and the remains of the works which king Waldemar erected when besieging it in 1355.

HALDEN (High), par. Eng. Kent ; 3340 ac. Pop. 683.
HALDENSLEBEN (Alt and Neu), two nearly adjacent places, Prussia, prov. Saxony, and 14 m. N. W. Magdeburg:1, (Neu), A tn., cap. circle of same name, r. bank Ohre. It is walled, has two churches and an hospital, manufactures of woollen cloth, hats, tobacco, copper, and carthen-ware; tan-
neries, sugar-refincries, and glass-works. Pop. 3748.-2, (Alt), A vil. about $2 \mathrm{~m} . \mathrm{S}$. of Neu-Haldensleben, with a Protestant and a R. Catholic church, manufactures of earthenware and liqueurs, sugar-refineries, distilleries, tile-works, numerous mills, and an extensive trade. Pop. 1500.

HALE, par. Eng. Hants; 1210 ac. Pop. 209.
Hale (Great), par. Eng. Lincoln; 5110 ac. Pop. 1003.
HALES, par. Eng. Norfolk; 1120 ac. Pop. 302.
HALESOWEN, a market tn. and par. England, in a detached portion of Worcestershire. The town, 7 m . S.W. Birmingham, is pleasantly situated in a valley on the Stour; streets tolerably straight, clean, well paved, and lighted with gas, and the supply of water abundant; many of the houses handsome. It has an ancient parish church, with a beautiful spire, and a monument to Shenstone, who was educated, and lies buried here; places of worship for Independents, Wesleyan Methodists, and Ranters; the remains of an extensive abbey erected by king John ; a free grammar-school, founded in 1652; and several other schools. Nails, ehains, and pearl and horn buttons, are manufactured here to a considerable extent ; and in the vicinity are coal mines, and several corn-mills. Market-day, Monday; two fairs annually. Pop. 2056. Area of par., 11,290 ac. Pop. 17,376.

HALESWORTH, a market tn. and par. England, co. Suffolk, 26 m . N.E. Ipswich, in a valley, l. bank Blyth, which is navigable for small craft to the town. The town is irregularly laid out; the church is a handsome Gothic building, with a fine tower; and there are places of worship for Baptists, Independents, Unitarians, and Wesleyan Methodists; several daily schools, and a set of almshouses. A good business is done in malting and corn, and there is one iron foundry, but the spinning of linen yarn forms the chief occupation of the inhabitants. Area of par., $1070 \mathrm{ac} . ~ P o p .2662$.

Halfay, or Halfayeh, a tn. Nubia, r. bank Nile, about 155 m . N.W. Sennaar ; lat. $15^{\circ} 57^{\prime} \mathrm{N}$.; lon. $32^{\circ} 46^{\prime} \mathrm{E}$. Pop. 4000.

HALFORD, par. Eng. Warwick; 1010 ac. Pop. 425.
Halibut or Sannagi Island, N. Pacific, near the S.W. extremity of the peninsula of Aliaska; lat. $54^{\circ} 27^{\prime} \mathrm{N}$. ; lon. $162^{\circ} 50^{\prime} \mathrm{W}$. (r.); 23 or 24 m . in circuit, low and barren. It contains many lakes, the rivers which flow from them abounding in fish. Foxes, sea-calves, and birds of all species are numerous. It was named by Captain Cook, from the great quantity of Halibut fish taken in the vicinity.

HALICZ, a tn. Austria, Galicia, circle Stanislav, r. bank Dniester, 40 m . E.S.E. Stry. It has a Greek church and two synagogues, manufactures of soap and candles, and salt springs. Near it, on a steep hill, stand the ruins of an old castle, once the residence of the lords of the kingdom of Halizia, now called Galicia. Pop. 1830.

HALIFAX, a market tn., par., and parl. bor. England, co. York (W. Riding). The town stands on a declivity rising gently from the Hebble, 36 m . W.S.W. York, on the railway from Bradford to Manchester, and has a very picturesque appearance. It is built almost wholly of stone, which abounds in the vicinity. Some of the streets are narrow and irregular, but there are two or three handsome and spacious, while nearly all are well paved, and well lighted with gas. There are many excellent buildings, especially amongst those of modern date. Water abundant. The principal public buildings are the three Established churches, all of them handsome; the theatre, a neat structure ; new assembly rooms, the piece hall, a magnificent quadrangular edifice of freestone; the baths, and the infirmary. There are also places of public worship for Independents, Baptists, Methodists, Unitarians, and Friends. The schools, which are numerous, include the free grammar-school, national school, and the British school, established as a charity school for the poor of all religious denominations; the blue-coat school, and some smaller school charities. There are several charitable institutions, including a set of almshouses. The literary institutions of the town are a literary and philosophical society, with an extensive museum; a mechanics' institution, with a library ; three news-rooms, and two subscription libraries. Halifax is favourably situated for manufactures and commerce, and to this circumstance its prosperity is attributable. It commands abundant supplies of coal and water, and an extensive inland navigation, which connects it with both Hull and Liverpool. The staple articles of manufacture are woollen goods, includ-
ing bread and narrow woollen cloths, and a great many other kinds of woollen fabrics, kerseymeres, carpeting, \&c. The manufacture of cotton is also carried on to a considerable extent; dyeing is carried on, and mill machinery, and wool and cotton cards, are likewise extensively made. The town is rapidily increasing in extent and population. Ifalifax sends two members to the House of Cominons. Registered electors (1851), 1084. Pop. township (1841), 15,382; (1851), 25,159; bor., 33,579 . - The parisi is one of the largest in England, and is divided into three parechial districts. Area, 75,740 ac. Pop. 130,743.

IIALIFAX, a city and scaport, cap. of colony Nova Scotia, S. coast, and near the centre of that peninsula, on a declivity, on the W. side of a deep inlet of the sea, called Halifax harbour, which extends several miles inland; lat. (Dockyard tablet) $44^{\circ} 39^{\prime} 42^{\prime \prime} \mathrm{N}$. ; lon. $63^{\circ} 35^{\prime} 30^{\prime \prime} \mathrm{W}$. (r.) Including its suburbs, it is $2 \frac{1}{2} \mathrm{~m}$. long, and about $\frac{1}{2} \mathrm{~m}$. wide. The

streets are spacious, and eross each other at right angles. Many of the houses are of wood, plastered and stuccoed, but many, also, are handsomely built of stone. There are three or four churches, a large R. Catholic cathedral, and places of worship for various bodies of Dissenters. The other public edifices are substantial structures, the principal of which is l'rovince Building, containing the chief gevernment offices, the public library, \&c.: it is built of freestone, and is a remarkably fine edifice. The others are Dalhousie college, military hospital, workhouse, prison, exchange, assembly rooms, theatre, and several public schools. The dock-yard, covering 14 ac ., is one of the finest in the British colonies. The harbour in front of the town, where ships usually anchor, is 1 m . broad; further up, the inlet expands into a wide basin, called Bedford Basin, comprising an area of 10 sq. m., and capable of accommodating the whole British navy. Along the water's edge, in front of the town, are numerous wharfs, close to which slips can lie for the discharge of their cargoes, and above these are the warehouses. Halifax is the principal naval station for our N. American colonies, and is defended by strong forts and batteries. It owns about 100 large square rigged vessels, as many schooners, and a host of small craft. Its exports consist of dried and piekled fish, lumber, coals, corn, flour, cattle, butter, cheese, whale and seal oil, and furs. 1 mports, the native products of the W. Indies and U. States, and British manufactured goods. There are some manufactures of snuff, leather, paper, and soap; also breweries, distilleries, and a considerable fishery. It has an extensive steam communication with various parts of N. America and the W. Indies, and, at stated periods, with Liverpool; and it is expected soon to be connected by railway with Canada and the U. States. Pop. estimated from 19,000 to 25,000 .

VoL. 1.

HALIFAX BAY, Australia, N.E. coast, between lat. $18^{\circ} 30^{\prime}$ and $19^{\circ} 10^{\prime} \mathrm{S}$., and lon. $146^{\circ} 20^{\prime}$ and $147^{\circ} 50^{\prime} \mathrm{E}$. It contains several islands, including the Palm islands.

HALKIN, par. Wales, Flintshire; 2110 ac. Pop. 1813.
HALKIRK, par. Scot. Caithness; 24 m. by $12 \mathrm{~m} . \mathrm{P} .2963$.
HALL, a tu. Anstria, Tyrol, circle Unterinnthal, cap. dist. of same name, l. bank Inn, which is here navigable, 5 m . E. Innsbruck. It is the seat of a mining and salt directory, contains a deanery church, a gymnasium, military school, Franciscan monastery, and lunatic asylum; and has very extensive salt-works, supplied by the salt mines which abound in the vicinity. P. 4969. Area of dist., 40 geo. sq. m. P.16,415.

HALI, a tn. Wiirtemberg, circle Jaxt, cap. bail. of same name, on the Kocher, 35 m . N.E. Stuttgart. It is walled, flanked with towers, and has three suburbs, a beautiful Gothic high church, five other churches, a handsome townhouse, library, and the ruins of an old castle; manufactures of linen, soap, starch, jewellery, and confectionery, and very extensive salt works. Pop. 6489. Area of bail., 108 geo. sq. m. Pop. 24,222.

HALLA, a tn. Scinde, near 1. bank Indus, 30 m . N. Hydrabad; lat. $25^{\circ} 45^{\prime}$ N. ; lon. $68^{\circ} 28^{\prime}$ E. It consists of an old and a new town-the latter the larger and more wealthy of the two. The bazaar, which is partially roofed over, is well supplied, and considerable business is transacted in it. Scindian caps, a very general wear, and earthenware, are manufactured here to a great extent. Some of the latter are showily decorated with rich and brilliant colours. Pop. about 10,000 .

HALI, ADALE, a river, Scotland, co. Sutherland, which, after a rapid N. course of about 20 m ., through the strath of same name, falls into the North Sea, at the bay of the Tor of Bighouse, near the boundary with Caitbness.

HALLAM (West), par. Eng. Derby; 1280 ac. Pop. 677.
HALLAM (Nether and Upper), two townships, England, co. York (W. Riding), par. Sheffield; the former 2 m . W. Sheftield. Pop. 7275. —— The latter $3 \frac{1}{4} \mathrm{~m}$. W.S.W. Sheffield. Pop. 1401.

HALIAAMSHIRE, a dist. England, co. York (W. Riding), consisting of the extensive parishes of Sheffield and Ecclesfield. A considerable portion of this district is still but thinly inhabited, and exhibits its ancient forest and woodland appearance.

HALLANDS-WAEDERO, a small isl. Sweden, in the Kattegat, off the N.W. coast of lain Christianstad, opposite the town of 'Toreko; lat. $56^{\circ} 26^{\prime}$ N.; lon. $12^{\circ} 30^{\prime}$ E.

HALLATON, a vil. and par. England, co. Leicester. The village (formerly a market town), 13 m . E.S.E. Leicester, contains a handsome church, with a lofty spire: an Independent chapel, free school, and almshouses. Two cattle fairs, annually. Area of par., 2360 ac. Pop. 637.

IIALIAU (Oner and Unter), two nearly contiguous vils. and pars. Switzerland, can. of, and 8 m . W. Schafthausen, on a fertile slope, at the foot of the Ober and Unter Berg, a ramification of the Randen. They contain two churches, one of which was fortified at the commencement of the 16 th century, and still has an ancient round tower, which formed part of the fortification. The trade is in corn, hemp, and wine, particularly the last, which ranks high among the wines of the canton. Pop., Ober-Hallan, 762 ; Unter-Hallau, 2461.

HALLE [Latin, Mala], a th. Prussia, prov. Saxony, on the Saale, here crossed by a wooden bridge, 20 m . N.W. Leipzig, on the railway thence to Magdeburg. It is encircled by a row of hills, and consists of the town proper and five suburbs. It is built in the form of an irregular square, surrounded by walls, with six gates, and defended by two forts. It is not very well built, but possesses several large squares, and, for the most part, broad and well-formed streets. It contains seven churches, of which the most deserving of notice are the Markt-kirche, an elegant Gothic structure, with four towers, and the Moritz-kirche, also Gothic, with a fine vaulted roof and richly-carved altar-piece; a university, to which the names of Gesenius and Tholuck have given celebrity, possessed of a library, and other good collections, and attended by abont 720 students; an old palace, once the residence of an archbishop; a townhouse, theatre, hospital, and infirmary; an orphan asylum, with a fine statue, by Rauch, of Franke, its founder; a lunatic asylum, and several charitable endowments. The manufactures include woollen, linen, and mixed goods; hosiery, leather, starch, and chemical products;
but the most important of all is salt, obtained from springs, which have been known from a very carly period, and are supposed to have given the town its name-Halle being derived from the Greek $\dot{\alpha} \lambda_{s}$, signifying 'salt.'. The annual produce is about 11,000 tons. Outside the walls, an elegant monument has been erected to the soldiers who died here of wounds received at the battle of Leipzig, in 1813. Teazel and carraway are largely cultivated in the vicinity; and the greater part of the larks, much used as dainties for the table at Leipzig, are caught bere. Pop. (1849), 33,848.

HALLE, a tn . Prussia, gov. of, and 30 m . S.W. Minden, cap. circle of same name, with a Protestant church, manufactures of linen and tobacco, a trade in linen, hemp, flax, buckwheat, horses, cattle, and swine; and four annual fairs. Pop. 1452.-Circle; area, 88 geo. sq. m. Pop. 32,152.

HALLEIN [Latin, Halla], a tn. Upper Austria, on a height above 1. bank Sulza, near the foot of the Dürrenberg, 9 m. S. Salzburg. It is the seat of a salt directory, and several other public offices ; contains five churches, a townhouse, courthouse, hospital, and boys' and girls' school ; and has manufactures of cotton, hosiery, and articles in wood, and extensive salt-works. Its salt mines, which have been worked for above six centuries, have a depth of above 350 ft ., and yield annually about 15,000 tons of salt. Pop. 5600.

HALLENBERG, a tn. Rhenish-Prussia, gov. of, and 31 m. S.E. Arensberg, on a small stream of same name. It has a slate quarry, and several annual fairs. Pop. 1548.

IIALLGARTH, a township, England, co. of, and $3 \frac{1}{2} \mathrm{~m}$. E.N.E. Durlam, containing extensive coal mines. P. 2295.

HALLIGEN (The), an isl. group, Denmark, off S.W. coast Schleswig; inhabited, but, not being protected by embankments, flooded at high water, except a portion, which, by means of warping, has been raised above sea-level. On this the houses are built; but, in stormy weather, the sea frequently gains access to them. The chief islands are-the Hooge, about 3 m . long by 2 m . broad; Langenes and Nordmarsch, forming one island, about 6 m . long by 1 m . broad; Gröde, about 2 m . long, hut very narrow; and Oland or Oeland. Each of these islands has its own church. Some cattle, and a considerable number of sheep are kept. Pop. 650.

HALLING, par. Eng. Kent; 1690 ac. Pop. 448.
HALLINGBURY, two pars. England, co. Essex:-1, (Great-); 1390 ac. P. 690.-2, (Little-); 2610 ac. P. 497.

HALLINGDAL, a valley, Norway, bail. Buskerud, 77 m. N. W. Christiania. It is thinly peopled; traversed by a river of same name, Hallingdal-elv ; and its upper part is formed, on one side, by the Halling-skarven and Hallingjökalen hills, respectively 5900 ft . and 6017 ft . high.

HALLING'TON, par. Eng. Lincoln; 860 ac. Pop. 78.
HALLIWELL, a township, England, co. Lancaster, 2 m . N.W. Bolton, containing extensive blacking works. Pop. 3242.

HALLOUGHTON, par. Eng. Notts; 800 ac. Pop. 88.
HALLOW, par. Eng. Worcester ; 3550 ac. Pop. 1228.
HALLOWELL.-1, A vil., U. States, Maine, on both sides of the Kennebec, 2 m. S.S.E. Augusta. It is neatly built on a slope, rising gradually from the river to a height of 200 ft .; possesses an academy, and 29 minor schools; four tanneries, numerous brick stores and warehouses, and a good deal of shipping, chiefly engaged in the coasting tradc. Vessels of 150 tons can unload at its wharfs, and steamers ply between it and Portland, and Boston. A gray granite, easily worked, is quarried here, and largely exported. Pop. 4654. -2, (Care), A headland, Arctic America, on the N. W. side of entrance to Fury and Hecla Strait; lat. $69^{\circ} 57^{\prime} 30^{\prime \prime} \mathrm{N}$.; lon. $85^{\circ} 26^{\prime}$ W. (R.)

HALL'S ISLAND.-1, One of the Gilbert group, N. Pacific Ocean ; lat. $0^{\circ} 53^{\prime}$ N. ; lon. $173^{\circ}$ E. (R.); about 9 m . long, N.E. and S.W., and 6 m . broad. It is of coral formation, and appears to be thickly inhabited, but its natives have had little interceurse with the whites.- 2 , An isl. British N. America, N. side of E. entrance of Frobisher Strait ; lat. $63^{\circ} 3^{\prime} \mathrm{N}$. ; lon. $64^{\circ} 55^{\prime} \mathrm{W}$. (к.)

HALLSTADT, a market tn. Bavaria, circle Upper Franconia, 4 m. N. Bamberg, on the Eller, near its confluence with the Main, over which there is here a ferry. It has a R. Catholic church, a chapcl, and castle; manufactures of damask and potass, several saw, and other mills, and a trade in hops, fruit, corn, and winc. Pop. 1627.

HALLSTAT'T, or Halazestat, a market tn. Upper Austria, circle Traun, picturesquely situated on the W. shore of the lake of Hallstatt, 60 m . S. W. Linz, on a mountain slope. There are properly no streets, but a succession of terraces, to which access is obtained by flights of steps. The church is very ancient, has a Gothic portal ; and on a projecting height, 1080 ft . above the houses, is a conspicuous tower, originally built for defence, but now occupied by the manager of the neighbouring salt mines. Pop. 1030.-The lake of Hallstatt, which is about 6 m . long, with an average breadth of less than 2 m ., and has a shape somewhat resembling the letter $S$, is remarkable for the wild and gloomy character of its scenery.

HALLUIN, a tn. France, dep. Nord, 10 m . N.N.E. Lille, r. bank Lys. It was once famous for its cloths, and has still manufactures of linen, calicoes, and bed-ticks; with a cotton and several oil mills, bleachfields, brick-works, breweries, \&c. Pop. 2535.

HALLUM, a vil. Holland, prov. Friesland, 10 m. W.S.W. Dockum. It has a handsome Calvinistic and a Baptist church, a school, and an excellent poorhouse; six chicory factories, and a distillery; but the inhabitants are chiefly agricultural. Pop. 1178.

HALLWEIL, a lake, Switzerland, chiefly in can. Aargau, but with its $S$. extremity touching that of Luzern; length, N. to S., about 7 m . ; breadth, 2 m . The Aa, shortly after quitting the lake of Waldegg, enters the $S$. side of this lake, and issues from its N. side, close to the old castle of Hallweil, a large, massive, and walled structure.

HALMAHERA, an island. See Gillolo.
HALMI, a market tn. Hungary, co. Ugocz, in a plain, near the morass of Eger, 11 m . S. Nagy-Szöllos. It has a castle, a Protestant church, and five large annual fairs, chiefly for cattle and swine. Pop. 792.

HALMSTAD, a tn. Sweden, cap. län of same name, at the mouth of the Nissa, in the Kattegat, 72 m . N.N.E. Copenhagen ; lat. (fort) $56^{\circ} 40^{\prime} 24^{\prime \prime} \mathrm{N}$. ; lon. $12^{\circ} 51^{\prime} 45^{\prime \prime}$ E. (R.) It is well situated, and tolerably well built; is the seat of a governor, and of several public offices; has a parish church, and a house of correction ; manufactures of common woollens, an important salmon fishery, and a harbour, which is naturally good, but very much silted np. In the vicinity are both mineral springs and sea-baths. Halmstad is celebrated in Swedish history as the place where the Swedish, Danish, and Norwegian commissioners, under the Kalmar union, met to choose their king. Pop. 2257.-The LÄn, sometimes called Halland, is bounded, N. by Göteborg and Bohns, N.E. Elfsborg, E. Jönköping and Kronsberg, S. Christianstad, and W. the Kattegat; area, about 2000 sq. m. The coast is sandy in some parts, but in others bold and rocky, and much indented, forming several considerable bays. The interior gradually ascends from the coast. The principal streams are -the Laga, Nissa, Athra or Falkenberg, and Viske, which all flow S.W. into the Kattegat. The soil is, in gencral, by no means fertile, and the corn raised falls short of the consumption; woods neither extensive nor valuable for timber, but extensively employed in making numerous minor articles, in which the inhabitants display considerable dexterity. These constitute the principal manufactures. Pop. 88,689.

HALS, a vil. Denmark, Jutland, N. side of the mouth of the Liimfiord, bail. of, and 15 m . E.S.E. Aalborg, which uses its haven as a shipping place. Pop. 800.

HALSALI, par. Eng. Lancaster ; 15,540 ac. Pop. 4445.
HALSBRÜCKE, a mining vil. Saxony, circle of, and 18 m. W. S. W. Dresden, on the Mulde, here crossed by a bridge. It has a silver furnace, amalgam works, which are the most important in existence; and much-frequented mineral baths. Pop. 1264.

HALSE, par. Eng. Somerset; 1340 ac. Pop. 421.
HALSHAM, par. England, York (E. Riding) ; 2800 ac. Pop. 284.

HALSTEAD, par. Eng. Kent; 1010 ac. Pop. 303.
HALSTEAD, a market tn. and par. England, co. Essex. The town, pleasantly situated on both sides of the valley of the Colne, $43 \mathrm{~m} . \mathrm{N} . \mathrm{E}$. London, is irregularly built, but has a neat appearance ; and, of late years, has undergone great improvements. It has two Established churches, one of them a large antique building; a Friends' meeting-house, an Independent and a Baptist chapel, a free grammar school, literary and
mechanics' institution, and various charities. There are three large silk and crape factories, and many of the females and children are employed in the making of straw-plait. Weekly market, Tuesday. Area of par., 6230 ae. Pop. 5710.

HALSTEREN, a vil. Holland, prov. N. Brabant, about 2 m . N. Bergen-op-Zoom, with a R. Catholie and a Calvinistic elureh, and a school. Pop. 538.

HALSTOCK, par. Eng. Dorset; 1970 ac. Pop. 626.
HALSTOW, two pars. England, co. Kent :-1, (Ifigh-) ; 2730 ac. Pop. 373.-2, (Lower-); 1320 ae. Pop. 297.

HALTERN, a m . Rhenish Prussia, gov. of, and 24 m . W.S.W. Münster; with two R. Catholic chnrehes, an hospital ; manufactures of woollen and linen cloth, and hosiery ; a printfield, tanneries, and mills; and seven annual fairs. Pop. 1934.

HAL'THAM-UPON-BAin, par. Eng. Lineoln; 2610 ae. Pop. 253.

HAL'TON, five pars. England :-1, Bucks; 1390 ac. Pop. 198.-2, Lancaster; 3830 ae. Pop. 694.-3, (East), Lincoln; 3920 ac. Pop. 627.-4, (IIolegate), Lincoln; 1320 ac. Pop. 544.-5, (West), Lincoln; 487 ) ae. Pop. 424.

HALTWHISTLE, a market tn . and par. England, co. Northumberland, and a station on the Newcastle and Carlisle Railway. The town, pleasantly situated on the S. Tyne, $32 \frac{1}{2} \mathrm{~m}$. W. Newcastle, has several dissenting places of worship, an endowed charity school, manufactures of linen, bricks, dye-works, a brewery, and a good trade in coal. Market day, Thursday. P. (1851), 1052. Area of par.,52,930 ac. P. 4655.

HALVERGATE, par. Eng. Norfolk; 2630 ac. P. 495.
HALWELL, two pars. England, Devon :-1, 5830 ac. Pop. 319.-2, 2720 ae. Pop. 445.

HALYS, river, Asiatic Turkey. See Kizil-Irmak.
HAM, a tn. Franee, dep. Somme, 15 m . S.S.E. Perome, surrounded by a marshy plain. It is an ancient place, and contains a church, with fine bas-reliefs and a curious erypt; but is chiefly deserving of notice for its citadel, which has been much strengthened by modern works, and serves as a state-prison, in which were confined Prince Polignae, and three other ministers of Charles X., who signed the ordonnances for the coupd'etat of 1830 ; and Louis Napoleon Bonaparte, for an absurd and premature attempt to seize the government of France, of which a more fortunate coup-d'etat has recently (1851) given him possession. IIam has manufactures of cotton goods, beet-root sugar, and clogs; and ten annual fairs. Pop. 2447.

HAM.-1, A hamlet, England, co. Surrey, on the Thames, 10 m . S.W. by W. London, and containing several handsome villas, with Ham Ilouse, ereeted for Henry Prince of Wales, son of James I. Pop.1391.-2, (West), A large vil. and par. England, co. Essex. The former, 4 m . E. by N. London, has a spacious church, and two dissenting places of worship, an endowed girls' school, several distilleries, printing-works, and flour-mills. Area of par., 5160 ac. Pop. 12,738.

HAM, four parishes, England:-1, Kent; 260 ac. Pop. 24.-2, Wilts; 1620 ac. Pop. 215.-3, (East-), Essex ; 2800 ac. P. $1461 .-4$, (High-), Somerset; 3840 ae. P. 1281.

IIAM-sur-Heure, a vil. and com. Belgium, prov. Hainaut, on the Ileure, 21 m. E. Mons. It contains an ancient castle; and has manufactures of nails, linen, and lace; ironworks, oil and flour mills; a trade in corn, bar-iron, timber, horses, and eattle; and three annual fairs. Pop. 1775.

HAM (ben), a vil. Holland, prov. Overijssel, 22 m . N.E. Deventer, with a Calvinistic church and sehool. In August, 1842, 43 houses were burned down. Pop. 748.

HAMADAN, a city, Persia, prov. Irak-Ajemi, 260 m . N.W. Ispalıan ; lat. $34^{\circ} 48^{\prime} \mathrm{N}$. ; lon. $48^{\circ} 26^{\prime}$ E. ; agreeably situated near the base of a great range of mountains, and overlooked by the lofty peak of Elvend. It looks like an old town, heaps of ruius presenting themselves on all sides; and is without any architectural objects of interest; the only large mosque being the Mesjid-i-Jumah, which has been recently renovated or rebuilt. The streets are narrow and dirty; still the city has a lively and bustling air about it. Its bazaars and earavanserais are numerous and extensive-some of them handsome; the former well furnished, and thronged with
tradesmen of all sorts-shoemakers, saddlers, blacksmith3, silversmiths, and workers in cotton-who all oceupy separate parts, and maintain great order in their arrangements. There are a vast number of tanneries in the city; the leather manufactured here supplying a large portion of all that is used in Persia. There are also considerable manufactures of coarse carpets, woollens, and cotton stuffs. Wine and rakeo-the latter a liquor distilled from the juice of the grape-are made by the Armenians. The trade whieh passes through the eity is large; IIamadan being the great centre where the routes of traffic between Persia, Mesopotamia, and Syria converge. During cight months in the year the climate is delightful; but in winter the cold is excessive, and fuel with difficulty procured. This eity is supposed to stand on the site of the ancient Ecbatana, built by Deioces, the first king of the Medes, for his imperial residence. The principal remains of the ancient city are the fragments of seulptured stone, to be seen in the foundations of walls and houses, and ancient coins and medallions. Pop. estimated at 30,000 .

HAMAH [Ifammath of Scripture; Greek, Epiphania], a city, Syria, pash. of, and 110 m . N. by E. Damascus, pic turesquely situated on both banks of the Orontes or Aaszy, here erossed by several bridges. It is built partly on a declivity, and partly on a plain. The streets are tolerably wide; the houses, with exception of a few of the best and largest, have mud walls, but are said to be richly and elegantly fittedup within. The prineipal buildings are the palace of the Mutzellim, and 13 mosques, one of which has a very ancient minaret. In the middle of the city is a square mound, on which formerly stood the castle. There are several bazaars, baths, and many fine residences, with spacious gardens attached. The principal trade of the eity is with the Arabs of the Desert who come to buy their tent-furniture and wool-

## Hamath, or hamah.-Frum Laburde, Voyage en Orient.

len abbas; and a considerable trade is also carried on with Aleppe, in European and colonial merehandise. One of the greatest curiosities here is the hydraulic wheels (noria or naoura), whieh supply the upper town with water. They are about a dozen in number; the largest about 70 ft . in diameter. By means of these wheels buckets of water are raised, which empty themselves into stone aqueducts, supported by lofty arches, on a level with the hill. Hamah is supposed to oceupy the site of the Epiphania of the Greeks; and is, probably, the capital of the kingdom of Hamath, the king of which sent presents to David, and entered into an alliance with him, after he had conquered the kingdom of Zobah. Pop. about 30,000.

HAMBACH (Mittel, Ober and Unter), a vil. Bavaria, Palatinate, 8 m . N.N.W. Amberg, with a R. Cathol:e church, ruinz of an old castle, and a trade in wine. Pop. 2065.

HAMBATO, a tn. Eeuador. See Ambato.
IIAMBIE, or liambye [ane. Hammus], a vil. and com. France, dep. Manches, 12 m. S.E. Coutances; with manufaetures of thread, a trade in eattle, and two annual fairs. Near it are the picturesque ruins of the old abbey of Hambye. P.3554.

HAMBLE-Le-Rice, par. Eng. Hants; 440 ac. Pop. 398.
HAMBLEDEN, par. Eng. Bucks; 6620 ac. Pop. 1241.
HAMBLEDON, two pars. England:-1, Hants; 9630 ac . Pop. 2069.-2, Surrey; 2020 ac. 1'op. 534.

HAMBLETON, par. Eng. Rutland; 1360 ac. Pop. 325. HAMBURG [Latin, Hamburgum; French, Hambourg; Italian, Amborgo], a free tn. Germany, cap. of a small republic of same name. a menber of the Germanic confederation, and
and a R. Catholic; an elegant new Jewish temple, and seven synagogues; an exchange, a noble edifice, only completed before the conflagration, and, though situated in the very heart of it, saved uninjured, consisting ehiefly of a magnificent hall,

1. St. Peter'a Church. 3. St. Nicholas' Church. 4. St. Catherine's Church 5. St. James's Church. 6. English Church. 7. Rath-haus (townhalt).
S. Exchange.
2. Great Hospit 11. Stadt Theatre. 12. Thalia Theatre. 13. Tivoli Theatre. 14. Observatory
3. Elbe Pavilion 16. Elb-hohe. 17. Railway Station. 18. Hafer Gate.
4. Millern Gate 20. Danim Gate 21. Ferdinand Gate.
5. Stein Gate. 23. Deich Gate. 24. Brook Gate 26. Laheck Gate. 27. Bertin Gate. 28. Gross Neumarkt and surrounded by a fine colonnade; a gymnasium, built in 1840 , provided with six professors, a library of nearly 200,000 vols., and many curious MSS., a museum, and good collection of physical and mathematical instruments; the Johanneum or Latin school, in handsome buildings adjoining the gymnasium, and designed, in conjanction with it, to furnish a complete course of education, philosophical, classical, and commercial, at a moderate rate; several well-endowed hospitals, among others, one which receives 500 orphans, and maintains them till educated, or apprenticed to a useful trade; a general hospital or infirmary, which can receive from 4000 to 5000 patients; a Jewish in firmary, well endowed, and an hospital for Jewish widows; a deaf and dumb institation, two asylums for the blind, an arsenal, observatory, three theatres, and numerous other places of public amusement; and various societies and associations, embracing all the more important objects of literature, seience, and art.
Hamburg does not depend much on manufactures, but possesses, among others, those of linen, cotton, and silk goods, hats, soap, tobacco, refined sugar, iron, tin and copper ware, machinery, jewellery, musi cal, mathematical, and surgical instruments, \&c. The trade is very extensive, including, to a greater or less extent, almost every article which Germany is able to sell, or requires to buy; and is greatly facilitated

TOWER OF THE CHURCH OF ST. JAMES, AND HOUSES OF THE 16Th AND 17 Th CENTURIES, HAMBURG -From Denidoff.
by the extensive means of communication both with foreign countries and with the interior. By the Elbe, vessels drawing 18 ft . can ascend at high water, and either deliver their

## IIAMILTON

cargoes directly in the warehouses, which line the bank, or send them by lighters into the very heart of the town. By the same means, also, a free and uninterrupted communication is given to the interior, and greatly extended by means of
stitution is a curions, and not very intelligible combination of the aristocratie and democratic principles. Very important modifications were proposed in 1848, and apparently sanctioned, but do not seem to have been yet carried into full effect. The fundamental principle of the constitution is, that the executive power is lodged in a senate or Rath, and the legislative power with a general control of the administration in the body of the burghers, represented by three colleges. The debt of Hamburg, in 1850, was $£ 2,427,386$; the receipts, $£ 593,447$; and the expenditure, £579,638. Pop. tn., 112,866; of whole territory, 188,054.

HAMBURG, several places, U. States. The only one deserving of netice is Itamburg, $S$. Carolina, $65 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Columbia, l. bank Savannah, opposite Augusta, with which it communicates by a bridge about 330 yards long. It is regularly built, and consists of a lower and up per town; the former, where business is chiefly done, lying along the river, while the latter occupies a commanding and airy situation on a height, which rises abruptly 60 or 70 ft . above it. The South Carolina Railway,
canals, which branch off to the Baltic, or penetrate into the basin of the Oder, and through it into that of the Vistula. Railways connect Hamburg with Rendsburg and Kiel, Schwerin and Rostock, and with Berlin and all E. and S. Germany. A great drawback to the trade is the want of a sufficient harbour, or rather of anything that can be called a harbour, the vessels being obliged to lie in the river, within a space railed off from the fair-way, and protected from the current by means of piles. The imports consist of sugar, coffee, tea, rice, tobacco, cotton, indigo, dye-woods, wine, spirits, spices, hides, fish, coals, British manufactured goods, \&c.; and the exports, of grain, seeds, butter, wool, salt provisions, cattle, bark, spelter, rags, German manufactures of all kinds, and Rhenish wines. The following table shows the number of vessels that entered and cleared at the port in the years 1845 to 1849 , with the gross value of the imports and exports for the same years:-

| Year. | Vespels Entered <br> Entered | Vessels Cleared | $V$ alue of limports. | Value of Exports. |
| :---: | :---: | :---: | :---: | :---: |
|  |  | Tons. | , | ${ }_{\sim}^{\boldsymbol{L}}$ |
| 1845 | 581,424 | -84,355 | 21,255,790 | 20,054,894 |
| 1816 | 558,060 | 559,635 | 20,378,725 | 19,780,359 |
| 1847. | 631,590 | 628,986 | 21,725,490 | 21,283,175 |
| 1818 | 593,634 | 593,(0)4 | 17,736,800 | 15,129,672 |
| 1849 | 564282 | 556,344 | 20,662,213 | 18,742,653 |

Accounts are kept in marks of 16 schillings $=$ about $1 \mathrm{~s} .2 \frac{1}{2} d$;; the mark banco, an imaginary money, is equal to $1 \mathrm{~s} .5_{4}^{3} \mathrm{~d}$. The principal weights and measures are the Fuss (foot) $=$ 0.94021 ft .; the Elle $=0.62681$ yard ; the Fass $=0.18135$ quarter; the Kanne $=0.397297$ gallon; and the Pf fund $=$ 1.068387 lb . avoirdupois.

The territory of Hamburg has an area of about 114 geo. sq. m. It consists of several detached portions, but the more important and central part, including that on which the town stands, is enclosed by Deumark, on all sides except the S. and S.W., where its boundary is the Elbe; it comprehends, likewise, the bailiwick of Bergedorf, and the little territory of Vierliinden, 16 m . from Hamburg, the sovereignty of both of which it enjoys, in common with Lïbeck; several islands, a small space on the l. bank of the Elbe, opposite the town; and, at the mouth of the Elbe, the bailiwick of Kitzebiittel, in which is the harbour of Cuxhaven. As a nember of the Germanic confederation, it has a full vote in the plenum, and shares a vote, in the minor diet, with tho wther free towns, Frankfort, Liibeck, and Bremen. Its con-
135.3 m . long, commences at Charleston, and has its terminus here. 1'op. about 2000 .

HAMELN, a tn. Hanover, Calenburg, cap. bail. of same naine, beautifully situated on the Weser, here crossed by a suspension bridge, 816 ft . long, resting on a pier which rises from an island in the middle of the river, 25 m . S .W. Hanover. It is surrounded by dilapidated walls with four gates, and derives considerable interest from the antiquated form of its buildings, many of the houses being of wood, in the old German style. It contains a fine old Stiftskirche, two other churches, tour towers, a burgher sehool, library, and several hospitals and poorhonses; is the seat of several courts and public offices, and las extensive breweries and distilleries, vinegar works, a tobacco factory, a salmon fishery, and a considerable trade. Pop. tn., 6191 ; bail., $10,171$.

HAMERINGHAM, par. Eng. Lineoln; 1370 ac. P. 171.
HAMERTON, par. Eng. Iluntingdon; 2090 ac. P. 160.
HAMID, tn. Asiatic Turkey. Sce Isbarta.
IIAMILTON, numerous places, U. States, including1, A vil. and township, New York, 94 m . W. by N. Albany, on the Chenange, with three churches, an academy, and a Baptist literary and theological institution. Pop. 3738.2, A vil. Ohio, $85 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Columbus, l. bank Great Miami, a bridge over which connects it with Rossville. It contains five churehes, a female academy, and several mills. Pop. 1800.-3, A township, New Jersey, 30 m . S.E. Woodbury. Pop. 1565. - 4, A township, Pennsylvania, 12 m. N.E. Gettysbnrg. Pop. 1069.

IIAMILTON, a thriving th. Upper Canada, cap. Gore dist., S. side of Burlington Bay, Lake Ontario, the prineipal part being built about 1 m . from the bay. The public buildings, many of which are handsome, include jail and courthouse, two market-houses, custom-house, theatre, and 16 churches and chapels. It is the seat of an active and inereasing trade. P'op. (1855), about 22,000 .

HAMILTON, a parl. bor. and market $t n$. Scotland, co. Lanark, 10 m. S.E. Glasgow, with which it is connected by railway. It lies on a rising ground, sloping E., near the conflux of the Avon with the Clyde, in a rich country, and close by the palace of the Duke of Hamilton. It is a very scattered place, almost every house having a piece of garden-ground attached, giving to the town a very rural and pleasing aspect. The houses, all of stone, in the lower part of the town, are chiefly of one story, and of an inferior description; but in the upper and more modern portions, which are rapidly extending, in consequence of the easy ac-

## HAMM

cess from Glasgow, there are many good, and some elegant tenements; but the streets are indifferently lighted with gas, still more indifferently cleansed, and the supply of water is defective. The county hall, a conspicuous Grecian edifice, and the extensive cavalry barracks, are the most important public buildings. There are 10 churches-one Established, one Free, four U. Presbyterian, one Episcopal, one Congregationalist, one Unconnected, and one R. Catholic; a goodly number of excellent schools, of which the Hamilton academy, and St. John's grammar-school, are the most important. The sewed muslin trade, and the weaving of muslins, galas, \&c., are the principal manufactures carried on; the former occupying, in the town and environs, about 4000 hands, and the latter about 900 . Hamilton palace, the seat of the Duke of Hamilton and Brandon, is so close upon the town as almost to form part of it. It is a large building, with an elegant N.W. front, adorned with a fine portico of Corinthian columns, and seated in very extensive and well-laid-off pleasuregrounds, on the river Clyde. It contains a good collection of paintings, and the grounds are accessible to the public. In the vicinity are the ruins of Cadzow castle, and a few remarkable old oaks, the remains of Cadzow forest, in which a herd of the original breed of wild cattle are kept. Dr. William Cullen was born at Hamilton in 1710 . Pop. (1841), 8876 ; (1851), 9620. Area of par., 14,240 ac. Pop. (1851), 11,731.

HAMM, a vil., republic of, ard 3 m . N.E. Hamburg, near r. bank Bille. It consists of three parts-Hamm, Hammerdeich, and Peterscamp or Rossberg; and contains numerous villas of the citizens of Hamburg, a church, poorhouse, and infant, and several private schools; and has two annual fairs, chiefly for cattle. The inhabitants raise fruit and vegetables for Hamburg. Pop. 1339.

HAMM, a tn. Rhenish Prussia, gov. of, and 23 m . N.N.W. Arnsberg, cap. circle of same name, at the confluence of the Ahse with the Lippe, which is here crossed by a bridge. It was once fortified, and is still entered by four gates; contains a castle, one R. Catholic, and three Protestant churches, a gymnasium, Franciscan monastery, barrack, and military hospital ; is the seat of a court of law and several public offices, and has manufactures of linen and leather, a bleachfield, a trade in linen and cattle, and four annual fairs. Pop. 5689.-Circle, area, 132 geo. sq. m. Pop. 42,204.

HAMMAMET, a modern seaport $t n$., on a wide gulf of the same name, regency of, and 40 m . S.E. Tunis ; lat. $36^{\circ} 30^{\prime} \mathrm{N}$. ; lon. $10^{\circ} 40^{\prime} \mathrm{E}$. Near it are many ancient ruins. It carries on a considerable trade with Tunis, to which it sends grain, oil, and wool. Pop. 8000.

HAMME, a vil. and com. Belgium, prov. E. Flanders, 24 m. N.N.E. Termonde, r. bank Durme. It contains two churches, two castles, a courthouse, an orphan and ordinary hospital, and several primary schools; and has manufactures of linen and woollen cloth, ribbons, cordage, starch, soap, and chocolate; several breweries, salt refineries, dyeworks, and oil, flour, malt, and mustard mills. Pop. 9562.

HAMMELBURG, a tn. Bavaria, Lower Franconia, cap. dist. of same name, at the confluence of the Thulba with the Saale, here crossed by a bridge, 26 m . N. Würzburg. It is walled, has a parish church, chapel, castle, townhouse, Franciscan monastery, poorhouse, and hospital; manufactures of linen; saw, bark, walk, gypsum, and four mills; a trade in wine, fruit, and cattle; and six annual fairs. Pop. 2630. Area of dist., 48 geo. sq. m. Pop. 11,771.

HAMMERFEST, a maritime tn. Norway, bail. Finmarken, on Hvalöe [Whale Island], a bare, treeless, barren spot; lat. (cliurch) $70^{\circ} 40^{\prime} \mathrm{N}$. ; lon. $23^{\circ} 42^{\prime}$ E. (r.) It is the most N. town in the world, lies in a fine secure bay, and consists of about 100 scattered wooden houses, with a church, and several stores; and is defended by three small batteries. It carries on a lively trade with Britain, Holland, Germany, Denmark, and Sweden, and more especially with Russia, in the skins of the bear, rein-deer, goat, otter, fox, walrus; and in walrus-teeth, eider down, oil, and fish. About 200 to 250 fishing boats annually frequent the bay, and 100 large vessels; and several vessels are sent each year to Spitzbergen, to hunt the white bear and walrus, and procure skins and down. Though within the Arctic circle, the winter is comparatively mild, and the surrounding waters seldom freeze, so that the inhabitants are enabled to fish in boats the whole year round. Pop. (1845), 416.

HAMMERÖE, a peninsula and par. Norway, bail. Nordland, on the West Fiord, about lat. $68^{\circ} 10^{\prime}$ N. Pop. 1932.

HAMMERSMITH, a vil. England, co. Middlesex, about $3 \frac{1}{2} \mathrm{~m}$. W. London, on the Great-western Road, along which the principal street extends. The other streets are, in general, narrow and irregular, but have, of late years, been much improved. Many of the older houses are of an inferior description, but most of those of modern erection are handsome. The latter include a number of elegant villas towards the Thames. The village is well paved, lighted with gas, and amply supplied with water. There are two Established churches, two Independent chapels, one Wesleyan Methodist, one Baptist, a Friends' meeting-house, and a R. Catholic chapel; several charitable foundations, most of them associated with educational objects; a school of industry for girls, and a number of day, Sunday, and boarding schools. The Thames is here crossed by a magnificent suspension bridge. The vicinity is occupied chiefly by nurscries and market gardens. Pop. 13,453.

HAMMERSTEIN, a th. Prussia, prov. W. Prussia, gov. of, and 81 m . W. Marienwerder, on the Zehe. It has a Protestant, and a R. Catholic church, and a synagogue; manufactures of woollen and linen cloth, a brewery and distillery, a trade in cattle, and five annual fairs. Pop. 1646.

HAMMERTON KIRK, par. Eng. York (W. Riding) ; 2190 ac. Pop. 341.

HAMMOON, par. Eng. Dorset; 870 ac. Pop. 57.
HAMOA or Samoa Islands. See Navigator's Islanis.
HAMOON, a shallow lake, or rather extensive, reedy morass, in S.W. Afghanistan, prov. Seistan, extending between lat. $30^{\circ} 42^{\prime}$ and $31^{\circ} 54^{\prime} \mathrm{N}$.; lon. $61^{\circ} 8^{\prime}$ and $62^{\circ} 10^{\prime} \mathrm{E}$ It has sometimes been confounded with Lake Zurrah, a little further S.; but the latter is now nearly, if not entirely, dried up. It is about 70 m . long, N.E. to S.W.; breadth, 15 m . to 20 m .; has rarely a depth of more than from 3 ft . to 4 ft ., and is, to a great cxtent, though not wholly, covered with rushes and reeds, which cows eat with greediness, and on which they readily fatten. Its water is salt, and its surface is supposed to be on the increase. Innumerable wild hogs harbour in the reeds, and commit great havoc on the cultivated grounds. Geese, ducks, and other water-fowl, are numerous. The pelican is common. Fish do not seem to abound. The Hamoon receives the Helmund, Adruscund, the Furrah Rood, and several other minor streams.

HAMPDEN, two pars. England, Bucks:-1, (Great-), 1820 ac. Pop. 290.-2, (Little-), 620 ac. Pop. 83.

HAMPNE'T'T, two pars. Eng.:-1, Gloucester; 1190 ac. Pop. 195.-2, Sussex, (West-) ; 1850 ac . Pop. 520.

HAMPRESTON, par. Eng. Dorset; 5090 ac. P. 1193. HAMPSHIRE. See Southampton.
HAMPSHIRE (NEw), one of the U. States of N. America (cap. Concord) ; bounded, N. by Lower Canada, E. by Maine, S.E. by the Atlantic, S. by Massachusetts, and W. by Vermont-from which it is separated by the River Connecticut; between lat. $42^{\circ} 40^{\prime}$ and $45^{\circ} 12^{\prime} \mathrm{N}$.; lon. $70^{\circ} 50^{\prime}$ and $72^{\circ} 40^{\prime} \mathrm{W}$. It is 160 m . long, N. to S. ; and varies from 19 m . to 90 m . in breadth, E. to W.; area, $9280 \mathrm{sq} . \mathrm{m}$., or $5,939,200 \mathrm{ac}$. This state has a sea-coast of only 18 m .; and the shore is generally a sandy beach, bordered by salt marshes, and indented with creeks, admitting only small vessels. There are only two bluffs along the coast, called Great and Little Boar's Heads. For the distance of 20 m . or 30 m . from the sea, the land is almost level, but thereafter rises; and in its N. part is traversed, S.W. to N.E., by a continuation of the Alleghanies, culminating in Mount Washington, 6234 ft . high-the loftiest summit E. of the Rocky Moun-tains-and having various other peaks, 4000 ft . to 6000 ft . high; among which are Mounts Adams, Jefferson, and Franklin. N. of these mountains, the country is hilly, rocky, and barren; but to the S., on the declivities of the lower hills, and in the valleys between them, the soil is good, and along the margins of the rivers it is excellent. The principal rivers are the Connecticut, the Merrimac-both navigable for a considerable distance-and the Piscataqua. There are also several lakes-of which Lake Winnipisseogee, 20 m . long, and 1 m. to 10 m . broad, is the largest. The climate is subject to gieat extremes. The principal crops are wheat, rye, flax, and hemp; barley, oats, pease, and beans are also raised. Apple and pear trees are abundant in the cultivated districts;
and the hilly and mountainous regions are still covered with extensive forests of pine, oak, cedar, hemlock, beech, maple, poplar, \&c. In the forests, blaek bears, wolves, foxes, wild cats, racoons, and gray, striped, and flying squirrels are still common; but the moose-deer, the beaver, and black squirrel have become rare. Of domestic animals, cattle, sheep, and pigs are numerous and large; but horses are both few and small. The manufactures consist of woollen, cotton, iron, leather, furniture, \&c. The commerce is inconsiderable. Exports (1848), £1785; imports, £13,282.

The legislature consists of a senate and house of representatives; and the exccutive power is vested in a governor and a council of five members-all of whom are elected annually by the people. The judiciary power is vested in a supreme court and a eourt of common pleas-the judges in which are appointed by the governor and council, and hold their offices during good belaviour, but not beyond the age of 70 .

New Hampshire was first settled in 1623, at Dover and Portsmouth. It was for some time under the jurisdiction of Massaehusetts, but since 1741 it has remained a separate state. Pop. (1840), 284,574; (1850), 317,999.

IIAMPSTEAD, a vil. and par. England, co. Middlesex, 4 m. N.N.W. London. The village occupies the slope of a hill; has narrow, crooked, and inconvenient streets; houses exccedingly irregular ; a neat briek Established church, and several dissenting chapels; national and Sunday schools, and an institution for edueating, clothing, and apprenticing poor children. The medicinal springs of Hampstead were formerly held in high estimation, but are not now so popular, although the place itself continues to be much resorted to for the salubrity of its air, and the beauty of its situation. The house, formerly the Upper Flask Inn, in Migh Street, and now a private residence, was the resort of the famous Kit-Kat Club. The heath which crowns the summit of the hill on the face of which llampstead stands, comprises about 280 ac ., and is sprinkled over with handsome villas. Area of par., which includes part of the hamlet of Kilburn, 2070 ac . Pop. 10,093.

HAMI'SEAD, two pars. Eng. Berks:-1, (Marshall-); 1810 ac. Pop. 325.-2, (Norris-); 6280 ac. Pop. 1280.

HAMPS'THWAITE, par. England, York (W. Riding) ; 9600 ac. Pop. 2500.

HAMP'ON, a vil. and par. England, co. Middlesex. The village, pleasantly situated, l. bank Thames, 15 m . W.S.W. London, has narrow streets, and generally irregular buildings, though there are also some excellent houses; and around it are many beautiful villas and noble mansions. The church is an elegant structure, with a square tower at the W. end: and there is an Independent chapel, and several boarding and other schools, ineluding a free grainmar school. Area of par., 3190 ae. Pop. 4711.

The royal palace of Hampton Court is about 1 m . from the village-the grounds extending to the margin of the Thames. The original palaec, which consisted of five quadrangles, of which two only now remain, was built by Cardinal Wolsey, who presented it to IIenry VIII., by whom it was subsequently enlarged, and who formed around it a royal park or chase, which he inclosed and stocked with deer. A third quadrangle was added by Sir C. Wren, for William III., who laid out the gardens and park in the Dutch taste. The palace, as it now stands, consists of three eourts, the first of the age of Wolsey, the second of Henry VIII., after Wolsey's death, and the third, as above-mentioned, of the age of William III. Hampton Court contains, amongst a great deal of rubbish, many valuable pictures by Holbein, Lely, Kneller, West, $\& \mathrm{c} . ;$ and also seven unequalled eartoons by Raffaele. The gardens comprise about 44 ac . The private garden is a curious specimen of the old style; presenting a series of raised terraces, formal flower-plots, and long sliady arcades. Hampton Court has been inhabited successively by Henry VIII., and his children; James I., and his son, Charles I.; Cromwell; William III., and his queen; Queen Anne; and, lastly, George II. Part of it is now occupied by decayed gentlemen and gentlewomen, with their servants. In November, 1838, the palace, gardeus, and grounds, were thrown open to the pubhe, without any charge.

HAMP'TON (Little). See Little Mampton.
HAMPTON, several pars. England:-1, (Bishop's), Hercford ; 2980 ac. Pop. 785.-2, (Gay), Oxford; 620 ac. Pop. 74.-3, (Great), Worcester; 1670 ac. Pop. 469.-4,
(Little), Sussex; 760 ac. Pop. 2270.-5, (Lovett), Woreester; 1580 ac. Pop. 174.-6, (Lucy or Bishop's), Warwiek; 3130 ac. Pop. 458.-7, (Maiscy), Gloucester ; 1920 ac. Pop. 410.-8, (Nether), Wilts; 800 ac. Pop. 149.-9, (Poyle), Oxford; 830 ac . P.141.-10,(Welsh), Salop; 2970 ac . P. 596 .

HAMPTON-in-Ardex, a vil. and par. England, co. Warwick. The village, $12 \frac{1}{2} \mathrm{~m}$. N.N.W. Warwick, a station on the Midland Railway, stands on a commanding eminence, near the N. extremity of the ancient forest of Arden, and consists of one irregular row of briek houses. It has an old parish church, and two charity schools. Area of par., 12,910 ac. Pop. (agricultural), 3306.

HAMP'ON-Minchin, a market tn. and par. England, co. Gloncester. The rown, 12 m . S. by E. Gloucester, is very ancient, situated on high ground, eonsists of four principal streets, crossing each other at right angles, and exhibits appearances of decay. It has a parish church, a Baptist chapel, several schools, and some small charities. There are several woollen cloth manufactories in the parish and neighbourhood. Weekly market Tuesday. Area of par., 4880 ac . Pop. 4890.-(Local Correspondent.)

HAMPTON ROADS, a branch of Chesapeake Bay, U. States, Virginia, off the mouth of James river. It is an important naval station, is defended by two strong forts, and has sufficient depth of water for the largest war ships.

HAMSEY, par. Eng. Sussex; 2530 ac. I'op. 533.
HAMVA, or Hanowa, a vil. IIungary, Hither Theiss, co. Gömör, r. bank Sajo, 15 m . from Tormallya. It contains a Protestant church. Pop. 1390.

IIAMWORTIIY, par. Eng. Dorset; 1270 ac. Pop. 351.
IIAN-KiAng.- I, A river, Corea, which, rising near Ngantang, enters the strait of Corea, near Chin-hai, after a S . course of about $200 \mathrm{~m} .-2$, A river, China, provs. Shensee and Houpe, which, after a tortuous S.E. course of about 700 m ., falls into the Yang-tze-kiang, at Han-Yang, after receiving numerous tributaries, and passing several considerable towns.

HAN-Tchong, a city, China, prov. Shensee, l. bank Hankiang; lat. $32^{\circ} 56^{\prime} \mathrm{N}$. ; lon. $107^{\circ} 12^{\prime}$ E.; in a mountainous country; with some trade in heney, wax, musk, and cinnabar.

HAN-Yang, Han-Tciing, or King-Ki-Tao.-1, The cap. city of Corea, about the middle of which it is situated; lat. $37^{\circ} 40^{\prime} \mathrm{N} . ;$ lon. $127^{\circ} 20^{\prime} \mathrm{E}$. It is the residence of the sovereign, but is very little known to Europeans.-2, A city, China, prov. Houpe, at the confluence of the Han-kiang with the Yang-tze-kiang; lat. $30^{\circ} 35^{\prime}$ N.; lon. $114^{\circ} 18^{\prime} \mathrm{E}$. It is surrounded with marshes, and possesses a considerable trade and population.

HAN-sur-Lesse, a vil. Belgium, prov. of, and 36 m . S.S.E. Namur, on the Lesse, which here is lost in the chasm of a calcareous hill, and, after pursuing its subterranean course for nearly a mile, reappears. Lesse has a remarkable and much-visited grotto, called Trou-de-Han, scarcely surpassed by any other in Europe.

HANAU, a tn. Hesse-Cassel, cap. prov. of same name, in a fertile district, at the confluence of the Kinzig with the Main, 13 m . E. Frankfurt, with which it is connected by railway. It consists of an old and a new town, is entered by six gates, and communicates with its different quarters, and the opposite sides of the rivers, by ten bridges. It is regularly built, very much after the manner of a Dutch town; and consists of straight, well-paved, and well-lighted strcets, and of several handsome squares. It contains an electoral castle, three churches, two townhouses, a burgher and grammar school, a school of design, a gymnasium, a custom-house, house of correction, infirmary, and several hospitals; is the seat of several important courts and offices; and has manufactures of jewellery, carpets, and tapestry ; silk and woollen goods, iron-ware, stained paper, wax and tallow candles, hats, delft-ware, \&c.; and a considerable trade in wood, drugs, dye-wares, and the above artieles of manufacture. It has also numerous worsted mills, tanneries, and distilleries. In 1593 many persons, driven by perseeution from the Low Countries, took up their residence in Hanau, and amply rewarded its hospitality by giving it the benefit of their industry and skill. Manufaetures, accordingly, then began, and have searcely ever since ccased to flourish. During the Thirty Years' War, Ramsay, a Scotchman, held the town for nine months against the Imperialists. In 1813 a battle was fought between the French and Bararians, to the advantage
of the former, and part of a suburb was burned down. Pop. 15,265 .- 'He Province of Hanau is situated in the S. of the electorate, and is the smallest of the four provinces into which it is divided. It is mostly covered by the Spessart mountains, but has several large and fertile plains, particularly towards the Main, which forms its S.W. boundary, and receives all its waters. Area, 333 geo. sq. m. Pop. 140,855.

HANAU, a vil. and par. Switzerland, can. of, and about 18 m . from St. Gallen, on the Thur. It is well built, has a parish church, used both by Protestants and R. Catholics; and some trade in hemp, flax, and dairy produce. Pop. 1953.

HANBURY.-1, A vil. and par. England, co. of, and $9 \frac{1}{2} \mathrm{~m}$. N.E. Worcester. The village consists of a few scattered houses, mostly of brick, and remarkable for the neatness of their appearance; has a parish church, a Wesleyan clapel, a charity school, founded in 1627 ; and several other charities. Area of par., 7260 ac. Pop. 1069.-2, A par. England, co. Stafford; 13,630 ac. Pop. 2483.

HANDA, an isl. Scotland, about 1 m . square, off W. coast co. Sutherland, from which it is separated by a narrow channel ; lat. (centre) $58^{\circ} 23^{\prime} \mathrm{N}$. ; lon. $5^{\circ} 11^{\prime} 45^{\prime \prime} \mathrm{W}$. (r.) ; and affording pasture for a few sheep. Pop. (1841), 65 ; principally engaged in fishing and fowling.

HANDBOROUGH, par. Eng. Oxford; 2820 ac. P. 1153.
HANDFORTH, with Boxden, a township, England, co. Chester, 5 m . S.W. Stockport, a station on the Manchester and Crewe Railway. It las a national school, and printworks. Pop. 650.

HANDLEY, twe pars. England:-1, Chester; 1976 ac. Pop. 381.-2, Dorset; 5670 ac. Pop. 1076.

HANDSCHUHSHEIM, a vil. Baden, circle Lower Rhine, bail. of, and 3 m . N.W. Heidelberg, r. bank Main, with a parish chureh, two castles, and mannfactures of cop-per-ware, a brewery, and eight mills. Pop. 2143.

HANDSWOR'I'H, two pars. England:-1, York (W. Riding) ; 3510 ac. Pop. 2862.-2, (with Soho), Stafford; 7720 ac. Pep. 6138.

HANDZAEME, a vil. and com. Belgium, prev. W. Flanders, 16 m. S.W. Bruges. It has manufactures of starch, a distillery, a tannery, and two breweries. Pop. 2876.

HANERAU, a vil. Denmark, in the N. W. of Holstein, on the Eider; with a liandsome manor-house, and the remains of an old castle, which, in the 12 th century, was the strongest bulwark of Holstein, towards the Ditmarshes. Pop. 2920.

HANG-Chow-roo, or Mang-Tcheou-fu, a large city, China, cap. of prov. Che-Kiang, on a plain at the S. terminus of the Imperial canal, and within 2 m . of the river Tsien-tangKiang, abent 40 m . or 50 m . from its mouth, 90 m. S.W. Slianghae; lat. $30^{\circ} 20^{\prime} 20^{\prime \prime} \mathrm{N}$.; lon. $120^{\circ} 7^{\prime} 57^{\prime \prime}$ E. (ı.) It is of oblong form, and is surrounded with ligh, well-built walls, about 8 m . in circuit, inclosing many large vacant spaces. The streets are narrow, but well paved, and clean; and throughout the town are numerous triumphal arches, monuments to great men, and gorgeous Buddhist temples. The shops and warehouses are said to be equal to the best in Londen, both as regards their size and the quantity and beauty of the goods displayed in them-silks, gold and silver ornaments, jade stones, and curiosities of all kinds, being leading articles. The houses are generally of but one story high. A large portion of the inlabitants reside in the suburbs, and in boats on the waters around them. A part of the space within the walls is divided off for the accommodation of the Manchoo garrison, which consists of 7000 troops. The governor-general of Che-kiang and Fe-kien resides in this city, and also the gevernor of the province; who, with their courts and troops, in addition to the great trade passing through, render it one of the most impertant and richest cities in China. Hang-Chowfoo is famous for its silk manufactures-particularly for its flowered taffetas, and different kinds of satin. It is said to produce more silk than all the other districts of the empire-there being 60,000 persons employed in this branch of industry alone, within the walls of the city. The river, opposite the city, is about 4 m . bread at high water, and is crowded with vessels of all descriptions-being the channel by which vast quantities of merchandise are received from, and exported to, the southern provinces. Hang-Clow-foo is the celebrated Kinsai of Marce Polo-the capital, in his time, of Southern China. Pop. estimated at 700,000.-(Middle Kingdom; Fertune's Tea Districts of China, 1852.)

HANGLETON, par. Eng. Sussex ; 1000 ac. Pep. 71. HANGOUD, or HANG-0̈-udd, a cape, Russia, S.W. extremity of Finland, to the N. of the entrance of the Gulf of Finland; lat. $59^{\circ} 45^{\prime} 58^{\prime \prime} \mathrm{N}$. ; lon. $22^{\circ} 57^{\prime} 53^{\prime \prime} \mathrm{E}$. (土) , with a lighthouse upon it, and near it a good harbour. Hard by this cape, the Swedish was signally defeated by the Russian fleet, in 1714.

HANGOO, or Hangu, a small tn. Afghanistan, 15 m . W. Kohat, in a pleasant and fruitful country, well watered by $r_{i}$ merous fine springs. It contains a small bazaar and stonebuilt fort. Lat. $33^{\circ} 31^{\prime}$ N.; len. $71^{\circ} 15^{\prime}$ E. Pop. 1500.

HANKERTON, par. Eng. Wilts; 2130 ac. Pop. 417.
HANLEY, twe pars. England, Worcester:-1, (Castle); 5630 ac. Pop. $1677 .-2$, (William, or Upper) ; 960 ac. P. 136 .

HANLEY and Shelton, two townships, forming a large and improving market tn. England, ce. Stafford, in the centre of the Potteries, pleasantly situated on rising ground, near the Trent, 1 m . N. Stoke, within the par. and parl. bor. of which it is comprised, $15 \mathrm{~m} . \mathrm{N}$. by W. Stafford. The streets are generally spacious, well paved, and lighted with gas; and the inliabitants amply supplied with water; houses, for the most part, neat, and many of them elegant and spacious. There are several inclosed and commedions market-places, a liandsome townhall, five churches, and twelve chapels, belonging to various Dissenting bodies. Several of these churches and chapels are elegant structures. The town also contains British and National Schools, numereusly attended; a museum, and mechanics' institution; infirmary, subscription library, newsroom, and other useful institutions. Weekly markets on Wednesday and Saturday; an important cattle market every alternate Tuesday; inhabitants are chiefly occupied in the potteries. Pop. 20,564.

HANMER, par. Wales, Flintshire. Pep. 2691.
HANNEY, two pars. England:-1, Lincoln; 1010 ac. Pop. 122.-2, (West), Berks; 3060 ac. P. 1153.

HANNIBAL.-1, Three isls. off N.E. coast Anstralia; lat. $11^{\circ} 35^{\prime} \mathrm{S} . ;$ lon. $142^{\circ} 51^{\prime} 20^{\prime \prime}$ E.; low, and covered with bushes. - 2, A township, U. States, New York, 176 m . W.N. W. Albany. Pop. 2269.

HANNINGFIELD, three pars. England, Essex :-1, (East) ; 3770 ac. Pop. 449.-2, (South); 1620 ac. Pep. 226. -3 , (West); 2800 ac Pop. 521.

HANNING'1ON, three pars. England :-1, Northampton; 1270 ac. Pop. 201.-2, Hants; 1220 ac. Pop. 261.3, Wilts; 2450 ac. Pop. 433.

HANNSDORF (Ober and Nieder), two nearly contiguons vils. Prussia, prov. Silesia, gev. of, and $50 \mathrm{~m} . \mathrm{S} . \mathrm{S} . \mathrm{W}$. Breslau. They contain a R. Catholic church, and a castle; and have tile-works, and several mills. Pop. 2087.

HANNUT, a vil. and com. Belgium, prov. of, and 22 m . W. Liége. It is poorly built, but has a modern castle, a saltrefinery, two breweries, a flour, and two eil mills. Pep. 1157.

HANOVER, numerous vils. and townships, U. States, particularly:-1, A vil. and township, New Hampshire, pleasantly situated near the Connecticut, 48 m . N.W. Concord, with a Congregational church, Dartmouth college, a medical institution, and a library of 16,500 vols. Pop. 2613.

HANOVER, or Hannover; [French, Hanovre; Latin, Hanovera], a kingdom in the N.W. of Germany, holding the fifth rank in the Germanic Confederation, and bounded, N. by the German Ocean, and the duchies of Holstein and Laucnburg, from which it is separated by the Elbe; N.E. by Meck-lenburg-Schwerin; E. Prussia and Brunswick; S. Prussian Saxony, Hesse-Cassel, and Rhenish Prussia; and W. Hollaud; lat. $57^{\circ} 18$ to $53^{\circ} 52^{\prime}$ N.; lon. $6^{\circ} 40^{\prime}$ to $11^{\circ} 35^{\prime}$ E. It is of very irregular shape; and, by the interjection of the duchy of Oldenburg, in the N., and of a long irregular belt of Brunswick, in the S., is divided into three distinct portions -the first, and far largest, forming Hanover proper, situated on the E., and tolerably compact; the second on the W., and separated from the former by Oldenburg and Rhenish Prussia, except at one spot, where the continuity is maintained by a narrow tract, not more than 6 m . wide; and the third in the S., completely isolated from the other two. Besides these three principal, there are three minor portions, all in the $S$. and so small, as not to require separate notice; and a range of sandy islands lining the coast. Tetal area, 11,105 geo. sq. m.; capital, Hanover. Within the territory are included part of Brunswick, and the free town of Bremen. It is
divided into the following seven landrosteien, or provinces, which are again subdivided into principalities:-

Physical Features.-The surface in the $S$. is covered by the IIarz Mountains, some of whose summits there attain a height of more than 3000 ft ; but all the rest of the country belongs to the W. part of the great plain which stretches E. across Prnssia and Russia, and only terminates at the foot of the central platean of Asia. In Hanover this plain, after free of the N . slopes of the Harz, subsides into an extensive, and often dreary, monotonous flat, with a gentle slope to the North Sea-to the basin of which it wholly belongs. The only exception to the general flatness is caused by branches of the Harz, of moderate height - one of which stretches in a N. N.W. direction, and forms the water-shed between the Ems and the Weser. In addition to these two rivers-the former of which traverses the $W$. portion of the kingdom, $S$. to N., while the latter traverses the W. of the E. portion, and drains the greater part of it, either directly or by its combined tributaries, Leine and Aller-the only other river of consequence is the Elbe, which skirts the N.E., and bounds a consilerable portion of the N., but is not augmented within it ly any important tributary. The Harz are rich in minerals, which have long been worked to a great extent, partly in common with Brunswick; and still form one of the chief sourees both of wealth and employment. They produce a little gold, a considerable amount of silver, some zinc, from 100 to 150 tons of copper, and about 4000 tons of iron annually. A branch of the Harz, betwcen the Leine and Weser, produces both coal and lignite; and, in several quarters, rock salt is found in large quantities. The other minerals are of no consequence.
Climate.-Considering the N. exposure of the country, the climate is remarkably mild, except in the higher districts of the S . The mean annnal temperature is $48^{\circ}$. The greatest cold seldom excceds $32^{\circ}$, and the greatest heat $95^{\circ}$. The prevailing wind is the W.; the air on the whole healthy; but its sudden changes of temperature, particularly near the coast, are trying to weak constitutions; and in the low flats, when the rivers become sluggish, and numerous stagnant pools are formed, dysentery, ague, and other intermittent fevers, often prevail.
Agriculture.-In the low alluvial flats the soil is remarkably rich; but usually so overcharged with moisture, that it cannot be safely brought under the plough, and is much more profitably employed by being allowed to remain in natural, or formed into artificial meadows, which yield heavy crops of hay, or feed large numbers of cattle, of a very superior deseription. When the ground attains a higher elevation, the soil often consists, either of a thin vegetable mould, on a substratum of sand-so poor, as often to be left in a state of nature, with its covering of heath; or of deep beds of peat. But, after deducting these two classes of soil, there remain extensive tracts of arable land, amounting to one-fourth of the whole surface, of good incdiun fertility, and so industriously cultivated, as to produce more corn than required by the home consumption. Flax also, for which much of the soil is admirably adapted, is extensively cultivated, and forms an inportant artiele of export; not so much, however, in its raw state, as in the form of yarn. The domestic animals, generally of superior brecds, have been estimated at 250,000 horses, 900,000 horned cattle, $1,620,000$ sheep, 30,000 goats, and 700,000 swine. Poultry also, particularly geese, are reared in vast numbers in the marshes; and the rearing of bees is so generally practised among the moors, as to form no contemptible branch of national economy. Forests occupy nearly one-sixth of the whole surface. They consist of hariwood and pine, in nearly equal quantities; and are extensively used in smelting.

Manufactures and Trade.-The extent to which mining operations are carried on in the Ilarz have been already mentioned. They unquestionably form, next to agriculture, the most important branches of national industry. Indeed, other manufactures are comparatively of limited extent. The most important are tissucs of flax and hemp. These, however, are chiefly domestic. The only other articles deserving of notice are-hosiery, ribbons, leather, chicory, tobacco, oil, chemical products, becr, and brandy. The trade has the advantage of three navigable rivers, and a considerable extent of sea-coast; and the government lias been as forward as any other in Germany in availing itself of railways, which already communicate, both E. and W., with the great continental trunks, and are in course of being still farther extended. Hanover, however, has not much of its own produce to export, and is, consequently, very much restricted as to imports on its own account. The greater part of its trade, accordingly, is transit; which, in recent times, has made considerable progress. It possesses several ports, among which the first is Emden.

People.-Taken as a whole, IIanover is very thinly peopled; and, in proportion to its extent of surface, has much fewer towns of importance than any other country in Germany. The great majority of the inhalitants are engaged in agricultural pursnits; and the land being often so unfertile, that a considerable tract is required to form a proper farm, a few hands are sufficient to give it all the cultivation which it requires. Hence, the proprietor or tenant lives in the midst of his land, surrounded by a few cottars, forming a small village; and a journey of miles will often be made before another similar village is met with. The population, indced, looks much better on the map than in reality; the greater part of the places which figure as towns being mere villages, of very humble pretensions. The inhabitants are generally of Saxon origin, except in the W., where they have a common origin with the Dutch, and are of Frisian extraction. They are simple, temperate, industrious, and patient; submitting, almost without a murmur, to live on the hnmblest fare, and give themselves little concern with political arrangements. The educated classes, of course, speak the ordinary written language, but the lower orders generally speak Low German. The great majority of them are Protestants, of the Lutheran persuasion. The R. Catholics do not exceed one-eighth of the whole, and are almost entirely confined to the districts of Iiildesheim and Osnabriuck.

Government.-This is a hereditary monarchy, in which the Salic law, excluding females from the crown, is still in force. In form the monarchy is constitutional ; having been framed, in 1819, on the model of that of England, but with very considerable modifications. An important infusion of the popular principle took place in 1833, during the reign of William IV. of England ; but the late Ernest Augustus, who had protested against it at the time, immediately on lis succession replaced matters on the footing of 1819 ; but, since the European turmoils of 1848-9, more of the popular element has been introduced into the government. As a member of the Gerinanic Confederation, Hanover has four votes in the plenum, and one full vote in the minor diet. Its contingent of troops is 12,000 . Its actual army amounts to about 21,000 men. Though it possesses a considerable extent of sea-coast, it has no navy. Debt (1851), $54,705,260 ;$ public income (1851-2), $\mathbf{£ 1 , 1 3 0 , 2 2 6 ;}$ expenditure, $£ 1,156,717$. Money and weights the same as in Prussia. The principal measures are lineal:-the fuss $=$ $11 \frac{1}{2} \mathrm{in}$.; klafter of 6 fuss $=5 \mathrm{ft} .9 \mathrm{in} . ;$ square, the morgen $=$ 2 roods $22 \frac{1}{2}$ perches; grain, the himten $=6.5839$ pints; liquid, the ohin $=41 \cdot 4$ gallons.

History.-The countrics of which the kingdom of Hanover is now composed were, in early times, the theatre of protracted contests between the Saxons and the Romans. The N. parts were inhabited by Longobardi and Chanci; the centre by Fusi and Chernsci; and the S. by Chatti, who, at a later period, advanced as far as the Aller. After the Romans lost their footing in the eountry, and the Longobardi were expelled from it, the Saxons became sole possessors, and divided it into three principal parts-Ostphalen, Engern, and Westphalen. The first great steps in civilization were taken by Charlemagne; who, having subdued the Saxons, introduced Christianity, and founded several bishoprics. Wittekind, the Saxon leader, by becoming a Christian, lost much of his influence with the great body of his countrymen, who still con-

## IIANSE TOWNS

tinued Pagans, but was allowed to possess his hereditary states. In 961 , the chief power was in the hands of Herrmann Billung. This Herrmann has been the subject of mueh keen discussion, and his history is still imperfectly known. The fourth in succession from him was Magnus, who succeeded in 1106; was almost constantly engaged in war, and having provoked the hostility of the successive emperors, IIenry I V. and Henry V., lost the greater part of his possessions, and was himself made prisoner. Some time after, Henry the Black, Duke of Bavaria, having married a princess of the House of Billung, received the duchy of Lïneburg as her dowry ; and subsequently greatly extended his possessions, by the addition of the principalities of Brunswick, Göttingen, \&c. His son, Henry the Lion, made many new conquests; and became so powerful, as to excite the jealousy of the emperor, who placed him under the ban of the empire, and succeeded in stripping lim of the greater part of his dominions. On his death shortly after, in 1195, the possessions left to him were shared by his three sons; the issue of his marriage with a daughter of Henry II. of England. William, the third of the sons, was the only one who had male heirs. Through them the lines of Brunswick-Wolfenbiittel and of Brunswick-Liineburg were nltimately formed. Ernest Augustus, one of the princes of the latter branch, after making several important additions to his territories, was raised to the dignity of Elector of Hanover, in 1692, and married the daughter of the Elector Palatine, granddaughter of James I., and niece of Charles I. of England. He was suecceded, in 1698, by his son, George Lewis; who, in accordance with the revolution settlement of 1688 , beeame sovereign of England, under the name of George I., on the demise of Queen Anne, in 1714 . The connection thas formed with the crown of England continued during four succeeding reigns, in which considerable additions of territory were made. In 1814, the Congress of Vienna raised Hanover to the rank of a kingdom, Two iudependent crowns were thus worn both by George IV. and William IV.; but on the accession of her Majesty, Victoria, to the crown of England, the Salie law carried off the other crown, and placed it on the head of the nearest male heir, Ernest Augustus, better known in Great Britain as the Duke of Cumberland. Contrary to general expectation, his reign not only passed peacefully, but contrasts favourably with that of several of his contemporaries; Hanover having reinained almost profoundly tranquil, while nearly all the other states of Germany were fearfully convulsed. IIe died in November, 1851, and was succeeded by his son, George V., who is hopelessly blind.

HANOVER, a tn. Germany, cap. kingdom of same name; lat. (market tower) $52^{\circ} 22^{\prime} 25^{\prime \prime}$ N.; lon. $9^{\circ} 44^{\prime} 23^{\prime \prime}$ E. (L.); in an extensive plain N.E. of Mount Linden, at the confluence of the Ilme with the Leine, and at the junction of railways which communicate with Bremen and 1. bank Elbe, opposite to Hamburg, on the N., Berlin on the E., Cologne on the W., and Frankfort on the S. It consists of an old and new town, separated by the Leine, and communicating by 11 bridges, and of the suburbs Gartengemeine and Linden; is entered by five gates, and is by no means attractive. The old town, situated on the right bank of the river, contains 40 streets, irregularly built, dull, and dirty. The new town, though of much less extent, is, in every other respect, superior, consisting generally of handsome houses, arranged in regular, spacious streets. Since 1837, when Hanover again became a royal residence, many changes have taken place, and numerous improvements continue to be made. The principal buildings and objects deserving of notice are the Markt [market] church, built in 1350, and of very antique appearance; the Kreuz [cross] chureh, built in 1333; the Agiden [St. Giles'] chureh, of ancient date, but restored in 1827 ; the Schloss [palace] church, a handsome structure, with an altarpiece by Lucas Cranach, some curious relics collected by Henry the Lion, and subterranean vaults, in which Gcorge 1. of England and his mother, granddaughter of James I., are buried; the royal palace, of considerable architectural merit, fitted up with much splendour, and containing several valuable and interesting collections; the royal library of 40,000
volumes, the ducal palace, the Fürstenhof or prince's residence, the Landschaftliche Haus, where the Estates of the kingdom meet; the townhouse, law courts, and government offices; new theatre, said to be one of the most striking mo

CHURCH OF ST. GILEs. Hanover.-From Lange, Ansichten von Dearschund.
dern buildings in Germany ; the Waterloo monument, 142 ft ., inscribed with the names of the Hanoverians who fell in the battle; the lyceum, the normal, polytechnic, and several other superior schools; several hospitals and public offices. The mannfactures consist chiefly of chocolate, chicory, buttons, wafers, saileloth, mirrors, tobacco, playing cards, hosiery, wax, and waxcloth, sugar, dyes, \&c.; and there are several breweries, and numerous distilleries. The trade, chiefly transit, having the advantage both of water communication by the Leine, which is here navigable, and of a system of railways, already referred to, is important, and continues to make rapid progress. The principal articles are wood, corn, and colonial produce.

Hanover, as the seat of the government, contains many important courts and public offices. It also possesses various societies for the encouragement of literature, science, and art. Its foundation is of anciont date. It joined the Hanse league in 1481 , and received the Reformation in 1533 . It suffered much during the 'Thirty Years' War, but had again nearly recovered, when, by the removal of the elector George to England, a check was given to its prosperity. It again suffered much during the Seven Years' War, and more during the continental wars; but it has recovered much since their successful termination, and more especially since 1837, when it became the residence of a royal court. Herschel the astronomer, the two Schlegels, and Iffland, were born in Hanover. Both Zimmermann and Leibnitz died in it. A fine avenue of lime-trees, above 1 m . long, leads to the palace of Herrenhausen, a low building, of no architectural merit, but containing some royal portraits connected with English history. Pop. of Hanover, without subnrbs, 28,085 ; with suburbs, 42,484 .

HANOVER, an isl., off W. coast Patagonia, separated from the mainland and Chatham ist. by the E. channel; lat. $51^{\circ} \mathrm{S} . ;$ lon. $74^{\circ} 30^{\prime} \mathrm{W}$.

HANSBEKE, a vil. and com. Belgium, prov. E. Flanders, on the Bruges canal, and the railway from Ghent to Bruges, 4 m . W. Ghent. Linen is the staple manufacture; and it has also a brewery, and a-flour and oil mill. Pop. 2776.

HANSE TOWNS [German, Hanse Städte], those towns, chiefly in Germany and Holland, that joined the Hanseatic league, now restricted to Hamburg, Bremen, and Lübeck, though, when most flourishing, in the 14 th and 15 th centnries, it included 85 towns. The name is derived from Hansa, which, in old Teutonic, signifies a league for mutual defence. The IIanseatic league was commenced, in 1239 , between

Ilamburg and the Ditmarslies, and had for its object the protection of conmerce from the robbers, who then swarmed both on sea and land, and from the arbitrary exactions of governments who, under the pretence of furnishing a convoy, subjected merchants to the greatest extortion.

HANSI, a th. Hindoostan, prov. of, and 92 m . W. by N. Delhi ; lat. $28^{\circ} 54^{\prime}$ N. ; lon. $75^{\circ} 39^{\prime}$ E. On the summit of a small hill near it is a strong fort, surrounded by a ditch. The walls include a muchlarger area than is occupied by houses.

HANSLOPE, a vil. and par. England, co. Buckinghain. The village, 4 m . N.N.E. Stoney Stratford, has a handsome parish ehureh, Baptist and Wesleyan chapels, and a national sehool. Inhabitants ehiefly agricultural. Area of par., 5290 ac. Pop. 1553.

IIANT's, cu. England. See Soutimmpton.
HANUNFALVA, two places, Hungary:-1, or Hanz$d o r f$, a market t . Hither Theiss, co. Saros, 12 m . W. Eperies; with a Protestant, and a R . Catholic chureh, and an annual fair. Pop. 1300.-2, or Hcnschav, a vil. 1lither Theiss, co. Zips, about 30 m . from Leitsehau; with a R. Catholic chureh, and a handsome nanor-house. Pop. 700.

HANWELL, two pars. Eng.:-1, Middlesex; 1160 ac . Pop. 1469.-2, Oxford; 1240 ac. Pop. 297.

HANWOOI) (Great), par. Eng. Nalop; 130 ac. P. 167.
HANWOR'ГH, three pars. Eng.:-1, Middlesex; 1390 ae. Pop. 751.-2, Norfolk; 1480 ac. Pop. 293.-3, (Cold), Lincoln; 1090 ae. Pop. 63.

HANZAABEK, or Ern, a market tn. Hungary, co. Stuhlweissenburg, r. bank Dambe, here crossed by a large stone bridge, $11 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Pesth. It las a castle, a Turkish tower of hewn stone; and a trade in wine and corn. P. 1261.

HAP'AI, Hapee, or IIavai, an isl. group, S. Pacifie, Tonga Arehipelago, consisting of four larger, and numerous smalker islands commected by eoral reefs, so as to be considered by the inhabitants only one island; lat. $20^{\circ} 3^{\prime} \mathrm{S} . ; \operatorname{lon} .174^{\circ}$ 41' W. (r.) This group lies low, is deficient in fresh water, but produces cocoa-nuts, bananas, and bread-fruit in abundance; and its inhabitants are very warlike. It was discovered by Cook in his third voyage, who named the four larger islands IIaano, Eoa, Lefouka, and Hoolaiva.

IIAPARANDA, a small seaport, Sweden, on the frontiers of Finland, and the shores of a large bay in the estuary of the 'Torneá, near 'lornea, and the most N. town in Sweden. It was founded after the cession of Finland to Russia, in 1809, and, though still very small, is well and regularly built, and gradually rising into importance. The trade is chietly in fish, furs, iron, timber, and tar. The steamers between St. Petersburg and Tornea usually call at Haparanda. Pop. 400.

HAP'PISBURGII, par. Eng. Norfolk; 1760 ac. 1'. 631.
HAI'SAL. Se IIAbsal.

HAl'TON, par. Eng. Norfolk; 670 ae. Pop. 203.
HARA, or KARA, a th. and lake, Chinese empire; the former in Mongolia, very near the great wall, 21 m . N.W. Sophin; the latter in the desert of Gobi, 228 m. E.S.E. LobNor; lat. $30^{\circ} 50^{\prime} \mathrm{N} . ; \operatorname{lon} .93^{\circ} \mathrm{E}$. It receives, on the E., the waters of the Soula-IIo, but has no visible outlet.

HARAMUK, or Harmoк, a lofty, isolated summit, in the mountains bounding Cashmere on the N. ; lat. $34^{\circ} 26^{\prime} \mathrm{N}$.; lon. $74^{\circ} 43^{\prime}$ E. Height above sea-level estimated at $13,000 \mathrm{ft}$. It appears to consist prineipally of basaltic anygdaloid. In a depression in the N. declivity is a small lake, called Ganga, held in high veneration by the Hindoos.

HAliAl'A, a vil. Punjab, l. bank Ravee, 85 m . N.E. Mooltan; lat. $30^{\circ} 37^{\prime}$ N.; lon. $72^{\circ} 43^{\prime} \mathrm{E}$. It is remarkable only for the rery extensive ruins with which it is surrounded, the most striking being the relies of a large brick fortress.

HARBER'TON, par. Eng. Devon; 5800 ac. Pop. 1496 ; containing vil. Murbertonford, in which shovels and reapinghooks are made. Pop. 468.

HARBLEDOWN, par. Eng. Kent; 1470 ac. Pop. 651.
HARBONNIERES, a tu. France, dep. Somme, 14 m . N.E. Mondidier, with cotton spiming, and manulactures of cotton caps and flamel. Pop. 2250.

HARBHRNE, par. Eng. Stafiord; 4000 ac. Pop. 6657.
HARBOROUGH (MARKET), a market tn. and chapelry, England, I. bank Welland, $13 \mathrm{~m} . \mathrm{S} . \mathrm{E}$. Leicester, and a station on the Rugby and stamford Railway. It is neat and well built, amply supplied with water, and well lighted with gas.

It has a large and handsome townhall, erected by a former earl of Harborough in 1788; a magnificent chureh, with a fine tower, and spire; Wesleyan, Baptist, and Independent chapels; a free grammar, and several other schools; a dispensary, and several eliarities; likewise a silk factory, several malt-houses, two breweries, and a brush manufactory; but the inhabitants are principally employed in agriculture. Marketday, Tuesday. Harborough gives the titles of baron and earl to the family of sherard. It was the head-quarters of the royal army prior to the battle of Naseby, in 1645 . Pop. 2433.-(Local Correspondent.)

HARBOROUGII, two pars. Eng. Warwick:-1, (Magna); 1580 ac. Pop. 375.-2, (or Harbury); 2060 ac. Pop. 1089.

IIARIBOUR-Grace, a maritime $t n$. Newfoundland, W. side of Conception [3ay, 20 m . N.W. St. Johns. It is a pretty looking town, consisting of a single long, straggling street along the N. side of the harbour or inlet; and is the seat of an important fishery. Pop. about 3000 .

HARBRIDGE, par. Eng. Hants; 2700 ac. Pop. 300.
HARBURG.-1, A tn. Hanover, gov. Lüneburg, cap. bail. of same name, on a canal, which, leaving the Seve, ter minates in the S. Elbe, about 1200 yards below, opposite to Ilamburg and Altona. It is a place of some strength, being both walled and defended by a citadel; is the seat of a court of justice, and several public offices; contains two churches and an hospital; has manufactures of linen, hosiery, soap, starch, refined wax, and tobaceo; and has an important trade, ehiefly transit, between Hamburg and the countries S. of the Elbe. A stean-boat plies daily to Hamburg, and the Manover and Llamburg Railway has its terminus on the $S$. side of the Elbe, at IIarburg. I'op. tn., 5055; bail., 16,268.-2, A market tn. Bavaria, Swabia, r. bank Wernitz, 38 m. S. Anspaeh; with a lrotestant clurch, a synagogne, a castle, a Jewish school, and a marble quarry. Pop. 1459.

HARBUTOWVIZ, a vil. Austrian Silesia, circle Teschnen, near Skotschau, on the Vistula; with a castle. 1’. 2500. HARBY, par. Eng. Leicester; 2800 ac. Pop. 629.
HARCHIEN, a vil. and com. Belgium, prov. Hainaut, on the canal of Pommerœul, 12 m . N.W. Mons. It has a flour mill, a brewery, and a trade in agricultural produce and cattle. Pop. 1444.

HA RDANGER-Fiord, an inlet, W. coast, Norway, bail. S. Bergenhuus, about 33 m . S.E. Bergen. It is approaehed through channels between numerous islands, extends S.W. to N.E. about 37 m ., then N. to S. about 34 m . ; general breadth, 5 to 2 m ., encumbered with several islets, and having numerous diverging arms. It is deep, is lined with lofty hills, and is the most beautiful and picturesque of the Norwegian fiords. $-2,($ Fjeld $)$, a mountain ridge on the horders of bail. S. Bergenliuns and Buskerud, about lat. $60^{\circ} 10^{\prime} \mathrm{N}$. , uniting N. with the Lang-fjeld, and S. with the Dovre-fjeld. Its highest point is 5908 ft .

HARDEGSEN, a th. Hanover, prov. Hildesheim, principality and 9 m. N.W. Göttingen. It is walled, and has a church, conrthouse, and four mills. Pop. 1291.

HARDENBERG, a tn. Holland, prov. Overijssel, 30 m . N.E. Deventer, 1. bank Veeht, here crossed by a bridge. It has an old Calvinistic church, a synagogue, elegant town house, and a school. Pop. (agricultural), 910.

HARDENHUISH, par. Eng. Wilts; 540 ac. Pop. 146.
HARDERWIJK [Latin, Maderovicum], a tn. Ilolland. prov. Gelderland, on the Zuider Zee, 30 m . E. Amsterdam, surrounded by pleasure-gardens, arable, and meadow land. It is fortified towards the land, has several gates, and two large market-places, in one of which is the townhall and the weigh-honse; in the other is held the fish and the cattle market, and, being planted with trees, it likewise forms a promenade. There are a Calvinistie, and a R. Catholic church, a barraek, two orphan hospitals, a gymnasimm, a high, and several other sehools. Its harbour is suitable only for fishing vessels. Seafaring, fishing, and herring smoking, are the prineipal oceupations. lop. 4382.

HARO [anc. Castrum Bilium], a tu. Spain, Old Castile, prov. of, and 25 m . W.N.W. Logroño, near r. bank Ebro. It is indifferently built, has irregular, ill-paved strects, several squares, two parish churches, five chapels, a townhouse, prison, large hospital, theatre, ladies' college, two primary schools, and an orphan asylum. Manufactures:-linen, eloth, baize, hats, leather, earthenware, and brandy. Trade in wine, fruits, oil, \&c. Annual cattle fair. Pop. 6235.

HARÖE, a small isl., W. coast Norway, prov. Trondhjem, bail. Romsilal ; lat. $62^{\circ} 45^{\prime} \mathrm{N}$.; lon. $6^{\circ} 30^{\prime} \mathrm{E}$.

HAROLD'S CROSS, a vil. Ireland, forming a suburb of Dublin, about 1 m. S. Dublin eastle. Pop. 2789.

HAROLDSTOWN, par. Irel. Carlow; 2834 ac. P. 836.
HARPENDEN, par. Eng. Hertford; 4920 ac. P. 1872.
HARPER'S FERRY, a vil., U. States, Virginia, 53 m . N.W. Washington, on the Baltimore and Ohio Railway, and on the Potomac, here crossed by a bridge. It has three churches, an academy, and one of the most extensive flour-mills in the U. States, an iron furnace and national armoury, containing 80,000 to 90,000 stand of arms, and employing 240 hands, who ammally manufacture 8850 stand of arms. P. 4000.

HARPERSFIELD, a vil. and township, U. States, New York, 56 in . W. by S. Albany, with two churches and several stores. Pop. 1708.

HARPFORD, par. Eug. Devon; 1240 ac. Pop. 305.
HARIIIAM, par. Eng. York (E. Kiding); 1970ac. I'. 239.
HARPLEY, par. Eng. Norfolk; 2180 ac. Pop. 376.
HARPOLE, par. Eng. Northampton; 1560 ac. P. 699.
IIARI'SDEN, par. Eng. Oxford; 1460 ac. Pop. 211.
HARISNELL, par. Eng. Lincoln; 2180 ac. Pop. 98.
IIARPTREE, two pars. Eng. Somerset:-1, (East), 2770 ac. Pop. $772 .-2$, (West), 2850 ac Pop. 571.

HARRICANAW, a river, British N. America, which rises in a small lake, about lat. $49^{\circ} 55^{\prime} \mathrm{N} . ;$ lon. $77^{\circ} 30^{\prime} \mathrm{W}$.; anl, after a N.W. course of about 270 m ., falls into James's Bay, at Hannah Bay-house.

HARRIETSHAM, par. Eng. Kent; 2520 ac. Pop. 675.
IIARRINGTON, a small seaport tn. and par. England, co. Cumberland. The тows, formerly called Bella Port, 5 m . N. by E. Whitehaven, has a neat church, two Dissenting chapels, a charity school, a ship-building yard, chemical works, and a rope-walk. Upwards of 40 vessels belong to the port. Coals are exported to Ireland, and lime to Scotland. Area of par., 2380 ac. Pop. 1934.

HARRINGTON, two pars. England :-1, Lincoln ; 1070 ac. P'op. 107.-2, Northampton; 2000 ac. I'op. 238.

HARRINGWORTII, par. Eng. Northampton; 3060 ac. Pop. 358.

HARRIS.-1, A dist. and par. Scotland, co. Inverness; 50 m . by 24 m .; the S. portion isl. of Lewis (which see). Pop. 4429.-2, (Sound of), a navigable channel, scparating Lewis from N. Uist, 9 m . long, from 8 m . to 12 m . broad, and greatly encumbered with islands and rocks.

HARRISBURG, a tn., U. States, cap. Pennsylvania, I. bank Susquehanna, 98 m . W.N.W. Philadelphia. It is well built, chiefly of brick; and contains a handsome statehouse, a large and commodious courthouse, surmounted by a cupola; a county prison, a Lancasterian school, a market-house, in the centre of the town; three academies, and nine churches, some of them elegant structures. There are two bridges over the Susquehanna ; one of them covered, ahove 900 yds . long, 40 ft . wide, and 50 ft . above the river. Harrisburg has several breweries, tanneries, and potteries; and carries on a considerable trade, especially in timber. Pop. 6000.

HARRISON BAY, a large inlet, Arctic Ocean, W. coast Russian Aincrica; bounded by Cape Halket and Point Berens, intersected by lat. $70^{\circ} 30^{\circ} \mathrm{N}$. , and by lon. $151^{\circ} \mathrm{W}$.

IHARRISONBURG, a vil., U. States, Virginia, 126 m . N.W. Richmond, with a courthouse, jail, market-house, and thrce churches. Pop. 1100.

HARRISTOWN, par. Irel. Kildare; 4680 ac. Pop. 115.
HARRODSBURG, a vil., U. States, Kentucky, on a small branch of Salt River, 29 m . S. Frankfort, with two churches, Bacon College, founded in 1836, attended by about 200 students; an academy, and two schools, and a bank. A mineral spring in the neighbourhood is much frequented. Pop. 1254.

HARROGATE, a vil. England, co. York (W. Riding), 20 m . E. York, a place of fashionable resort, the principal watering-place in the N. of England, and noted for its chalybeate and its sulphureous mineral springs. It is divided into High and Low Harrogate-the former situated on an elevated plain, commanding an extensive prospect, the latter in a valley bencath; but both so nearly united by intermediate buildings, that they may be considered as forming one village. There are many handsome buildings, particularly in Low Harrogate ; two suites of public baths, several spacious lotels, and a number of excellent lodging-houses for the accommodation of visitors, some of which are fitted up in the most elegant style; likewise the usual places of resort and recreation found in fashionable watering-places-a theatre, promenade rooms, ball-rooms, librarics, and reading-rooms; and a race-course, formed in 1793. Pop. 3372.

HARROLD, a small market tn . and par. England, co. Bedford. The rown, 8 m. N.W. by W. Bedford, on the Ouse, here crossed by a bridge, has a neat ehurch, a large Independent chapel, a free school, some almshouses; anl manufactures of lace. Market day, Tuesday. Area of par., 3240 ac . Pop. 1007.

IIARROLDSTON, two pars. Wales, Pembroke:-1, (St Issel's). Pop. 337.-2, (West); 1688 ac. Pup. 130.

HARROW-on-the-mhle, a vil. and par. Enghand, co. Middlesex, 10 m . N.W. London, on a hill of peculiar form, which rises out of a fine vale. It is irregularly laid out, and consists chiefly of one street, and its church, an ancient structure, with a lofty tower and spire, forms a conspicuous object from great distances around. There are places of worship, besides, for laptists and Wesleyans. The grammar-school of Larrow, the rival of Eton, and to which the place owes its celebrity, was foumded, in 1571 , by John Lyon, a yeoman of the parish, to afford gratuitous instruction to the poor children of Llarrow, strangers being permitted to enter on payment of certain fees. But the ellucation is almost wholly classical, consequently few boys belonging to the parish take advantage of it ; the greater portion of the scholars being sons of noblemen and gentlemen. The system of education and diseipline pursued is similar to that at Eton. Area of par., 9870 ac. I'op. 4527.

HARROWDEN, two pars. England, Northampton:-1, (Great); 1160 ac. Pop. 168.-2, (Little); 1480 ac. Pop. 673.

HARRY COOK ISLAND, an isl. Arctic Ocean, N. of George IV. Coronation Gulf ; lat. $68^{\circ} 10^{\prime} \mathrm{N}$. ; lon. $109^{\circ} 50^{\prime} \mathrm{W}$.

HARSANY, two places, Ifungary:-1, A vil. Thither Theiss, co. Bilar, on the White Koros, 9 m . from Grosswardein, with a Protestant church. Pop. 1180.-2, (Kis and

Vagy), two nearly contiguous vils. Thither Danube, co. Baranya, about 3 m . from Siklo3, at the foot of the famous viue-clad hill of Lapancsa. They are well built, and contain a Protestant church and school. Pop. of Kis-Harsany, 430 ; Nagy-Harsany, 800.

HARSEFELD, a vil. Hanover, gov. of, and 10 m . S. Stade, cap. bail. of same name, on the Aue. It is a very old place, and had acquired some importance as early as the 9th century. Pop. vil. 989 ; bail. 8155.

HARSEWINKEL, a tn. Rhenish Prussia, gov. and 26 m. E. Münster, with a parish church, poorhouse, and manufactures of linen; and a trade in wool, clover-seed, and cattle. P. 1042.

HARSIN, a small tı. Persia, prov. Irak-Ajemi, 20 m . E. by S. Kermanshaw, in a well-watered and well-cultivated valley, with the ruins of a fort, and of an aqueduct; and some other architectural remains.

HARSLEBEN, a vil. Rhenish Prussia. gov. Münster, circle IIalberstadt, on the Goldbach, with a parish church and a mill. Pop. 1663.

HARSON ISLAND, an isl. Upper Canada, in the lake, and at the embouchure of the river St . Clair. It is about 12 m . long, by 9 m . broad

HARSTON, two pars. England:-1, Cambridge; 1480 ac. Pop. 662.-2, Leiccster; 630 ac. Pop. 181.

HARSWELL, par. Eng. York (E. Riding); 720 ac. P. 67.
HART (Alf), a vil. Moravia, circle Znaim, about 20 m . from Schelletau, with a church, and a castle ; mauufactures of calico, glass-works, and a cotton-mill. Pop. 951.

HART, par. Eng. Durham; 8280 ac. Pop. 728.
HARTA (Kıs), a vil. Hungary, co. and 56 m. S. Pesth, 1. bank Danube, with a Protestant church. Pop. 2055.

HARTBERG, a tn. Austria, Styria, circle of, and 28 m . N.E. Grätz, on the Laufnitz. It is walled, is well built, has a deanery chureh, a Capuchin monastery, an hospital, the remains of an old castle, and manufactures of eloth, six mills, a trade in cattle, and in loorses. Pop. 1500.

HARTBURN, par. Eng. Northumb.; 23,830 ac. P.1322.
HARTENSTEIN, a tn. Saxony, circle Zwickau, cap. bail. of same name, on the Thierfeld, 50 m. S.S.E. Leipzig. It stands at the foot of a hill, crowned by a castle, usually occupied by one of the Saxon princes, and surrounded by a garden and fine park; is the seat of a court of justice, has a chapel, orphan hospital, and manufactures of linen and hosiery. Pop. tu., 1947; bail. 12,874.

HARTES'T, par. Eng. Suffolk; 1900 ac. Pop. 812.
HARTFIELD (N. and S.), par. Eng. Sussex ; 8420 ac. Pop. 1603.

HARTFORD, several places, U. States, particularly :1, A tn. Connecticut, r. bank Connecticut, which is here navigable, 37 m . N.N.E. Newhaven. It is not regularly built; but its main street is spacious, and lined with good houses. Among the public buildings are the statehouse, a spacious and handsome edifice; the city-hall, of Doric architecture; Washington College, founded in 1824, with an average attendance of 80 students, and libraries containing 6500 vols.; the American Asylum for the Deaf and Dumb, the earliest establishment of the kind in the U. States; the Retreat for the Insane, a fine stone edifice, surrounded by well-laidout grounds; and the Athenæum, an elegant Gothic structure. The number of churelies is 12 . Hartford has manufactures of leather, pottery, ironware, machinery, and cordage; and carries on a considerable trade. A railway, 38 m . long, connects Hartford with Newhaven. Pop. 9468.-2, (East), A vil. and township, Connecticut, on a plain, E. bank Connecticut, opposite IIartford eity, with which it is connected by a bridge. It contains four churches, and several mills. Pop. 2389.-3, (New), A vil. and township, New York, 4 m . W. Utica, with four churches, a female seminary, and a number of manufacturing establishments. Pop. 3819.-4, $\Lambda$ vil. and township, New York, 57 m . N.N.E. Albany, with two churches. Pop. 2164.

HARTFORD, par. Eng. IImntinglon; 1720 ac. P. 380.
HARTHA, a tn. Saxony, circle and 32 m . S.E. Leipzig, with a handsome church, two schools, an hospital; manufactures of linen, tile-works, a brewery, and mills. Pop. 1941.

HARTHAU, a vil. Saxony, circle Zwickan, bail. of, and 3 m. S. Chernnitz, l. bank Wurschnitz. It has two large spinning-mills, manufactures of bobbinet, machine-works, two mills, and some quarries. Pop. 1256.

HARTHILL, two pars. England:-1, Chester; 500 ac. P. 158.-2, (with Woodall), York (W. Riding); 2940ac. P. 709. HARTING, par. Eng. Sussex ; 7830 ac. Pop. 1267.
HARTINGTON, par. Eng. Derby; 24,160 ac. P.2197.
HALTLAND, a market tn. and par. England, co. Devon. The rown, 19 m . E.S.E. Barnstaple, lies in a bleak district, and has a very mean appearance. Area of par., 11,030 ac. Pop. 2223. On the coast herrings are caught; the fishermen frequenting Hartland quay, about $2 \frac{1}{2} \mathrm{in}$. W., on the Bristol channel. Hartland Point [anc. Herculis promontorium], about 3 m . N.W., is in lat. $51^{\circ} 1^{\prime} 24^{\prime \prime}$ N.; Ion. $4^{\circ} 31^{\prime} 30^{\prime \prime} \mathrm{W}$. (r.)

HARTLEBURY, par.Eng. Worcester; 5500 ac. P. 2051.
HARTLEPOOL, a seaport tn. England, co. of, and 17 m . S.E. Durham, with which, and with Stockton, it is connected by railway ; lat. $54^{\circ} 41^{\prime} 48^{\prime \prime} \mathrm{N}$. ; lon. $1^{\circ} 10^{\prime} 45^{\prime \prime} \mathrm{W}$. (r.); on a promontory, nearly surrounded by the sea. It consists of scveral spacious and well-formed streets, and contains many handsome houses and shops. It is abundantly supplied with water, and is well lighted with gas; has a guildhall and public baths, both fine structures; an Established churel, an imposing edifice, in various styles of architecture; several Dissenting places of worship, and a seanen's Bethel chapel; a mechanics' institution, a newsroom, a national, and two free schools, and some minor charities. Ship-building is carried on to some extent; and there are also two small iron-foundries, an iron and brass foundry, a cement manufactory, and an anchor and chain work. The trade of Hartlepool, which had been falling into decay, is rapidly reviving; a result, in great part, attributable to its new and spacious docks, its excellent pier, and the recent improvenients in its harbour. The registered shipowners belonging to the port are 170, and the number is increasing; the tonnage of the ships, in many instances, 700 or 800 tons. In 1850 , the number of ships that entered was 9625 ; tonn. $1,179,338$. These ships took from the port upwards of $1,000,000$ tons of coals to all parts of the world. Lartlepool is much resorted to in the summer season for sea-bathing, and for its medicinal springs. Around the townmoor there is a favourite promenade, which commands an extensive view of the sea. Pop. 5236.

HARTLEY, four pars. Eng.:-1, Kent; 1110 ac. P. 224. -2,(-Mauditt), Hants; 1550 ac. P. $84 .-3,\left(-W_{\text {estpall }), \text { Hants; }}\right.$ 1450 ac. P. $351 .-4,(-$ Wintney), Hants ; 2280 ac. P. 1370.

HARTLIP, par. Eng. Kent; 1350 ac. Pop. 341.
HALTMANSDORF, two vils. Saxony :-1, Circle of, and 7 m . from Leipzig, with manufactures of linen, a spin-ning-mill, and serpentine and other quarries. Pop. 1583.2, (Gross-), circle Dresden, 10 m . from Freiberg, with manu factures of linen and dimity, several mills, and a trade in flax. Pop. 1900.

HARTPURY, par. Eng. Gloucester; 3580 ac. Pop. 877.
HARTSHORN, par. Eng. Derby; 2510 ac. Pop. 1389.
HARTWELL, two pars. England:-1, Bucks; 680 ac. Pop. 138.-2, Northampton; 1850 ac. Pop. 533.

HAPTY, Isle of St. Thomas, par. England, co. Kent; 2530 ac Pop. 117.

HARVINGTON, par. Eng. Worcester; 1290 ac. P. 347.
IIARWELL, par. Eng. Berks; 2720 ac. Pop. 857.
HARWICH, a market tn., parl. bor., and seaport, Eng land, co. Essex, on a point of land opposite the confluence of the Orwell and Stour, 66 m . E.N.E. London ; lat. $51^{\circ} 56^{\prime} 36^{\prime \prime}$ N.; lon. $1^{\circ} 17^{\prime} 30^{\prime}$ E. (r.) It consists of three principal streets, and several smaller, well paved and lighted; has a handsome modern church, Wesleyan, Baptist, and Independent chapels; townhall, jail, custom-louse, theatre, assembly, and reading-rooms; a number of daily schools, and several charities. The harbour is spacious, and among the best on the E. coast of England; and is the only one, between Yarmouth Roads and the mouth of the Thames, capable of affording refuge in $\mathbf{E}$. winds; consequently, several hundred colliers, and other vessels proceeding northward, may be scen anchored here during the prevalence of strong N.E. winds. It is defended by two forts; and two fixed lights-the one 95 ft . above the level of the sea, the other 45 ft .indicate the entrance to the harbour; which, however, is dangerous without a pilot. The number of vessels belongiyg to the port, in 1850, was 139 ; tonn. 60,900 ;-total vessels iuward, 654 ; tonn. 49,402 ;-out ward, 658 ; tonn. 33,063 ; more than three-fourths of the whole being coasters. Ship-building, and other employments connected with maritime affairs, occupy
a great portion of the population. A number are employed also in dredging, outside the harbour, for cement-stone, which is afterwards manufactured in the town. In the summer season, Harwich is much frequented by sea-bathers. Harwieh returns two members to the House of Commons; registered electors (1851), 272. It is of Saxon origin; in 1318, it was incorporated by Elward II.; and, in 1347, it supplied 14 ships to the fleet of Edward III. Pop. 3829.

HARWOR'TH, par. Eing. Notts; 4320 ac. Pop. 878.
IIARZ, or Hartz [anc. Mercyial, a range of mountains, Germany, N. of the Thïringerwald, with which it is connected by the Eichsfeld mountains. It has no proper central axis, but consists of a great number of single mountains, merely separated by narrow valleys, which are almost all transverse. The length of the range, S.E. to N.W., from Mansfeld, in Prussian Saxony, to Seesen, in Brunswick, is about 60 m ., and its breadth nearly 20 m . It covers portions of Prussia, Anhalt-Bernburg, Brunswick, and Hanover. The water-shed between the basins of the Weser and the Elbe, traversing the range from S.S.W. to N.N.E., divides it into two unequal partsa N.W. and a S.E. The former, though it covers less space, is the more elevated of the two, and takes the name of Ober or Upper Harz; the latter forms the Unter or Lower Harz. A series of hills, bordering the range, but not properly within it, is called the Vor, or Anterior Harz. The eulminating point is the Brocken, 3791 ft . The summit of this mountain, and of several others whieh surround it, is granite; the others consist of granwacke and clay-slate. The hills of the Vor IVarz are composed of red sandstone. The whole range is rich in minerals, particularly argentiferous lead, copper, and iron. 'The sides, and sometimes also the summits, of the mountains are clothed with forests; in the Ober Harz, consisting almost entirely of pine; but, in the Unter Harz, of beeeh and oak.

HARZDORF (Alt and Neu), two nearly contiguous vils. Bohemia, circle Bmzlau, about 3 m . from Raehenberg, with a school, a bleachfield, a worsted, and several other mills, and large machine-works. Pop. 2021.

HARZGERODE, a tn. Anhalt-Bernburg, cap. bail. of same name, $37 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Halle. It is walled, defended by a fort, has a townhouse, old eastle, and forest school; a trade in corn and eattle, and three large fairs. About 2 m . W. is the heautiful and well-frequented watering-place, Alexisbad. Pop. ti., 2517 ; bail. 4870.

HASAN DAGir, a lofty mountain, Asiatic Turkey, pash. Kharidj, 85 m. E. by N. Konia or Koniyeh, of nearly a conical form, 8000 ft . high, and said to preserve patches of snow throughout the year. Its N.W. base is bounded by the plain of the Lake Touz Ghienl; to the S.W., a low undulating country connects it with the Karajah Dagh while to the E. it is prolonged by one or two cones, and then a lofty ehain of hills.

HASAN Kal'eir, a tu. Asiatic Turkey, on the Aras, pash. of, and 20 m. E. by N. Erzeroom. It was once a Genoese trading station, lut is now in a state of decay. Its double wall, of modern ercetion, its old castle, seven mosques, \&c., are all in a more or less ruinous condition. Opposite the town, across the river, are innumerable hot springs: some are bitnminous, but others contain iron and lime. 'Two batlis, luilt over the warmest $\left(105^{\circ}\right)$ and most copious sources, are both constantly filled with bathers.

HASCOMDE, par. Eng. Surrey; 990 ac. Pop. 335.
HASEK, a market tn. Arabia, prov. Hadramáut, in Curia Muria bay. It lies in a verdureless district, and behind riso granite hills, 4000 ft . high.

HASELBEECHI, par. Eng. Northamp.; 1790 ac . Pop. 194.
IIASELBURY, two pars. Eng.:-1, (Bryan), Dorset; $\$ 010$ ac. 1'. 639.-2, (Pluckinct), Somerset; 1430 ac. P. 809.

HASLLEY, two pars. Eng.:-1, Warwick; 1280 ac. Pop. 188-2, (Great), Oxford; 3140 ac. Pop. 786.

HANELCOR, par. Eng. Warwick; 1950 ac. Pop. 360.
IIASELUUNNE, a tn. Hanover, gov. of, and 35 m . N.W. Osnabrïck, cap. bail. of same name, r. bank Hasc. It has a court of justice, a parish church, a Latin, and another school, blast furnaces, tile-works, several distilleries, and manufactures of salors' hats, seythes, shovels, white lead, vinegar, and tobacco. Pop. tn., 1790 ; bail., 8669.

IIASENP('T'I, a th. Russia, gov. Courland, r. bank Tebber, 80 m. W.N.W. Mitau; with a court of justice, a church, and a eastle. Iop. 1015.

HASEIELJ, par. Ensc. Glouccster; 14G0ac. P. 304.

IIASGUARI, par. Wales, Pembroke; 1300 ac. P. 122.
IIASHMY'S ISLANDS, a group of five low isls., N. Pacific Ocean; lat. $5^{\circ} 47^{\prime} \mathrm{N}$. ; lon. $153^{\circ} 6^{\prime}$ E.; connected by coral reefs, and forming a lagoon inside. They are about 15 m . in circumference, covered with cocoa-nut trees, and are thickly populated by a light-complexioned race, who, though wearing the mask of friendship, are not to be trusted.-(Naut. Mag., vol. xviii., p. 23.)

HASKETON, par. Eng. Suffolk; 1140 ac. Pop. 508.
HASKI, an isl., S. coast Arabia, one of the Curia Muria group; lat. $17^{\circ} 27^{\prime} 12^{\prime \prime}$ N. ; lon. $05^{\circ} 35^{\prime} 45^{\prime \prime}$ E. (r.) ; $1 \frac{1}{4} \mathrm{~m}$. long N. to S., and about $\frac{1}{2} \mathrm{~m}$. broad, having a high-peaked hill near its $S$. point.

HASLACII, a market tn. Upper Austria, and on a height above the Mühla, 17 m . N. Eflerding; with a church, two towers, an hospital, and an active trade in linen. Pop. 1130.

HASLACI, a tn. Baden, circle Middle Rhine, cap. bail. of same name, l. bank Kinzig, 15 m . S.S.E. Offenburg. It is walled, flanked with towers, and has manufactures of vermicelli and red leather, a wax refinery, iron-works, and a trade in wood. Pop. tn., 1720. Area of bail., 40 geo. sq. m. Pop. 10,153.

HASLE, a vil. Denmark, W. coast, isl. Bornholm, abont $6 \mathrm{~m} . \mathrm{N}$. Röme. It has a ehureh, a winter haven of the fifth class, with 7 ft . water, and a fishery. Some coal is worked in the vicinity. Pop. 700.

IIASLEMERE, a bor., market tn., and par. England, co. Surrey. The town, 40 m . S.W. London, is indifferently built, has an ancient chureh, with a low square tower; an Independent chapel, and three sehools. Near it are some large paper manufaetories. Market day, Tuestay. Area of par., 3330 ac. Pop. 873.

HASLI, Ober-ITasli, or Hasid-tm-Weissland, a bail. Switzerland, can. Bern, comprehending all the upper part of the Aar valley, resting on the Grimsel, and the glacier of the Aar, from its sources to the lake of Brienz. Surrounded by the loftiest masses of the Bernese Alps, it is noted for its natural beauties; among its cascades are those of the Reichenbach, Gentbach, Handeckfall, Gelmerbach, \&c. The people are supposed to be descendants of Scandinavian ancestors, who eame hither in the fifth century. Pop. 6723.

MASLINGDEN, a market tn. and township, England, co. Lancaster, 16 m. N. Manehester, on the E. Lancashire Railway. It has improved greatly in appearance of late years, many old mean-looking houses having beer, replaeed by substantial new edifiees. It has a handsome modern chmreh, with an ancient tower, erected in the reign of Henry VIII.; four Dissenting ehapels, several day schools, and a free school, having a small endowinent. The woollen manufacture, formerly the staple of the town, is now supplanted, to a great extent, ly that of cotton. Excellent building-stone, slate, and flags, abound in the neighbourhood. Market day, Saturday; fivo annual fairs, chiefly for horses and cattle. Area of township, 4420 ac . Pop. 8063.

HASLINGF1ELD, par. Eng. Camb.; 2439 ac. Pop. 689.
IIASI'ARREN, a tn . France, dep. Basses-Pyrénées, 13 m . S.E. Bayonne, in a fertile and well-cultivated district. It has a church, several tanneries, both for common and shammy leather; and a considerable trade in these articles, and in cattle. Pop. 2415.

HASIRES, a vil. France, dep. Nord, 9 m . S.W. Valencionnes, r. bank Selle; with manufactnres of beet-root sugar, breweries, and gin distilleries. Pop. 2987.

IIASSAN, or Hassani, an isl. Red Sea, coast of Arabia; lat. $25^{\circ} \mathrm{N} . ; \operatorname{lon} .37^{\circ} 10^{\prime} \mathrm{E}$. ; height, on the N. side, 400 ft ., whence it slopes away to the S.E. Indifferent water is obtained here in sonall quantities, and that only in winter. During the warm season, the Arabs leave the eoast for this island, to avoid the great heat of the continent, and to dispose of their grain, dates, \&c., to the hadj boats, which put in here.

HASSELFELDE, a tn . Brunswick, circle of, and 9 m . S.W. Ilankenburg, cap. bail. of same name; with a church, burgher sehool, hospital, and poorhonse; tile-works, a brewery, and a trade in salt and cattle. Pop. tn., 1617 ; bail., 4500.

IIASSEL'I.-1, A tn. Belgium, cap. prov. Limbourg, on the Demer, 15 m . W.N.W. Maastricht. It is regularly fortified, tolerably well built, has a court of first resort, and several public offices; four ehurches, two chapels, a courthouse, two hospitals, an almshouse, a college, and several primary

## IIASSFURT

schools; with manufactures of tobacco, madder, soap, oil, candles, chocolate, refined wax, and hats; dye-works, bleachfields, salt-works, numerous tanneries, breweries, and distilleries ; an important trade in spirits, tobaceo, and madder ; and two weekly fairs. Pop. 8210.-2, A tn. Holland, prov. Overijssel, $6 \mathrm{~m} . \mathrm{N}$. Zwolle, on the Veeht, formerly fortified. It has a townhall, two churehes, a synagogue, poorhouse, infirmary, and several schools. Shipping and turf-selling are the principal occupations, though some boat-building, limeburning, and calico-weaving are likewise earried on. P. 1871.

HASSFUR'T, a tn. Bavaria, eirele Lower Franconia, cap. dist. of same name, on the Main, 34 m . N.E. W ürzhurg. It las a parish ehureh and two ehapels; a townhouse and hospital ; manufactures of linen; saw, and other mills; a fishery, and mineral spring. Near it, fruit, hops, and wine, are extensively grown. Pop. tn., 1880 ; dist., 10,341 .

IIASSINGHAM, par. Eng. Norfolk; 610 ac. Pop. 104.
IIASSLEBEN, a tm . Saxe-Weimar, eircle of, and 17 m . N.W. Weimar, on the Gera ; with a eastle, an oil and a flour mill, and three annual fairs. Pop. 1266.

HASSLOCH, a vil. Rhenish Bavaria, on the railway from Mannheim to Homburg, 15 m . N.N.E. Landau; with a R. Catholie, and two Protestant ehurehes, eoal-works, and several mills. Pop. 4772.

HASSMERSHEIM, a vil. Baden, cirele Lower Rhine, 1. bank Neckar, 20 m . E.S.E. ILeidelberg; with a chureh, and several breweries, some shipping, and a trade in wine and cattle. Pop. 1661.

HASTINGS, a river, Australia, New S. Wales, the entrance to which is the large harbour of Port Maequarie, 192 m . N.E. Sidney ; lat. $31^{\circ} 25^{\prime} 45^{\prime \prime}$ S. ; lon. $152^{\circ} 53^{\prime} 54^{\prime \prime}$ E. Total course, generally E., about 60 m ., through a pleasing undulation of hill and dale, riehly clothed with timber.

HAS'TINGS, a parl. bor., market tn., and one of the Cinque Ports, England, eo. Sussex, 54 m. S.S.E. London, and about midway between Dungeness and Beaehy IIead; lat. $50^{\circ} 51^{\prime} 30^{\prime \prime} \mathrm{N}$. ; lon. $0^{\circ} 36^{\prime} \mathrm{E}$. (r.) ; pleasantly situated on the sea-coast, with lofty hills and eliffs towering behind. Hastings may now be considered as consisting of an old and a new town; the former oceupying a hollow between the East-hill and the Castle-hill ; the latter, called St. Leonard's, stretching S. and W. of the Castle-hill. Most of the houses of reeent crection are handsome, and agreeably situated under the eliff's along the shore. The streets are well paved and lighted. In front of the town is a splendid esplanade, tastefully laid out. It has two parish elurches, built of flint and stone, aneient, but landsome edifices; two Episeopal chapels, several Dissenting places of worship, an elegant townhall, supported on arches, with a market-place beneath; and t wo free sehools; baths, libraries, assembly-rooms, promenades, public gardens, \&e. There are several charitable institutions, ineluding a dispensary and two free sehools. There is no harbour at Ilastings, and only an indifferent road for small vessels. Its trade is trifling, but its fishery is considerable, giving employment to about 500 persons. There is a good deal of boat-building, and an extensive business in lime; but the prineipal support of the town now arises from the numerous visitors who resort to it during the bathing season. Westward of the town, on the edge of the eliff, are the ruins of a castle, erected by William the Norman in 1067 ; and of the chureh and conventual buildings of a free college, supposed to have been founded in the reign of Henry I. Hastings, though not the oldest, is considered to hold the first rank among the ancient maritime boroughs called the Cinque Ports. It returns two members to the House of Cominons. Registered electors (1851),976. Pop. 11,617.

HATCHI, two pars. Eng., Somerset:-1, (Beauchamp); 1050 ac. Pop. 329.-2, (Wcst) ; 1660 ae. Pop. 465.

HATCHY (Big), a river, U. States, Tennessee, falling into the Mississippi, 33 m . N. by E. Memphis, after a N.W. by W. course of about 120 m .

HATCLIFFE, par. Eng. Lincoln; 1370 ac. Pop. 139.
HATFIELID.-1, A tn. and par. England, eo. Hertford. The town, 17 m. N.N.W. London, has a handsome chureh, which stands on an elevated site; an Independent clapel, several schools, and some small charities. Near it is IIatfield house, the magnificent residence of the marquis of Salishury. Area of par., 12,700 ac. Pop. 3646.-2, A vil. Yorkshire, W. Riding, 4 m . N.E. Doneaster, consisting of a single strect
about 1 m . long. It has an old elmreh; but is chiefly noted for the extensive drainage works in its vieinity, commenced in the reign of Charles L., and having for their object the draining of Hatfield chase, which originally contained about $180,000 \mathrm{ac}$. of ground, subject to be flooded, but which is now all under cultivation. Pop. 2939.

HATFILLD, four pars. Eng.:-1, Hereford; 1980 ae. Pop. 181.-2, York (W. Riding); 21,150 ac. Pop. 2939.3, (Broad Oak or Regis), Essex; 8810 a. Pop. 1968.4, (Peverell), Essex ; 3830 ac. Pop. 1383.

HATFORD, a par. England, Berkshire; 1050 ac. Pop. 123.

HATHERLEIGII, a market tn . and par. England, co. Devon. The town, 24 m . W.N.W. Exeter, is irregularly built, but well kept; houses, in general, constructed of 'cob' (a mixture of mortar and straw), and thatehed. It has a landsome Gothic chureh, with a tower and a spire ; a Baptist chapel, a national school, several almshouses, and various other charities. Iuhabitants principally employed in agrieulture. Weekly markets, Tuesday and Friday. Area of par., 6500 ac. Pop. 1882.-(Local Correspondent.)

HATHERLEY, two pars. Eng., Gloucester :- 1, (Down); 930 ac. Pop. $212 .-2,\left(U_{1} p e r\right) ; 810 \mathrm{ae}$. Pop. 22.

HATHERN, par. Eng. Leieester; 1340 ae. Pop. 1252.
HATHEROP, par. Eng. Gloueester ; 2160 ac. Pop. 358.
HATHERSAGE, par. Eng. Derby ; 13,630 ac. P. 2054.
hatian, a tn. Siam. See Cancao.
HATLEY, two pars.Eng.,Cambridge:-1,( (ast); 1184ac. Pop. 98.-2, (St. George) ; 1000 ae. Pop. 136.

HATO Viejo, a tn. New Granada, dep. Cundinamarea; lat. $6^{\circ} 22^{\prime}$ N.; lon. $75^{\circ} 38^{\prime}$ W.; between 4000 and 5000 ft . above sea-level. Pop. 1446.

HATRAS, a tn. and fort, IIindoostan, prov. of, and 90 m . S.W. Delhi ; lat. $27^{\circ} 37^{\prime}$ N.; lon. $75^{\circ} 58^{\prime}$ E.; a busy flourish ing place. Its fort was destroyed, in 1817, by the British.

HATTEM [Latin, Mons Dei], a tn. Holland, prov. Gelderland, 36 m. N. by E. Arnhem, on the Grift, with ruined walls. It has an ancient townhouse in the market-place, and a wateh, and a weighhouse; a Calvinistic, and a Dissenting ehureh, and several benevolent institutions; a Latin, and various other sehools. Pop., chiefly agricultural, 2426.

HATTEN, a tn. Franee, dep. Bas-Khin, 9 m . S. Weissenbourg; with a handsome R. Catholic. and a Protestant ehureh, and some trade in linen. Pop. 2079.

HATTENHEIM, a vil. Nassan, bail. of, and 2 m . W.S.W Eltville, r. bank Rhine; with a R. Catholic chureh, a great number of fine villas, and a spring of some celebrity. P. 965.
llatTERAS (Care), a low rocky promontory, U. States, S.W. end of an isl. on E. coast N. Carolina; lat. $35^{\circ} 15^{\prime}$ N.; lon. $75^{\circ} 30^{\prime}$ W. (r.) The shoals extend a long way to the S.E., and have been the seene of many disastrous shipwreeks. A light-house, 95 ft . high, has recently been erceted 1 m . inland.

IIATTERSILEIM, a vil. Nassan, bail. Hüehst, 10 m . N.E. Mainz; with a parish chureh. Pop. 948.

HATTIA, an isl. Ilindoostan, presid. Bengal, prov. Chittagong, near the mouth of the Brahamapootra, or Great Megna, by the deposit of which it has been formed, 14 m . long by 10 m . broad. It is nearly submerged at springtides; but still is productive in grain, and yields good salt.

HATTTINGEN, a m. Rhenish Prussia, gov. of, and 36 m . W. Arnsberg, 1. bank Rulir. It has four churehes and chapels, a poorhouse, court of justice, manufactures of woollen and linen eloth, muslins, seythes, and files; a trade in cattle, and five annual fairs. Pop. 4282.

HATTON, two pars. Eng.:-1, Lineoln ; 1780 ae. Pop. 203.-2, Warwick; 3910 ac. Pop. 954.

HATTORF, a vil. Hanover, gov. Hildesheim, prineipality Grubenhagen, near Herzberg; with a parish chureh, and trade in corn and flax. Pop. 1375.

HATVAN, a market tn . Hungary, co. Heves, 1. bank Za gyva, 30 m . E.N.E. Pesth ; with a liandsome church, an elegant castle, manufactures of cloth, and important fairs, chiefly for horses. Pop. 3100.

HATZEG, or Hotzing [Latin, Vallopolis], a market tn . Austria, Transylvania, co. of, and 11 m . S. Hunyad, with three churehes, a townhouse, Franciscan monastery, and an important trade in cattle. Pop. 1100.

HATZFELD, an ane. tn. Hesse-Darmstadt, prov. Oberhessen, r. bank Eder, 15 m . N.W. Marburg. It is walled,

## HAUBOURDIN

## HAVANA

has a castle in ruins, two churches, a townhouse, and school ; a paper-mill. and three annual fairs. Pop. 668.

IIAUBOURDIN, a vil. France, dep. Nord, 5 m . W.S.W. Lille, on the Deule. It is generally well built, has a large and handsome church, manufactures of lace and white lead; bleachfields, tanneries, cotton and oil mills, a trade in combed wool, and four annual fairs. Pop. 3092.

HAUENSTEIN (Ober and Nifider), two monntains of the Jura chain, Switzerland, on the frontiers of Basel and Solothurn, about 18 m. S.E. Basel. Both of them are passed by roads from Basel, which have been constructed at great expense, and form important thoroughfares from W. Germany into the interior of Switzerland. They are supposed to be nearly in the line of two old roads used by the Romans.

IHAUGHAM, par. Eng. Lincoln; 1360 ac. Pop. 111.
HAUGHLEY, par. Eng. Suffolk; 2460 ac. Pop. 916.
HAUGHCON, three pars. Eng.:-1, Notts; 980 ac. Pop. 77.-2, Stafford; 2150 ac. Pop. 480.-3, (le Skerne), Darliam; 11.340 ac. Pop. 1518.

HAUGSD()RF (Gross), a market tu. Lower Austria, on the Pulkan, 30 m. N.N.W. Kornenburg; with a spacious market-place, a castle, and a burgher hospital. Pop. 1935.

IIAUKSWELL, par. Eng. York (N. Riding); 3850 ac. Pop. 338.

HAULCIIIN, a vil. and com. Belgium, prov. llainan', on the old Roman road called the Chansée Brunehault, 10 m . S.E. Mons, with a trade in horses. Pop. (agricultural), 1063.

HAUNS'TE'T'EN, a vil. Bavaria, circle Swabia, 4 m . S.S.E. Angsburg ; with a church, a ehapel, and nanufactures of wax-eloth; a large bleachfield, a paper, saw, and other mills. Pop. 729.

HAUP'TWEIL, or IIAUPTWyl, a vil. Switzerland, can. Thurgau, 1 m . S.E. Bischofzell, on the frontiers of St. Gallen. It has manufactures of cotton, with dye-works, print-works, oil-mills, saw-mills, \&c. Pop. 1250.

HAUSBERGEN, a tn. Rhenish Prussia, gov. of, and 4 m . S. Minden, r. bank Weser; with a Protestant parish chureh, manufactures of starch and gunpowder, and a trade in linen, yarn, and cattle. Pop. 850.

HAUSBRUNN, or Haszbrunka, a vil. IIungary, co. of, and 26 m . from Presburg; with oil, pitch, and tile works, and several mills. Pop. 1256.

IIAUSDORF (Oben), a vil. Prussia, prov. Silesia, gov. Breslau, circle (ilatz; with a parish clurch, a bleachfichd, and several mills and coal mines. Pop. 1079.

IIIUSEN, numerons places, Germany, particularly-1, (Ober-Iteusen), a vil. Bavaria, circle Swabia, 3 m . N. W. Augsburg; with a parish chureh, and several cattle-markets. Pop. 186I.-2, Two adjoining vils. Würtemberg, circle Neekar, bail. Brackenheim. United pop. 2062.

HAUSETON, par. Eng. Cambridge; 568 ac. Pop. 313.
IIAUSRUCK, a monntain range, Upper Austria, giving its name to a circle, and forming the watershed between the basins of the Inn and the $A$ ger. It is covered with forests, and has seams of lignite. In 1817, part of one of the moun tains fell in, and was replaced by a lake.

HAUSA, state, Africa. See Housss.
IIAUSSY, a vil. France, dep. Nori, 10 m. E.N.E. Cambrai, r. bank Selle: formerly defended by a strong eastle. It has manufactures of linen, breweries, brickworks, lime kilus, and sandstone quarrics. Pop. 3012.

HAU'TBOIS-Migna, par. Eng. Norfolk; 600 ac. Pop. 162.

MaU'TE ME or Mare Island, a small isl. British America, bay of Fundy, 8 m. S.W. Cape Chigneeto, composed mostly of steep rocks, but easily accessible on the E. side.

HAU'TELUCE [Latin, Vollis Lucia], a vil. and com. Sardinian States, div. Savoy, on the Doron, here crossed by a stune bridge, 39 m . S.S.B. Geneva; with a parish church, having one of the finest steeples in Savoy; a courthouse, school, and a trade in cattle and dairy produce, particularly clieese, resembling Gruyere. Pop. 1585.

Vol. 1.

the exchange, havana.- Froman Original sketch.
dows, which give the whole place a heavy, and even bloomy appearance; but consideratle improvement in the character of the streets has been, of late years, effected; and the town, though still unhealthy in summer, is less so than formerly.

## HAVANT

1186
HAVRE (Le)

The suburbs, standing chiefly on the other side of the bay, but in some parts approaching closely to the walls, are more pleasingly built, and, even in extent, are superior to the town. Havana is the see of a bishop, and the seat of the chief colonial authorities. The only exception is the supreme court; which, notwithstanding of repeated proposals to remove it to the capital, still sits at Puerto Principe. Among the principal buildings, the first place is due to the Cathedral; not so much on account of any architectural merit, but because it contains the ashes of Columbus, which were brought hither from San Domingo, in 1796. Near the altar, above an opening called the tomb of Columbus, is a tablet, inlaid in the wall, and sculptured with his bust in bas-relief. In addition to the Cathedral, there are nine parish, and seven other churches. The principal one is San Felipe. The otber buildings or public establishments deserving of notice are-the governor's house; the Admiralty; the Royal University, including a medical and law school, and chairs for the natural sciences; the large convent of San Juan de Dios, now used as an hospital ; the Exchange; the Opera-House, and two theatres-one of them said to be larger than the Scala of Milan; the Cuna or Foundling Hospital ; the Casa Real de Beneficencia, an extensive and well-endowed institution, combining an orphan hospital, a lunatic asylum, and an infirmary; San Lazaro, an hospital for persons affected by Kocubea or Lazarino-a kind of leprosy, peculiar to the W. Indies, and said to be incurable; and the prison, a large quadrangular building, well arranged, and placed so as to secure a free circulation of the sea-breeze. The staple manufacture of Havana is that of cigars, which have long obtained an almost universal celebrity. The other manufactures, consisting chiefly of chocolate, straw hats, and woollen fabrics, are not of much consequence. There are numerous printing-offices; and several daily papers are issued. The trade is most extensive and important. A large share is naturally engrossed by the mother country; from which there arrived, in 1852, 661 Spanish vessels, and departed, 699; the total arrivals for the same year being 1758, and departures, 1789. The following table presents a view of the exports of Havana from 1845-1852:-

| Years. | $\begin{gathered} \text { Ruga } \\ \text { boxe } \end{gathered}$ |  |  | Honey. tierces. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 267,595 | 170,466 | 20,075 | 817 | 31,409 | 2,72 |
| 1846 | 515,900 | 263,946 | 26,679 | 1,887 | 37,487 | 6,0 |
| 1847. | 661,766 | 346,390 | 32,763 | 1,435 | 36,095 | 10,49 |
| 1848. | 686,088 | 132,172 | 25,934 | 1,707 | 36,903 | 11,30 |
| 1849. | 605,463 | 509,044 | 34,413 | 1,939 | 26,048 | 7,46 |
| 1850 | 704,777 | 170,902 | 28,615 | 2,156 | 43,894 | 7,09 |
| 18 | 849.018 | 150,253 | 44,539 | 2,108 | 45,666 | 5,79 |
|  | 688,747 | 158,496 | 39.515 | 2114 | 37,113 | 5,8 |

* An arroba is equal to about 25 lbw , avorrduposs.

A railway, 45 m . long, connects Havana with Guines ; and there are several other lines leading into the interior, and used chiefly for traffic. Havana was founled in 1519 , on a site which was then called the Port of Carenas. In 1538, it was surprised and burned by a French privateer. During this and the beginning of the following century, it rapidly increased; great numbers of the inhabitants of Cuba flocking to its vicinity, to avoid the depredations of the buccancers. The English failed in an assault upon it in 1655 , but succeeded in capturing it in 1762 . In the following year, by the peace of 1763 , it was restored to Spain, and has ever since continued in its possession. For a long time Spain derived the chief part of her fleet from the building-yards of Havana; which, from 1724 to 1796 , furnished her with 51 ships of the line, 22 frigates, and several smaller craft; amounting in all to 110 vessels, carrying 5068 guns-six of them above 100 guns each. Pop. (1827), 94,023; whites, 46,621 ; free negrocs, 15,347 ; free mulattoes, 8215 ; slaves, 23,840 ;-(1841), 135,000.

HAVANT, a market tn. and par. England, co. Hants. The town, $19 \mathrm{~m} . \mathrm{E}$. by S . Southampton, on the railway thence to Brighton, consists of two narrow, but regular, and tolerably well-kept streets; has a church, a Dissenting chapel, and national and other schools. Parchment and leather were formerly made here on an extensive scale. A well-attended corn-market on Saturday. Area of par., 2560 ac . Pop. 2101.

HAVEL, a river, Germany, which rises among the lakes in the S.E. of Mecklenburg-Schwerin, enters Prussia near Fürstenberg, and flows circuitously S.S.W. past Spandau, where it receives the Spree; past Potsdam to Brandenburg, where,
after expanding into a series of lakes, it turns N.N.W., passes Rathenau and Havelberg; and, 5 m . below the latter town, joins r. bank Elbe, after a course of about 160 m ., of which more than 100 m . are navigable. Its principal affluents are -on the r. the Rhin and the Dosse, and on the 1. the Spree and the Plaue. Its navigable importance is much increased by three canals-the Finow, connecting it with the Oder the Plaue, connecting it with the Elbe; and the Ruppin, which, by connecting the upper and lower part of its course, through means of the Rhin, saves a long distance of circuitous navigation. A peculiar feature of the Havel is the great number of lakes which it forms by its expansion.

HAVELBERG, a tn. Prussia, prov. Brandenburg, gov. and 48 m. N.W. Potsdam, on an island formed by the Havel, and connected with the land by three bridges. It has a handsome cathedral, another church, and a large poorhouse; a court of justice, and several public offices; manufactures of hosiery, sugar-works, a brewery, distillery, building-yards, some shipping and trade, particnlarly in wood. Pop. 3077.

HAVENINGHAM, par. Eng. Suffolk; 2390 ac. P. 417.
HAVERAY (Great and Little), two isls. Scotland, co. Shetland, off W. coast Mainland.

HAVERFORD-West [called by the Welsh ITwlfordd], a parl. bor., market tn., river-port, and co. of itself, S. Wales, locally in co. Pembroke, of which it is the cap., beautifully situated on an eminence above the River Cleddy, 200 m . W. by N. London. It has some inconveniently steep streets; is paved, and lighted with gas; a guilảhall, jail, and cus tom-house - all respectable structures; three churches, two of which are ancient; seven Dissenting places of worship a number of daily schools, including a free grammar-school an almshouse and school, for clothing and educating 24 boys and 12 girls, founded in 1684 ; an asylum for pauper and criminal lunatics, and a workhouse. With exception of a paper-mill, there are no manufactures carried on, either in the town or vicinity. The river is navigable, at spring-tides, to Haverford-West, for vessels of 100 tons burthen. The port is dependent on that of Milford. Imports, chiefly groceries, and other articles, for the consumption of the town and surrounding country; and a few cargoes of timber from the Baltic and Canada. Exports, principally cattle, butter corn, and hard coal, for malting. The town was fortified by a strong castle, built in the 14th century, upon an adjoining rocky eminence. Part of the remains of this castle has been converted into a county jail. Haverford-West lias sent one member to the House of Commons since the 17th of Henry VIII. Registered electors (1851), 686. Markets on Tues day and Saturday. Races in the vicinity, in autumn. Pop. (1851), 6580.

HAVERIILL, two vils. U. States, America:-1, A vil. and township, New Hampshire, 62 m. N.N.W. Concord, with a courthouse, jail, Congregational church, and academy Pop. 2784.-2, A vil. and township, Massachusetts, l. bank Merrimac, across which is an elegant bridge, connecting it with Bradford. It has four churches, two printing-offices, and several manufacturing establishments. Vessels of 100 tons come up to the village. Pop. 4336.

HAVERHILI, a market tn. and par. England, cos. Essex and Suffolk. The town, pleasantly situated near the source of the Stour, $12 \frac{1}{2} \mathrm{~m}$. S.W. Bury St. Edmunds, has an ancient church, a Dissenting meeting-house, a charity school, and manufactures of cottons, fustians, and checks. Market day, Friday. Area of par., 3320 ac. Pop. 2451.

HAVERING-Atte-Bower, par. Eng. Essex ; 4290 ac. Pop. 427.

HAVERINGLAND, par. Eng. Norfolk; 2350ac. P. 160
HAVERSHAM, par. Eng. Bucks; 1430 ac. Pop. 283.
HAVRE, a vil. and com. Belgium, prov. Hainaut, on the Haine, 5 m . E. Mons, with two breweries, a tannery, salt work, flour-mill, and a trade in agricultural produce. P. 1966.

HAVRE (Le) [formerly Le Havre-de-Grace; Latin, Portus Gratice], a seaport tn. France, dep. Seine-Inferieure, N. side of the estuary of the Seine, 108 m . N.W. Paris, with which it is connected by railway. It is lined by a triple range of ditches, supplied with water from the sea; and is surrounded by ramparts and lofty walls, crowned by a parapet, and adorned by a fine planted alley. The fortifications, however cannot be considered strong, as they are completely commanded by adjoining heights. It is entered by five gates.

The town, which, with exception of a number of old wooden houses of wretched appearance, is of comparatively modern date, is built of brick or stone, with great regularity, in straight, wide, and well-cleaned strcets, which intersect each

in extent of shipping only by Marseilles. Its shipping trade, in 1850, stood as follows:-

|  | Exterkd. |  | Clbarkd. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Visscla. | Toan. | Vessels. | Tonn. |
| Foreign.... | 1456 | 351,829 | 1135 | 260, 120 |
| Coasting... | 2248 | 156,409 | 2336 | 181,583 |

Havre is the seat of a court of primary resort, and of commerce; the residenee of toreign consuls; and possesses a chamber of commerce, and a hydrographical school of the first class. Its history is not of much interest. The earliest notice of it is in the 15 th century; when it became of importance to form a new barbour, in consequence of the silting-up of that of Harfleur. The project was conceived, and some progress made in it, by Louis X 1 I.; but it continued little more than a fishing village till the time of Francis I., who conferred important privileges upon it, erected numerous works, and, at immense expense, gained the greater part of the present site of the town from the sea; which has, however, repeatedly threatened to resume possession, and cansed great disaster. A citadel was afterwards built; and Ilavre, being now regarded as a place of strength, beeame the object of repeated contests between the French aud the English. The old fortifieations having disappeared, have been replaced hy others; due chiefly to Bonaparte. Pop. 27,053.

HAVRE-me-(ibace, a small seaport, U. States, Maryland, r. bank, and just above the mouth of the Susquehanna,
other at right angles. The public buildings are not numerous, and possess little interest. They include the chureh of Nôtre-Dame, in a kind of bastard architecture, partly Gothie; the chureh of St. Franeis; the townhouse, formerly the governor's palace; the round tower of Francis I., the only relic of the fortifications of that monareh; the theatre, arsenal, exchange, library, and barracks. The manufactures consist of sulphuric acid, earthen and stone ware, paper, starch, lace, oil, refined sugar, cables, and other marine cordage. There are also breweries, and numerous brick and tile works. A govermment tobaceo factory employs 300 workmen; and from the building-yards a great number, both of sailing vessels and steamers, celebrated for the beanty of their make and their sailing properties, are annually fittedout. But the great dependence of Havre is on its commerce, for which it possesses great advantages, both in its harbour and in its position. Its harbour, which is said to be one of the most accessible in France, is entered by a narrow channel, formed by two long jetties, stretching from E. to W., and kept clear by eonstant dredging. This channel leads to the outer harbour [avant port], an irregular expanse of no great extent, which is left dry at ebb tide, and is ocenpied by great numbers of coasters, and other small vessels, which can safely touch the ground. Within the acaut port are capacious wetdocks, four in number, though three only are completed, capable of floating and accommodating about 300 large vessels, and lined with fine quays and extensive warehouses. The harbour is aecessible by large vessels only during four hours of each tide; a disadvantage so far counterbalaneed by the fact that the tides of LIavre continue at their maximum for three hours. Havre thus commands the greater part of the import and export trade of Paris, and of the more important towns in the N. of France; importing vast quantities of colonial and other produce, among which

33 m. N.E. Baltimore. It contains an Episcopal chureh; and has valuable shad and herring fisheries. It is a station on the Wihnington and Baltimore Railway; and the Susquebanna Canal, which connects the Chesapeake with the canals of Pennsylvania, terminates here. Pop. 1200.

HAWAII, or OWHymee, the largest and most southerly of the Sandwich or Hawaian Islands; deriving a melancholy interest from having been the death-scene of the illustrious navigator, Cook, who was there murdered, in Kealakeakus bay, February 14,1779 ; lat. (L. point), $19^{\circ} 5^{\prime}$ N.; lon. $155^{\circ} 49^{\prime}$ W. (к.) It is somewhat of triangular shape, 100 m . long N . to S., the N.E. side 84 m. , the S.E. 64 m. ; area, $4040 \mathrm{sq} . \mathrm{m}$. It is wholly voleanic, and appears to be less an upheaval than merely deposits from the numerous volcanoes of which it forms the base. The S.W., S., and S.E. coasts are composed almost wholly of lava or voleanie cinders, frequently exhibiting deep caverns, the abode of imuncrable birds, and perpen-

rhe crater of kilauea, ilawall.-From the United States Expluring Expeditinn.
dieular cliffs, against which the sea dashes with fury. 'Ine N.E. coast is likewise generally precipitous, eften basaltie, and cut into deep gulleys, and presents almost innumerable cascades, resulting from heavy showers falling on the mountains. In some localities, twenty of these cascades may be seen in cotton holds a most important place;
and exporting mumerous articles of French manufactureparticularly silks, eottons, ironware, plate, mirrors, furniture, stained paper, bricks and tiles, provisions, tools, philosophical instruments, and agricultural implements; also wine, liqueurs, flour, \&c. Havre is the second port in France; being exceeded
a distance of 100 or 200 yards. The N. and N.W. coasts are flatter than the others, and possess a considerable extent of rich fertile land; in many places, however, badly supplied with water. On all the other coasts, likewise, are numerons spots having a rich soil. The mountains do not ascend in peaks, but rise gradually and comparatively unbroken. The principal snmmits are Mauna-Kea, in the N.E., 13,953 ft., topped with nine cones; it consists almost wholly of scorix, and presents no apparent crater. Mauna-Loa, in the S., $13,760 \mathrm{ft}$., a smooth dome, crowned by an immense crater called Moku-a-weo-weo, upwards of 2 m . in diameter, of whose tremendous power the surrounding country, covered with lava, shows ampleevidence; and Mauna-Huahali or Muarari, in the W., 7822 ft ., with several craters. But perhaps the most remarkable of the volcanoes is that of Kilauca, 3970 ft . high, E.S.E. of MaunaLoa, on an elevated plain. It does not present a cone, but is a huge black pit of irregular shape, with almost perpendicular sides, $3 \frac{1}{2} \mathrm{~m}$. long by $2 \frac{1}{2} \mathrm{~m}$. broad, and 1000 ft . deep; the inside bordered by a black ledge of cooled lava, 600 to 2000 ft . broad. During the day, the bottom looks like a heap of smouldering ruins; but at night, it shows two immense pools or lakes of cherry-red liquid, in a state of violent ebullition, which illuminates the whole vast expanse, and flows in all directions like water; and numerous conical craters continually throwing out stones, ashes, lava, smoke, and flame. Sulphur is plentiful, and steam and gas jets numerous; earthquakes occur very frequently, but are not often disastrous. Between the abovenamed three great mountains, is a great central valley, almost unknown and uninhabited. Among the numerous indentations of the coast, the most important are the Bay of Kealakeakua or Karakakora, on the W.; and Byron's, Milo, or Waiaka bay, on the E. coast; the latter is described as extensive, wellprotected, and affording good anchorage and excellent facilities for watering. The climate is in general mild and equable; in some parts rain seldom falls except in occasional showers, while in others, both in the interior and on the coast, as at Byron's Bay, showers occur daily. The island is well-wooded, and cultivation is carried on in many places which would be deemed almost impracticable in any other country, arising, in a great measure, from the desire of the natives to be near the sea, for the sake of the fish which abound along the coasts. In excavations among the lava rocks, sweet potatoes, melons, and pine-apples are planted; all of which produce a crop. The staple commodities are sweet potatoes, upland taro, and yams; the latter almost entirely raised for ships. Sngar-cane, bananas, pine-apples, bread-fruit, cocoa-nuts, and melons, are also cultivated. The inhabitants are almost entirely confined to the coasts, along which they live in small villages. - Pop. (1823), 85,000; (1839), 39,364.-(U. S. Expl. Exped.; Findlay's Directory for the Pacific, \&ic.)

HAWAIIAN ISLANDS. See Sandwich Islands.
IIAWARDEN, a market tn . and par., N. Wales, co. Flint. The town, 6 m . W. Chester, is well paved; has an ancient, plain church, an endowed free grammar-school, and several other daily schools. At its E. end are the picturesque remains of an ancient castle, supposed to have been built soon after the Conquest. Market day, Saturday. In most of the townships of Hawarden parish there are considerable coalmines, from which Chester and the adjacent country are chiefly supplied; and in some of them fire-clay, of very fine quality, is also found. Glauber salts, sal-ammoniac, ivoryblack, \&c., are also manufactured in the parish. Pop. 6079.

HAWASII, a river, Abyssinia, which rises in a mountainous district; lat. $8^{\circ}$ N.; lon. $40^{\circ}$ E.; and, after a N.E. course of about 276 m ., discharges itsclf into lake Aussa; lat. $11^{\circ} 18^{\prime} \mathrm{N} . ;$ lon. $42^{\circ} \mathrm{E}$. Both sides of this stream are covered with beautiful forests.

HAWAZ, a tn. Persia. See Ahwaz.
HAWERBY, with Beesby, par. Eng. Lincoln; 870 ac. Pop. 87.

HAWES, a market tn. and chapelry, Eugland, co. York (N. Riding), $17 \frac{1}{4} \mathrm{~m}$. W. Middleham, on the Yore. It has a church, and places of worship for Independents, Wesleyans, Sandemanians, and Friends; an endowed and a national school; and manufactures of knit hosiery, caps, jackets, \&c. Near it is a fine waterfall. Market day, Tnesday. Area of chapelry, 16,159 ac. Pop. 1611.

HAWES WATER, a small picturesque lake, England, co. Westmorland, 5 m . N. Kendal; 3 m . long, and very deep.

HAWICK, a bor. of barony, Scotland, co. Roxburgh, on the Teviot, $40 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Edinburgh, with which it is connected by railway. It consists of one long, and several diverging streets and lanes, paved, lighted with gas, and well supplied with water. Several of the newer streets contain many handsome houses; but some curious old structures are still to be seen in various parts of the town, having more the aspect of fortresses than ordinary dwellings. It has an old, and an elegant new parish church, a Free, and three U. Presbyterian churches, and a Congregational chapel; an indifferent-looking exchange, three public reading-rooms, a public and a trades' library, a school of arts, 2 savings'-bank, several religious and benevolent societies, an excellent academy, and several private schools. At the upper extremity of the town is ar artificial mound of earth, called the Moat, of great antiquity; supposed to have been used, at a remote period, as a court for the administration of justice. The Tower Inn is composed, in part, of an ancient border peel, and was the residence, in former times, of the barons of Drumlanrig. Hawick has long been celebrated for its woollen manufactures. These consisted formerly of carpets, tartans, shawls, plaids, flannels, \&c.; but the attention of the manufacturers is now principally directed to the production of woollen hose, of which they annually produce above $1,000,000$ pairs, exclusive of blankets and flannels. Leather-tanning, skin-dressing, glove, and candle making, are also carried on to a considerable extent. Gavin Douglas, the poet and translator of Virgil, was admitted rector of Hawick in 1496; and near the town Dr. John Leyden was born. Pop. (1851), 7420 ; or including the adjoining village of Wilton, 8868 .

HAWK, a prefix to the name of several pars. England: -1 , (Hawkchurch), Dorset ; 3900 ac. Pop. 820.-2, (Hawkedon), Suffolk; 1210 ac. Pop. 339.-3, (Hawkesbury), Gloucester; 8940 ac. Pop. 2231. 4 , (Hawkhurst), Kent; 8590 ac. Pop. 2656.-5, (Hawkinge), Kent; 1490 ac. Pop. 146.-6, (Hawkley), Hants; 1710 ac. Pop. 323.-7, (Hawkridge), Somerset ; 3260 ac . Pop. 79.-8, (Hawksworth), Notts; 720 ac . Pop. 203.-9, (Hawkwell), Essex ; 1250 ac. Pop. 366.

HAWKE BAY, (WAIROA), an extensive indentation, S.E. coast N. Island, New Zealand, N. extremity ; lat. $38^{\circ} 55^{\prime}$ S.; lon. $177^{\circ} 40^{\prime}$ E. (R.) It is of a semicircular form, very oper, and from 50 m . to 60 m . in length, S.W. to N.E. Fine timber, of all kinds, is met with here, but difficult of access.

HAWKESBURY (East and Wests), two townships, Upper Canada, Ottawa dist., at the E. extremity of the upper province. Pop. (1845), 1751 and 1976 respectively.

HAWKESBURY, an isl. British N. America, W. coast, formed by several arms of the sea extending N. from Princess Royal Island; lat. $53^{\circ} 30^{\prime} \mathrm{N}$. ; lon. $129^{\circ} \mathrm{W}$. It is 42 m . N. to S.; breadth, a m.; discovered by Vancouver.

HAWKSHEAD, a market tn. and par. England, co. Lancaster. The Town, $25 \mathrm{~m} . \mathrm{N} . \mathrm{N}$. W. Lancaster, near the head of Esthwaite water, has two principal streets, straight, and well kept; houses of blue stone, and slated; excellent supply of water. It has a church, and places of worship for Baptists, and Friends ; a good townhall, with a spacious mar-ket-place underueath; a free grammar, and various other schools, and several charities. ILoop and bobbin making are carried on to a large extent; but the inhabitants generally are engaged in petty trade and agriculture. Weekly narket on Monday. A rea of par., $22,220 \mathrm{ac}$ Pop. 2323.

HAWLBOLINE, an isl. Ireland, Cork harbour, $\frac{3}{4} \mathrm{~m}$. S. Queenstown, and once a naval depôt ; also a rock, co. Down, off the entrance of Carlingford harbour.

HAWLING, par. Eng. Gloucester; 3430 ac. Pop. 217.
HAW NBY, par. Eng. York (N. Riding); 22,250ac. P. 815.
HAWNES, or Haynes, par. Eng. Bedford; 3260 ac . Pop. 913.

HAWOR'TH, a vil. and chapelry, England, co. York (W. Riding), 8 m. N.W. Halifax, with an Episcopal and four Dissenting chapels, extensive worsted-spinuing, and manıfactures of woollen stuffs. Pop. 6303.

HAWRIDGE, par. Eng. Bucks; 610 ac. Pop. 233.
HAWS'TEAD, par. Eng. Suffolk; 1980 ac. Pop. 457.
HAWTON, par. Eng. Notts; 2150 ac. Pop. 240.

HAXEY, par. Eng. Lincoln; 8470 ac. Pop. 2071.
HAY.-1, An inland co., W. Australia, about 50 m . sq. mountainous in the $S$. parts, and having a number of salt
lakes, but with a fair proportion of good soil and pasturage. -2 , A river, W. Australia, a tributary of Mairet lagoon, 25 m . W. Albany.-3, A conieal peak, E. Australia, thickly wooded; lat. $27^{\circ} 36^{\prime}$ S.; lon. $152^{\circ} 8^{\prime}$ E.-4, A cape, British N. America, Arctic Sea, near lon. $95^{\circ} \mathrm{W}$.

HAY, a market tn. and par. S. Wales, co. Brecknock. The тows, 13 m . N. E. Brecknock, is lighted with gas, indifferently supplied with water, and houses, though of stone, mostly of a poor description. It has a plain, romanticallysituated clureh ; several Dissenting places of worship, national and other schools, a mechanics' institution, and nunerous small charities. Formerly, a considerable manufacture of flannel and woollen stuffs was carried on here; but this business has, of late years, very much fallen off. Weekly market, Thursday. Pop. 2107.

HAYCOCK, various isls. in different parts of the world: -1. China Sea, off W. side Busvagon, one of the Philippines, high and roeky; lat. $12^{\circ} 9^{\prime}$ N.; lon. $119^{\circ} 51^{\prime} 15^{\prime \prime}$ E.-2, Celebes Sea, between isl. Celebes and Mindanao; lat. $4^{\circ} 18^{\prime}$ N.; Ion. $125^{\circ} 23^{\prime}$ E. (r.) - 3 , A small rocky islet, Mergui Archipelago, S. from St. Matthew's Island; lat. $9^{\circ} 40^{\prime}$ N.; lon. $97^{\circ} 50^{\prime}$ E. -4, China Sea, 40 m . S.S.W. Great Natunas, high, of eonieal shape, having a reef projecting from it to the S.W. and S., 3 m . or 4 m .; lat. $3^{\circ} 19^{\prime}$ N.; lon. $107^{\circ} 34^{\prime}$ E.-5, China Sea, S. S.W. South Natunas; lat. $2^{\circ} 13^{\prime}$ N.; lon. $108^{\circ} 57^{\prime}$ E.-6, Flores Sca, Pantar Strait, rises upwards in the form of a cone or haycock; lat. $8^{\circ} 18^{\prime}$ s.; lon. $124^{\circ} \mathrm{E}$.
ha YD, a tn . Bohemia, cirele of, and 25 m . W. Pilsen, well built, with a castle, parish church, townhouse, and hospital ; manufactures of wax-eloth and flannel, important glassworks, and a trate in agrienltural produce. Pop. 1710.

HAYDON, two pars. Eng.:-1, Dorset; 660 ac. P. 116. -2, Essex; 2470 ac. P’op. 324.

HAYDON-BRIDGE, a vil. and chapelry, England, co. Northumberland, 6 m . W. Hexham, on the S. Tyne, here crossell by a bridge, and on the Neweastle and Carlisle Railway. It has an Episcopal and two Dissenting chapels, a free school, and 20 almshouses. Pop. 1908.

HAYDORR, par. Eng. Lincoln; 5140 ac. Pop. 617.
HAYES, or Hild liver, British N. America. It rises near Lake Wimipeg, traverses several small lakes, and falls into Hudson's Bay, at Fort York, after a N.E. course of above 300 m . Its banks are, in some places, steep, rocky, and covered with pines.

HAYES, two pars. Eng. :-1, Kent; 1300 ac. Pop. 450. -2, (or Heese), Middlesex; 5670 ac. Pop. 2076.

HAYFIELD, a vil. England, co. of, and 37 m . N.W. Derby, on the Kinder. It has well-kept streets, houses of stone, water abundant, a handsome church, an old Methodist meeting-house, an endowed prammar, and several other schools; cotton manufactures and calico-printing. Pop. 1715.

HA YINGEN. a tn. Wiirtemberg, circle Danube, bail. of, and 10 m . S.S.E. Miinsingen, with an old castle, townhouse, cornhouse, parish chureh, two ehapels, and an hospital ; potassworks, breweries, a trade in corn, horses, and cattle. 1'. $6 \overline{5} 5$.

HAYLE, a small scaport tn. England, co. Cornwall, $3 \frac{1}{2} \mathrm{~m}$. S.E. by E. St. Ives. It was formerly celebrated for its copper-house for smelting the ore; but, on account of the scarcity of coal, the latter is now carried to Swansua. It is at present equally celebrated for its two iron foundries ; in which the largest engine eylinders are east, not only for the Cornish mines, but for exportation. The principal trade of the port is the exportation of eopper ore to Wales, and tin to Bristol. Imports:-coal, timber, groceries, and shop-goods. Vessels of 200 tons burthen can enter at spring-tides.

HAYLING, an isl., S. coast England, co. Southampton, in Chichester harbour, scparated from lortsea by a very narrow channel. It lies low, comprises mueli heath and waste land, and is divided into the two parishes of N. and S. Hayling; in the latter of which a watering-plaee has been formed. Area, 3670 ae. Pop. 896 . Off the S. coast is the relic of a traet of land, submerged in the reign of Edward Ill., now forming an extensive shoal, named the Woolsner sandbank.

MAYNAU, a tn. Prussia, prov. Silesia, gov. of, and 11 m . W.N.W. Licgnitz, on the Deichsa, and on the railway trom Frankfurt-on-the-Oder to Breslau. It has a Protestant chureh, several schools, an infirmary, hospital, and poorhonse; mannfactures of woollen and linen cloth, tile-works, several mills, a trade in corn, and a weekly market. Pop. 3899.

HAYNESTOWN, two pars. Irel.:-1, Kildare; 459 ac. Pop. 63.-2, Louth; 1980 ac. Pop. 445.

HAY'S CASTLE, par. Wales, Pembroke. Pop. 366.
Hayti, Haiti, or Sin Domingo (Island of) [Spanish, San Domingo; originally, Española; Latin, Hispanioh], one of the Leeward Islands, W. Indies; and, after Cuba, the largest, one of the riehest, and most beantiful of the Antilles. It lies S.E. from Cuba, and is separated from it by the Windward Passage, 50 m . broad ; Jamaica and Porto Rico lie W. and E. of it, but at considerable distances. It extends from Cape Engaño, lat. $18^{\circ} 35^{\prime} \mathrm{N}$. ; lon. $68^{\circ} 20^{\prime} \mathrm{W}$. (r.), to Cape Tiburon, lat. $18^{\circ} 22^{\prime} \mathrm{N}$. ; lon. $74^{\circ} 28^{\prime} \mathrm{W}$. ; and from Point Beata, lat. $17^{\circ} 36^{\prime} 42^{\prime \prime} \mathrm{N} . ;$ lon. $71^{\circ} 32^{\prime}$ W.; to Cape Isabella, lat. $19^{\circ} 59^{\prime} \mathrm{N}$. ; lon. $71^{\circ} 1^{\prime} \mathrm{W}$.; and is about 400 m . long, E. to W., and 150 m . broad, at its broadest part. Area, including the islands of Tortuga, Gonaive, \&e., abont $27,690 \mathrm{sq} . \mathrm{m}$. ; or nearly as large as Scotland. The E. part of the island is oceupied by the Republic of Santo Domingo-(see Santo Domingo) ; and the W. part by the Empire of Hayti-(see next article).

The island of Hayti is of irregular form, being deeply indented by bays and inlets, and having corresponding projec tions; the greatest of the latter being its S.W. portion, which forms a headland about 150 m . long, and 18 m . to 40 m . broad. It is intersected, W. to E., by three chains of mountains, all mutually connected by offsets; between are extensive plains and savamnahs. The prineipal central clain, which contains the culminating peaks-of whieh Cibao, 7200 ft . high, is the loftiest-commences W. at Cape Nicolas, takes an E.S.E. direction, and terminates at Cape Engaño. Nearly parallel with this ehain, another, commencing W. near Monte Christi, nearly skirts the N. coast, till it terminates E. abruptly, on approaching the so-called peninsula of Samana; it is followed by low marshy grounds, interlaced by estuaries and channels, which separate stinana from the mainland, and afford communication from the bight of that name to the sea on the N. shore of the island; the heights, however, re-appear on the opposite side of the low grounds, and terminate in Cape Samana. Between these two mountainranges extends La Vega Real, or the Royal Valley. 130 m . long, watered by the Yaeki and Yuma, and presenting almost boundless pasture-lands. The third, and S. mountainrange, commences W. at Cape Tiburon, extends E. along the whole of S. headland, and terminates at the river Neiva, abont 80 m . W. the town of San Domingo. Besides La Vega Real, there are other extensive plains and valleys; more particularly, on the coast E. of Sin Dominero, los llanos, or the flats, 80 m . Iong-a rich pasture district. The plain of Cayes, at the W. end of the island, has been greatly increased in extent by the formation of a kind of rock, consisting of minute fragments of shells and coral, incrusted with calcarcous cement, resembling travertin. Fragments of vases, and other human works, have been found in it at a depth of 20 ft . This kind of rock is now in process of formation throughout the whole of the W. Indies. All the streams of Hayti, of any importance, originate in the great central mountain-ehain; and, as may be inferred from the general direction of the momitains, have either an E., W., or S. course-no stream, of any consequence, flowing N. The principle are-Artibonite, flowing W., and Monte Cliristi or N. Yacki, N.W.; the Yuma, flowing S.E.; and the Neiva or S. Yacki, the Nisao, and the Ozana, flowing s. They are all encmmbered at their mouth with sand-bars; and hence few of them are navigable, even for short distances. The Ozama, however, admits vessels drawing 12 ft . or $12 \frac{1}{2} \mathrm{ft}$. There are several lakes, mostly in the S.W. of the island. The chief are, the salt lakes of Enriquillo, and Azuey; the former in the valley of the Neiva, about 20 m . long by 8 m . broad, and abounding in caymans; the latter, $10 \mathrm{~m} . \mathrm{W}$. of lake Enriquillo. about 10 m . long, hy 6 m . broal. S. of these lies the fresh lake of Icotea or Limon, about the size of lake Azuey. Mineral springs exist in various parts. The most noted, in the E. portion of the island, are those of Baniea-temperature, $112^{\circ}$ to $125^{\circ}$-Biahama, Yaya, and Pargatal; and in the W. portion those of St. Rose, containing iron, vitriol, and alun; the saline waters of Jean Rabel, and those of Dalmarie, containing sulphur, potash, \&c. The mineral products are various and rich, includitg goll, platina, silver, quieksilver, copper, iron-similar to that of Damemora in Sweden-mag-
netic iron, tin, sulphur, manganese, antimony, rock-salt, bitumen, jasper, marble, opal, lazulite, chalcedony, \&c. The gold mines are abandoned; and gold-washing is only carried on by the poorer classes, in the N. rivers. Indeed, all of the minerals are negleeted, from want of capital.

Hayti, as a whole, is one of the healthiest of the W. Indian islands; and this may more especially be said of its N . provinces, and more elevated localities. The Vega Real is famed for its salubrity. The seasons are, a wet, during whieh heavy rains are frequent-3, and even 5 inches, at times, falling in 24 hours ; and a dry, during which little or no rain falls; and, in some localities, years have passed over without a single heavy shower. At San Domingo the mean temperature is $78^{\circ} 5^{\prime}$, and the extremes $60^{\circ}$ and $95^{\circ}$; while at Port-auPrinee the range is from $63^{\circ} 5^{\prime}$ to $104^{\circ}$. The minimum oceurs in December, and the maximum in August and September. Land-breezes moderate the summer heats. Hurricanes oceur seldomer than in the Windward or Caribbean Islands. Earthquakes, though not frequent, have been very disastrous; the most notable recorded are those of $1564,1684,1691,1751$, 1770 , and 1842. By that of 1751 Port-au-Prince was destroyed, and 60 m . of coast submerged; and, by that of 1842 , towns were overturned, and thousands of lives were lost. Nowhere is tropical vegetation seen to greater advantage than in Hayti ; contributing, with the lofty and, at times, rugged monntains and deep valleys, to render the scenery of this island unsurpassed. Columbus and his followers, when they came in sight of La Vega Real, supposed they had reached an earthly paradise. Majestic pines, noble mahogany trees, fustic, satin-wood, and lignumvitæ, clothe the mountains, and form the prineipal exports of the $S$. provinees. 'The roble or oak (Catalpa longissima), which yields hard, durable wood; the wax-palm, divi-divi (Caesalpina cariaria), numerous fine cabinet-woods, and the riehest flowering plants, abound; and the usnal tropieal vegetables-plantains, bananas, yams, batatas ; and fruits-oranges, pine-apples, cherimoyas, sapodillas, with melons and grapes, yield a plentiful return. The staple cultivated products are-coffee, sugar, indigo, eotton, tobaceo, and eacao; the quantities of which raised have fallen off, in eonsequence of the unsettled state of the island. The W. or Freneh section has always been the best cultivated. The native quadrupeds of Hayti are small-the largest not bigger than a rabbit; but the animals introdueed from Enrope, and now in a wild state, have thriven prodi-giously-large numbers of eattle, pigs, and dogs, now roaming freely in the savannahs and in the mountain forests. Birds are neither numerous in species nor beautiful in appearance; still great numbers of pigeons (Columba leucocephala) are annually taken and used as food; and ducks, in large quantities, and other swimmers and waders, frequent the marshy places. If birds are few, insects are no less numerous. The lakes and rivers contain numbers of caymans and alligators; and, in the surrounding seas, whales are common in spring; and green and hawksbill turtles, lobsters, and crabs, abound on the coasts.

When the Spaniards discovered the island, under Columbus, in 1492, they found it inhabited by a happy, docile, indigenous race, subject to five hereditary ehiefs, named caeiques, who reigned over as many districts-that whieh included the La Vega Real being the most important. So ruthlessly were these poor aborigines dealt with by the Spaniards, that in 1507 they were reduced to 60,000 ; and in 1535 there remained only 500 . The pure race died wholly out the latter end of last century ; but their eharacteristic features, and luxuriant hair, are still to be traced among their descendants, from intercourse with Europeans, Africans, and coloured people. They still are named Indios. The aborigines believed in a Supreme Being, whom they did not adore; paying that tribute to inferior deities, called Zemes, whom they dreaded, and whom they represented by figures carved in wood and stone, or manufaetured of clay or cotton. They believed in the immortality of the soul; and thought, in the future state, to meet their friends in an earthly paradise. A number of Indian antiquities are still met with, consisting of figures, mortars, daggers, stools, \&c., carved in wood, or shaped in clay. Broken pottery is often found; and recently a granitic ring, 2270 ft . in circuit, was discovered in the interior, near San Juan; where, in former times, resided the redoubted elicf, Caonabo. A cemetery, with numerous graves,
and several limestone caves and grottoes, with picture-writings traced upon the rocks, have been met with in various quarters, some of them very elaborately executed. The W. end of the island is now inhabited by an African race; and the E. end by a raee of Spanish descent, intermingled with numerous negroes and coloured people.

The principal towns in Hayti are Cape Haytien, Gonaives, and Port-au-Prince, in the W.; San Domingo, and Savana-laMar, in the E.; and Monte Christi and Santiago in the N.

As already indicated, Hayti was diseovered by Columbus in 1492; and here, at Isabella, on the N. shore of the island, the discoverer founded the first Spanish colony in the new world. The Spaniards, by their oppression, having exterminated the aborigines, introduced African slaves to cultivate the sugar-cane, \&c. Numerous colonists emigrating to S . America, after the conquest of Peru, the inhabitants were all withdrawn to the interior, to prevent their escape; and the W. end of the island thus left free to the French colonists, who, driven from St. Christopher's, settled there in 1630. These settlers captured the pigs and horned cattle that had become wild, sold the skins to traders who touched on the coast, and smoked the flesh, both for food and for sale, on a grating of wood, called boucan; whence was given them the name of Buccaneers. Joining arms with freebooters, who, in 1632, settled in Tortuga, and who were named Flibustiers, from the small fast fly-boats in which their expeditions were earried on, they became marauders by sea and land; and their suceesses rendered the name Buccancer terrible over all the W. Indian seas. Ultimately, the island of Tortuga, and part of the mainland, were claimed by the French settlers for their king. The first governor was appointed in 1664 ; and by treaty with Spain, of 1773 , the W. part of the island was guaranteed to France. The Spanish part declined, and the French part prospered ; and in 1789 was in its most flourishing state. In 1790 the population of the island was estimated at 550,000 ; eonsisting of whites, who were Europeans, and their descendants; negroes, nearly all slaves; and people of colour, the offspring of the intercourse of the two former races. Many of the latter were free-born, or had obtained their liberty, and likewise had enjoyed a liberal education; still they were earefully excluded from political privileges, and were not eligible to sitnations of authority or trust. On the breaking-out of the great Frenel revolution, a contest ensued between the coloured people and the whites; the former demanding equal privileges with the latter. A petty, but sanguinary war, ensued; until the slave population, also rising, joined the coloured people, and completely subdued the whites. The whole island, including the Spanish portion, ultimately fcll under the power of the negro chief, Toussaint L'Ouverture, first president of the Haytian republie. Me was afterwards betrayed into the hands of the French, who had despatched an army to Hayti, with the view of regaining the position they had lost in the island; but, after some partial successes, they were permanently expelled; and in 1803 the island was declared independent, and its Spanish name, of San Domingo, replaced by its indigenous one, of Hayti, meaning the mountainous country. Contentions for power suceeeded between the various leaders of the young republic; unheard-of atrocities were eommitted, and much blood spilt -limited, however, chicfly to the French portion of the island. In 1821, the Spanish portion declared itself independent of the mother country, and assumed the name of Spanish Hayti; but it was soon subjugated by Boyer, the president of the Haytian Republic, or French Hayti; and the whole island was thus brought under one government. In 1842, a revolution broke out, and President Boyer was compelled to flee to Jamaiea; and, in 1844, the inhabitants of the Spanish portion rose, overpowered their Haytian oppressors, and formed themselves into a republic, under the name of Santo Domingo, whiel was proclaimed, November 24, 1844. After various individuals had, for a short period occupied the presidential chair of the Haytian Republic, the election fell upon General Soulouque, who, in 1848, ordered a new massacre of the coloured race; and, the following year, made an unsuccessful attempt to subjugate the Dominican Republic. He was successful, however, in aiming at the imperial crown; and, in the latter half of 1849 , ascended the throne, under the title of Emperor Faustin I. He surrounded his throne with a court and hereditary nobility, instituted orders of knight-
hood, \&c.; and, as he had no male issue by the empress, the amended constitution permitted him to seleet his successor from among his issue. The independence of the Dominican Republic was virtually reeognized by Great Britain, by the appointment of a consul to it, in 1849 ; and it was formally recognized by a treaty of amity and commerce, ratified September 10, 1850. But neither Emperor Faustin I. (Soulouque), nor the U. States, nor any European power, has yet (April, 1852) recognized the young republic. Pop. of whole islard estimated at 943.000 .-(Private Communication from Sir R. H. Schomburgk, H.M. Consul at San Domingo, ecc.)

IIAY'TI, or IIaiti (Esipire of), an independent state, W. Indies, oeenpying the W. end of isl. Hayti or San Domingo, and corresponding with the portion of the island formerly belonging to the French, and including the aljacent islands of Tortuga, Gonaives, \&c.; cap., Port-au-Prince. The E. boundary, towards the Dominican Republie, is formed by an irregular line, drawn, $S$. to $N$., from the river Anses-à-Pitre or Pedernales, on the $S$. coast, about lon. $71^{\circ}$ $50^{\prime}$, to the mouth of the river Massaere, which flows into the bay of Mazanilla, about 10 m . S.W. Cape Haytien. Area, $10,081 \mathrm{sq}$. m. It is divided into six departments, subdivided into arrondissements and communes. The country, as seen by the preceding article, is monntainous, interspersed with rich fertile plains and valleys, is well watered, and yields spontaneously numerons valuable products; more especially fine timber, of various kinds, and dye-woods. Agriculture, however, on which it must greatly depend for prosperity, is in a very indifferent state, and is prosecuted with no degree of vigour; the generality of the rural inhabitants living, from day to day, on the spontancous productions of the soil. The produce in cotton, sugar, indigo, tobaceo, \&e., has consequently greatly fallen off, reducing, in a corresponding degree, the exports of these articles. Little satisfactory information can yet be obtained respecting the commerce of this empire. In 1845, Great Britain exported to Hayti mannfactures to the value of $£ 215,072$; obtaining, in return, coelineal, cacao, coffee, fustic, logwood, mahogany, eotton, and bees'-wax. Accounts are kept in U. States' dollars and cents.

By the eonstitution of 1843 , the sovereign power was recognized to be in the people; the executive power was placed in the hands of a president; the legislative in a chamber of commons and a senate-the former consisting of ons or more representatives for each commune, elected for three years, and the latter of six for each department, elected for four years, and both uniting, on certain occasions, to form the National Assembly; the julicial power was placed in a court of cassation, being the high tribunal of appeal, with various subsidiary and initiatory courts. The laws are based on the code ciril of France. The whole patronage, civil and military, being in the hands of the president, Sonlouque dispensed it in such a manner as enabled him, in 1849 , to have his title of president ehanged into that of emperor, and to have the eonstitution altered to suit the circumstances. Princes of the hlood, dukes, counts, barons, and two orders of knighthoodthat of St. Faustin, and a legion of honour-were created to adorn the court of this pigmy empire. The effective foree of the army is stated to be $40,000 \mathrm{men}$; and that of the navy 15 small vessels, formerly merehantmen, and 1000 men.

The people are nearly wholly of negro race, speak the French language, and profess the R. Catholic religion; other forms of religion, however, being tolerated. The government having reserved to itself the supervision in matters of religion, the Pope has never recognized the Haytian chureh; the affairs of which are superintended by a vicar-general, under the direction of the minister of education and religion. In every parish a school, on the Lancasterian system, is maintained at the public expense. 'The clergy,' says a recent French writer, ' with few exceptions, consists of priests that have been expelled from their diocese, and who seek a fortume in a country over which the hierarchical sway does not extend. Others are only priests in their own opinion, and some are not even able to officiate; finally, the larger number live in concubinage.' With such a state of matters, in a population composed of slaves and their descendants, a lax state of morals is to be expected; religion is neglected-nay, often despised; the marriage-tie is seldom solemnized; and concubinage so gencral, that not more than four births in the
hundred are said to be legitimate. Few forcigners reside in Hayti; still those who do are well protected. They cannot hold real property, except in the name of a Haytian, with whom they associate for that purpose, and in whose name it is registered. Principal towns:-Port-au-Prinee, the capital; Cape Haytien, Gonaives, \&e. Pup. estimated at 550,000females greatly predominating in numbers. For History, sce preceding article.-(Private Communication from Sir R. II. Schomburgk, H.M. Consul at San Domingo, \&ec.)

IIAY'TIEN (Cape). See Cape Maytien.
HAYTON, three pars. Eng.:-I, Cumberland; 7650 ac. Pop. 1217.-2, Notts; 2700 ac. Pop. 281.-3, York (E. Riding); 2980 ac. Pop. 485.

HAYWOOD, two vils. and townships, England, co. Stafford :-1, (Great), 4 m. N.W. Rudgeley, is neat and well built, has an Episeopal elnreh, and places of worship for Independents and R. Catholics. Pop. 761.-2, (Little); a neat village, $\frac{1}{2} \mathrm{~m}$. S E. the former. Pop. 519.

HAZZAREHS, tribe. See Afghanistan.
HAZARYBAUGH. atn. Mindoostan, presidency Bengal, prov. Balar, 220 m. N.N.W. Calcutta, on an elevated tract of table-land. The principal bazaar is open, and regularly built ; houses of mud. Near it are hot springs, strongly impregnated with sulphuretted hydrogen.

IIAZEBROUCK, a tn. France, dep. Nord. 24 m . W. N. W. Lille. It is tolerably well built, has a spacious and richly ornamented parish church, erected between 1490 and $1520 ;$ a fine townhouse, a sub-prefecture (both modern); communal college, puhlie hospital, with a lofty open spire; and an old convent of Augustims, now occupied by the large linen market; a primary school, a small public library, manufactures of linen, thread, stareh, soap, leather, and salt; breweries, tanneries, dye-works, oil-mills, and limekilns. An important linen market is held every Saturday. Iop. 4422.

II AVELEICH, par. Eng. Essex; 1630 ac. Pop. 131.
HAZERSWOUDE, a vil. Holland, prov. S. Holland, 8 m .S.E. Leyden. It is a scattered, but well-built place; has three churches, an elegant poorhouse, and a school. Turfcutting and acriculture are the main employments. Pop. 742.

HAZLETON, par. Eng. Gloucester; 2530 ae. Pop. 286.
HAZLEWOOD, par. Eng. Suffolk; 2570 ac. Pop. 108.
IHEACHAM, par. Eng. Norfolk; 3570 ac. Pop. 811.
HEADCORN, par. Eng. Kent; 4930 ac. Pop. 1292.
IIEADFORD, a market th. Ireland, eo. of, and 14 m . N. Galway. It is neatly built, has a handsome parish church, free schools, and a dispensary. Pop. 1647.

HEADINGLEY witi Burley. a vil. and chapelry, England, co. York (W. Riding), in the bor. of, and $2 \frac{1}{2} \mathrm{~m}$. N.W. Leeds. The village is neatly built, has a handsome Episcopal, and a Wesleyan chapel, two paper-mills, and a bleaching establishment. At Burley, the woollen and stuff manufactures are carried on extensively. Near it are the Leeds botanical and zoological gardens. Pop. (1851), 6105.

IIEADINGTON, par. Eug. Oxford; 1780 ac. Pop. 1668.
IIEADLEY, two pars. Eng. :-1, Itants ; 7090 ae. Pop. 1265.-2, Surrey; 1830 ac. Pop. 317.

HEADON witir Upton, par Eng. Notts; 2300 ac. P. 269.
HEAGE, a vil. and township, England, co. and 8 m . N. by E. Derly. It is very scattered, has an Episcopal church, and several Dissenting cliapels; a free, and an infant school. Coal and ironstone are found here in great abundance. Pop. 2305.

HEALAUGII. par. Eng. York eity; 2800 ac. Pop. 245.
IIEAIJNG, par. Eng. Lincoln; 1250 ac. Pop. 90.
HEAN, a tn. Anam, prov. Tonquin, on the Song-ea, at its divergence, 50 m . E.S.S. Kachao. It is of great extent, and is inhabited ly many Chinese merchants.

HEAND (St.), a tr. France, dep. Loire, 6 m . N. St. Etienne; with silk mills, and three fairs annually. Pop. 1200.

HEANOR, a th. and par. England, co. Derby. The Town is on an acclivity, $8 \frac{1}{2} \mathrm{~m}$. N.F. Derby, consists principally of two strects, straight and well-kept; honses of brick; badly supplied with water; rapidly increasing and improving. It has a very ancient church, and three Dissenting places of worship; a national school, and manufaetures of silk and eotton articles, stockings, and lace, for the manufacturers of Nottingham. Pop. 3058 . Area of par., 6870 ac. Pop. 6282.

HEANTON-Punchardon, par. Eng. Devon; 2340 ac. Pop. 626.

ILEAPIIAM, par. Eng. Lincoln; 1250 ac. Pop. 125.

HEATII, two pars. Eng.:-1, Derby; 1430 ac. Yop. 402.-2, (or Hethe), Oxford; 1300 ac. Pop. 380.

HEATHER, par. Eng. Leicester; 1100 ac. Pop. 368.
HEATHFIELD, two pars. Eng.:-1, Somerset ; 550 ac . Pop. 146.-2, Sussex; 6117 ac. Pop. 1917.

HEATON-Norres, a township and chapelry, England, co. Lancaster, 2 m. N.W. Stockport. The streets are mostly parallel to each other, well paved, and lighted with gas ; supply of water plentiful. It has a beautilul Gothic chureh, with a lofty spire, and several Dissenting chapels; numerous zchools, and extensive cotton manufactures. Pop. 15,817.

IIEAVI'TREE, par. Eng. Devon; 3290 ac. Pop. 3048.
HEDDEN-Bridge, a large manufacturing vil. England, co. York (W. Riding), 3 m . W. Halifax, in a valley celebrated for the romantic beauty of its scenery, a station on the Manchester and Leeds Railway. It has a handsome church, several Dissenting places of worship, with extensive cotton, silk, and worsted manufactures, and mills for grinding corn.

HEBRIDES (New), an archipelago or isl. group, S. P'aeific Ocean, N.E. of New Caledonia, between lat. $13^{\circ} 15^{\prime}$ and $20^{\circ} 3^{\prime} \mathrm{S}$., and lon. $166^{\circ} 30^{\prime}$ and $170^{\circ} \mathrm{E}$. It consists of about 20 larger, and a much greater number of smaller islands and rocks. The most important are Espiritu Santo, 70 m . long, by about 25 m . broad; Mallicolo, 60 m . long, by 28 m . broad, with a good larbour, called Port Sandwich; lat. $16^{\circ} 25^{\prime}$ S.; lon. $167^{\circ} 46^{\prime}$ E. (r.); Erromango (which see); Tanna, 20 m . long; Ambrym, Annaton, Aurora, Banks, Sandwich, and Whitsuntide. They are all of volcanic origin. and in Tanna is a volcano of great activity. Most of the islands rise into lofty hills, and some of them into mountains of considerable elevation; but all of them are well wooded, abound with water, and present a most luxuriant vegetation. Cultivation is carried on with great care. The animals are few. The natives are of Papuan race, brave, slender, active, hospitable, but are accused of cannibalism; and, in point of intelligence, rank below the natives of many of the other S. Sea islands. Area estimated at 200 sq. m. Pop. 200,000.-In 1606, Quiros and Torres discovered the more N. islands, Espiritu Santo, \&c.; and, 162 years later, Bougainville re-discovered them, and added the islands of Pentecost, Pic de l'Etoile, Aurora, and Lepreux. In 1774, they were visited by Cook, who discovered Mallicolo and the more S. islands, and gave the group its present name.

HEBRIDES (The), or Western Islands [anc. Ebudes or Ebudce], a series of about 200 isls. and islets, of which 80 only are inhabited, off W. coast Scotland, extending from lat. $55^{\circ} 26^{\prime}$ to $58^{\circ} 32^{\prime} \mathrm{N}$. ; the most S . being the island of Arran, in the Firth of Clyde, and the most N. the island of Lewis. They are usually divided into the Outer Hebrides, popularly called the Long Island, of which the principal are Lewis and Harris, N. Uist, Benbecula, S. Uist, and Barra; and the Inner Hebrides-Skye, Mull, Islay, Jura, Coll, Rum, Tiree, Colonsay, \&c.; and within the Firth of Clyde, Bute, Arran, Cumbraes, and Luchmarnock. The former being separated from the latter, and from the mainland, by a strait or channel called the Minch, which, at its narrowest part, between Harris and Skye, is about 12 m . broad. The Outer IIebrides consist of a continuous series of islands and islets, running, S.W. and N.E., through a space of 130 m ., having Barra IIcad, lat. $56^{\circ} 47^{\prime} 6^{\prime \prime}$ N.; lon. $7^{\circ} 39^{\prime} 15^{\prime \prime} \mathrm{W}$. (r.), at the S. extremity, and the Butt of Lewis, lat. $58^{\circ} 31^{\prime}$ N.; lon. $6^{\circ} 14^{\prime}$ W. (r.), at the N. extremity. The Inner Hebrides are more widely scattcred, and more irregularly disposed, many of them being from 10 to 30 m .asunder. Of these islands, seven are within the Firth of Clyde, and constitute the comity of Bute ; the others belong, respectively, to the shires of Argyle, Inverness, and Ross. Area about $2739 \mathrm{sq} . \mathrm{m}$., or $1,688,960 \mathrm{ac}$., of which about $170,000 \mathrm{ac}$. are arable, and about 64,000 fresh water lakcs. The Outer Hebrides are almost wholly formed of gneiss, with poor soil; the more N. of the Inner IIebrides, Skye, Kum, Eigg, Canna, Mull, Ulva, Staffa, St. Kilda, \&c., belong to the trap scries, with a more fertile soil than the former. Islay, Jura, Gigha, Colonsay, \&c., belong to the slate formation; and the islands in the Firth of Clyde are composed of trap, sandstone, and limestone. Most of the islands are rugged and mountainous, and contain large proportions of moss and moor. The climate is mild, salubrious, but variable, tempestuous, and humid. Snow and frost are almost unknown in the smaller islands, and are but little felt
in the larger. There is comparatively little wood in the Hebrides, and, on many of the islands, none at all, although, some centuries ago, most of them were thickly covered with wood. In Skye, Islay, Mull, and several of the other islands, however, both forest and fruit trees have been planted, in recent times, to a considerable extent, with great success. The rivers of the Hebrides are necessarily small. There are many, however, in which salmon abound, particularly in the larger islands. Lakes are numerous, but few of them of any great depth, the deepest not exceeding 3 or 4 fathoms. In some of the larger islands, as Bute, Lewis, Mull, Islay, great improvements in agriculture lave taken place of late years; but, in all the others, it is still in a very backward state. Oats and barley are almost the only white crops raised. Potatoes are extensively cultivated, and small quantities of flax for family use. Black cattle, known by the name of kyloes, constitute the staple product. The native breed of sheep is very small, but Cheviots have been introduced with success. The breed of horses is also small, but hardy and docile.

The land is gencrally held by tacksmen, tenants, and subtenants, including cottiers and crofters. Farins, though sometimes of great extent, are mostly of small value, varying from $£ 5$ to $£ 50$ yearly rent. Most of the cottiers, who are a numerous class, pay their rent in services instead of money. In consequence of the minute division of the arable land, there is, in many of the islands, a great excess of population, an evil which some of the proprietors have remedied by encouraging emigration. The condition of the inhabitants, generally, more especially in the outer INebrides and Skye, is very depressed; their dwellings miscrable, and their living poor, consisting chiefly of potatoes, milk, and oat or barley bread; and in bad harvests often insufficient in quantity to support nature. The manufacture of kelp was at one time carried on to a great extent in the Hebrides, but the remission of the duties on salt and barilla have nearly extinguished it. The fisheries, though prolific and abundant in a remarkable degree, are strangely and unaccountably neglected by the inhabitants. Gaelic is the universal language of the Hebrides, which, in remote times, were sul ject to the kings of Norway, but, in 1264, were annexed to the crown of Scotland. They were now held by various native chieftains, in vassalage to the Scottish monarch; but, subsequently, all fell into the hands of one powerful chief, who thercupon (1346) assumed the title of 'Lord of the Isles,' and began to affect an entire independence of his sovereign. The abolition of hereditary jurisdictions, in 1748, secured to these islands, for the first time, the peace and safety afforded by a just and powerful government. Pop. (1841), 92,615.

IIEBRON [anc. Kirjuth-arba], a tn. Asiatic Turkey, pash. Damascus, 18 m. S. by W. Jerusalem, 2835 ft . above sea-level ; lat. $31^{\circ} 32^{\prime} 30^{\prime \prime} \mathrm{N}$. ; lon. $35^{\circ} 8^{\prime} 20^{\prime \prime}$ E. It lies in the narrow valley of Mamre, with numerous olive-trees towards the W., and vineyards N., with bare mountains rising above. It has narrow streets, sellom more than 2 or 3 yards in width, and excessively dirty; high well-built stone houses, with flat roofs, surmounted with small domes, but many of them in ruins, rather extensive covered bazaars, with wellfurnished shops, exhibiting in profusion glass manufactures, consisting of lamps, coloured rings, \&c., for which the place has long been celebrated, and in which it carries on a considerable trade. There are nine mosques, but none of them possessing any architectural interest, excepting the massive edifice built over the tombs of the patriarchs, from which Christians are rigorously excluded, it being esteemed by Mahometans one of their holiest places. It is surrounded by a lofty wall, built of large stones, and of great antiquity, almost the only ancient relic in the town. Hebron is one of the oldest existing towns, having been built seven years before Zoan; it is mentioned prior to Damascus (Num. xiii. 22; Gen. xiii. 18). It was the residence of Abraham, and the Patriarehs, and of David. Pop. about 5000.

HECHINGEN, a tn. Germany, cap. principality Hohen-zollern-Hechingen, on a height above the Starzel, 30 m . S.S.W. Stuttgart. It is walled, and divided into a high and a low town, has a castle, in which the prince resides, a new, but ungainly structure; two R. Catholic churches, a synagogne, and museum; sulphur springs, with a bathing establishment. Manufactures of woollen cloth, and a trade in cattle. About 2 m . from the town, and connected with it by
an avenue of poplars, is the old castle of Holsenzollern, on a height, 2620 ft . above sea-level, the cradle of the royal family of Prussia. Pop. 3389.

HECHO, a th. Spain, A ragon, prov. of, and 50 m . N.N.W. IIuesca, near the French frontier. It is poorly and irregularly built, has a handsome parish church, a courthouse, with prison, a Latin and a primary school, and a trade in wool, wood, and cattle. Pop. 1000.

HECKINGHAM, par. Eng. Norfolk; 1160 ac. P. 309.
HECKINGTON, par. Eng. Lincoln; 5720 ac. P. 1558.
HECKMONDWIKE, a considerable and thriving vil. England, co. York (W. Riding), $9 \mathrm{~m} . \mathrm{S}$. W. Leeds. It has a neat church, in the carly English style, with a tower surmounted by a handsome spire; three Dissenting chapels, a commodious national, and some other schools; extensive blanket, carpet, woollen cloth, and woollen yarn manufactories; and a commodions hall for the sale of blankets. Pop. 3537.

IIECLA, or IIekla, a volcano, Iceland, about 20 m . from its S. coast ; lat. $64^{\circ} \mathrm{N}$. ; lon. $19^{\circ} 42^{\prime} \mathrm{W}$. It is of a conical shape, and stands completely isolated, having a circumference at the base of about 12 m . It terminates in three peaks, the central and loftiest of which, IIeklufjall, has a height of 5110 ft . It is composed chiefly of basalt, much of which is columnar, and of lava, but is mostly covered by stones, seoriæ, ashes, and other loose voleanic matters. The lava occurs chiefly at the bottom, and forms a rugged and vitrificd wall around the base. The craters, which are numerous, occur on the sides of the peaks; and deep ravines form channels for the torrents fed by the melting of the snow, with which the mountain is at all times more or less covered. The eruptions on record, commencing with the 10 th century, are 43. One of the most tremendous occurred in 1783 , when a very great extent of country was laid waste, and an immense volume of lava produced. As if the volcano had then exhausted its force, it remained quiescent till September 2, 1845, a period of 62 years, when it again became active, and continued with little intermission till November, 1846, to discharge itself from three craters; throwing out ashes, some of which descended in sinall dust on the Orkney lsles, a distance of 400 m ., projecting inasses of pumice-stone, weighing half a ton, to the distance of a league and a half, and pouring ont a torrent of lava which, at 2 m . from the craters, was 1 m . wide, and from 40 to 50 feet decp.

IIEDDERNHEIM, a vil. Nassau, on the Nidder, 3 m . N.N.W. Frankfurt, with a Protestant and a R. Catholic church. Pop. 1229.

HEDDESDORF, a vil. Rhenish Prussia, gov. of, and 9 m. N.W. Coblenz, with a court of jnstice, a parish church, tanneries, dye-works, a bleachfield, and a powder-mill; near it are iron-works. Pop. 1115.

HEDDINGTON, par. Eng. Wilts; 1650 ac. Pop. 342.
HEDDON-on-the-wall, par. Eng. Northumberland; 4590 ac Pop. 753.

HEDEI, a vil. Holland, prov. Gelderland, on the Maas, 12 m. S. W. Tiel, with a Calvinistic and a R. Catholic church, and two annual horse-fatirs. Pop. 1395.

HEDELFINGEN, a vil. Würtemberg, circle Neckar, bail. Cannstadt, with a Protestant church, and remains of a strong castle. Pop. 1236.

HEDEMARKEN, a bail. Norway, prov. Aggershuus, extending from about lat. $59^{\circ} 50^{\prime}$ to $62^{\circ} 40^{\prime} \mathrm{N}$., with a breadth of about 50 m .; area, 7580 geo. sq. m.; bounded, E. by Sweden, N. by prov. S. Trondhjem, W. by bail. Christiania and Buskerud, and S. by Aggershuus. Its N. part is covered by the Dovre-field, and part of its E. boundary is formed by the lofty Kiölen mountains. Throughout its whole length, it is traversed by the Glommen and numerous other streams. It has several lakes, of which Miösen, Stor, Osen, and Famand are the chicf; possesses the largest extent covered with wood of any of the divisions of Norway, and contains, also, its best arable land, but has no town. Besides wood-cutting and agriculture, fishing, hunting, and mining are carried on. Pop. (1845), 89,810 .

HEDEMORA, a tn . Swelen, liin. of, and 25 m . S.S.E. Falun, beautifully situated on the side of a hill, near the lake II ofra. It is a small, old place, but is tolerably well built. In the vicinity are the mineral springs of Lassbo. Pop. 1033.

HEDEMÜNDEN, a tn. Hanover, prov. IIidesheim, r. bank Werra, 12 m . S.W. Güttingen, with a church, town-
house, manufactures of linen and earthenware, a fishery, and a trade in corn. Pop. 919.

HEDENHAM, par. Eng. Norfolk; 1800 ac. Pop. 272.
HEDERSLEBEN, a vil. Prussia, prov. Saxony, gov. Magdeburg, bail. Aschersleben, with two churches, an old nunuery, an oil and a flour mill. Pop. 1459.

HEDERVAR, a market tn. Hungary, Thither Danube, co. of, and 13 m . N.W. Kaab, on the island of Little Schiitt, and the Wieselburg arm of the Danube. It contains an elegant castle, with valuable collections and fine gardens; and has a trade in corn and cattle, and several ammual fairs. P. 1240.

HEDGERLEY, par. Eng. Bucks; 1010 ac. Pop. 161.
HEDINGHAM CAS'LLF.-1, A vil. and par. England, co. Essex, $33_{4} \mathrm{~m}$. N. W. by N. Halstead. The villagee, at a hillfoot, l. bank Colne, consists of a principal and an inferior, and not very uniform nor clean, street. It has an ancient ehurch, an Independent chapel, and malting and straw-plaiting are carried on. The castle, which belonged to the family of De Vere, was once an important fortress, but the keep is the only portion of it now standing. Area of par., 2600 ac . Pop. 1343. -2, (Sible), par. Eng. Essex ; 5490 ac. Pop. 2322.

HEDJAZ (Ei). See Hejaz.
HEDON, or IIeydon, a bor., market tn., and par. Eng. land, co. York (E. Riding). The Town, 6 m . E. Hull, on a creek called Hedon Haven, communicating with the Humber, consists chicfly of two strects, with a market-place in the centre. It has a spacions church, two Dissenting chapels, several schools, and benevolent and religious societies; exports some grain. Area of bor. and par., 1440 ac . Pop. 998.

HEDRAHELY, a vil. Hungary, Thither Danube, co. Sumegh, on a hill, 12 m . from Szigetvar, with a Protestant church, and a trade in wine and cattle. Pop. 1015.

HEDSOR, par. Eng. Bucks; 770 ac. Pop. 194.
HEEG, a vil. Holland, prov. Friesland, on lake of same nane, 5 m . S.S.W. Sneek. It is a neat place, has a church and a school, and suffered greatly from a water-flood in 1825. Pop. 795.-The Heeg Lake and the Fljuessen united, extends, N.E. to S.W., about 9 m ., with a breadth of $1 \frac{1}{2}$; it communicates with several other lakes, and with the North Sea.

HEELEY, a vil. England, co. York (W. Riding), $1 \frac{1}{2} \mathrm{~m}$. S. by W. Sheffield, divided into Upper and Lower Heeley, consisting of two straggling and irregular streets; with a handsome church, a Wesleyan chapel, and national school; principal employments, file-cutting and entlery. Pop. 2200.

HEENE, par. Eng. Sussex ; 460 ac. Pop. 185.
II EENVLIE'T, a tn. IIolland, prov. S. Ilolland, on the estuary of the Maas, 4 m . E.S.E. Brielle. It is a neatly-built place, with an indifferent-looking townhouse, an old goodlooking Calvinistic church, a neat synagogue, a school, a large market-place, and a harbour. Pop. 569.

IIEEPEN, a vil. Rhenish Prussia, gov. of, and 24 m . S. W. Minden, with a church, mannfactures of linen, and a trade in cattle. Pop. 1915.

HEER, a vil. Holland, prov. Limburg, 3 m . E.S.E. Maastricht. It is a scattered place, composed of small houses, and has a R. Catholic church. Pop., agricnltural, 1052.

HEER-Arendskerke (S'), a vil. Holland, prov. Zeeland, isl. S. Beveland, 3 m . W.S.W. Goes, with a church, school, and a well-frequented harbour. Pop. 1325.

HEELDDE, a vil. Holland, prov. Gelderland, 31 m . N. by E. Arnhem, in a well-wooded agricultural district, with two churches, a school, and a roomy market-place. Pop. 1187.

HEERENBERG ( $\mathrm{S}^{\prime}$ ), a tn. Holland, prov. Gelderland, 16 m. S.E. Arnhem, with a castle, townhonse, two churches, a synagogue, a school, hospital for the poor, and a R. Catholie theological scminary. Agriculture and cattle-rearing; trade in grain, cattle, and timber; calico-weaving, and the manufacture of chicory and eau-de-Cologne, are carried on. Pop. 1081.

HEERENVEEN, a market tn. Holland, prov. Friesland, 18 m . S.E. Leeuwarden. It is a scattered, lut well-built place, has good public offices, three churches, four schools, and a good transit trade. Pop. 1828.

HEERLEN, a vil. Holland, prov. Limburg, 4 m . E.N.E. Maastricht, with an elegant townhouse, a moderately-largo church, and a school. Agriculture, cattle-rearing, tanning, and grain, oil, and tan mills, employ the people. Pop. 1688.

HEESCH, a vil. Holland, prov. N. Brabant, 11 m. E.N.E. Hertogenbosch; a well-huilt, scattered place, with a townhouse, small chureh, and a school. Pon. 1196.

## IIEIDINGSFELD

HEESTERT, a tn. and com. Belgium, prov. W. Flanders, 5 m . E. Courtrai ; with linen-weaving, breweries, a to-bacco-work, a malt and several flour mills. Pop. 2899.

HEGENHEIM, a vil. France, dep. Haut Rhin, 15 m . E. Altkirch, near l. bank Rhine. Pop. 2151.

HEGYALLYA, the S. termination of an offset of the Carpathians, Upper Hungary, co. Zeniplin, between the rivers Hernad and Bodrog, and lat. $48^{\circ}$ and $49^{\circ}$ N.; and abutting on the Theiss, near Tokay. It is a rich wine district; area, about $80 \mathrm{sq} . \mathrm{m}$. ; producing the famous wines known in this conntry as Tokay; but the growth of a great number of vineyards, among which those of Tarczal and Talya, take precedence even of Tokay itself. The annual produce is about $2,200,000$ galls.

HEGYES, or Igyusch, a vil. Hungary, Hither Danube, co. of, and 29 m . N.E. Bacs, on the Teletska; with a R. Catholic church, and a trade in corn and cattle. Pop. 3700.

HEGYES-HALOM, or Strass-Sommerein, a vil. Hungary, co. of, and 7 m . from Wieselburg; with a l'rotestant and a R. Catholic church, and a mill. Pop. 1290.

HEIBUK, a thriving vil. Turkestan, khanate of Khoondooz, 80 m . N.W. the Hindoo Koosh, and 4000 ft . above sealevel; with a castle of sun-dried bricks, built on a commanding eminence. The houses have domes instead of terraces, with a hole in the roof for a chimney.

HEIDE, a tn. Denmark, Holstein, N. Ditmarsh, 27 m. W.S.W. Rendsburg. It is divided into four quarters, and is well built, has a large market-place, a parish church, several schools, a poorhouse, manufactures of earthenware and white and common leather, several tile-works, tobacco factories, oil and flour mills, a trade in cattle, a weekly market, and two annual fairs. In the churchyard, a monument has been erected to the Reformer, Henrich von Zutphen, who suffered martyrdom here in 1524. Pop. 5400.

HEIDEKRUG, a vil. Prussia, prov. E. Prussia, gov. of, and 57 m. N.E. Königsberg, cap. circle of same name, near E. slore of the Curischehaff; with a court of justice, several public offices, a Protestant church, and a trade in horses and cattle. Pop. 300.-The circle is flat and swampy. Area, 294 geo. sq. m. Pop. 31,335.

HEIDELBERG, a tn. Baden, circle Lower Rhine, cap. bail. of same name, beautifully situated l. bank Neckar, here crossed by a bridge of nine arches, in one of the loveliest districts of Germany, 11 m . E.S.E. Mannheim, on the railway from Frankfurt to Carlsrule. It stands on a narrow
church of St. Peter; the church of the Holy Ghost, divided by a partition-wall, so as to serve both as a Protestant and a R. Catholic clureh; the castle, anciently the residence of the Electors Palatine, and now an imposing ruin, combining the character of a palace and a fortress; the university, founded in 1386, and possessed of a library of 150,000 volumes, not remarkable as an edifice, but distinguished as a school of law and medicine, and attended by about 700 students; the townhouse, the anatomical and zoological museums, lyceum, superior burgher, and other schools. The manufactures, not of much importance, include refined wax, leather, vinegar, paper, surgical and musical instruments, madder, and, more than all, beer, which employs 36 breweries, and bears a very high name. One of the greatest curiosities of the place is the well-known Heidelberg tun, kept in a cellar under the castle; and, though far less than several of the London porter vats, it is the largest wine cask in the world, being 36 ft . in length, 26 ft . in diameter, and capable of holding 800 hogsheads. Heidelberg is rich in public walks. The gardens around the castle are well laid-out; and at every turn, present the finest views of the Neckar, and the fertile and richly-wooded valley through which it winds to join the Rhine. Still higher up, behind the town and castle, a car-riage-road leads, by easy ascent, to the top of the Königsstuhl -the loftiest hill of the district, from which an extensive view is obtained, of surpassing beanty. In 1622, the ferocious Tilly, after bombarding Heidelberg for a month, took it by storm, and gave it up to three days' pillage. In 1688, a French general, Melac, on the orders of Louis XIV., took the town, and burnt it, outrivalling even Tilly in cruelty and brutality. In 1693, another French force repeated, and, if possible, exceeded all former atrocities. Pop. 12,038.

HEIDELSHEIM, a tn. Baden, circle Middle Rhine, r. bank Salzbach, 12 m . N.E. Carlsrule, with two churches, a school, hospital, and a trade in wine. Pop. 2273.

HEIDENFELD, (Markt), a market tn. Bavaria, circle Lower Franconia, on the Main, here crossed by a new bridge, 15 m. W.N.W. Würzburg, with manufactures of leather and earthenware, some shipping, several mills, a trade in wood and wine, and three annual fairs. Pop. 2048.

HEIDENHEIM.-1, A market tn. Bavaria, Middle Franconia, 34 m. S. W. Nürnberg, with two Protestant churches, an old Benedictine monastery, manufactures of earthenware, several mills, and a mineral spring. Pop. 1829. $-2, A \mathrm{tn}$. Würtemberg, circle Jaxt, cap. bail. of same name, in the Brenz valley, 46 m. E.S.E. Stuttgart. It is an old, but

HEidelberg, from the Bridge.-From Allegmagne Morumentale et Piteuresque.
ledge, between the river and the rock on which the castle is built; and, from the nature of the ground, is almost confined to a long, narrow street, with a few dark and narrow lanes opening into it. The principal buildings are-the

## HEIGHAM, par. Eng. Norfolk. Pop. 6050.

IIEIGIIING'TON, par. Eng. Durham; 7610 ae. P. 1347.
HEIGHTON (Soutit), par. Eng. Sussex; 470 ac. P. 81.
IIEILBRONN, a tn. Wärtemberg, circle Neckar, cap. bail. of same name, beautifully situated r. bank Neckar, here crossed by a covered wooden bridge, at the foot of the Wartberg, 26 m . N. Stuttgart. It consists of the town proper, surrounded by lofty walls, with three gates, and of several little suburbs; and is very irregularly huilt. It contains four ehurches, one of them, Kilian's chureh, with a beautiful tower, 220 ft . high, a choir of purest Gothie, with fine carvings, painted glass, and curious monuments; an ancient townhouse, a gymnasium, with a library of 12,000 volumes; an ancient tower, royal palace, the Deutschehaus, or House of 'Teutonic Kinights, an hospital, and workhouse. The manufactures consist of cutlery, tinware, earpets, soda, vinegar, oil, and liquenrs; and the trade, facilitated by the Ncekar and a canal, recently brought into the town, though somewhat decayed, is still important. Heilbronn is built upon the site of a Roman station, and was long an imperial free town. Pop. 8600. Area of bail., 40 geo. sq. m. Pop. 23,630.

HEILIGEN KREU'TZ, or Santa Croce, a tn. Austria, Illyria, circle Görz, on the Wippach, 17 m . N.N.E. Trieste, with a parish church, and an ancient, strong castle. P. 1095.

HEiligenbell, or Swienta Sierka, a tn. Prussia, prov. E. Prussia, gov. of, and 28 m . S.W. Königsberg, cap. circle of same name, at the confluence of the Bahnan with the Jarft, near the Frisehehaff. It has a lav court, several public offices, a chureh, townhouse, and courthouse; a trade in cattle, and three annual fairs. Pop. 2837.--The circle is flat, well wooled, and fertile. Area, 320 geo. sq. m. Pop. 34,804.

HEILIGENBLU'T, a small vil. Austria, Illyria, cirele of, and 56 m . N. W. Villach, in the valley of the Möll, at the foot of a mountain of same name, in the Noric Alps, about 5000 ft . above sea-level, and esteemed the loftiest village in the Austrian dominions. The scencry around, including that of the Gross-Glockner, with its glaciers, is very magnificent.

HEILIGENHAFEN, a tn. Denmark, Holstein, on the Paltic, opposite the island of Femern, 39 m. N.N.E. Lübeck. It has a Gothie church, four sehools, and a poorhouse; vinegar works, breweries, and distilleries; a winter haven, admitting vessels drawing 8 ft ., and carrying on a considerable trade; and an important fishery. Pop. 2000.

HEILlGENSTAI'T, a tn. Prussia, prov. Saxony, gov. of, and 47 m . N.W. Erfurt, cap. circle of same name, in a valley, at the confluence of the Gaislade with the Leine. It is walled, has three gates, a law court, and several public offiees; a I'rotestant, and four R. Catholic churches; a castle, a gymnasium, formerly a Jesuit college ; workhouse, ordinary and orphan hospital; manufactures of wooden clocks and worsted; a brewery, distillery, trade in eattle, and six annual fairs. Pop. 4864.-The circle lies high, is very bleak, and by no means fertile. Area, 119 geo. sq. m. Pop. 41,267.

IlElLSBERG, a tn. Prussia, prov. F. Prussia, gov. and 40 m. S. Königsberg, eap. circle of same name, l. bank Alle. It has a fine castle, fire churches, courthouse, a Bernardine monastery, poorhouse, and infirmary; manufactures of woollen and linen eloth, and leather; and a trade in linen, yarn, and cattle. Pop. 4458.-The circles is flat, well wooded, and well adapted for agriculture. Area, 324 geo. sq. m. P. 42,512.

HEILSBRONN, a market to. Bavaria, eircle Middle Franconia, 14 m . W.S.W. Nürnberg. It has a handsome old church, with fine carvings, and the monuments of several princes of Nürnberg and Brandenburg; an old Cistertian abhey, manufactures of wax-cloth and various woollen artıcles, and a trade in tobacco, madler, and fruit. I'op. 824.

IIEIMBACH, several small places, Germany, particu-larly:-1, A vil. Baden, circle Upper Rhine, bail. Emmendingen, with a R. Catholie ehurch, a trado in cattle, and a large stone quarry. Pop. 719.-2, A vil. Rhenish Prussia, gov. of, and 18 m . E.S.E. Aix-la-Chapelle, with a R. Catholic church, manufactures of wooden articles, tanneries, and a spinning-mill. Pop. 869.-3, A vil. Rhenish Prussia, gov. Coblenz, cirele Neuwied, with a R. Catholic chureh. P. 1092.

IIEIMERSIEIM.-1, A vil. Rhenish Prussia, gov. of, and $11 \mathrm{~m} . S$. Cologne, with a castle, manufactures of woollen cloth, a paper, an oil, and a flour mill. Pop. 1001.-2, A tn. Hesse-Darmstadt, Rheinhessen, circle Alzey, with a Protestant and a R. Catholic ehureh, and two schoolhouses. Pop. 741.

HEIMSIIEIM, a tn. Wiirtemberg, cirele Neckar, 14 m. W. Stuttgart. It has a castle, and was burned down in the Thirty Years' War; and by the French, in 1692 and 1693. Pop. 1223.

HEINENOORD, a vil. Holland, prov. S. Holland, 11 m . W. Dordreeht, with an old ehurch, a sehool, and a harbour, communicating with the Old Maas. Pop. 599.

HEINERSDORF, several places, Germany, particularly -1, (Klein-Heinersdorf), A vil. Prussia, prov. Silesia, gov. Licgnitz, circle Grünberg, with numerous mills. Pop. 738. -2, (Lang-Heinersdorf), A vil. Irussia, prov. Silesia, gov. Liegnitz, circle Sprottau, with a castle and a mill. Pop. 954. $-3, A$ market vil. Saxe-Meiningen, bail. of, and 4 m . E. Sonnenberg, r. bank Hasslaeh, with breweries, famous for their beer; numerous saw-mills, and manufaetures of articles in wood. Pop. 841.

IIEININGEN, a vil. Würtemberg, circle Danube, 25 m . N. W. Ulm, with a Protestant church. Pop. 1209.

HEINKENZAND, a vil. Holland, prov. Zeeland, isl. S. Beveland, 6 m . S.W. Goes, consisting of one broad strect, with a Calvinistic and a R. Catholie church, and a school. I'op. (agricultural) 1389.

HEINRICIIS, a market tn. Prussia, prov. Saxony, gov. of, and 33 m . S.W. Erfurt, on the Hasel, with a chureh, synagogue, mannfactures of coarse cotton, iron, and tin ware; iron and steel works, and a trade in wine. Pop. 1200.

HEINRICIISGRÜN, or Heynesgryn, a tn. Bohemia, circle of, and $8 \mathrm{~m} . \mathrm{N}$. W. Elnbogen, with a chureh, a fino castle, and manufactures of cotton goods, iron-works, and a tin mine. Fine pebbles are found and polished here. P. 1580.

HEINRICHSWALDE, several places, Prussia, particularly :-1. A tn., prov. Silesia, gov. of, and 50 m . S.S.W. Breslan, with a parish church, and two mills. Pop. 1615.2, A vil., prov. E. Prussia, gov. of, and 39 m . N.W. Gumbinnen, circle Niellerung, with a court of justice, a courthouse, and a parish church. Pop. 578.

IIEINSBERG, a tn. Rhenish Prussia, gov. of, and 20 m . N. Aix-la-Chapelle, cap. circle of same name, on the Worm, and near 1. bank Rocr. It is walled, has a law court, several public offices, a Protestant and a R. Catholic church, courthouse, hospital, ruins of an old castle, manufactures of woollen eloth, flannel, hats, and ribbons; tanneries, distilleries, a paper-mill, and a trade in cattle. Pop. 1789.
The circle is fertile. Area, 71 geo. sq. m. Pop, 32,705.
HEISKER, an isl. Scotland, IIebrides, 7 m . W. North Uist, about 2 m . long, E . to W.

HEITERSHEIM, a tn. Baden, cirele Upper Rhine, 10 m. S.W. Freiburg, with a parish church, castle, and courthouse; a bathing establishment, a gypsum, two oil, and several flour mills. Pop. 1394.

HEJAZ, a division of Arabia, extending along the N. half of the E. coast of the Red Sea; bounded, N. by the Gulf of Akaba; E. by Nejd; S. by Yemen, the dividing line passing from Kali, on the sea-shore, in lat. $18^{\circ} 35^{\prime}$ N., to Khalail, on the N. borders of Asir; and on the W. by the Red Sea; comprehending a lowland (Teháma el Hejáz), and a tract of highland or Nejd, E. of a range of mountains, generally visible from the sea-shore; and which attain, in some places, an elevation of perhaps 8000 ft ., and are often covered with snow in winter. The main chain of these mountains seems to be formed of granite; but porphyritic rocks occur in many places, supporting sandstone and calcareous formations. Traces of volcanic fires are numerous in the Teháma, in the vicinity of the Gulf of Akaba, where the land has been raised by their ageney; as is manifest from the immense beds of coral which border the shore above the level of the sea, and which rise higher above that level the farther we advance $N$. Arab historians attest that, in the middle of the 13th century, a volcano broke ont a little I.. of Medinalı, and near that city the ground is now covered with porous lavas.

There are no rivers in the Tcháma cl IIejíz, where the wadies or beds of occasional torrents are but rarely filled; indeed, the lower part of the Teháma does not enjoy the refreshing influence of ten days' rain in the year, and whatever fertility it possesses is due to little streams led to it from the mountains. On these the rain falls more copiously; and the well-watered valleys among the hills, with their corn-fields, their variety of exquisite fruits, and their shally groves of date-palms, contrast strongly with the sunburnt plains be-
low; and appear, to the eye of the weary traveller, to be blessed with an opulence, and a charm of scenery, which do not in reality belong to them. The coast of Hejáz is said to be unhealthy; owing to the foulness of the water, which produces fever. The water in the interior, if collected from the surface of the ground, is brackish; or, if fresh, it is impregnated with sulphur, and otherwise unwholesome. The productive and irrigated valleys of the interior, also, are rendered insalubrious by the combined effects of humidity and rank vegetation. In the Tehána, the wild plants are few and uninteresting, and offer little for the support of animal life. On the mountains, near the Gulf of Akaba, may be fonnd two species of wild goat. A few hares and gazelles, with jerboas and lizards, possess the plains. The hyænas and foxes, more numerous, subsist chiefly on fish, which they find on the coral reefs along shore. The falcons, feeding on fish, are also, relatively, the most numerous of the feathered tribe. In some localities the fish are extremely plentiful; and certain tribes of Bedouins not only subsist on them, but also carry great quantities of salt fish to the market of Mecea. Three species of dolphin, besides a manati (the dugong), are taken on the coast of Hejáz. Tortoise-shell and mother-of-pearl ald largely to the fisherman's gains. The coral reefs afford shelter for small vessels in all weather; but they cannot be prudently entered, unless under the guidance of a native pilot. For large vessels, the coast of Hejáz has good anchorage, but few harbours.

From Yambo, southwards to the borders of Yemen, the whole country is subject to the sherif of Mecea. The more N. part, lying within the region anciently called Arabia-Petræa, has no towns, nor even villages, but only a few "castles, to guard the road to Mecca. Besides these two cities, the only places of importance arc-the seaports, Jiddah and Yambo, and Taíf or Tayef, on the table-land, and depending on Mecca.- (Niebuhr's Descrip. de l'Arabie; Burckhardt's Travels, dec.; Rüppell's Travels in Nubia, \&ec.)

HELCIIIN, a vil. and com. Belgium, prov. W. Flanders, r. bank Scheldt, 30 m . S. Bruges, with manufactures of linen and woollen goods, two breweries, and three mills. Pop. 1194.

HELDBURG, a tn. Saxe-Meiningen, r. bank Kreek, at the foot of a basaltic hill, crowned with an old castle, 25 m . S.E. Meiningen. It is walled, flanked with towers, has a court of justice, two churches, several schools, an hospital, manufactures of cement, and a trade in cattle. Pop. 1076.

HELDER (Tiiv:), [Dutch, Den Helder], a market tn., military port, and strongly fortified seaport, Holland, in the most N. part of prov. N. Holland, opposite isl. Texel ; its forts commanding the Marsdiep, the entrance to the Zuider Zee, 23 m . N. Alkmaar ; lat. $52^{\circ} 57^{\prime} 42^{\prime \prime} \mathrm{N}$. ; lon. $4^{\circ} 45^{\prime}$ E. (R.) It has an elegant townhouse, Calvinistic, Lutheran, R. Catholic, Jansenist, and Baptist churches, and a synagogue ; an orphan hospital, and several other benevolent institutions. From being little better than a fishing village, Napoleon converted it into a fortress of the first rank, capable of containing 10,000 men in its bomb-proof casemates, and called it his Northern Gibraltar. Its batteries defend the entrance of the harbour of the grand canal at Nieuwe-Diep. On the bighest point of the Downs is Fort Kijkdnin, from the centre of which rises a lighthouse. Being much exposed to the fury of the ocean, the port and coasts are protected by gigantic dykes, one of which is 6 m . long, and 40 ft . broad, with an excellent road on the top of it. Marsdicp, the entrance to the Zuider Zee, has a strong current, which always keeps it elear, rendering this the only port in IIolland with deep water close to the shore. The British, under Sir Ralph Abercrombie and the Duke of York, took possession of the Helder in 1799, but werc compelled to re-embark a few weeks thereafter, having fruitlessly endeavoured to excite the Dutch to throw off the French yoke. Pop. 2846; or, including Nieuwe-Diep (with which it is connected by a row of houses), and some seattered environsnamely, the village of Huis-duinen, and the hamlets of Buitenveld, Kanaalweg, and Nicuwstad-about 10,000 .
 Flanders. Weaving is the chief employment. Pop. 1017.

HELDEVAD, or Helligvad, a vil. Denmark, Schleswig, bail., and 9 m. W.N.W. Apenrade. It has a very old church, a medicinal spring, and near it are numerous barrows.

HELDRUNGEN (Schloss), a tn. Prussia, prov. Saxony, gov. of, and 33 m. W.S.W. Merseburg. It has a church, a castle, in which the fanatical Münster was imprisoned; saltpetre and potass works, and a trade in corn, hemp, flax, hops, and cattle. Pop. 17,217.

HELEN (St.), five pars. Eng.:-1, Berks; 3590 ac. Pop. 5531.-2, Norfolk. P. 487.-3, Suffolk. P. 1352.-4, Worcester. Pop. 1323.-5, (Bishopsgate), Middlesex. Pop. 659.

HELENA-Santa, a tn. Brazil. prov. Maranhão, com. of, and 60 m . W.S.W. Guimaraens, r. bank Turiaçu; with a church. Mandioc, rice, and cotton, are cultivated around it.

HELENA (St.), an isl., S. Atlantic Ocean, belonging to the British empire; lat. (Diana's peak) $15^{\circ} 57^{\prime} \mathrm{S}$. ; lon. $5^{\circ} 42^{\prime} \mathrm{W}$. (R.); about 700 m . S.E. isl. Ascension, 1400 m . W. from the W. coast of S. Africa, and 2000 m . from the E. const of Brazil ;
greatest length, from Barn Point in the N.E., to W. Point, $10 \frac{1}{2} \mathrm{~m}$; greatest breadth, from Sugar Loaf Point in the N., to the Barn in the S., 7 m. ; area, about $47 \mathrm{sq} . \mathrm{m}$. Its comparatively small size, and its immense distance from the continents both of the old and the new world, might seem to have doomed it to be one of the most solitary and least frequented portions of the earth's surface; but its position, in the direct line of the great ocean thoroughfare from Europe to the E., has made it a most important halting station for vessels performing that lengthened voyage, while it has acquired much additional celebrity from being the place of Napoleon's banislment; and where he resided from 1816 till his death, May 5, 1821. When seen from a distance, it has the appcarance of a lofty pyramidal mass, of a dark gray colour, rising abruptly from the surface of the ocean, and presenting no signs of vegetation; but when more nearly approached, though its precipitous and almost inaccessible coasts become still more striking, and on all sides, but particnlarly on the N., enormous beetling cliffs are seen almost perpendicular, and varying in height from 600 to 1200 ft ., a number of openings are discovered, forming the mouths of narrow valleys or ravines, leading gradually up to a central platean. On the shore, at all of these openings where a landing might be effected, small forts and other military works have been formed, chiefly for the purpose of making it a secure prison-house, while the peace of Europe depended on the safe custody of its prisoner. These, however, are almost the only traces of the liand of man which can be seen till the very remarkable peak on the N., called Sugar Loaf Point, is rounded, when, on turning to S.W., a fine bay and roadstead presents itself, and James' Town is seen partly lining the shore, and winding up the valley. This is the only town on the island, and owes
its existence to its fine natural harbour, whieh is well sheltered, and affords excellent anchorage in 12 fathoms. It is defended by strong batteries, contains the official residences, lining a spacious parade, and has a handsome ehureh, and shops well supplied with European and Asiatic merchandize. The best access to the iliterior is up James' valley, which, as well as the other valleys, leads, as has been already mentioned, to a kind of central platean. This is traversed by a limestone ridge, stretching E. to W., dividing the island into two unequal portions, and attaining in Diana's peak, near its centre, the height of 2700 ft ; the highest summit in the island. The portion on the S. of this ridge is the more abrupt and rugged of the two, and consists of an almost continuous suceession of rugged hills and peaks, evidently of

LOT'S W1FE.-From Neale's Geognusy of St. Helena.
voleanic origin. Several of these assume curious and fantastic forms. Of these, two of the most remarkable are situated near the S. coast, and, from some imaginary resemblances, have received the names of Lot and Lot's Wife. They are both formed of strangely-contorted columnar basalt,

TIIE CHMNEY.-From Seale's Geognosy of St. Helena.
and their summits are respectively 1444 ft . and 1423 ft . above sea-level; the former rising 197 ft ., and the latter 160 ft . above its base. Along the coast, at this part of the island. W. from Sandy Bay, there stretches, for a censiderable
distance, a stratum of horizontal celumnar basalt, forming a stupendeus wall, 50 ft . to 180 ft . high. An isolated portion of this stratum forms what is called the Chimney; a remarkable column of horizontal hexagenal basalt, 64 ft . high. The portion of the island N . of the ridge is also rugged, but contains several tolerably level traets, which, during the season when moisture is abundant, are covered with rich verdure. The largest of these tracts is that of Longwood, where Napoleon had his residence. The soil, though not of great natural fertility, is partly under cultivation; but the vegetation, instead of being tropical, as its position might have led one to expect, is decidedly European, and almost even British. Many of the hills are crowned with irregular plantations of Seotch firs, while many of the sloping banks are cevered with the common gorse or whin. Of the 756 species of plants now found on the island, only 52 are native.

There cannot be a doubt as to the volcanic formation of a considerable portion of the island, or the emergence of other considerable parts of it from the bottom of the sea. Though there is no well-defined erater, eartliquakes have frequently been felt; and, even in the absence of storm, beth at sea and on the island, strange heavings in the surrounding waters, the result, evidently, of subterranean commotion, are not uncommon. One of the most remarkable of these took place, February 17, 1849, when the sea suddenly became agitated, as if by a heavy storm, and several vessels, torn from their moorings, were dashed upon the beach; still, at a short distance from the island, no disturbance was felt. Owing to the elevation of the surface, the climate is temperate, and invalids frem the hot regions of the E. recover rapidly under its genial influence. The range of the thermometer is between $57^{\circ}$ and $72^{\circ}$, and gives an annual average of about $66^{\circ}$. Properly speaking, there are neither manufactures nor trade. The island is far from being able to supply its own wants, and the only traffic consists in supplying eommodities to the ealling vessels. The revenue of 1848 amounted to $£ 16,535,14 s$.; of 1849 , to $£ 15,921,9 s$. Of the latter sum, $£ 8940$ was derived from customs, and $£ 2014$ from licences. The total expenditure of 1849 was $£ 23,867$. Pop. 5000 , of whom nearly one half are whites.

HELEN'S (St.)-1, 1 market tn . and clapelry, England, co. Lancaster, on a branch of the Mersey, 11 m. E.N.E. Liverpool, originally, and at a comparatively recent period, but an insignificant village, now a considerable and impertant town, well-built, thriving, and populous. It owes its rise to the introduction of various branches of manufacture, but more especially to that of glass, which is earried on here to a great extent. Copper-smelting is also extensively carried on ; excellent watch movements are made; and there are large chemical works, and earthenware manufactories. There are two churches, several Dissenting places of worship, a handsome townhall, several schools, various charities, and religious and benevolent societies. Market day, Saturday. Pop. 17,849.-2, Par. Eng. Hants; 1880 ac. Pop. 1373.-3, One of the smaller Seilly Islands, N. of Tresco island, with an old chureh, good pasture, but no inhabitants.

HELENSBURGII, a small maritime town Scotland, co. Dumbarton, N. shere of Firth of Clyde, opposite Greenock, from which it is distant about 4 m . It is rather prettily situated, and is a favourite sea-bathing place. The town stretches along the shore, and consists of two or three leng parallel streets, interseeted by several shorter. These, being spacious, and the houses generally wide apart, with gardens attached, the whole place has an airy and cheerful appearance. It is lighted with gas, has an Established chapel, a Free, and a U. Presbyterian church, and Indejendent, Baptist, and Episcopalian chapels. It has some retail trade, but depends ehiefly on summer visitants. P. (1851), 2895.

HELGE- $\boldsymbol{R}$, a river in the S . of Sweden, which has its source in several small lakes, län Wexiö, whence it flows

## IIELHOUGHTON

## HELMSTÄDT

S.S.W., expanding into Lake Mockel; after which it turns S.S.E., and, on reaching the town of Christianstad, expands into a lake of its own name, about 9 m . long, by 3 m . wide, whence it flows E.N.E. to the Baltic, near Ahus. Total course about 70 m .

HELHOUGHTON, par. Eng. Norfolk; 1640 ac. P. 356.
HELICON, or Zagora, a celebrated mountain of N . Greece, about 44 m. W.N.W. Athens; height, 4593 ft .

HELIER (St.), cap. isl. Jersey, S. coast, E. side St. Aubin's Bay; lat. $49^{\circ} 11^{\prime} 18^{\prime \prime}$ N. ; lon. $2^{\circ} 7^{\prime}$ W. (r.) ; at the base of an amphitheatre of low hills, which slope down to the bay. St. Helier is protected by two fortresses, namely, Elizabeth Castle, on a rock in the bay, opposite the town; and Fort Regent, a strong and well-garrisoned fort, which overlooks the inner harbour. The town is composed of several spacious, and a number of narrow and irregular streets; most of them, however, well drained and kept clean; houses generally of stone, some of them well, but most of them indifferently built; lighted with gas, and supplied with water from wells. The places of worship comprise-six Episcopal churches, five Methodist, four Independent, two R. Catholic, one New Jerusalem, one Mormon, and one Plymouth Bretbren. The educational means include a national, two infant, a British and foreign, and several other schools, and a college. The only public building worth noticing is the House of Assembly, but it has little architectural merit. The Royal Square is an open flagged area, surrounded by the principal book shops, newspaper offices, reading-rooms, the courthouse, and a large hotel. There are manufactories of soap and candle, and several foundries and breweries. Shipbuilding, also, is carried on to a large extent. The harbour, docks, and quays are spacious and commodious; and a considerable shipping trade is done, chiefly with Newfoundland. The mildness of the climate, and the cheapness of many of the luxuries of life, have induced a great number of persons of limited means to fix their residence at St. Helier. Pop. (1841), 23,988; (1851), 29,741.

HELIGOLAND [Danish, Helgoland-Holy Land; anc. Hertha], an isl. belonging to the British empire, in the N. Sea, nearly equidistant from the mouths of the Elbe and Weser; lat. (light) $54^{\circ} 11^{\prime} 36^{\prime \prime} \mathrm{N}$.; lon. $7^{\circ} 53^{\prime} 12^{\prime \prime}$ E. (n.) ; circuit, about 2 m. ; area, $5 \frac{1}{4} \mathrm{sq} . \mathrm{m}$. Its surface is partly elevated, and partly flat, and the sea is preying so fast upon it, that it will, probably at no distant period, be reduced to a mere shoal or bank. Its rocks consist of reddish sandstone, which present a perpendicular face to the sea, and has a striking appearance. The interior is partly cultivated, and produces a little barley and oats. The town consists of about 400 houses, and, during the continental blockade by Napoleon, was a very stirring place, being the depôt for the immense stores of British goods which were brought over, and afterwards smuggled ashore. Since the peace, it has lost its importance. It is much resorted to for sea-bathing. P. 2300.

HEliopolis. See Baalbec.
HELL GATE, a pass in the strait called East River, U. States, New York, between Great Barn and Long Islands, with a dangerous eddy; which, however, can be passed at all times by steamers, and by the largest vessels at high water, and with a fair wind.

HELLAND, par. Eng. Cornwall; 2770 ac. Pop. 300.
HELLANIYAH, or Helaaneea, the largest of the Curia Muria islands (which see).

HELLAS, a country of Europe. See Greece.
HELLEBEK, a vil. Denmark, N.E. coast of Seeland, bail. Fredericksborg, at the N. entrance of the Sound, 27 m . N. Copenhagen. It has a church, and an important manufactory of fire-arms. Pop. 300.

HELLEFORS, a vil. and par. Sweden, län of, and 45 m . N.N.W. Orebro, beautifully situated on the Svart-elf, which here forms several falls. It has a church, and extensive ironworks. Near it is a silver mine.

HELLENDOORN, a vil. Holland, prov. Overijssel, 17 m . N.E. Deventer; with two churches, a school, and manufactures of boots and shoes. Pop. 860.

HELLESDON, par. Eng. Norfolk; 1020 ac. Pop. 400.
HELLESPON'T. See Dardanelles.
HELLEVOETSLUIS, or Helvoetsluis, a stronglyfortified seaport, Holland, prov. S. Holland, 18 m . S.W. Rotterdam, on the Haringvliet; lat. (light) $51^{\circ} 49^{\prime} 24^{\prime \prime} \mathrm{N}$. ; lon. $4^{\circ} 8^{\prime}$ E. (R.) It has a large, excellent harbour, one of the
stations of the Dutch navy, and is to Rotterdam what the Helder is to Amsterdan. Large vessels bound for Rotterdam avoid the dangerous navigation of the Maas, arising from the sandbanks at its mouth, by taking the ship-canal from Hellevoetsluis across the island of Voorne; and, by this route, Indiamen reach the sea in a single day. There are here a royal dock, arsenal, shipbuilding yards, and other establishments met with in a naval port; also three churches, a synagogue, a school, poorhouse, and townhouse. William III. embarked here for England, November 11, 1688. Pop. 2523.

HELLIDON, par. Eng. Northampton; 840 ac. P. 397.
HELLIN, a tn. Spain, Murcia, prov. of, and 35 m . S. by E. Albacete, on a hill side. It has narrow, crooked streets, but is tolerably well built; has one principal and five smaller squares, a handsome archidiaconal church, several chapels, two convente, town and session-houses, a prison, extensive hospital, and three schools; and, crowning the hill, the relics of its ancient castle and walls. Manufactures:-linen, coarse cloth, blankets, and hempen fabrics, bats, leather, glass, earthenware, esparto mats, ropes, \&c. Trade:-in sulphur, obtained in the vicinity; wine, manufactured goods, silk, grain, \&c. Pop. 8818.

HELLINGLY, par. Eng. Sussex ; 5820 ac. Pop. 1675.
HELLOVO [anc. Othrys], a spur of the Pindus moun-tain-range, forming part of the $N$. frontier of Greece, and extending from lon. $21^{\circ} 40^{\prime}$ to $22^{\circ}$ E.; and connected E. with Mount Varibovo. Culminating peak, Geraco Vouni, 5570 ft . high. On its S. slopes rises the river Ellada or Sperchius.

HELLUM, a vil. Holland, prov. of, and 9 m . E.N.E. Groningen; a scattered place, with a church and a school. The inhabitants are agriculturists and cattle-rearers. P. 639.

HELLWIGSDORF (Langen), or Langen Helmersdorf, a vil. Prussia, prov. Silesia, gov. Liegnitz, circle Volkenheim; with a Protestant and a R. Catholic church, a castle, a saw and several other mills. Pop. 916.

HELMARSHAUSEN, a tn. Hesse-Cassel, Niederhessen, on the Diemel, $27 \mathrm{~m} . \mathrm{S}$. Eisenach. It is walled, has a church, townhouse, and school ; manufactures of linen, tinware, and four annual fairs. On a precipice, above the town, are the ruins of the castle of Krukenburg. Pop. 1932.

HELMBRECHTS, a market tn. Bavaria, circle Upper Franconia; with a mineral spring, manufactures of woollen and linen cloth, and a trade in cattle. Pop. 1200.

HELMDON, par. Eng. Northampton; 3560 ac. P. 551.
HELME, a river, Germany, which rises in the Harz Mountains, on the S. confines of Hanover, flows E., across Prussian Saxony, forming part of the boundary between govs. Erfurt and Magdeburg, and then, turning gradually round to the S.E., joins l. bank Unstrut, about 6 m . below the town of Artern, after a course of 45 m .

HELMECZ-Kiraly, a market tn. Hungary, Hither Theiss, co. Zemplin, on the island of Bodrogköz, about 15 m . from Ujhely. It has a R. Catholic church, a castle, and a trade in wine. Pop. 1231.

HELMINGHAM, par. Eng. Suffolk; 3870 ac. P. 284.
HELMOND, a tn. Holland, prov. N. Brabant, 22 m. S.E. Hertogenbosch, on the Aa; with a townhouse, two churches, a Latin school, a large old castle, and some cotton and linen weaving. Pop. 1917.

HELMSDALE, a fishing vil. Scotland, E. coast, co. Sutherland, 22 m. N.E. Dornoch, near the mouth of Helmsdale water, here crossed by a handsome bridge. It is neatly built, and has an Established and Free church, and productive salmon-fisheries. The herring-fishery is carried on here to a great extent. The harbour has of late been greatly improved by the erection of a substantial pier.

HELMSLEY, a market in. and par. England, co. York (N. Riding). The rown, situated, $21 \mathrm{~m} . \mathrm{N}$. York, has a handsome parish church, three Dissenting places of worship, a frce school, a little linen-weaving, and some trade in corn. Market day, Saturday. Area of par., 29,640 ac. Pop. 3475.

HELMSLEY, two pars. England, York (N. Riding) :1, (Gate), 520 ac. Pop. 306.-2, (Upper), 780 ac. Pop. 68.

HELMSTADT, a tn. Brunswick, cap. circle of same name, 20 m . E.S.E. Brunswick. It is walled, has four gates, two suburbs, five public squares, two churches, a townhouse, gymnasium, several schools, three hospitals, and the handsome buildings of a university, which was founded in 1576 , but suppressed at the commencement of the present century.

Manufaetures of flannel, hats, tobaceo-pipes, soap, vinegar, and liqueurs; and trade in cattle. Near it is a chalybeate spring, with a bathing establishment, and both lignite and common coal are worked. Pop. 5300. Arca of circle, 231 geo. sq. m. Pop. 42,585.

HELMS'TAD'T.-1, A market tn. Bavaria, circle Lower Franconia, 9 m . W. Wiirzburg; with a parish ehurch and tile-works. Pop. 1168.-2, A vil. Baden, cirele Lower Rhine, bail. Neekarbisehoffsheim. Pop. 1075.

HELMUND, a large river, Afghanistan, whieh it traverses diagonally, N.E. to S.W., having its sources on the S.E. declivity of the Hagekuk ridge, whieh connects, transversely, IIindoo Koosh with Koh-i-baba, near the S. W. opening of the Oouna Pass, 32 m. W. Cabool. It flows thence, in a general S.W. direetion, to about lat. $31^{\circ} 10^{\prime} \mathrm{N} ., \operatorname{lon} .62^{\circ} \mathrm{E}$., when it suddenly turns N.W., passes near Dooshak, and ultimately falls into the extensive Lake llamoon, after a course of about 550 m . Its source is $11,500 \mathrm{ft}$. above sea-level, and its course, in consequence, so extremely rapid, that navigation upwards is impracticable. The immediate banks are in some places very fertile, but, at a short distance from the river, the country on cach side is an arid, barren desert, nearly uninhabited. It has few affluents of any considerable size; the principal are the Shahbund, the Turnuk and its tributaries, and the Khaush; the first flowing from the N.W., the second from the N.E., and the third from the N.

HELPERTIIORI'E, par. Eng. York (E. Riding); 2620 ac. Pop. 160.

HELPRINGIIAM, par. Eng. Lincoln; 2600 ac. P. 774.
HELP'TONE, par. Eng. Northampton; 1860 ac. P. 513.
HELSER, a vil. IIesse-Cassel, Niederhessen, circle of, and 7 m . E.S.E. Cassel ; with a parish chureh and three mills. Iop. 1186.

IIELSINGBORG, a seaport tn . Sweden, län Malmö, beautifully situated at the narrowest part of the Sound, opposite to Elsineur ; lat. (light) $56^{\circ} 2^{\prime} 42^{\prime \prime}$ N. ; lon. $12^{\circ} 42^{\prime} 15^{\prime \prime}$ E. (R.) It stands at the foot of a ridge of hills, and is a wellbuilt, stirring plaee; has a handsome market-place, in which is the townhouse, an ancient tower called Kärna, situated on a hill, and forming a very conspicuous object; the remains of an old eastle; manufactures of leather, dye-works, tile-works, salt-works, and a spacious new harbour, in the form of a hexagon. Pop. 2854.

HELSINGFORS, a seaport tn. Russia, eap. Finland, on a peninsula in the gulf of that name, 180 m . W.N.W. Petersburg; lat. (observatory) $60^{\circ} 9^{\prime} 42^{\prime \prime} \mathrm{N}$.; lon. $24^{\circ} 57^{\prime} 30^{\prime \prime} \mathrm{E}$. (n.) It was almost completely burnt down in the wars with the Swedes, and, since 1815 , has been rebuilt with great regularity. It is defended ly two forts elose to the town, and still more effectnally by the eastle of Sweaborg, which, though about 3 m . distant, eompletely guards the entrance to the harbour; and, being situated on a number of isolated roeks, is so strongly fortified, both by mature and art, as to be deemed almost impregnable. Ifelsingfors is the residenee of the governor, and the seat of important courts and public offices, contains three churches and a university, and has manufactures of linen, sailcloth, and tobacco, and a capacious harbour, which ranks as one of the liest in the Baltic, and at which an important trade is carried on in timber, corn, and fish. Pop. (1841), 12,775.

IIELSINGLAND, an old prov. Sweden, composing the greater part of län Gefleborg, where its name is still preserved in the districts of N . and S. Helsingland.

## IIELSINGOR, a tn. Denmark. See Elisineur.

HELSTON, a market tı., municipal and parl. bor. England, co. Cornwall, agreeably situated on an acelivity, I. bank Loo, near its entrance to the sea, 9 m . S.W. Falmouth. Two prineipal streets, which eross each other at right angles, straight, and well kept. Houses nearly all of stone, and generally well built. Well-lighted with gas, and abundantly supplied with water. One chureh, and two or three Dissenting chapels. A large and handsome guild-hall, a grammarsehool, national, commercial, British, and several other sehools; a public reading-room, and a dispensary. No manufactures, and merely a retail, and some shipping trade. It sends a member to the House of Commons; registered electors (1851), 335. Pop. 3584.-(Local Correspondent.)

HEL'TAU, or Nagy-Diznod, a vil. Austria, Transylvania, 6 m. S. Hermannstadt. It is large, well built, and eheerfullooking, finely situated in a romantic valley, has a l'rotestant
church, and has manufactures of cloth, and a trade in excellent fruit, particularly cherries. The inhabitants are remarkable for their stature. Among the men, $6 \frac{1}{2} \mathrm{ft}$. is not uneommon, and many of the women are 5 ft .9 inehes. Pop. 2563.

HELVELLYN, one of the highest mountains of England. co. Cumberland, between Keswiek and Ambleside, height 3313 ft ., amidst beautifnl and romantie scenery, easy of aseent, and commanding a splendid view of the lake distriet.

HELVETIA (Nueva), a th. Upper California, on the Sacramento, 50 m . from its mouth in the bay of San Franeisco.

HELVE'TIC Confederation. See Switzerland.
HELVOIR'T, a vil. IIolland, prov. N. Brabant, 5 m . S. W. IIertogenbosch, with two churches and a sehool. Pop., agricultural, 878.

HEM, a vil. France, dep. Nord, 5 m . E. Lille, with manufaetures of beet-root sugar, breweries, brick-works, and oil mills. Pop. 2209.

HEMAU, a tn. Bavaria, Upper Palatinate, 19 m . W.N.W. Ratisbon; with a eourt of justice, a parish church, castle, townhouse, poorhouse, tile-works, and a brewery. Pop. 1350.

HEMBLINGTON, par. Eng. Nortolk; 1070 ac. P. 284.
HEMEL-Hempstead, a market tn . and par. England, eo. Hertford, $23 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. London, near the sinall rivers Gade and Bourn. It consists of one principal street, nearly a mile in length; houses in general good, and the whole town neat and clean. It has an old church, of Norman arehitecture; several Dissenting places of worship, an infirmary, a school of industry, a national, and an infant, and several other schools. The staple manufacture is paper, several of the largest paper-mills in the kingdom being in the neighbourhood. Straw-plaiting forms the ehief employment of the females. In 1837 some curious Roman relies were found liere. Area of par., ineluding chapelries of Bovingdon and Flaunden, 12,440 ac. Pop. 7268.

HEMINGBROUGH, par. England, York (E. Riding); 9440 ac. Pop. 1953.

HEMINGBY, par. Eng. Lincoln; 2430 ac. Pop. 373.
HEMINGFORD, two pars. Ergland, IIuntingdon :-1, (Abbots); 2990 ac. Pop. 564.-2, (Grey); 1610 ac. P. 910.

HEMINGS'TONE, par. Eng. Suffolk; 1320 ac. P. 381.
HEMINGTON, two pars. Eng.-1, Northampton; 1240 Pop. 147.-2, Somerset; 1780 ac. Pop. 483.
HEMIXEM, a vil. and com. Belsinm, prov. of, and $7 \mathrm{~m} . \mathrm{S}$. Antwerp, on the Seheldt. It contains a ehureh, with the toinb of Antony of Brabant, natural son of Philip of Burgundy, and the castles of Calbcek and Emsdael, picturesquely situated in magnificent grounds on the banks of the Seheldt; and las manufactures of wax tapers and candles, brickworks, breweries, an oil and other mills; near it, at the confluence of the Schelle-Vliet with the Seheldt, stands the old abbey of St. Bernard, now oceupied as a eentral house of correetion, and capable of receiving 2000 conviets. Pop. 1075.

HEMLEY, par. Eng. Suffolk; 1140 ac. Pop. 508.
HEMMERDEN, a vil. Rhenish Prussia, gov. and 12 m . S.W. Düsseldorf, with a R. Catholic parish ehureh. P. 805.

IIEMMINGSTED, a vil. Dennark, IIolstein, S. Ditmarshes, on a height between IIcide and Meldorf, 29 m . N.N.W. Gluiekstadt. It has a ehureh, and is memorable for the battle fonght in its vicinity in 1500 , when a small number of the inhabitants of the Ditmarshes defeated the king of Denmark and the Duke of Molstein, at the head of from 20,000 to $30,000 \mathrm{men}$, and seeured their ancient freedom for another half eentury.

HEMPNALI, par. Eng. Norfolk; 3530 ac. Pop. 1255. HEMPSTEAD, a vil. and township, U. States, New York, 21 m . E. New York; with three churehes, a seminary, tanneries, paper factories, and numerous inills. Pop. 7609.

HEMPSTEAD, four pars. England:-1, Essex; 3430 ae. Pop. 798.-2, Gloucester; 1220 ac. Pop. 224.-3, Norfolk; 1720 ac. Pop. 296.-4, Norfolk; 1450 ac. Iop. 175.

HEMP'TON, par. Eng. Norfolk; 560 ac. Pop. 447.
HEMS, or Homs [Roman, Emesa], a tn. Syria, near the lake Kades, 85 to 90 m . N.E. Damascus; lat. $34^{\circ} 17^{\prime} \mathrm{N}$. ; Ion. $37^{\circ} 34^{\prime} \mathrm{E}$. It is strongly fortified, and has an aetive trade. The plains of IIems have been the seene of two great battles; the first ending with the defeat of Zenobia, queen of Palmyra, by the Roman emperor Aurelian; and the second, 7th July, 1832, when nine pashas of three tails, with their respective forces, were defeated by Ibrahim Pasha. 1'. 30,000.

HEMSBACH, a vil. Baden, circle Lower Rhine, near Mannheim; with a church, and an old castle which once belonged to the Templars. Pop. 1715.

HEMSBY, par. Eng. Norfolk; 2170 ac. Pop. 591.
HEMSOEN, an isl. Sweden, E. coast Gulf of Bothnia; lat. $62^{\circ}{44^{\prime}}^{\prime}$ N.; lon. $18^{\circ}$ E.; 5 m . N.E. Hernösand; 7 m . long by 4 m . hroad.

HEMSWELL, par. Eng. Lincoln; 2890 ac. Pop. 399.
HEMSWOR'TH, par. Eng. York (W. Riding); 4120 ac. Pop. 1005.

HEN and Chickens.-1, A group of small isls. U. States, near the W. end of Lake Erie.-2, A group of isls. Indian Archipelago, strait of Macassar; lat. $5^{\circ} 28^{\prime}$ S.; lon. $117^{\circ}$ $54^{\prime}$ E. (r.)

HENARES, a river, Spain, which rises in the N. of prov. Guadalajara, flows S.E. past the town of Guadalajara, and joins 1. bank Jarama, about 11 m . E.S.E. Madrid, after a course of about 90 m .

HENBURY, a vil. and par. England, co. Gloucester. The former is pleasantly situated $4 \frac{1}{4} \mathrm{~m}$. N.N.W. Bristol; and, on account of its vicinity to the latter, is the residence of many opulent citizens. It has a spacious and handsome church, and a free school. Area of par., $10,660 \mathrm{ac}$. Pop. 2439.

HENDERSON, several places, U. States, particularly a vil. and township New York, $151 \mathrm{~m} . \mathrm{N}$. W. Albany, with two churches, several mills, and a good harbour on lake Ontario. Pop. 2480.

HENDERSON Island. See Elizabeth Island (No. 2.)
HENDON, par. Eng. Middlesex; 8290 ac. Pop. 3327.

HENEAGUA. See Inagua.
HENEGLWYS, par. Wales, Anglesey; 2000 ac. P. 466.
HENFIELD, an agricultural vil. and par. England, co. Sussex; the former 9 m. N.W. Brighton, on an open plain; has an old-fashioned church, a Methodist chapel, a national school, and a corn-market on Friday. Area of par., 4440 ac. Pop. (1851) 1653.

HENFYNYW, par. Wales, Cardigan; 2000 ac. P. 859.
HENG-croo-foo, a city, China, prov. Hoonan, 1. bank IIeng-Kiang, 93 m . S. by W. Chang-Sha; lat. $26^{\circ} 55^{\prime} 12^{\prime \prime}$ N.; lon. $112^{\circ} 23^{\prime} 23^{\prime \prime} \mathrm{E}$. (L.) Paper is extensively manufactured here; and in the vicinity are silver mines, which are not allowed to be worked.

HENG-Kiang, a river, China, prov. Hoonan. It rises in the mountains which scparate Hoonan from Quangtong, flows N. and falls into Lake Tong-ting, after a course of about 350 m . Chang-Sha and IIeng-Choo-foo are the principal cities on its banks.

HENGELO, two vils. Holland:-1, Prov. Overijssel, 26 m. E. by N. Deventer, with three churches, a synagogue, and a school. It has some damask and calico weaving, bleacheries, breweries, and mills for corn, oil, \&c. Pop. 1830. - 2, Prov. Gelderland, 18 m. E.N.E. Arnhein, a good-looking place, with a Calvinistic and a R. Catholic church, a synagogue, and a school. Near it good iron-ore is found. P. 581.

HENGERSBERG, a tn. Lower Bavaria, r. bank Danube, 23 m . N.W. Passau ; with two churches and a castle. P. 908. HENGRAVE, par. Eng. Suffolk; 1000 ac Pop. 228. HENHAM, par. Eng. Essex; 2990 ac. Pop. 855.
HENIN-Lietard, a tn. France, dep. Pas-de-Calais, 11 m . N.E. Arras; with manufactures of cambric and soap, oil mills, and saltworks. Pop. 3091.

HENLEY, par. Eng. Suffolk; 1990 ac. Pop. 329.
HENLEY-House, a station of the Hudson's Bay Company, 150 m . S.W. Albany Foot, 1. bank Albany; lat. $51^{\circ} \mathrm{N}$.; lon. $85^{\circ} 6^{\prime} \mathrm{W}$.

HENLEY-in-Arden, a market tn. and chapelry, England, co., and 8 m . W. by N. Warwick, in a valley on the confluence of the Alne and Arrow, with some neat and respectable, and some antique-looking honses, an elegant church, a Baptist clapel, a charity school, and an hospital. Nails are made here to a considerable extent. Weekly market, Monday. P. 1223.

HENLEY-on-Thames, a market tn., mun. bor., and par. England, co. Oxford. The rown, 1. bank Thames, here crossed by a handsome bridge, 35 m . W. London, consists of four principal well-paved and lighted streets, and has an imposing Gothic church, with a fine tower, places of worship for Dissenters; and a neat townhall, supported on
sixteen Doric columus, forming a piazza, used as a markethouse. The charities comprise the united charity schools, a national, several day schools, some almshouses, and a number of friendly and other societies. There are a readingroom and a valuable library, bequeathed by Dean Aldrich of IIenley, who died in 1737, and to which all rate-payers have free access. Malt is made extensively, and there are several breweries, a large silk mill, and a considerable trade in corn, malt, flour, and timber by the Thames. Markets, Wednesday, Friday, and Saturday. Area of par., 1920 ac. P. 3622.

HENLLAN, three pars. Wales:-1, Cardigan. Pop. 127. -2 , Denbigh, 15 m . by 7 m . Pop. 2601.-3, (HennlanAmgoed (), Carmarthen, 3 m. by 2 m. Pop. 438.

HENLLIS, par. Eng. Monmouth; 2180 ac. Pop. 245.
HENLOPEN (Cafe), a headland, U. States, Delaware, the S.W. point of the entrance to Delaware bay, with a fixed light, 180 ft. high; lat. $38^{\circ} 46^{\prime} 36^{\prime \prime}$ N.; lon. $75^{\circ} 6^{\prime} \mathrm{W}$. (R.)

HENLOW, par. Eng. Bedford; 2450 ac. Pop. 776.
MENNEBONT, a tn. France, dep. Morbihan, 27 m . W.N.W. Vannes; lat. $47^{\circ} 47^{\prime} 50^{\prime \prime} \mathrm{N}$; ; lon. $3^{\circ} 16^{\prime} 55^{\prime \prime} \mathrm{W}$.(c.); on the Blavet, crossed, in the vicinity, by an iron suspensionbridge. It consists of the old town, the walled town, and the new town; the last two separated from the first by the river, and is poorly built, consisting of steep streets, in the dirtiest state imaginable. The walled town still retains the greater part of its fine old ramparts, and many of the old houses have a picturesque appearance. Outside is a handsome quay, which vessels of iniddle size can approach, and in its neighbourhood is a large square, one angle of which is occupied by the parish church. IIennebont exports corn, wine, wax, honey, hemp, \&c., and las a building yard, and six annual fairs. The strong castle by which Hennebont was once defended, and with which the readers of Froissart are familiar, has almost entirely disappeared. Pop. 3339.

HENNERSDORF, several places, Bohemia, particularly: -1, (Hennersdorf or Unter-Branna), a vil. circle Bidschow, at the confluence of the Sowinetz with the Elbe; with a clurch, a school, and a walk-mill. Pop. 1228.-2, (Hennersdorf or Henrichsdorf), a vil. circle Bunzlau, in a beautiful valley; with a churel and a school, a saw and two flour mills. Pop. 1396.

Hennersdorf, Gross, or Lang-Hennersdorf, a vil. Saxony, circle of, and 20 m . S.S.E. Bautzen. It is cheer-ful-looking and well built; has a large educational establishment, female boarding-school, and orphan hospital; and manufactures of cutlery. Count Zinzendorf dwelt here. P. 1430.

HENNOCK, par. Eng. Devon; 3320 ac . Pop. 828.
HENNUYERES, a vil. and com. Belgium, prov. Lainaut, on the railway from Brussels to Braine-le-Comte. It has a brewery, distillery, and two mills; the chief employment is agriculture. Pop. 1541.

HENNY, two pars. Eng. Essex:-1, (Great) ; 1350 ac. Pop. 417.-2, (Little); 490 ac. Pop. 65.

HENRI-Chapelle, a vil. and com. Belgium, prov. of, and 17 m . E. Liége. The chief employments are agriculture, and the weaving of woollens for the inanufacturers of Verviers. Pop. 1425.

HENRICHEMONT, a tn. France, dep. Cher, on the Lesser Sandre, 17 m . N.E. Bourges. It is neat, well built, has a large central square, manufactures of coarse cloths, and pottery, tanneries, and a considerable trade in wool. It was once capital of a small principality called Boisbelle. Pop. 1302.

HENRY (Port), a port, W. coast, Patagonia, near Cape Tres Puntas; lat. $50^{\circ} \mathrm{S}$. ; lon. $75^{\circ} 15^{\prime} \mathrm{W}$. (R.) The harbour is spacious, and capable of containing a numerous squadron of the largest ships, in 20 fathoms' water, perfectly secure from the effects of wind and sea. Around it are granite mountains, some rising almost perpendicularly to an elevation of 2000 ft ., perfectly bare at their summits and N.W. sides, but the lower parts thickly covered in sheltered places and ravines, partly with trees, and partly with brushwood; the former, however, are so small as to be only fit for firewood. Fresh water is abundant, but, excepting wild celery and arbutus berry, no useful vegetable production is known to exist here.

HENRY'S MOAT, par. Wales, Pembroke. Pop. 338.
HENSIES, a vil. and com. Belgium, prov. Hainaut, on the Haine and the canal from Mons to Condé, 13 m . W. Mons. It has manufactures of chicory, three breweries, and a little trade in butter, hemp, and hay. Pop. 2067.

HENSTEAD, par. Eng. Suffolk; 1100 ac. Pop. 280. IIENSTRIDGE, par. Eng. Somerset; 4080 ac . Pop. 1146. HENTLAND, par. Eng. Iereford; 2550 ac. Pop. 612. IIENZADAII, a tn. Burmah, prov. of, and 68 m . W.N.W. Pegu, r. bank, Irawady. With Keounzouk, which adjoins, it forms a considerable town, and has numerous pagodas.

HEONG-Shan, a tradiug town, China, prov. Quangtong, on the Canton river, 22 m . N.W. Macao.

HEPPENHELII, a tn. IIesse-Darmstadt, prov. Starkenburg, cap. circle of same name, 16 m . S. Darmstalt, on the railway from Frankfort to IIeidelberg. It is prettily situated and is walled, but has somewhat of a decayed appearance. It contains an old church, built by Charlemagne, a synagogue, courthouse, townhouse, and three schools, and has manufactures of lime and leather, bleaclifields, tile-works, five mills, and several fairs. On a commanding height, at some distance belind the town, is the old castle of Starkenburg, which belonged to the Arehbishop Electors of Mainz, and was considered one of their strongest fortresses. It stood repeated sieges, and makes a considerable figure in the German wars. Pop. tı. 4170; circle, 41,346.

HEPPENHELM-aN-der-Wiese, a vil. Hesse-Darmstadt, Kheinhessen, 33 m. S.S.E. Mainz, on the Eisbarh, with a Protestant church, townhouse, and school. Pop. 1336.

HEPTONSTALL, a vil. England, York (W. Riding); 7 m . W. by N. Halifax, on the summit of a precipitous lint, houses all substantially built of stone. It has a church, Wesleyan, and Baptist chapels, and a free grammar-school. Hand-loom weaving is the main employment; the young work in the neighbouring cotton and silk mills. Pop. 4791.

IIEPWORTII, par. Eng. Suffolk; 1640 ac. Pop. 582.
HERACLEA, a seaport th. Asiatic Turkey. See Erekli.
HERACLIA, a small isl. Grecian Arehipelago, 5 m . S. Naxia or Naxos, about 4 miles square.

HERALETZ, (New), a market tn. Bohemia, circle, and 30 m . S. Czaslan, with two castles, a chureh, school, manufactures of liuen, a potass work, bleachfield, and two mills. Pop. 966.

IIERAT, or IIeraut, formerly Heri [anc. Aria], a city, Afghanistan, 370 m . W. by N. Cabool, and $265 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Kandahar, near the IIeri; lat. $34^{\circ} 22^{\prime} \mathrm{N}$.; lou. $62^{\circ} 9^{\prime} \mathrm{E}$.; in a beautiful and fertile valley or plain, 30 m . long and 16 m . wide. It is of an oblong form, about 1600 yards in length, and 1400 yards in breadth, encircled by an artificial earthen mound, surmounted by a lofty wall of unburned briek, the former from 40 ft . to 60 ft ., the latter from 25 ft . to 30 ft . in height. A broal, deep, wet ditch surrounds the whole. At the N. end of the town is a strong citadel, also protected by a wet diteh. There are five gates, from four of which as many long bazaars lead towards the centre of the town, where they terminate in a small square surmounted by a dome; houses generally two stories high; smaller streets covered over, and low, dark, and inconceivably filthy. The principal mosque is a large building, and was once magnificently adorned, but is now going rapidly to decay. The town contains, altogether, 1200 shops, 17 caravanserais, 20 public baths, many public reservoirs for water, and a great number of mosques. Herat has been long celebrated for its carpets, which are remarkable for their softuess, and for the brillianey and permanency of their colours; but this manufacture has been for some time on the decline. The sword-blades made here are also much esteemed all over Persia. Being on the great thoroughfare from India to the E. districts of Persia, the commerce of Herat is very considerable. It exports assafuetida and saffron, its two staple articles ; pistachio-nuts, mastic, manna, gums, dyes, and carroway seeds; and imports shawls, indigo, sugar, chintz, muslin, leather, and skins, most of which are re-exported to Mushed, Yezi, Kerman, and 1spahan, whence are received in return, dollars, tea, china-ware, broad-cloth, copper, pepper, and sugar-candy. Great quantities of lamb and sheep-skins are here made up into cloaks and caps, and shoemaking is carried on to a great extent, but not to an extent sufficient to meet the demands of the city and province; whole camel loads of slippers being brought from Kandahar to make up the defieiency. Nearly the entire commerce of Iterat, with the capital embarked in it, is in the hands of the Himloos. The plain or valley in which the city stands, is described by Conolly as 'one beautiful extent of little fortitied villages, gardens, vineyards, and corn fields, brightened by many small
Vol. I.
streans of shining water.' It is carefully and amply irrigated by artificial canals, and is thus made to produce the most delicious fruits. The climate is on the whole healthy. The winters are cool, the snow lying for several days; but for two months in summer, the heat is excessive. The numerous architectural remains seattered over the neighbourhood, afford evidence of Herat having been, at one time, a much larger and more splendid city than it is now. Amongst these remains are the ruins of a Moosullah or place of worship, about a mile $N$. from the city, dedicated to the memory of the Imaum Reza; a vast series of beautiful and costly buildings, finely sculptured, and otherwise embellished. Herat is represented, by native writers, as having been in its glory in the 15 th and 16 th centuries. It was a long time capital of the empire founded by Tamerlane; was taken from the Persians by the Afghans, in 1715; retaken by Nadir-Shah, in 1731; and recovered by the Afghans, in 1749. The population of the city and territory is of a mixed character-Persian, Afghan, Sanjik, Belooche, Mogul, ILindoo, and a few Jews; stated to be 45,000 .

IHERAUL'T, a dep. France, bounded, N. and N.E. by Gard, S.E. and S. Gulf of Lyon3, S.W. Aude, W. Tarn, and N.W. A veyron; lat. $43^{\circ} 15^{\prime}$ to $43^{\circ} 57^{\prime} \mathrm{N}$. ; lon. $2^{\circ} 32^{\prime}$ to $4^{\circ} 10^{\prime}$ E.; greatest length, N.E. to S.W. 65 m. ; central breadth, 39 m .; area, $3800 \mathrm{sq} . \mathrm{m}$. It is of a very compact and somewhat oval shape. In the N.W. it is covered by the central chain of the Cevennes, whence the descent is rapid, and gives the whole department a strong S.E. inclination towards the coast, the greater part of which is lined by a long succession of lagoons. The principal rivers are the IIerault, which, traversing it N. to S ., divides it into two unequal parts; and the Orb and Lez, which are both partly navigable. Water comnunication of a much more valuable nature than that of the rivers, is furnished by the Canal du Midi, which here has its terminus in the large lagoon of Thau, and completes the connection between the Mediterranean and the Atlautic. The climate was at one time regarded as so superior, that the town of Montpellier situated within it, was a great resort of invalids from the N. and particularly from Great Britain; and though its reputation in this respect has considerably diminished, it must still be admitted, that notwithstanding the sudden changes which the temperature often undergocs, and the variety of winds of which, even at Montpellier, no fewer than 14, of more or less intensity, are counted, the interior of the department possesses a pure and healthy air, and a generally cloudless sky. Unhealthy localities are only found along the coast, where, owing to the number of lagoons and marshy flats, rheumatism and intermittent fevers are common. The quantity of waste land in the department amounts to considerably more than one-fifth of the whole surface. Of the remainder, one-sixth is under the plough, one-ninth in vineyards, and one-thirteenth in wood. The arable land is thus far below the proportion which is usual in the other departments of France, but the soil being generally of great fertility and tolerably well cultivated, yields much more grain than the home consumption requires. The crops of wheat, rye, barley, and oats, are very abundant. Permanent pastures are limited in extent; but in several districts valuable artificial meadows have been formed, and valuable crops of the finer grasses, incluting clover, sainfoin, and lucerne, are obtained. Many of the wines produced, of which the annual average is 628,570 opipes, are of the first quality. The best of the red are St. George's, St. Christol, and St. Drézéry; of the white, Marseillan and Pinet; and of the Muscat or sweet wines, Frontignan, Lunel, Maraussan, \&c. The olive is partially, and the mulberry very extensively cultivated. Aromatic, medicinal, and dye plants are also raised ou a large scale. Fruit, including almonds and ehestnuts, is abundaut; and among forest trees, the oak, both of the common and evergreen species, holls a prominent place. The minerals include coal, which is worked to some extent; copper, of which there are several mines, slate, millstones, marble, and gypsum. Salt is chiefly obtained from the lagoons. Among the manufactures are woollen, silk, and cotton goods, gloves, hosiery, muslin, chemical products, perfumes, essences, \&e.; and there are numerous dye-works, tanneries, paper-mills, and distilleries. An important general trade is carried on by means of the ports of Cette and Agde. For administrative purposes, Herault is divided into four arrondissements-Montpellier,

## HEREFORI

the capital ; Béziers, Lodéve, and St. Pons-de-Thomiers subdivided into 36 cantons, and 328 communes. Pop. 386,020.

HERAULT [anc. Arauris], a river, France, which rises in the Cevennes, at the foot of the lofty mountains of Aigoual and Lesperon, dep. Gard, flows first E., then S., enters dep. Herault, traverses it N. to S., and, passing the town of Béziers, communicates with the Canal du Midi, near where it enters the S.W. extremity of the lagoon of Thau, and shortly after falls into the Mediterranean at Agde, after a course of about 90 m ., of which 10 m . are navigable. Its principal affluents are the Ergue, Dourbie, Payne, Tongue, Rieutor, and Dardaillon.

HERBERN, a vil. Rhenish Prussia, gov. of, and 16 m . S. Münster ; with a parish church, manufactures of linen cloth, and wooden clogs; tile-works, and limekilns. Pop. 1000.

HERBERTINGEN, a vil. Würtemburg, circle Danube, 32 m. S.W. Ulm ; with a large Protestant church and chapel. Pop. 1272.

HERBEUMONT, a vil. and com. Belgium, prov. Luxembourg, on the Semois, 29 m . W. Arlon; with extensive slate quarries, from which about $8,000,000$ of slates are annually obtained. Pop. 1108.

HERBIERS (Les), a tn. France, dep. Vendée, 24 m . N.E. Bourbon-Vendée, on the Maine. It is well built, and has some trade in country produce. Pop. 1360.

HERBIGNAC, a tn. France, dep. Loire-Inferieure, 40 m . W.N.W. Nantes. It has manufactures of earthenware, a trade in cattle, and six annual fairs, one of which is well frequented. Near it are the imposing ruins of the old castle of Renroet, in good preservation. Pop. 514.

HERBOLZHEIM, a tn. Baden, circle Upper Rinine, on the Bleich, 17 m . N.N.W. Freiburg; with a R. Catholic church, manufactures of linen, and a trade in hemp and tobacco. Pop. 2057.

HERBORN, a tn. Nassau, cap. bail. of same name, r. bank Dill, 15 m . N. Weilburg. It is walled, has two churches, an old castle, a Calvinistic theological scminary, with two professors, and superior schools; manutactures of woollen and linen cloth, hosiery, earthenware, tobacco, and tobacco pipes; red and white leather, dye-works, limekilns, paper, walk, bark, and other mills. Pop. tn., 2267; bail., 15,69I.

HERBRANSTON, par. Wales, Pembroke. Pop. 249.
HERBRECHTINGEN, a vil. Würtemberg, circle Jaxt, on the Brenz, here crossed by a stone bridge, 58 m . S.S.E. Heilbronn; with a church, the remains of an old monastery, and a cotton-mill. Pop. 1524.

HERBSLEBEN, a vil. Saxe-Coburg, r. bank Unstrut, 15 m. N.N.E. Gotha; with a church, castle, and hospital. Pop. 1480.

HERBSTEIN, a tu. Hesse-Darmstadt, Oberhessen, on the Vogelsberg, 16 m. W. Fulda; with a R. Catholic church, two schools, and an hospital ; manufactures of linen and combs, a trade in linen and cattle, and five annual fairs. Pop. 1616.

HERCK, two places, Belgium :-1, (-la-Ville), a vil. and com., prov. Limburg, 7 m . W. Hasselt, on the Herck. It is an ancient place, and once possessed some importance, though now mercly a village. It has a flour and two oil mills, and an annual fair. Pop. 2018.-2, (-Saint-Lambert), a vil. and com., prov. Limbourg, at the confluence of the Mombeek with the Herck, $3 \mathrm{~m} . \mathrm{S}$. Hasselt. It has two breweries, but the chief employment is agriculture. Pop. 1153.
herculan eu m, or Herculanum [Italian, Ercolano], an anc. city, on the coast, and about 7 m . from the town of Naples, near the base of Mount Vesuvius. It was buried, A. D. 79, by the same eruption of that volcano which buried Pompeii. Its site was discovered, in 1713, by the sinking of a well; and, by the extensive excavations which have since been made, several buildings, including a theatre and two temples, have been opened up, and many interesting antiquitics obtained. Among the latter are an immense number of MSS., on rolls of papyrus. They are in a state resembling charcoal, dry and crumbling, and with the leaves so strongly adhering to each other as to form almost a compact mass. Unfortunately, the attempts at unrolling have had very partial success; and, still more unfortunately, the subjects, so far as ascertained, prove to be of very little interest, consisting only of treatises, by obscure writers, on natural history, criticism, arts, \&c. The collections obtained from Herculaneum are principally deposited in the royal museum at Portici.
hercynlan Fores't. See Harz.

HERDECKE, a tn. Rhenish Prussia, gov. of, and 27 m . W. Arnsberg, r. bank Ruhr, here navigable. It has three churches, important manufactures of woollen cloth and ironware, and a trade in corn and cattle. Pop. 2308.

HEREFORD, a W. co. England, bounded, N. by Shropshire, S. by cos. Monmouth and Gloucester, E. by Worcester, and W. by Radnor and Brecknock; about 38 m . in length, S.E. to N.W., and 32 m . in breadth, at the broadest part; area, $863 \mathrm{sq} . \mathrm{m}$., or $552,320 \mathrm{ac}$., of which nearly 500,000 are arable, meadow, and pasture. The surface is beantifully diversified by hill and dale, the former commanding some of the finest views in England; noble and extensive woods and orchards, alternating with rich corn fields and verdant meadows. The county belongs wholly to the basin of Severn, towards which river it has a general slope N. to S., as indicated by the course of its rivers, the Wye and its affluents the Lagg, Arrow, and Frome, and some smaller streams. The soil is in general fertile, particularly the alluvial lands upon the banks of the rivers, but the pasture-grounds are in many places indifferent, and the herbage poor. Wheat is the principal crop, but barley, hops, and turnips are also extensively cultivated. Orchards are numerous, and not confined to any particular districts. The quantity of cider made from their produce is very great, and the quality excellent. The Herefordshire cattle are held in high estimation. They feed easily, are quiet, tractable, work well, produce the finest beef, but are poor milkers. They are much employed in farm operations. The usual breed of sheep is a cross between the Leicester and the Ryeland, and the numbers are estimated at 500,000 . Horses are bred in considerable numbers, mostly agricultural, and of indifferent quality, excepting in the N. parts of the county, where both riding and coach horses of a superior description are reared. Agriculture is, on the whole, in an improved and improving condition, although in many parts drainage is greatly neglected. The farms, which are held mostly from year to year, are generally large, and the number of small ones decreasing. Oak timber is very abundant, and forms, with oak bark, an important article of export. Iron ore has been met with in the districts bordering on Gloucestershire, but in inconsiderable quantities. The climate is various, but in general remarkably salubrious. Some medicinal springs are met with on the Hereford side of the Malvern hills, and petrifying springs in the hilly parts of the county, where the soil is calcareous. The manufactures are few and unimportant, consisting chiefly of some coarse woollens and gloves; the latter manufactured in the city of Hereford, and borough of Leominster. Herefordshire is divided into 11 hundreds, and 219 parishes. It returns seven members to Parliament; three for the county, and two each for the city of Hereford and borough of Leominster. Registered clectors for the county (1851), 6856. Pop. 115.489.

HEREFORD, a city and parl. bor. England, cap. above co., I. bank Wye, 120 m . W.N.W. London. It is situated on slightly rising ground, in a fertile and well-cultivated valley, nearly in the centre of the county. The principal streets are broad and straight, all macadamized, and well-lighted with gas; houses mostly of brick, and the public buildings of stone. The most remarkable structure in the city is the cathedral, situated near the Wye; built, or rather rebuilt, in the reign of William the Conqueror, on the site of an earlier edifice. Its entire length is 335 ft ; width, 174 ft . None of the other parish churches require any special notice. There are places of worship for the principal denominations of Dissenters, and a handsome R. Catholic chapel. The only other public buildings of any consideration are, the college, a venerable, but gloomy building, adjoining the cathedral; the shire-hall, a large, well-proportioned, and commodious building; the county-hall, also a fine edifice; the city prison, formerly one of the gateways of the ancient walls; the county jail, built on Howard's plan in 1797; and a neat theatre. There are a great many schools, of various descriptions, in the city, including one for educating and clothing 50 boys and 30 girls; the free, or college grammar-school, a very ancient foundation, with many valuable scholarships; a bluecoat school, and Dean Langford's gift for scholarships, for four scholars of the free school of Hereford. There are several other schools, in which education is given gratis, and in some instances clothing besides. The charities unconnected with educational purposes are numerous, and comprise an infirmary, maternity hospital, asylum for lunatics, \&c. The
inanufactures, which are few, and mostly inconsiderable, consist chiefly of hats, leather, earthenware, ropes, and cutlery. There is also an extensive iron-foundry, and a large ale and porter brewery. Gloves were formerly made to a considerable amount, but the trade has been for some time declining, chiefly through the successful rivalry of Worcester. Cider, grain, hops, oak bark, and wool are conveyed down the Wyc, to Bristol and other places. There are annual races held here in August, and a triennial musical festival in September, which continues during three days. Eleanor Gwynn, better known as Nell Gwynn, the favourite mistress of Charles II., and founder of Chelsea hospital, and David Garrick, were natives of Hereford. Pop. 11,3b7.

IIEREFURD (Litrie), par. Eng. IIcreford; 3840 ac. Pop. 462.

IINREGH, a vil. IIungary, Hither Danube, co. of, and 21 m . E.S.E. Komorn, with a Protestant and a R. Catholic church. Pop. 1351.

IIERENCIA, a tn. Spain, New Castile, prov. of, and 36 m. N.E. by N. Ciudad-Real, near the confluence of the Valdespino with the Giguela. It has level and paved strects, is tolerably well built, has four squares, a parish ehureh, three chapels, a convent, a Latin and fonr primary schools, a storehouse, and cemetery; mannfactures of soap, chocolate, white wax, and coarse cloth; and a trade in its manufactures, and in agricultural produce. Pop. 7151.

HERENT, a vil. and com. Belgium, prov. Brahant, on the Dyle and the Lonvain canal, 14 m . E.N.E. Brussels. It has a trade in agricultural produce and cattle. Pop. 2391.

IIERENTHALs, a tu. and com. Belginin, prov. of, and 20 n. E. Antwerp, on the Little Nethe. It is a very ancient place, and, in the 14 th and 15 th centuries, during the latter of which it was surrounded with walls, was considered the capital of the Campine. It has a chureh and a townhouse, neither of them of much architectural merit, two chapels, an hospital, and a prison; manufactures of woollen cloth, hats, and cordage ; tanneries, breweries, dye-works, several mills, and a weekly market. Pop. 3357.

HERFFEIINGEN, a vil. and com. Belgium, prov. Srabant, $13 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Brussels. It has a brewery and four mills. Poj. (agriculturai), 1746 .

HERFORD, a th. Rhenish-Prussia, gov. of, and 16 m . S.W. Minden, cap. circle of same name, at the confluence of the Aa and Bega with the Werra. It is walled, has a R. Catholic and four Protestant churches, a synagogue, gymnasium, industrial and other schools, prison, workhouse, and the remains of a fine old abbey, a court of law, and several public offices; manufactures of linen and cotton goods, leather, basket-work, and tobaeco; several oil-mills, and a trade in corn, cattle, and yart. Pop. 8569.--The circle is hilly, and only of moderate fertility. Area, 128 geo. sq. m. Pop. 66,102.

HERGNIES, a vil. France, dep. Nord, 7 m . N. Valenciennes, r. bank Scheldt, with manufactures of woollen hosiery and brick-works. Near it is a scam of coal. Pop. 1522.

IIERICOURT, a tn. France, dep. Haute-Saône, l. bank Luzenne, 30 m. E. Vesoul. It is irregularly, but tolerably well built, has a church, the choir of which is used by the R. Catholics, and the nave by the Protestants; an old castle, important manufactures of cetton prints, cotton hosiery, glue, and earthenware, several dye-works, brick-works, tanneries, and breweries, and monthly fairs, ehiefly for cotton-twist and tissues. Pop. 3050.

HERINGEN, a tn. Prussia, prov. Saxony, gov. and 51 m . W. Merscburg, r. bank Helme; with an old castle, a law conrt, a potash factory, and a trade in flax and cattle. Pop. 2108.

HERIN'TSE, Homintsova, or IIorintsa, a vil. IIungary, Mither Theiss, co. Marmaros, in a plain, on the Nagyag, about 25 m . from Szigeth, with a Greek chnreh. Pop. 1422.

IIERIOT, par. Scet. Edinburgh; $6 \frac{1}{2} \mathrm{~m}$. by $4 \mathrm{~m} . \quad$ P. 355 .
IIERISAU, a tn. and par. Switzerland, can. of, and 5 m . N. W. Appenzell, cap. dist. Hinter-der-Sitter, in the AnsserRhoden, beautifully and advantageonsly situated $r$. bank Glatt, at the confluence of the Bribhbach. It consists of two principal squares and four streets, with seven smaller ones opening into them; contains a large and handsome chureh, with an ancient tower ; a new and elcgant townhouse, a poorhouse, arsenal, and cassine; and has extensive manufaetures of muslins, plain and embroidered, forming the staple of the
town; and of cottons and silks, tanneries, dye-works, bleachfields, paper, saw, and other mills. The environs are laid out in beautiful walks and gardens, and two of the surrounding heights are erowned by the old castles of Resenberg and Rosenturg. P'op. (1850), 8387.

HERJE-iN, a river, Sweden, rising in a mountain-range which separates liin Ostersund from Falun, flows first E.S.E., expanding into several lakes, then N., and joins l. bank Ijusne, a little above Sveg, after a course of 40 m.

II ERJEADALEN, a dist. Sweden, forming the S. part of lin Ostersund, and named from the Merje-in, which waters it.

IIERKIMER, a vil. and township, U. States, New York, 1. bank Mohawk; with a courthouse, jail, two ehurches, and an academy; several tanneries and mills. l'op. 2369.

IIERKlNGEN, an agricultural vil. Holland, prov. S. Itolland, 15 m. S. Briclle, with a church and school. P. 600.

IIERLESHAUSEN, a vil. Hesse Cassel, Niederhessen, circle Eschwege, with a church and the handsome palace of Augustenan, a residence of the Landgrave of Hesse-Philippsthal. l'op. 1042.

IIERM, one of the smaller channel islands, $2 \frac{1}{2} \mathrm{~m}$. N.E. Guernsey, possessing inexhaustible quarries of excellent granite. P'op. 33.

IIERMANMIESTETZ, Iferman Mestec, or IIermanstadt, a th. Bohemia, circle of, and 5 in . W. Chrudim, r. bank Chrudimka, at the foot of a mountain-ridge. It is well built, has two squares, a large and handsome parish church, three chapels, a synagogue, a eastle, with garden and park; a courthouse, burgher hospital, poorhonse, and school; tile-works, stone quarrics, and a large worsted mill. Pop. 2665.

HERMANNS'TAD'T [Latin, Cibinium; Hungarian, NagySzeben], a th. Transylvania, cap. stuhl of same name and of Saxen-land, on the Cibin, in an extensive valley, bounded, $S$. by the mountain-chain of Fogara, and on other sides by lofty and picturesque hills, 54 m . S.S.E. Klausenburg, 1315 ft . above sca-level. It consists of a high and a low town, and of three suburbs. The ligh town is surrouniled by double walls, flanked with towers and bastions, and enelosed by ditehes, all in a very dilapidated state; but is, on the whole, well built, consisting of several handsome squares, and regu-larly-paved and tolerably-clean streets. A succession of steep stone stairs lead down to the lower town, which presents a very disagreeable contrast, being both ill built, unpaved, and filthy in the extreme. The principal buildings are the Protestant cathedral, a handsome Gothic structure, commenced, in 1357, by King Lndwig, and completed, in 1460, by Matthias Corvin, surmounted by a lofty tower, and containing numerous interesting monnınents; the R. Catholic high chureh, formerly belonging to the Jesuits; the new Reformed church, the Protestant gymnasium, and, connected with it, the Brackenthal museum, with several good collections, and a library of 15,000 volumes; the townhouse, theatre, barracks, honse of correction, an orphan, and two other hospitals. The manufactures consist of woollen and lineu eloth, hats, bone-combs, of which abont 750,000 are aunnally sold in Turkey and Wallachia; earthenware and tobacco-pipes, cordage, copperware, refined wax, leather, paper, and gunpowder. The trade in these articles, and also the transit trade, chiefly to and from Constantinople, are of great importance. IIermannstadt, as the capital of the Saxon-land, is the place where the meeting of the states, called the National Universität, is held. It is alse the seat of a military governor, and of several important courts and public offices; and has a physical society, devoted chiefly to the geology of Transylvania. Pop. (1846), 21,500. - The stuill, a district on the frontiers of Wallachia, is hilly, well wooded, and is watered by the Alnta and its tributaries. It contains much good arable land, grows a large quantity of wine, but of indifferent quality, depastures great numbers of cattle, and yields honey and wax. The inliabitants, mostly Saxons, in addition to agriculture, carry on a considerable trade, particularly with Wallachia; the principal pass to which, over the Carpathians, by the Rotherthurm, is in this stuhl. Area, 544 geo. sq. m. Pop. 70,000.

II ERMANOS.-1, A gronp of small isls. Caribbean Sea, belonging to Venczuela, 12 m . S.E. Blanquilla; lat. $11^{\circ} 42^{\prime}$ N.; lon. $64^{\circ} 29^{\prime}$ W. (R.). -2 , Two small isls. Philippines, W. coast of Luzon ; lat. $15^{\circ} 50^{\prime} \mathrm{N}$.

HERMANSEIFEN, Herzmanzeyf, or Hermanstift, a vil. Bohemia, circle Bidschow, in a narrow valley; with a
church, manufactures of linen, a large paper-mill, and yarn bleachfield. Pop. 1804.

HERMANSTADT. See Hermanmiestetz.
HERMESKEIL, a vil. Rhenish Prussia, gov. of, and $12 \mathrm{~m} . \mathrm{S} . \mathrm{E}$. Trèves, in the Hochwald; with a court of justice, a R. Catholic parish church, and a trade in cattle. Pop. 965.

HERMIES, a vil. France, dep. Pas-de-Calais, 17 m . S.E. Arras. Pop. 2377.

HERMIGUA (Valle de), a vil. Canaries, isl. Gomera, beautifully situated among lofty hills; with a parish church, a primary school, suppressed convent, several flour-mills, and a trade in wine, silk, and fruit. Pop. 1827.

IIERMINE (Ste), a vil. France, dep. Vendée, 14 m. N.W. Fontenay-le-Comte; with manufactures of linen, a trade in catcle, and two annual fairs. Pop. 1261.

HERMIT ISLAND, a remarkable isl., S. Pacific, about 10 m . N.W. Cape Horn, the S. extremity of which forms the bold perpendicular promontory called Cape Spencer; lat. (W. cape) $55^{\circ} 50^{\prime} \mathrm{S}$. ; lon. $67^{\circ} 55^{\prime} \mathrm{W}$. (R.) It is of irregular form, deeply indented by bays and coves; shores bold and steep, surmounted by conical peaks, the highest of which is 1742 ft . abont sea-level. It is about 12 m . long, E. to W., of plutonic origin; syenitic greenstone, resting on a basis of granite, with here and there some quartzose and felspathic rocks. The monntain-peaks are of very compact greenstone, and highly magnetic, possessing the property of polarity in an extraordinary degree. The mountains themselves rise at once from the water's edge, clothed for half their elevation with a low, deep-green forest, and crowned with rugged precipices and gray masses of rock, while foaming cascades rush down every gulley; the whole scenery, according to Captain Ross, closely resembling that of many parts of the west of Scotland. The natives here do not often exceed 5 ft . in height; they are in the most abject misery and wretchedness, wandering nearly naked through the snow, and living in wigwams, affording inadequate shelter from the inclemency of the weather. They are, however, peaceable and inoffensive, cheerfnl and good-tempered, but indolent, leaving all drudgery to their wives.-(Voy. Adv. and Beagle; Ross's Ant. Exp.)

HERMITAGE, par. Eng. Dorset; 450 ac. Pop. 132.
Hermon't, a vil. Egypt. See Arment.
HERMOPOLIS. See Syila.
HERMSDORF, numerous small places, Germany, particularly :-1, (-unterm-Knyast), a vil. Prussia, prov. Silesia, gov. of, and 30 m . S.W. Liegnitz, at the foot of Mount Knyast, with a castle and a R. Catholic church, tile-works, and several mills. Pop. 1605.-2, (-Städtisch), a vil. Prussia, prov. Silesia, gov. Liegnitz, circle Landshut, with a castle, and numerons bleachfields and mills. Pop. 1363.-3, (-Grüssanisch), a vil. Prussia, gov. Liegnitz, circle Landshot, with a chapel and two water-mills. Pop. 1754.-4, A vil. Saxony, circle of, and $20 \mathrm{~m} . S . W$. Dresden, with extensive limestone quarries and several mills. Pop. 940.-5, A vil. Saxe-Altenberg, 33 m. S.W. Leipzig, with a parish church, a saw and a flour mill. Pop. 1046.

HERMSDORF, or Hermansdorf, a vil. Bohemia, circle of, and 36 m . N.E. Königgrätz, in a valley, on the Steina. It contains two chnrehes, a castle, with a library, cabinet of coins, and other collections; and a school ; and has manufactures of woollen and linen cloth, two bleachfields, a saw and other mills. Near it is the old castle of Kienast, one of the finest ruins in the Riesengebirge. Pop. 1519.

HERNAD, a river, Hungary, an affluent of the Theiss. It rises in a branch of the Carpathians, on the $N$. frontiers of Hungary, about lat. $49^{\circ} 56^{\prime}$ N., lon. $20^{\circ} 5^{\prime}$ E., flows E., past Iglo, then, turning S.S.E., passes Kaschau, a little below which it turns S.S.W., and separates into two branches; which, after flowing in parallel lines within a short distance of each other, unite a little below the town of Onod, thus forming a long, narrow island. About 6 m . below the junction, the united stream, proceeding E.S.E., joins r. bank Theiss. Total course of the Hernad, nearly 150 m .: principal affo-ents-right, the Golnicz and Sago; left, the Tarcza.

HERNANI, a tn. Spain, Biscay, prov. Guipuzcoa, 9 m . N.N.E. Tolosa, well built, with wide, straight, and paved streets, a large and handsome parish chnrch, chapel, townhouse, prison, civil hospital, college, two schools, a cemetery; mannfactures of linen, hardware, and phosphorus; and a trade in fruits and manufactured goods. Pop. 2360.

HERNE, a small tn. and par. England, co. Kent. The Town, 5 m . N.E. Canterbury, has a handsome church. Area of par., 4560 ac. Pop. 3041 .—Herne Bay, a much-frequented sea-bathing place, on a beautiful bay, $7 \mathrm{~m} . \mathrm{N}$. by E. Canterbury. It has a handsome clock-house, a market-house, a chapel of ease, an Independent chapel, national and infant schools, assembly, reading, and billiard rooms, a fine promenade, and a pier $\frac{3}{4} \mathrm{~m}$. long. Pop. 1572.

IIERNHILL, par. Eng. Kent; 2690 ac. Pop. 603.
HERNÖ, an isl. Sweden, Gulf of Bothnia, län Hernösand, opposite the mouth of the Angermanelf, and only separated from the mainland by a narrow channel. The town of Hernösand stands on its N.E. sliore.

HERNOSAND, a tn. Sweden, cap. län of same name, on W. side of isl. Hernö, Gulf of Bothnia, 228 m. N. Stockholm ; lat. (church) $62^{\circ} 37^{\prime} 54^{\prime \prime} \mathrm{N}$. ; lon. $17^{\circ} 57^{\prime}$ E. (r.) It is well built, is the see of a bishop and the residence of a governor, has an old church, of tolerable appearance, with some good carvings; a gymnasium, library, and house of correction, two good harbours, connected by the strait between the island and the mainland; and building-yards, at which a considerable number of vessels are fitted ont. The principal exports are timber, pitch, butter, flax, and provisions. Pop. 2114. The LÄN, called also Wester-norrland, is bounded, N. by län Umea, W. by Ostersund, S. by Gefleborg, and E. by the Gulf of Bothnia; area, 9650 sq. m.; slopes generally N.E., and is watered by numerous lakes, and by the rivers Angerman, Sodra, Adals, Sanga, Indal, \&c.; about one-half of the län has an altitude under 328 ft ., and the other half under 852 ft . Grain is not raised in sufficient quantities for the consumption Cattle-rearing, navigation, and fishing are actively prosecuted. Pop. 81,637.

HERN YOKOVA, or Hernakova-Czella, a vil. Hungary, Banat, co. Temeswar, 4 m . from Rekas, with a Greek church. Near it bee-culture is extensively pursued. P. 1078

HERO (North and South), two isls., U. States, Vermont, in Lake Cliamplain, separated by a narrow channel, and forming together Grand Isle. S. Hero is 13 m . long, by 4 m . broad; N . Hero is 10 m . long, by 2 m . broad. Both are fertile.

HERON, a vil. and com. Belgium, prov. of, and 21 m . W.S.W. Liége, on the Forseille; with a beautiful parish church, a brewery, two mills, and several lime-kilns. Quar ries of building-stone and iron-mines are wrought in the vicinity. Pop. 1047.

HERON ISLES, a small group of isls., Gulf of Mexico, S. the entrance of Mobile Bay ; lat. $30^{\circ} 12^{\prime} \mathrm{N} . ; \operatorname{lon} .88^{\circ} \mathrm{W}$.

HERRENBAUMGARTEN, a market $t \mathrm{n}$. Lower Austria, on the Grotbach, about 4 m . from Poysdorf, with a church, townhouse, and the remains of an old castle; and a trade in the wine of the district. Pop. 1590.

HERRENBERG, a tn. Wïrtemberg, circle Schwarzwald cap. bail. of same name, on a hill, at the solurce of the Ammer, 18 m. S.W. Stuttgart. It has narrow and indifferently-made streets, a deanery church, town church, Latin and grammarschools, the remains of an old castle, mannfactures of woollen and linen cloth, and hosiery, and a trade in fruit. Pop. 2147. Area of bail., 69 geo. sq. m. Pop. 24,369.

HERRENBREITUNGEN, or Burgbreitungen, a vil. Hesse-Cassel, prov. Fulda, circle and 5 m . W.N.W. Schmalkalden, cap. bail. of same name, r. bank Werra, with a church and a castle. Near it, tobacco is extensively grown. Pop. 939.

Herrengrujnd, Urvolay, or Panszka-Dolinc, a vil. Hungary, co. Sohl, 11 m . N.E. Kremnitz. It is a poor place, composed of old wooden houses, on the ridge of a hill, so bleak and sterile that corn will not ripen on it. Mines of argentiferous copper have been worked in the district for about eight centuries. Some lace also is made. Pop. 1556.

HERRENTHOUT, a vil. and com. Belgium, prov. and 18 m . E.S.E. Antwerp, on the Wimpe, with mannfactures of woollen cloth, candles, and cordage; a distillery, two breweries, dye-works, flour-mills, and a trade in butter. Pop. 2353.

HERRERA, several places, Spain :-1, A vil. Andalusia, prov. of, and about 61 m . E. Seville, consisting of houses which, though generally small, are regnlarly built. It contains a large and ancient church, a courthouse, prison, and two primary schools; and has several oil and flour mills, and a trade in oil and corn. Pop. 1965.-2, (Herrera-de-Alcantara), a tn. Estremadura, prov. of, and 60 m . W. Caceres, near the Tagus and the frontiers of Portugal. It is very
poorly built; has a church, and some trade in corn. Pop. 936.-3, (IIerrera-del-Duque) [anc. Leuciana], a tn. Eatremadura, prov. of, and 70 m . E. by N. Badajos. It has clean, wide, and well-paved streets ; three squares, a parish chureh, chapel, town and session houses, a prison, school, storehouse, manufactures of coarse cloth and frieze, and a trade in grain, cattle, sheep, and pigs. Near it are the ruins of a Roman castle. Pop. 2499.-4, (Iferrera-de-Rio-Risuerga), a tn. Old Castile, prov. Palencia, on a height above the Pisuerga, here crnssed by a handsome bridge of 13 arches, $31 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Burgos, with a church, townhouse, prison, several flour-mills, and a trade in corn. Near it is a magnificent ruin, supposed to be of Moorish construction. Pop. 744.-5, (Herrera deValdecañas), a tn. Old Castile, prov. of, and 17 m . E.N.E. Palencia. It is irregularly built, bat consists of houses generally of two storics; has a parish church, townhouse, and primary school; and a trade in agricultural produce. P. 661.

IIERRIARD, par. Eng. IIants; 3050 ac. Pop. 427.
HERRIEDEN, a tn. Bavaria, circle Middle Franconia, 1. bank Altmülıl, 29 m. W.S.W. Niirnberg. It is walled, has a law court, a R. Catholic church, the handsome buildings of an old collegiate endowment, a wax refinery, gypsum-kilns, and a trade in corn and cattle. Pop. 1389.

HERRINES, two places, Belgium :-1, A vil. and com. prov. Brabant, $18 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Brussels. It has several corn-mills; but the chief employment is agriculture. Pop. 4248.-2, A vil. and com., prov. Hainaut, r. bank Scheldt, 32 m . W.N.W. Mons. It has a brewery and two flour-mills; and a trade in agricultural produce, wool, and cattle. Pop. 2098.

HERRINGFLEET, par. Eng. Suffolk; 1720 ac. P. 197.
HERRINGSWELL, par. Eng. Suffolk; 2540 ac. P. 495.
IIERRLEBERG, a vil. and par. Switzerland, can. Aargau, on a height above E. shore Lake Zuirich, 7 m . S.S.E. Zuirich, with a number of good houses and villas, a handsome church, and two schools. Near it excellent wine is grown. Pop. 1073.

HERRLISIIEIM, two places, France, dep. IIaut-Rhin: -1, A tn., 4 m . S. Colmar, on the Lauch. Pop. 2289.-2, A vil. and com., 12 m . N.N.E. Strasburg, r. bank Zorn. Pop. 1269.

HERRNIIU'T, a tn . Saxony, circle of, and 18 m . S.E. Bautzen. It was fourded by a colony of Moravians, driven from their homes, in 1721-25, by the persecution of the Jesuits. They found an asylum with a Saxon nobleman, Count Zinzendorf, and, assuming the name of IIerrnhuters ['The Lord's Watchmen'], built the town of Herrnhut; which is now the seat of a bishop, and the central locality of the sect, which has spreal itself far and wide, and particularly distinguished itself by missionary exertions. The town is built with great regularity, and distinguished by the order, stillness, and cleanliness which prevall in it. It contains two meeting-houses, a large missionary establishment, a Bible society, and several schools; and has manufactures of linen, calico, ribbons, sail-cloth, and a great number of minor articles in tin, leather, gold, and silver. Pop. 1200.

HERRNSHEIM, a market tn. IIesse-Darmstadt, Rheinhessen, near the Rhine, 25 m. S. Mainz, with a R. Catholic church, parsonage, townhouse, school, and castle. P. 1335.

HERRNS'TAD'T, or WAzciorz, a tn. Prussia, prov. Silesia, gov. of, and 34 m . N.N.W. Breslan, at the conflnence of the Herla, here crossed by a bridge, with the Bartsch, here crossed by three bridges. It has a court of law, several public offices, a Protestant, and a R. Catholic parish church; several schools, and an hospital; manufactures of linen; a beet-root sugar, and numerous tobacco factories and mills; a trade in flax and cattle, and four annual fairs. Pop. 2331.

HERSBRUCK, a tn. Bavaria, circle Middle Franconia, r. bank Pegnitz, here crossed by four bridges, 17 m . E.N.E. Niirnberg. It is walled, has a court of justice, two churches, an hospital, and infirmary ; manufactures of leather, tile-works, a trade in hops, and several mills. Pop. 2310.

HERSEAUX, a vil. and com. Belgium, prov. W. Flanders, on the Tournay and Courtray Railway, 30 m . S. Bruges. It has manufactures of woollen and cotton stuffs, tobacco, potash, and oil; and a trade in grain and flax. Pop. 2179.

HERSFELD, a tn . Hesse-Cassel, prov. of, and 10 m . N.N.E. Fulda, cap. circle of same name, at the confluence of the IIaune with the Fulda, here crossed by two bridges. It is walled, very irregularly built, has two churches, a town-
house, gymnasium, grammar and industrial schools, orphan and ordinary hospitals, extensive manufactures of woollen cloth, employing about 2000 hands ; manufactures of mixed cotton goods, soap, red and white leather, and numerous dyeworks and worsted mills. Pop. 5715 . Area of circle, 161 geo. sq. m. Pop. 36,395.

HERSSELT, a vil. and com. Belgium, prov. of, and 24 m. E.S.E. Antwerp, on the Great Nèthe, at the confluence of the Hersseltbeek. It has several brick-works, a distillery of gin, and three mills. Pop. 4148.

HERS'TAL, or IIeristil, a tn. and com. Belgium, prov. of, and 3 m. N.E. Liége, l. bank Meuse, with a church, founded by Charlemagne, but rebuilt in 1677 ; a courthouse, of ancient date, restored in 1833 ; and manufactures of all kinds of iron and steel ware, including fire-arms, for the dealers of Liége; a gin distillery, a work for the extraction of pyroligneous acid, a saw-mill, salt-refinery, and two breweries. Coal is worked to some extent in the vicinity. Her stal was the residence of Pepin-le-Gros, at the beginning of the 8th century, and of several of the French kings of the sccond race. Pop. 6653.

HERSTELLE, a vil. Rhenish Prussia, gov. of, and 39 m . S.S.E. Minden, 1. bank Weser, over which there is here a ferry. It has a cliurch, and manufactures of soap and tobacco. Pop. 911.

HER'TEN, a vil. Rhenish Prussia, gov. Münster, circle Recklinghausen, with a church, two mills, and a trade in cattle. Pop. 972.

HERTFORD [contracted, Herts], an inland co. England, bounded, N. by Cambridgeshire, E. Essex, S. Middlesex, W. Buckingham and Bedford, about 38 m . in lengtb, S. W. to N.E., and about 20 m . in breadth ; area, 403,200 ac., of which about 350,000 are arable, meadow, and pasture. The general aspect of the county is pleasing, being diversified by hill and valley. The highest elevations, which do not much exceed 900 ft ., occur in the chalk-hill ranges, in the N. part of the county. The abundance of growing wond adds much to the beanty of the scenery; while the great number of gentlemen's seats, distributed over the country, imparts to the whole an air of comfort and wealth that is very striking. The principal river: are the Lea and Colne, both of which have numerous tribu taries. The climate is mild and healthy; soil various, but principally loam and clay, and generally fertile; although there are several gravelly tracts in the centre of the county that are poor and unproductive. The largest portion of the county is under tillage. Wheat, barley, and oats, form the principal crops. Turnips and artificial grasses are also cultivated to a great extent. The wheat and barley are of a superior description. In the S.W. parts of the county, there are many cherry and apple orchards; the produce of which is sent to the London market. Large quantities of hay, of excellent quality, are grown on the meadow lands. There are no breeds of cattle peculiar to the county; nor is the rearing of live stock an object of much regard, the land being chiefly arable. The sheep, mostly prepared for the butcher, are principally of the South Down and Wiltshire kinds. There are few large estates in the county, and the farms are, in general, rather small. Leases are usually from 7 to 14 years. Silk, cotton, and black lace, were at one time manufactured to a considerable extent, but have now much declined. A considerable quantity of malt is made in various districts; and straw-platting affords employment to a great many females. Ribbons are made at Tring, Watford, St. Alban's, \&c.; and paper is manufactured, on a large scalc, and in the most approved manner, near Rickmansworth and Watford. The Great Northern Railway traverses the centre of the county; the London North-Western Railway, and Grand Junction Canal, pass through its W. borders; and the Eastern Counties Railway along its E. limits. Hertfordshire contains 8 hundreds and 135 parishcs. It returns 5 members to the House of Commons; 3 for the courty, and 2 for the bor. of Hertford. Registered electors (1851), 5114. Pop. (1851), 167,298.

HER'TFORD, a parl. bor. and market tn. England, cap. of above co., on the Lea, $19 \mathrm{~m} . \mathrm{N}$. London, on a branch of the Eastern Counties Railway. It consists of three principal streets, meeting in the centre; well paved, lighted with gas, and amply supplied with water from the Lea. It has two parish churches, several Dissenting places of worship, a free
crammar-school, for the education of freemen's sons; a blue coat school, a brancl of Christ's Hospital; a girl's charity school, an infant school, a green-coat charity school, and several others that afford gratuitous instruction; six almshouses, and a number of minor charities. The principal public buildings, besides the churehes already mentioned, are- the shirehall, in the market-place, comprising the courts of law and a handsome assembly-room; the borough jail, county house of correction, and infirmary. On the site of an ancient castle, is a large handsome brick edifice, used as a preparatory school to the E. India Company's college at Haileybury, about 2 m . from the town. There are three literary and reading institutions. With exception of some pretty large breweries, and an extensive distillery, there are no manufactures in the town. A very active general business, however, is carried on. There is a good trade in coal and timber; a great deal is done in malting; and there are many corn-mills on the Lea, in the neighbourhood. In 673 a national ecclesiastical council was held in Hertford; and about a.d. 905, Edward built the castle, and rebuilt the town. This castle was occupied by John of Gaunt, and by the queens of IIenry IV., V., and VI.; and Queen Elizabeth also resided in it occasionally. Jean II., king of France, and David, king of Scotland, were both in captivity here during the reign of Edward III. Pop. 5450.

HERTIN, or RTina, a vil. Bohemia, circle Königgrätz, on the Rtinka; with a handsome church, a school, and a mill. Pop. 1558.

IIER'TINGFORDBURY, par. Eng. Hertford; 2510 ac. Pop. 737.

HERTOGENBOSCH ( $S^{\prime}$ ), S'Bosch, or Den Boscir [Latin, Boscoducum or Silvaducis ; French, Bois-le-Duc ; German, Herzogen-busch], a city, Holland, cap. prov. N. Brabant, 49 m. S.E. Amsterdam; lat. (great church) $51^{\circ} 41^{\prime} 18^{\prime \prime}$ N.; lon. $5^{\circ} 18^{\prime} 45^{\prime \prime}$ E. (L.) It lies at the confluence of the Aa and the Dommel, which here form the Diest or Dieze, in a low marshy situation. The surrounding country, and the lower parts of the city, are flooded in winter; and, even late in spring, a stream of water often runs through the principal streets. Still it is a lively, pleasant place, and esteemed healthy; for which last quality it is indebted to the constant supply of fresh water flowing through it. Hertogenbosch is fortified, has four gates, five large squares-in one of which, named the Grootemarkt [great market], stands the elegant townhall, and the watch-house. Other public buildings are-the governmenthonse, the courthonse, prison, barracks, granary, \&c. Of the churches, seven in number, the Groote, or St. Janskerk [great, or St. John's church], is the finest in the city, and one of the finest in Holland. It was built 1280-1312; is well preserved, though it suffered much in the sieges of 1601 , 1603 , and 1629 ; and was renewed in 1843 . There are several benevolent, literary, and scientific institutions; and a Latin, and twenty other schools, some of them free. The harbour is merely a reach of the Dieze, lined with quays and warehouses, and is frequented by numerons vessels; shipping and trade forming the main branches of occupation. There are also manufactures of cutlery, pins, ribbons, yarn, hats, brushes, \&c. ; with breweries, tanneries, soap-works, and oil, walk, and corn mills. Hertogenbosch was founded in 1184 , by Godfried III., on the site of a hunting-seat of the Dukes of Brabant. It withstood Prince Maurice, who besieged it in 1601 and 1603 ; but was taken by Prince Frederic-Henri, after a memorable siege, in 1629; by the French in 1794, and by the Prussians in 1814. Pop. (1850), 21,782.

HER'TS, a co. England. See Hertford.
HERTWIGsDORF (Ober, Mittel, and Nieder), three contiguous vils. Prussia, prov. Silesia, gov. of, and 50 m . N.W. Liegnitz. They contain a castle and a R. Catholic church, and several mills. Pop. 1320.

HERTWIGSWALDAU, several places, Prussia, parti-cularly:-1, A vil., prov. Silesia, gov. Breslan, with a R. Catholic parish church and a mill. Pop. 1263.-2, Two nearly contiguous vils., prov. Silesia, gov. Liegnitz, circle Javer, with a Protestant and a R. Catholic church, and several mills. Pop. 1020.

HERVAS, a tn. Spain, Eetremadura, prov. of, and 75 m . N.N.E. Caceres, indifferently built, with crooked, dark streets, two squares, a handsome church, surmounted by a spire; three chapels, three schools, a large townhouse, prison, hospital, storehouse, infirmary, and a delightful alaméda. It has
manufactures of linen, coarse cloth, and baize; and a trade in fruits, wine, and pork sausages-immense quantities of which are made here. Pop. 3560.

HERVE, a tn. Belgium, prov. of, and 10 m . E. Liége. It is well built, has two handsome churches, a college, several primary schools, and two almshouses; manufactures of shoes, woollen cloth, and soap; a salt-refinery, a brewery, brickworks, tanneries, and a trade in excellent butter and cheese; which is sent to all parts of the kingdom. Pop. 3395.

HERVELD, a vil. Holland, prov. Gelderland, 6 m . W. Nijmegen, with two churches and a school. Near it tobacco is cultivated. Pop. 890.

HERWEN, or Herwers, a vil. Holland, prov. Gelderland, 12 m. S.E. Arnhem; with two churches, and a school. Pop. (agricultural), 651.

HERWIJNEN, a vil. Holland, prov. Gelderland, 18 m .
W. Tiel, with a clıurch and school. Pop. (agricultural), 1784.

HERXHEIM, a vil. Bavaria, Palatinate, dist. and 6 m . S.E. Landau, with a church and two mills. In 1793, a battle was fonght here between the French and Mustrians. Pop. 3557 ; among whom are 140 Jews.

HERZBERG, a tn. Hanover, prov. of, and 38 m. S.S.E. IIildesheim, l. bank Sieber, with a church and an old castle, now converted into a courthouse; manufactures of woollen and linen cloth, fire arms, paper, saw, and other mills. Pop. 3706.

HERZBERG, a tn. Prussia, prov. Saxony, gov. of, and 59 m. E.N.E. Merseburg, on the Black Elster, with a court of justice, two churches, a courthouse, manufactures of earthen ware, and a trade in corn and cattle. Pop. 3277.

HERZEELE, a vil. and com. Belgium, prov. E. Flarders, on the Molenbeck, 13 m . S.S.E. Ghent, with manufactures of shoes, casks, wicker-work, and articles of turnery; a tannery, two dye-works, and four mills. Pop. 1928.

HERZEGOVINA, or Hertsek, an inland prov. Tur-key-in-Europe, between lat. $42^{\circ} 25^{\prime}$ and $44^{\circ} 5^{\prime} \mathrm{N}$.; lon. $16^{\circ} 25^{\prime}$ and $19^{\circ} 17^{\prime}$ E.; bounded, N.E. by Bosnia and Croatia, S.W. by Dalmatia, and S.E. by Dalmatia and Montenegro; length, N.W. to S.E., 140 m. ; greatest breadth, 50 m .; area, 7000 sq. m. It is generally mountainous; being covered by a branch of the Dinaric Alps, and slopes to the Adriatic, to which, through the Narenta and its tributaries, it sends its waters. Tobacco of excellent quality is produced; hydromel or mead is extensively manufactured, and is the favourite bevcrage of the inhabitants. The exports, which are unimportant, consist of hides, wool, fruit, wax, cattle, and tallow. The province is divided into 13 prefectures or departments, and is governed by a vizier. The principal towns are-Mostar, the capital; Stolatz, Trebigne, Gliubuski, Niksich, Pogitel, and several others. Herzegovina fell into the hands of the Turks in 14 s 3 . Pop. 200,000.

HERZIIORN, a vil. Denmark, Iolstein, cap. lordship of same name, on the Rhin, 3 m . E.N.E. Gliickstadt, on the railway thence to Elmshorn. It contains a parish church. -The Lordsme, forming two bailiwicks, has an area of 8 geo. sq. m. Pop. 1800.

HERZOGENAURACI, a th. Bavaria, circle Upper Franconia, 1. bank Aurach, 11 m. N.W. Niirnberg, with a court of justice, church, chapel, castle, and hospital; manufactures of cloth, tile-works, two mills, and four annual fairs. IIops and tobacco are extensively cultivated in the vicinity. Pop. 1827.

HEliZOGENBURG, or Herzeburg [Latin, Ducum Burgum], a market tn. Lower Austria, in a wide but marshy valley, l. bank Trasen, here crossed by a bridge, 31 m . W. Vienna. It is walled; has an Augustine monastery, a large structure in an unfinished state, with a handsome church, adorned with numerous frescoes; a library of 15,000 volumes, a picture-gallery, and museum. Pop. 1280.

HERZOGENBUSCHSEE, a vil. and par. Switzerland, can. Bern, in a beautiful and well-cultivated district, 13 m . E.S.E. Solenre. From the number of Roman coins and other antiquities found in it, it is supposed to stand on ground which once formed a Roman camp. It is well built; has a church, on a gentle eminence; two schools, several charitablo endowments, and a large corn magazine belonging to the canton; and a considerable transit trade. The churchyard was once surrounded by strong and lofty walls, and formed a kind of fortress. Pop. 6008.
llerZogswaldau (Ober, Mittel, and Nieideit), three nearly contiguous vils. Prussia, prov. Silesia, gov. of, and 17 m . N.W. Liegnitz. They contain a parish chureh, two castles, tile-works, and several mills. l'op. 1758.

HESARAB, or Asarys, a tı. Central Asia, khanat of, and 50 m. E.S.E. Khiwa, on a canal of same name, near 1. bank Amoo-Daria. It stands on a height, is surrounded by a good earthen wall, and eonsists of about 600 houses, inhabited chiefly by Usbeks and Sarts, who live by trade, and sent caravans to Bokhara, Persia, and Russia.

HESDIN, a fortified th. France, dep. Pas-de-Calais, 14 m. S.E. Montreuil, in a picturesque and fertile valley, near the Canche. It ranks as a fortress of the third class, is well built of brick, has a chureh, a handsome townhouse, manufactures of hosiery in thread and cotton, earthenware, refined salt, and leather; breweries, brick, and tile-works, and three annual fairs, one of which lasts 15 days. P. 3241 .

HESKE'T-in-the-Fonest, par. Eugland, C'umberland; 16,580 ac. Pop. 2018.

HESKE'T-Newmarket, a small compact market tn. England, co. Cumberland, pleasantly situated on the Caldew, 11 m. S.S.W. Carlisle, with a Methodist chapel, a Friends' meeting-house, an inconsiderable weekly market, and several well-attended cattle fairs.

HESKE'TI, with Becconsall, par. England, Lancaster; 1580 ae. Pop. 553.

HESLERTON, par. Eng. York (E. Riding) ; 6170 ac. Pop. 563.-Heslington (St. Paul), par. Eng. York (E. Riding); 2570 ae. Pop. 266.

HESSE [Lierman, IHessen], three independent sovereignties, W. Germany, situated contiguously and in some measure intermingled with eaeln other, bet ween lat. $49^{\circ} 24^{\prime}$ and $51^{\circ} 38^{\prime} \mathrm{N}$.; and lon. $7^{\circ} 53^{\prime}$ and $10^{\circ} 11^{\prime}$ E.:-
I. Hesse-Cassel (Electorate of), or Electonal Hesse [Geruan, Kurhessen, or Hessen-Kassel], a prineipality, consisting of five distinct portions, of which four, forming the county of Nehaumburg, the lordship of Schmalkalden with Barchfeld, the old distriet of Katzenberg, and the bailiwick of Dorheim, are completely isolated. The far larger portion, forming the prineipality proper, though of a very irregular and straggling shape, lies contiguous, and is bounded, N. by Rhenish Prussia and Iranover; E., Prussian Saxony, Saxe-Weimar, and Bavaria; S., Bavaria, Hesse-Darmstalt, and Frankfort ; and W., Nassau, Hesse-Darmstadt, anl Waldeck; area, ineluding the detached portions, 2672 geo. sq. m. The greater part of this principality belongs to the eentral German plateau, and has a very rugged surface, partly eovered by branches of the Harz. These, however, nowhere attain a great elevation, the culminating point not exceeding 3600 ft . The far greater part of the drainage is carried into the Werra, either directly or by its tributaries, Fulda, Ulster, Wohra, Gelster, \&e.; but a small portion, chiefly in the S., is carried to the Rhine by the Lahn, Ohm, and Main. The elimate is severe, particularly in the higher districts, where corn ceases to ripen. The best elimate is on the Main, where some wine of indifferent quality is grown. From the rugged nature of the soil, the extent of arable land is limited, and cultivation is ehiefly confined to the narrow valleys and lower hill slopes; amounting, however, to about two-fifths of the whole surface. The system of agrieulture is very imperfect, and the soil poor, with exception of a rich tract in the province of Hanau; but still the amount of grain raised is fully equal to the home consumption. The principal crops are rye, barley, and oats. Potatoes also are extensively grown, and form the chief dependence of the lower classes. Fruit is tolerably abundant, and a great part of the loftier districts is covered with extensive forests, which employ a eonsiderable number of the inhabitants, and furnish one of the most valuable sources of revenue. The minerals include gold, silver, in connection with eopper, lead, iron, cobalt, salt, alum, poreelain earth, common coal, and lignite. Of the metals the only one from which profitable returns are obtained is iron; and the coal, though said to be abtumlant, is very partially worked. The manufactures consist eliefly of woollens, cottons, and linen. The last was long famous, and in many distriets formed the prineipal occupation; but English competition has almost driven it from the foreign market. The central position which the prineipality oecupies between N. and S . Germany, secures to it a considerable transit trade;

The navigable rivers afford extensive facilities to this trate, and to these have recently been added the benefits of railway communication; lines which centre at Cassel, and lead N. to Hanover, W. to Colorne, S. to Frankfort, and E. to Leipzig, being either completed or in course of construction. The principal towns are Cassel, the eapital; Manau, and Fulda. HesseCassel ranks as the eighth State of the Germanic confederation, and has three votes in the plenum. Its constitution is a monarchy, subject to certain modifications; but the extent of these is either not properly understood or not fairly exereisel, and hence quarrels between the Elector and his subjeets have recently endangered the peace of Europe. Administratively, the principality is divided into the four provinees of Niederhessen, Oberhessen, Fulda, and Hanan, subdivided into bailiwicks. A bout four-fifths of the inhabitants are Protestants. Pop. 746,708.

1I. Hesse-Darmstadt (Grand ducity of) [German, Hessen or Messen-Darnistadt], an independent state, consisting of five distinct portions. Three of these, forming the districts of Vöhl, Wimpfen, and K ürnbach, all of limited extent, are wholly isolated and enelosed by other states. The other two portions, forming about nine-tenths of the whole, are separated from each other by a belt of land stretching E. to W., and including part of Hesse-Cassel, and the whole territory of Frankfort. The more S . of these portions forms the two provinces of Rheirhessen, and Starkenburg, and is bounded N. by Hesse-Cassel, Frankfort, and Nassau; W. and S.W. Rhenish Prussia, and Jhenish Bavaria; S. Baden; and E. Lower Bavaria. The N. portion forming the single province of Oberlsessen, is bounded, W. by Rhenish Prussia and Nassau, and enclosenl on its other three sides by Hesse-Cassel ; area of whole grand duchy, 2443 geo. sq.m. Oberhessen is generally mountainous, being covered in the W. by the Taunus, which in Hausberg rises to 1755 ft ; in the N . by the Rodhaargebirg, which in Hatzfeld attains 2730 ft .; and in the E. by the Vogelsberg, whose culminating point here is 3104 ft . The provinces Starkenburg and Rheinhessen are also mountainous towards their frontiers; more especially in the S.E. occupied by a portion of the Odenwald, and in the S.W. by the Donnersberg, a N. ramification of the Vosges; but these mountains, rapidly subsiding in the interior, form extensive plains belonging to the valleys of the Main and the Rhine. To the latter river the whole surface of the Grand duchy belongs, with exception of a small portion in the N., drained by the Edder and Fulda, affluents of the Weser. The elimate is greatly diversified, being cold and bleak in the mountainous distriets, and mild and pleasant in the valleys of the Rhine and the Main. Here, however, the only unhealthy districts are found among the extensive marshes which the Thine has formed. The soil, particularly in provinces Starkenburg and Rheinhessen is remarkably fertile, and eorn of all kinds is raised in quantities sufficient to leave a large surplus for export. Hemp, flax, potatoes, and rapeseed, are also extensively grown; and in particular distriets tobaceo and hops. The vine forms a most important oliject of culture, and fruit is very abundant. The right bank of the Rhine is densely, but the left bank poorly wooded, and though the extent of ground oceupied by forest is nearly equal to that oceupied by arable land, very little timber is exported. Horses, cattle, sheep, and swine, are very numerous; but superiority of breed is not sufficiently attended to. The minerals inelude iron, eoal, lignite, and salt; and there are good quarries of sandstone, limestone, whetstones, basalt, and roofing slate. Agriculture and the rearing of cattle forming the principal eniployments, leave little room for extensive manufactures. In some districts, however, they have made considerable progress. The most important is linen. The transit trade is very considerable, and has lately received the benefit of a railway, which, entering the grand duchy on the frontier of Bailen, traverses it centrally from S. to N., passing through Frankfort. The principal towns are Darmstadt, the capital ; Mainz, Giessen, Bingen, and Worms. Hesse-Darmstadt ranks as the ninth state of the Germanie confederation, and has one full vote in the minor diet, and 3 votes in the plenum. Its constitution is a hereditary monarchy, which was almost unlimited till 1820 , when it was modified by the introduction of two ehambers- an upier, composed ehietly of nobility and eitizens, appointed tor life by the grand duke; and a lower, composed chiefly of deputies from the principal towns. About two-thirds of the inhabitants are Protestants. Pop. 834,711.
III. Hesse-Homburg [German, Ifessen-Homburg], a landgraviate, W. Germany, forming a member of the Germanic Confederation, and consisting of two separate territories placed at a considerable distance from each other-Homburg proper, about 10 m . N.N.W. Frankfurt, and bounded N., W., and S. by Nassau, and N.E. and E. by Hesse-Darmstadt; and Meissenheim, about 30 m . S. W. Mainz, bounded, N. by Rhenish Prussia, from which it is separated by the Nahe; N,W. by Birkenfeld, an isolated territory of Oldenburg; S.W. and S., Rhenish Prussia; and S.E. and E., Rhenish Bavaria; area, 80 geo.sq.m. of which, $24 \cdot 32$ geo. sq. m. belong to Homburg; and $55 \cdot 68$ geo. sq. m. to Meissenheim. Both territories are mountainous -Homburg, lying on the E. slope of the Taunus; and Meissenheim, being partly covered by hills of considerable height; but both are well cultivated; Meissenheim, in particular, has a mild climate in the S.E., where the vine is extensively cultivated. The agricultural produce exceeds the home consumption; the forests abound with excellent timber, and the minerals include both iron and coal. Hesse-Homburg, as a member of the Germanic Confederation, shares the 16 th vote in the minor diet with Liechtenstein, Waldeck, Reuss (both branches), Lippe-Schaumburg, and Lippe, and furnishes a contingent of 200 men. Its constitution is monarchical, with few constitutional checks. A considerable portion of its revenue is derived from the gaming-table. Pop. 24,203.

HESSE (UPPER) [German, Oberhessen], a prov. grand duchy of Hesse-Darmstadt (which see).

HESSE (Upper and Lower) [German, Oberhessen and Unterhessen], two provs. electorate of IIesse-Cassel (which see).

HESSE (Rhenish) [German, Rhein-Hessen], a prov. Hesse-Darmstadt (which sce).

HESSELÖE, an izl. Denmark, in the Kattegat, about 16 m . N. Seeland, of a triangular shape, and rather more than 1 m . long, and lying in the line of vessels navigating the Kattegat, in the direction both of the Sound and the Great Belt. On it is a light 85 ft . above sea-level.

HESSEN, a market tn. Brunswick, on the Fallstein, 20 m . S.S.E. Brunswick; with a eastle, two ehurches, two schools, and a poorhouse. Pop. 1303.

HESNETT, par. Eng. Suffolk; 1620 ac. Pop. 417.
HESSIGHEIM, a vil. Würtemberg, circle Neckar, bail. Besigheim, on the Neckar; with a parish church, and vine and cherry culture. Pop. 954.

HESSLE, a vil. and par. England, co. of the tn. of Hull, locally in York (E. Riding). The village, on a gentle acelivity, l. bank Humber, $4 \frac{1}{2} \mathrm{~m}$. W. by S. Hull, a station on tlee York and North Midland Kailway, has two principal wellkept streets, a fine Gothic church, two Dissenting places of worship, endowed school for 20 boys, a servants' school for 30 girls, and other charities; and a large manufactory of Paris white, but the inhabitants are principally agriculturists. Area of par., 2410 ac Pop. 1388.

HESTON, par. Eng. Middlesex ; 3720 ac. Pop. 4071.
HESWALL, par. Eng. Chester; 2070 ac. Pop. 546.
HETENY-Huszu, or Hosszuhetin, a vil. Hungary, Thither Danube, co. Baranya, 7 m . from Fiinfkirchen, in a mountainous district; with a parish church, a courthouse, and school ; glass-works, and several mills. Near it are stone and marble quarries, and much wine is grown. Pop. 2091.

HETEREN, a vil. Holland, prov. Gelderland, 6 m . W.S.W. Arnhem; with two churches, a school, and the ruins of a castle. Pop. 674.

HEJHAURA, a tn. Hindoostan, Nepaul, on a plain; lat. $27^{\circ} 26^{\prime}$ N.; lon. $84^{\circ} 54^{\prime}$ E.; with a brick building surrounding a square court, for the accommodation of merchants, and a few shops, but miserably poor.

IIETHEL, par. Eng. Norfolk; 1420 ac. Pop. 211.
HETHERSET'T, par. Eng. Norfolk; 3190 ac. P. 1138.
HE'FTON-LE-HOLE, a vil. and chapelry, England, co. and 6 m . N.E. Durham, in the vale of Houghton. It has a handsome Episcopal chapel, and places of worship for Dissenters; a national school, a commodious hotel, and a subscription news-room. Irhabitants chiefly engaged in the neighbouring coal-mines. Area of chapelry, 1590 ac. Pop. 4158.

HETTSTAD'I, a tr. Prussia, prov. Saxony, gov. of, and 31 m. N.W. Merseburg, on the Wipper; with a parish church, a copper furnace, vitriol-works, tile-works, distillevies, breweries, vinegar-works, and a trade in flax. Pop. 3990.

HEUBACH, a tn. Würtemberg, circle Jaxt, 34 m. E. Stuttgart ; with manufactures of linen, a cotton-mill, and a trade in cattle and agricultural produce. Pop. 1189.

HEUBACH, two places, Bavaria:-1, (Gross), a vil., circle Lower Franconia, 4 m. S.E. Klingenberg, l. bank Main; with a church, a chapel, two mills, and a trade in wine and fruit. Near it, on a height, is the Franciscan hospitium of Engelsberg. Pop. 1850.-2, (Klein), a market tn., circle Lower Franconia, cap. dist. of same name, on the Main, at the confluence of the Grundwiessnbach, here crossed by a stone bridge. It has a castle, with a chapel, and fine gardens; a Protestant, and a R. Catholic church, and a synagogue, and sandstone quarries. Pop.tn., 1571 ; dist., 4195.

HEUCHELHEIM, a vil. Hesse-Darmstadt, Oberhessen, circle Giessen ; with a Protestant church, a townhouse, and two mills. Pop. 1142.

HEUKELUM, a tn. Holland, prov. S. Holland, on the Linge, 18 m . W.N.W. Dordrecht; with a castle, townhall, church, and school. Agriculture and horse-breeding are carried on. Pop. 535.

HEULE, a vil. and com. Belgium, prov. W. Flanders, on the Heule, 24 m. S. Bruges; with mannfactures of linen and cotton cloth, several breweries, four mills, and a trade in corn, flax, and cattle. Pop. 3862.

HEUMEN, a vil. Holland, prov. Gelderland, 6 m . S. Nijmegen, near the Maas; with two churches, one of them old and neat ; a school, and the ruins of an old castle. P. 601.

HEURE-LE-Romain, a vil. and com. Belgium, prov. of, and 7 m. N. Liége, on the Great Aaz. The chief employment is agriculture, but a great number of the females are employed in making straw hats. Pop. 1100.

HEUSDEN [Latin, Heusda], a walled tn. IIolland, prov. N. Brabant, 8 m . W.N.W. Hertogenbosch; with a townhouse, watchhouse, barrack, arsenal, three churches, a synagogue, several hospitals, and schools. It has a good harbour, two breweries, and some distilleries, but depends chiefly on the garrison. Pop. 2066.

HEUSDEN, two places, Belginm :-1, A vil. and com., prov. E. Flanders, 4 m . E.S.E. Ghent, r. bank Scheldt. It has considerable manufactures of linen, a brewery, and three mills. Pop. 2135.-2, A vil. and com., prov. Limburg, on the Mangelbeek, 9 m . N.W. Hasselt; with a fine castle, an oil, and two flour mills. Pop. (agricultural), 1336.

HEUS'liEEU, a vil. Bavaria, circle Lower Franconia, 1. bank Saale, 45 m . N.N.E. Wiirzburg; with a church, a chapel, a salt spring, two oil, and three flour mills. Pop. 960.

HEVE (La), [anc. Caletorum Promontorium], a cape, France, forming the N. extremity of the estuary of the Seine, dep. Seine-Inferieure, about 3 m . N. W. Havre; lat. $49^{\circ} 30^{\prime} 42^{\prime \prime}$ N.; lon. $0^{\circ} 4^{\prime} 15^{\prime \prime} \mathrm{E}$. (R.) It is composed of limestone rocks abounding with fossils, and on its summit are two fixed lights, respectively 207 and 396 ft . above sea-level, and visible at a distance of 15 m .

HEVER, a vil. and com. Belgium, prov. Brabant, on the railway from Malines to Louvain, and on the Dyle, 13 m . N.E. Brussels. It has a trade in agricultural produce. P. 1520.

HEVER, par. Eng. Kent; 2680 ac. Pop. 582.
HEVERLE, a vil. and com. Belgium, prov. Brabant, r. bank Dyle, 12 m . E. Brussels; with several distilleries, and a corn-mill. Pop. (agricultural), 1814.

HEVERSHAM, par. Eng. Westmorland; 19,350 ac. Pop. 4405.

HEVES, a market to. Hungary, Thither Theiss, co. of same name, 55 m . E.N.E. Pesth. It was once fortified, has a parish ehureh, a castle, with fine gardens and riding-school, and a trate in corn, cattle, tobacco, and wine. Pop. $5699 .-$ The county, in the N., is mountainous and well wooded, but elsewhere sinks down into an extensive plain, much of which is covered with morasses. It belongs entirely to the basin of the Theiss, which traverses it in a S.S.W. direction. The soil is fertile, producing large crops of wheat, the finest tobacco in the kingdom, a little wine, fruits of all kinds, and particularly melons of excellent quality. On the pastures, which are both rich and extensive, great numbers of cattle are fed. Fish, especially sturgeon, are taken in great numbers in the Theiss. The principal minerals are alum, marble, and slate. The inhabitants are chiefly Hungarians, with a small mixture of Germans and Slaves. For administrative purposes, the county is divided into four districts-Gyöngyös,

Tarna, Theiss, and Mutra. Erlau, ineonveniently situated on the N.E. extremity of the county, is the capital. Area, 1922 geo. sq. m. Pop. 295,570.

HEVINGHAM, par. Eng. Norfolk; 3180 ac. Pop. 893.
HEWELSFIELD, par. Eng. Gloucester; 1580 ac. P. 319.
HEWISII, or HUsisi, par. Eng. Wilts; 610 ae. P. 133.
HEWORTII (Netuek), a ehapelry, England, co. Durhain, par. Jarrow, $2 \frac{1}{4} \mathrm{~m}$. E.S.E. Gateshead, a station on the Brandling Junetion Railway; with an Episeopal and various Dissenting chapels; extensive chemical works, and manufactures of bottles, earthcnware, and brown paper, and shipbuilding. Pop. 7126.

HEXIIAM, a market tn. and par. England, co. Northumberland. The town is situated on r . bank Tyne, about 1 m . below the junction of the N. and S. branches of that river, which, about $\frac{1}{4} \mathrm{~m}$. from Hexham, is crossed by a handsome stone bridge, 20 m . W. Neweastle, on the railway thence to Carlisle. It has some tolerably wide streets, the greater number, however, are very narrow; only partially paved, but well-lighted with gas. The market-place is a spacions, wellpaved square, and contains the market-house, an ancient stone building, with a dial in front, formerly used as the courthouse of the bishops and priors of Itexham. The abbey or priory chureh of Ilexham is a cruciform structure, of mixed Norman and Gothic arelitecture, with the remains of the monastic buildings at its W . end; and there are also several Dissenting places of worship, a free grammar-school, and several day schools; a mechanics' institute, a dispensary, and a number of small charities. Woollen-yarn spinning, hatmaking, tanning, leather-dressing, and glove-making, are carried on here to a considerable extent. Market day, Tuesday ; and frequent and extensive cattle-markets. Hexham is supposed to have been Axelodunum. In the 7th century, a monastery was founded here by St. Wilfrid, and a bishop's see soon afterwards established. The diocese was subsequently united to Lindisfarne. The town and part of the church were burnt by the Scotch in the time of Edward I. On March 9, 1761, a formidable riot arose from an attempt to ballot for a succession of men for the militia, after the term of three years preseribed by law had been served, when 45 persons were killed, and 300 severely wounded by the fire of the military. P. tn. 4720 . A rea of par., $28,370 \mathrm{ae}$. P. 5989 .

HENTON, par. Eng. Hertford; 1460 ae. Pop. 295.
HEYBRIDGE, lar. Eng. Essex; 2110 ac. Pop. 1177.
HEYDON, par. Eug. Norfolk; 2200 ac. Pop. 321.
HEYFORD, four pars. Eng.:-1, (Lower), Oxford; 1650 ac. Pop. 562.-2, (Nether), Northampton; 1690 ace Pop. 599.-3, ( $U_{1} p^{\prime}(r)$, Oxford; 1300 ae. Pop. 337.-4, (Upper), Northampton; 920 ae. Pop. 111.

MEYOP, par. Wales, Radnor; 1180 ac. Pop. 202.
IIEYSILAM, par. Eng. Lancaster; 1620 ac. Pop. 698.
HEYSHOTT, par. Eng. Sussex ; 2210 ac . Pop. 408.
HEYS'T, two places, Belgium:-1, (-op-den-Berg), a vil. and com., prov. of, and 18 m . S.E. Antwerp, on the great Nettfe, which is here navigable. It has two churehes, two primary sehools, extensive manufactures of linen, and a trade chiefly in corn and hops. Pop.5021.-2, A vil. and com., W. Flanders, 9 m . N. Bruges, near the sea. The chief employments are agriculture, rearing cattle, and fishing. Pop. 855.

IIEY'TESIBURY, a small tu. and par. England, co. Wilts. The town, 15 m . N.N.W. Salisbury, in a pleasant valley, 1. hank Wily, and border of Salisbury plain, consists principally of one long and irregular street; has an almshouse or hospital of very ancient date, and a cruciform church. The manufacture of broad cloth was formerly carricd on to a considerable extent, but has very much deelined of late. Area of par., 3380 ac. Pop. 1311.

IIEYTHROP, par. Eng. Oxford; 1710 ae. Pop. 198.
HEYWOOD, a vil. and chapelry, England, co. Laneaster. The vhlage, 3 m . E.S.E. Bury, a station on the Manchester and Leeds Railway, is lighted with gas, and supplied with water; has a commodious chapel, places of worship for Dissenters, good national schools, 36 cotton mills, all, with one exception, for heavy fustian goods, and two paper-mills. Pop. 14,856.

Ill-1Io, a river, Corea, which rises in the mountains extending $N$. to $S$. in the interior of the peninsula, flows W., and falls into the Yellow Sca, in lat. $38^{\circ} 45^{\prime} \mathrm{N}$., after a course of about 75 m .

Vol. I.

HIA. - 1, A th. China, prov. Shansee, 67 m. S. by W. Ping-Yang.-2,(-Kiang), a tn. China, prov. Kiangsee, 1. bank Kan-kiang, 78 m. S.S.W. Nan-Chang.-3, (Loui), a tu. China, prov. Quangsee, on an affluent of the IIong-kiang, $50 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Taiping.

HIANG-Ho.-1, A tn. China, prov. Chihle, 30 m . E.S.E. Pekin, l. bank Pei-ho.-2,(-Vou), A city, China, prov. Quangsee, on an affluent of the Ngo-vu-kiang, 30 m . S.S.E. TchinNgan.

HilaO-y, a tu. China, prov. Shansee, r. bank Fuen-ho, 8 m. S.S.E. Fuen-choo. Near it are some reurarkable mineral springs.

H1BALDSTOW, par. Eng. Lincoln; 4390 ae. Pop. 688.
HIBIAPPABA [sometimes called Biapina], an extensive cordillera, Brazil, stretching E. to W. in prov. Ceara, forming part of the E. boundary of Piauhi, and divided into the serras of Biapina, Boa-Vista, Boritama, Cocos, \&e. It contains mines of iron and copper, but little or no gold.

HICKLETON, par. Eng. York (W. Riding) ; 770 ae. Pop. 157.

IIICKLING, two pars. Eng.:-1, Norfolk; 4510 ac. Pop. 860.-2, Notts; 2930 ae. Pop. 581.

HIDAS, a vil. Hungary, Thither Danube, co. Baranya, on the Sarwasser, here crossed by a bridge, abont 10 m . from Szexard. It has two ehurehes, a trade in corn, wine, and tobacco. Pop. 1661.

IIIDDA, a vil. Afyhanistan, 5 m . S. Jelalabad; lat. $34^{\circ} 19^{\prime}$ N .; lon. $70^{\circ} 2 \overline{5}^{\prime} \mathrm{E}$. It is remarkable for several mounds and caves, the relies of an unknown and extinet race. Those which have been opened were found to contain ashes, bones, gems, coins, ornaments, \&e., and are supposed to have been either depositories of Buddhist relics, or places of sepulture for eminent persons.

HidDDENSEE, or IIIddensö, an isl. Prussia, in the Baltic, off Pomerania, 12 m. N. Stralsund, and $W$. of isl. Rügen, from which it is separated by the Strait of Frogg, 10 m . long, by about 2 m . broad; W. shore bordered by steep cliffs and sandy downs of considerable height; soil generally light-part of it arable, and still morè in pasture. Inhabitants eliefly employed in fishing. Amber is found on the coast. Pop. 690.

HIDEGKUT, numerous places, IIungary, particularly1, $\boldsymbol{A}$ vil., Thither Danube, co. of, and 6 m . from Pesth; with a R. Catholic clmarch. Pop. 1020--2, A vil., Thither Damube, co. of, and 20 m . from Tolna; with a Protestant chureh. Pop. 700.-3, (or Kaltenbrunn), a vil., Thither Danube, at the foot of a lofty hill above the Lapines, 4 m . from Fiirstellfeld; with a parish church. Pop. (chiefly Germans), 1470.

HIDJELLEE, a maritime tn. IIindoostan, prov. Bengal, r. bank estuary of $1 l o o g h l y, 60 \mathrm{~m}$. S.S.W. Calcutta. Salt is extensively manufactured here.

HIDVEG, numerous places, IIungary, particularly-1, A vil., Hither Theiss, co. Zemplin, about 8 m . from Miskolcz. It formerly stood on the r. bank of the IIernad, but, in consequence of a change in the bed of that river, now, with exception of the ehurch, which is Protestant, stands wholly on the 1. bank. Pop. 1322.-2, A vil., Hither Danube, co. Honth, in a marshy district, r. bank Ipoly, here erossed by a bridge, about 5 m . from Ipoly-Sagh ; with a R. Catholie church. Pop. $940 .-3$, A market tu., co. Eisenburg, on the Raab, 11 m . S.S.E. Steinamanger; with a parish chureh. Pop. 970.

Hilelahat (Lake), Sweden. See IIjelmar.
IIIEN-YAN, a tn. China, prov. Shense, l. bank Hoei-Ho, 15 m . W.N.W. Si-Ngan.

HIERAPOLIS [Turkish, Pambuk-Kaleh, 'cotton eastle '], an anc. ruined eity, Asiatic Turkey, pash. Anadolia, near r bank Lyens, 121 m. E. by S. Smyrna, in a singularly beautiful position, on a broad terrace, extending S.E. to N.W., bounded, on the N.E. by a range of lofty mountains, and presenting, on nearly all other sides, a vast extent of productive plains and riel pastures. The ruins of the city elearly attest its former importance. The main street can still be traeed in its whole extent, and is bordered by the remains of three Christian chorches, one of which is upwards of 300 ft . long. But the principal ruins are a theatre, and gymnasium, both in excellent preservation; the former, 346 ft . in diameter ; the latter, nearly filling a space of 400 ft . square. In all directions, rows of columns, walls, and side-posts of doorways meet the eye; and, beyond the eity walls to the E. and s., are
also many interesting sepulchral monuments, of large dimensions and imposing style. But, perhaps, the most extraordinary feature of Hierapolis is its hot springs of mineral water, charged with calcareous matter, which produces the most singular effects in the formation of stalactites and incrustations. These waters rise from several deep springs among the ruins, and are to be found in small rivulets for 20 m . round; they are tepid, and to appearance perfectly pure, though, at the deptl of 20 ft ., a dark-green hue is visible. The cliffs over which the waters of these springs fall, are incrusted by their deposits, which is of a snowy whiteness, each cascade leaving a distinct and separate line of incrustation, resembling
villas and handsome honses, the residences of wealthy London merchants ; a beautiful church, places of worship for Dissenters, a cemetery of about 20 ac ., tastefully laid out; a freo grammar-school, a charity, and several other schools; almshouses, and minor charities. It likewise possesses a literary and scientific institution, an agricultural society, and a savingsbank. Pop. chapelry, 4302.

Highlands. See Scotland; and Arctic HigirLands.

HIGHWORTH, a market tn. and par. England, co. Wilts. The town, delightfully situated on a hill, $39 \mathrm{~m} . \mathrm{N}$. by E. Salisbury, is distinguished for its salubrity, and the beauty of its environs. It consists of two principal streets, very irregularly built, but well kept; is plentifully suppliedwith water, and lighted with gas; and, upon the whole, may be said to be improving. It has an ancient Gothic church, of the reign of Henry VI.; several Dissenting chapels, a national, British, and other schools; and several small charities. The inhabitants are chiefly employed in agriculture. Weekly market, Wednesday. Area of par., 9810 ac . Pop. 3939.-(Local Correspondent.)

HIGUER (El), a cape, Spain, of no great beight, coast of Guipuzcoa, Bay of Biscay. It forms the W. extremity of the mouth of the Bidassoa, and bars the entrance to the port of Fuentarabia, from which it is N . rather more than $1 \mathrm{~m} . ;$ and contains a fort, which guards the harbour.

HIGUERA, several places, Spain :1, (Higuera-de-Argona), a tn. Andalusia, prov. of, and 13 m. N.N.W. Jaen, near tho Salado. It is indifferently built; has a parish church, finely situated on a height overhanging the town; a court-house, pri-
a river which had been suddenly arrested in its course, and converted into stone. Hierapolis owed its ancient celebrity, and, it is conjectured, its sanctity also, to these remarkable springs. The place takes its modern name Pambuk-Kaleh, from the white appearance of the cliffs which support the terrace on which the ruins of the city stand.

HIERDEN, an agricultural vil. Holland, prov. Gelderland, 2 m . E. by N. Harderwijk, with a Calvinistic church and school. Pop. 957.

HIERRO, an isl. Canaries. See Ferro.
hiletzing, or Maria Hietzing, a vil. Lower Austria, on the Wienfluss, a short distance S.W. Vienna. It is well built; has a public square, with an obelisk; an old parish church, to which numerous pilgrimages are made; a theatre, and a magnificent casino. It stands close to the gardens of Schönbrunn, and is a great holiday resort of the citizens of Vienna. Pop. 2000.

HIGGIN'S POINT, a cape, Russian America, forming the N.W. point of the N. entrance into the channel of RevillaGigedo; lat. $55^{\circ} 27^{\prime}$ N.; lon. $131^{\circ} 34^{\prime} \mathrm{W}$.

HIGII, several pars. England:-1, (Highbray), Devon; 4150 ac. P. 314.-2, (Highclere), Hants; 4560 ac . P. 468. -3, (High Hampton), Devon ; 2220 ac. P. 365.-4, (Highley), Salop; 1460 ac. P. 360.-5, (Highway), Wilts; 950 ac. P.147. -6, (Highweek), Devon; 2140 ac. P. 1303.

HIGHAM, four pars. England :-1, Kent; 2820 ac. P. 777.-2, Suffolk; 1020 ac . P. 259.-3, (Gobion), Bedford; 770 ac P. 109.-4, (-on-the-Hill), Leicester; 2880 ac. P. 556 .

HIGHAM-Ferrers, a bor., market tn., and par. England, co. Northampton. The rown, 59 m. N.N.W. London, on a rocky eminence, $\frac{1}{2} \mathrm{~m}$. from the E. bank of the Nene, consists chiefly of two streets, with a market place, in which stands an ancient cross. It has a very handsome old church, a Wesleyan chapel, a free grammar, and several other schools; an almshouse, some remains of an ancient college, foundcd in 1422, and a townhall, of modern erection. The only business carried on in the town, to any extent, is shocmaking. Lacemaking formerly flourished here, but has gone rapidly to decay since the introduction of machinery. Area of par., 2260 ac. P. 1030.

IIIGHGATE, a vil. England, co. Middlesex, on a hill, 5 m. N.N.W. St. Paul's, London. It has many elegant
son, several flour mills, and a trade in corn. Pop. 685. $\mathbf{- 2}_{2}^{2}$, (Higuera-de-Bargas), a tn . Estremadura, prov. of, and 27 m. S. Badajoz, consisting of a number of small, ill-constructed houses, generally of earth, but with clean, commodious, and well-paved streets. It has a parish church, townhouse, old castle, and primary school; manufactures of coarse woollen and linen cloth; and a trade in wool and skins. P. 1608.-3, (Higuera-de-Calatrava), a tn. Andalusia, prov. of, and 19 m. W.N.W. Jaen, poorly, though not irregularly built; with a parish church, a courthouse, a prison, a primary school, oil-mills, and a trade in corn and cattle. P. 618.-4, (Higuera-de-la-Serena), a tn. Estremadura, about 80 m . from Badajoz, near the Guadamez, very irregularly built; with a parish church, a primary school, manufactures of linen and corks, and several mills. P. 953.-5, (IIiguera Junto Aracena), a tn. Andalusia, prov. Huelva, about 36 m . N. Seville, consisting generally of mean, inconvenient houses, and irregular, ill-paved, and filthy streets. It has a parish church, townhouse, primary school, manufactures of cork, and a trade in them, and in oil. P. 1240.-6, (Higuera La Real), a tn. Estremadura, prov. of, and about 45 m . from Badajoz, gencrally well and regularly built, with level, well-paved streets, and a handsome square. It has two churches, one of then large and elegant; a townhouse, prison, hospital, school, manufactures of woollen and linen cloth, lats, and white soap ; numerous oil and flour mills, and a trade in corn, wine, and oil. P. 3800.

HIGUERELA, a tn. Spain, Murcia, prov. of, and 20 m . from Albacete, with a parish church, townhouse, prison, two primary schools, manufactures of woollen cloth, bricks, and earthenware; ard a trade in agricultural produce. Pop. 2488.

HIGUEY, a vil. and bay; isl. Hayti, republic of, and 78 m. E. San Domingo. The village is about 10 m . inland. -The bay, protected by the island of Saona, is in lat. $18^{\circ} 20^{\prime}$ N.; lon. $68^{\circ} 40^{\prime}$ W. This part of Hayti was the scene of some of the most atrocious cruelties committed by the Spaniards who accompanied Columbus, on the unfortunate natives of this island. Higuey at that period was an independent district, governed by a cacique.

HIJAK [anc. Belia], a tn. Spain, Aragon, prov. and 68 m . N.N.E. Teruel, r. bank San Martin, tolerably well built ; with five squares, three churches, a townhouse, hospital, school,
prison, cemetery, convent, and an ancient and magnificent lucal palace. It has manufactures of linen and soap; and a trade in silk, hemp, soap, and agricultural produce. P. 2638.

HILA, a vil. Indian Archipelago, isl. Amboina, peninsula of Hitoe, with a governor's house, a Christian church, and a Mahometan temple. IIere the Dutch first landed on the island.

IIILAIRE (Sr.), several places, France :-1, A vil., dep. Nord, 8 m . E. Cambray. P. 2007.-2, (Hilaire-du-Harcouet), a tn., dep. Manche, 40 m . S. St. Lô, the seat of a communal college. It has manufactures of woollen and linen cloth, leather, and refined wax; an important trade, concentrating that of the surrounding districts for a considerable distance; important cattle markets, and five annual fairs. P. 3068.

II1LARY (St.)-1, A par. Eng. Cornwall; 3380 ac. P. $3619 .-2$, A par. Wales, Glamorgan ; 1200 ac. P. 164.

HILBOROUGH, par. Eng. Norfolk; 3230 ac. P. 337.
IILCLIENBACH, a tn. Rhenish Prussia, gov. of, and 30 m. S. Arnsberg, with a court of justice, a Protestant chureh, and a trade in cattle. Pop. 1279.

HILDBURGHAUSEN, a walled tn. Germany, principality Saxe-Meiningen, cap. bail. of same name, r. bank Werra, 17 m . S.E. Meiningen. It is, on the whole, a poorlybuilt and lifeless place; with a palace, in which, till 1826, when the line of Gotha became extinct, the dukes of SaxeHildburghausen used to reside; several courts and public offices, a R. Catholic and two Protestant churehes, an old townhouse, gymnasium, normal seminary, industrial, Jewish, and other schools; a deaf and dumb institution, hospital, poorhouse, and lunatic asylum; manufactures of woollen and linen cloth, tobacco, and lolls; several breweries and distilleries, two weekly markets, and six annual fairs. Pop. 4181. Area of bail., 88 geo. sq. m. Pop. 18,233, chiefly Protestant.

HILDER, a vil. Rhenish Prussia, gov. of, and 9 m . E.S.E. Düsseldorf, on the Itterbach, with a Protestant and a 12. Catholic chureh, and manufactures of woollen and linen cloth, cassimere, \&c. Pop. 920.

HILDELS, a market tn. Bavaria, circle Lower Franconia, on the Ulster, 57 m . N.N.E. Würzburg, with a parish chureh, manufactures of linen, saw, oil, and other mills; and a trade in linen, yarn, and eattle. Pop. 1066.

HILDERSIIAM, par. Eug. Cambridge; 1450 ac. P. 238 .
HILDESHEIM, the most S. of the seven landrosteien or provs. into which the kingdom of Hanover is divided. It consists of the three principalities of Hildesheim, Göttingen, Grubenhagen, and the county of Hohnstein; area, 1268 geo. $\mathrm{sq} . \mathrm{m}$. The county of Hohnstein is of limited extent ; pop. 9545. For the prineipalities of Göttingen and Grubenhagen, see the articles under their names. The principality of Ilildesheim, is separated from the other two, on the S., by an interposed belt of the duchy of Brunswick; and is bounded, E. by Brunswick and Prussian Saxony, N. by landrostei Luineburg, and W. by landrostei Hanover. It is partly covered by ramifications of the Harz; which, however, nowhere attain a height much exceeding 1100 ft . Its principal stream is the Innerste, an affluent of the Leine. Its soil is far above the average fertility of the kingdom; about two-thirds of the whole consisting of a productive loam. Pup. landrostei, 368,130; principality, 162,913 .

HILDESHEIM, a tn. Hanover, cap. above prov., on a slope above r. bank Innerste, 19 m . S.S.E. Hanover, with which it is connected by railway. It was once fortified, and is still entered by seven gates; but the fortifications have been thrown down, planted, and converted into promenades. It is very irregularly built, contains a Gothic cathedral, of the 11 th century, with bronze gates, 16 ft . high, covered with bas-reliefs, and with numerous monuments, particularly a pillar of coloured alabaster, called Arminsaule, now surmounted by a cross, but supposed to have originally supported an idol of the pagan Saxons; three other R. Catholic churehes, of which that of St. Godehard is a fine Romanesque structure; four Protestant churches, of which those of St. Andre:v and St. Lambert are the most remarkable; an old Benedictine monastery, now converted into a linatic asylum; several other monasteries, the buildings of which are oceupied by a gymnasiuin, seminary, arsenal, and barracks; the townhouse and temple-house, fine specimens of old arehitecture; numerous hospitals, and benevolent endowments. The manufac-
tures consist chiefly of lacquerware, wax-tapers, soap, starch, vinegar, leather, and tobacco; and there is a considerable trade in linen and yarn. Hildesheim is the see of a R. Catholic bishop, founded by Charlemagne, in 798: and the seat

part of the mariet-place, hlldesheim.
From Lange, Ansichten mon Deutsellanad.
of a superior court of law, and several important public offices. It is a place of considerable antiquity, and formed an important member of the Hanse Leaque. It has repeatediy suffered much by war. Pop. 14,374.

HILFRA'TH, a vil. Rhenish Prussia, gov. and 20 m .N.N.E. Aix-la-Chapelle, with manufactures of articles in wood and wicker-work; in which the trade is considerable. Pop. 900.

HILGAY, par. Eng. Norfolk; 7340 ac. P. 1515.
HILGERSDORF, a vil. Bohemia, cirele Leitmeritz, on the Hochwald, near the frontiers of Saxony. It has a school, manufactures of linen, hosiery, and tobacco-pipes; two yarn bleachfields, and five mills. Yop. 1935.

HILL, par. Eng. Gloucester; 2020 ac. P. 227.
IILL, 1)EVERILL, par. Eng. Wilts; 1420 ac. P. 118.
HILL IIVER; British N. America. See Hayes River.
IIIILIA, a tn. Asiatic Turkey, pash. of, and 60 m . S. by W. Bagdad, on both sides of the Euphrates, among the ruins of ancient Babylon. It has good bazaars, well supplied with meat, fish, rice, and even luxuries; is regularly governed, in general quiet, peaceable, and particularly well-disposed towards strangers and Franks. The Euphrates is here crossed by a floating bridge, 450 ft . long. Pop. 10,000 .

HILLAYA, a small tn. Scinde, r. bank Indas, 40 m . S. Iydrabad; lat. $24^{\circ} 55^{\prime} \mathrm{N}$. ; lon. $68^{\circ} 8^{\prime}$ E.; near the E. extremity of a consitlerable expanse of brackish water, abounding in fish, and surrounded by low sandstone hills.

HILLE, a vil. Rhenish Prussia, gov. of, and 8 m . E.N.E. Minden, with a parish clureh, a trade in cattle, and three annual fairs. Pop. 2485.

HILLEGEISBERGG, a vil. Holland, prov. S. Iolland, three m . N. Rotterdam, with a council-house, elegant chureh, and school. Pop. (agrieultural), 1480.

HILLEGOM, a vil. Holland, prov. S. Holland, 10 m . N. Leyden, near Lake llarlem, with two churches, two poorhouses, and a school. Turf cutting is the chief employment. Pop. 1652.

HILLARÖD, a tn. Denmark. See Fredericksborc.
HILLERSDORF (Nieder and Ober), a vil. Austrian Silesia, circle Troppau, on the Oppa, with a Protestant and a R. Catholic chureh; a saw, and two other mills. Pop. 1560.

HIILLESDEN, par. Eng. Bucks; 2150 ac. P. 262.

Springfield, with a courthouse, jail, and two tanneries. P. 400.

IIILONGOS, a tn. Philippines, W. side isl. Leyte, with Point IIilongos N.W., in lat. $10^{\circ} 24^{\prime}$ N.; lon. $124^{\circ} 35^{\prime}$ E. (r.)

HILPERTON, par. Eng. Wilts; 980 ac. P. 973.
HILPOLTSTEIN, a tn. Bavaria, Upper Palatinate, 19 m . S.S.E. Nürnberg, with a R. Catholic cluurch, two chapels, a castle, townhouse, a trade in corn, and several mills. P. 1495.

HILSBACH, a tn. Baden, circle Middle Rhine, on a stream of same name, 16 m . S.S.E. Heidelberg, with a Protestant clurch and two annual fairs. Pop. 1366.

HILSTON, par. Eng. York (E. Riding); 530 ac P. 41.
HILTON, three pars. England:-1, Dorset; 1870 ac. P. 730.-2, Huntingdon; 1510 ac. P. 344.-3, York (N. Riding) ; 1510 ac. P. 126.

HILVARENBEEK, a vil. Holland, prov. N. Brabant, 17 m. E.S.E. Breda, with a large, tolerably regular marketplace, in which stand the two churches. There are, likewise, a council-house, weighhouse, castle, poorhouse, and school. Pop. (agricultural), 2494.

HILVERSUM, a market tn. Holland, prov. N. Holland, 15 m . E.S.E. Amsterdam, with a good-looking courthouse, three churches, a synagogue, and several schools; manufactures of cotton-yarn, and various kinds of cotton cloths, tapestry, floor and horse cloths, \&c.; in which most of the inhabitants are engaged. Pop. 5160.

HILZINGEN, a vil. Baden, Lake circle, 8 m . N.E. Schafflhausen, with a clurch, a castle, two mills, and a market for corn and fruit. Pop. 1009.

HIMÁLAYA, a chain of snowy mountains, the most elevated on the earth, which encloses the Indian peninsula on the N., and separates it effectually from N. Asia. These mountains are regarded, by some, as part of a great mountain chain which runs across the entire continent of Asia, from Taurus to the S.E. coast of China; but this attempt to establish the geological unity of successive mountain ranges, throughout thousands of miles, rests wholly on hypothesis; only a few small portions of the great range in question having been geologically examined, and much of it (the Chinese portion) being almost wholly unknown. The mountain range known as the Hindoo Koosh, W. of the IIimálaya, might indeed be fairly considered as a continuation of the same chain. But, even liere, broad distinctions present themselves as soon as we compare the neighbouring ranges, with respect to their physical character and aspect. Thus, for instance, the Hindoo Koosh forms the N., the Himalaya, the S. edge of a great table-land. It seems advisable, therefore, to atide, in this instance, within the limits prescribed by ordinary language, and to consider, as the Himálaya only, that chain of mountains which forms the N. boundary of IIindoostan, between the Indus on the W., and the Brahmapootra on the E. Both these great rivers have their sources in the snows of Kailása, a group of mouatains rising above the high plains of Tibct,
in the rear of the Himalaya; but they flow in opposite directions, taking courses, however, nearly parallel to, and equidistant from, the snowy chain on the S. The Indus runs at first to the N.W., about 100 m . distant from the Himálaya, which it cuts through in lat. $34^{\circ} 30^{\prime}$ N.; lon. $72^{\circ} 40^{\prime} \mathrm{E}$.; and thence descends S. to the Indian Occan. The Brahmapootra, on the other hand, flows from the Kailása to the S.E. and E., till, turning suddenly S., it rushes through the mountain chain, in lat. $27^{\circ} 45^{\prime} \mathrm{N}$. ; lon. $95^{\circ}$ E.; and thence, by a sinuous but rapid course, reaches the Bay of Bengal. Thus the same rivers which mark out the limits of the Himaláya, properly so called, serve also to complete the boundaries of the peninsula of Hindoostan. Thus defined as to limits, the Himálaya has a length of 2000 m ., with an average breadth of 180 m. ; and the extent of its perpetual snows and glaciers might doubtless bear comparison with the area of many flourishing kingdoms. Its direction, beginning at the Indus, is from N.W. to S.E. for about a third of its whole length; it then curves gradually to the E., which direction it retains during its last third.

Name.-The name Ilimálaya is a Sanscrit term of great antiquity, signifying 'the abode of snow.' The abridged form Himala is also met with. From the adjective Ilimavata, changed analogically into the pracrit Himóta, the Grecks and Romans formed their Hemodus, Emodus, and Juraus. Pliny observes of this last name, that it means snowy. The Himávata or snowy region is already mentioned, in the Laws of Menú (probably 1200 в.c.), as the N. boundary of India.

Aspect.-The great plain of India, S. of the Himálaya, has a general elevation of 1000 ft . above the sea. Some points of it may attain double this height, while others (towards the E.) sink to an elevation of 300 ft ; but these variations are few, and have no perceptible effect on the prevailing uniform character of the plain, along which the commencement of the mountain region is everywhere marked in the most distinct manner. The ground sinks gradually, for a short distance, towards the foot of the Himálaya, the marshy hollow being covered with thick jungle (properly jangal) or forest, frequented by elephants, and the chicf haunt of the tiger. The range of hills immediately behind this has little elevation, and does not conceal the lofty summits in the rear, of which it is said that there are generally three ranges distinguishable, rising successively one above the other. Lastly, in the remote distance is seen a continuous range covered with snow, towering high above the rest, and reaching, in some points, such an immense height, as to be visible from a distance of 200 m . or more. If the higher regions, however, be explored, it is found that there is not, in reality, any unbroken ridge or continuous chain of heights covered with snow, but thatnumerous summits, at very different distances, being projected on the same level in the field of view, coalesce in vision owing to their uniform whiteness, and present the appearance of one wall of snow. As the eye, surveying the Himálaya from the plains at its feet, ranges at once over an immense region of most varied character and climate, till it rests at last on those icy heights, which, though so conspicuous, yet lic perceptibly beyond the ordinary reach of vision, the scene is one of the most impressive imaginable: but if the heights beyond be ascended, the first impressions of novelty and grandeur give way to others of a more solemn kind, till at last the boundless extent of the snowy tracts, with their perfect silence and desolation, while the lively landscape below fades away in the distance, inspire feelings of awe and melancholy.

Transverse Section.-It will conduce much to a just conception of the general form and structure of these mountains, to study, carefully, a complete section of them from the plains of India on the one side, to the high land of Tibet on the other. Towards the foot of the mountains, the plain, 1000 ft . above the sea, declines N., forming a marshy hollow, which, lying as jungle or waste, is remarkable only for its extreme insalubrity, and for the number of wild beasts infesting it. This tract is called the Tarrai, or Tarragani, that is, the passage through ; and its outer margin, when it happens to be irrigable and fertile, is entitled Kadir. Belind the Tarrai rises the sandstone chain of hills gradually to a height of about 2000 ft . above the external plain, but not more than 500 ft . above the longitudinal valley within. The sandstone ridge is sometimes covered, and totally concealed, by enormous fragments of other kinds of rock. The dry,
sunny slope between this ridge and the Tarrai is known as the Bháver, and is covered with forests of immense timber, in which the saul or sála (Shorea robusta) and teak (Tectona grandis) predominate. The longitudinal valleys in the interior are called Dhin; in their jungle and dense forests, frequented by elephants, and in their pestiferous atmosphere, they resemble the tracts immediately below them. Such is the lower region of the IIimalaya, which may be considered as extending, on the N . side of the Dhins, up to an elevation of 4000 ft . above the sea. Thence, to the height of $10,000 \mathrm{ft} .$, may be marked out as the middle region. The upper region of the llimalaya, comprising the snow fields, terminates above, at the ridge of the Gháts or Passes, at a general elevation of 16,000 , or, as some think, of $18,000 \mathrm{ft}$. The great enlminating summits of the range are here left out of view, in order that the characteristic general features may more easily engross attention ; it will suffice for the present, therefore, to remark, that the general height of the IIimálaya is double that of the Alps; that the passes over the former ordinarily exceed, often by half a mile, the elevation of Mont Blane ( $15,732 \mathrm{ft}$.$) , the lighest point in Enrope; the Karo-$ korum pass being $18,600 \mathrm{ft}$. the Parangla $18,500 \mathrm{ft}$., the Kronbrung $18,313 \mathrm{ft}$., and the Doora Ghát $17,750 \mathrm{ft}$. high; and finally, that there are several summits in the IImálaya which approaeh closely to double the absolute elevation of the greatest of the Alps, and forty of these are stated to be above $20,000 \mathrm{ft}$. It may also be remarked that the highest points, whieh tower far above the line of perpetual snow, are not generally situate in a line with the passes, but rather in advance ol them; and that, in the opinion of recent travellers, the ridge on the r. or N. bank of the Arun, which flows W., behind the Ghats of Sikkim and Nepaul, till it descends through the latter country to join the K 6 si, is still more elevated than that which we have deseribed.

Dicisions.- For all the purposes of a general, comprehensive survey of the IImalaya, it will be sufficient to view it only under the eight following divisions, which may be easily retained:-

1. The rivers of the Punjab (five waters), spring from a portion of the great chain, whieh portion may be conveniently constituted a distinet group, under the title of the W. Himálaya, but whieh may also be subdivided into three parts, the first and last of the five rivers being separated from the other three. The most N. province of India is the celebrated Cashmere, which is the upper valley of the Jailum. Serinagur, the capital (in lat. $34^{\circ} \mathrm{N}$. ), stands at elevation of only 6000 ft . above the sea, but the valley is surrounded by perpetual snows. It must, however, be observed, that, W. of Caslmere, between it and the Indus, there lies a small portion of the IImálaya, not presenting any remarkable feature, nor considered as appertaining to India, but inhabited by the Dards or Jurds, a people connected, probably by race, with the mountaineers of the IIindoo Koosh.
2. The Chenáb, the Ravee, and the Bejah or Byas, the three midlle rivers of the l'unjab, all rise in the snowy summits of the Pariyat, whieh border Ladakh, and descend, through Lahoul and Kishtewar, to the plains.
3. The fifth and most E. of the Punjab rivers is the Sutlej, or Satadru (literally, hundred running). This great river springs from the S.W. foot of Kailasa, which sends, from its N.W. and S.E. extremities respectively, the Indus and Brahmapootra also. After flowing some distance N.W., parallel to the ILimalaya, it turns S.W. and ents through this chain, descending successively through the three separate valleys of Kunawar, Bussaher, and Belaspoor. Thus the easternmost river of the Punjab leads us to the middle of the IImálaya, where, between the range of Kailása in the rear (21,000 ft.), and the widely-spread snows of Jawahir or Nanda Devi in front ( $25,600 \mathrm{ft}$.), lies, at a height of nearly $15,000 \mathrm{ft}$., the sacred lake of Mánasaróvara. This portion of the snowy range, inchinding the sources of the Ganges and Jumna, is regarded by the IIindoos with peeuliar veneration, and deserves, on every account, to be grouped apart as the central Ilimalaya. The $\mathbf{W}$. commencement of this division of the chain may be placel in lon. $78^{\circ} \mathrm{E}$., though, behind the mountains, the Sutlej reaches further $E$.
4. Jumnotri, the triple-peaked mountain, $25,749 \mathrm{ft}$. high, at the foot of which the Jumua takes its rise, is regarded by the IIindoos as holy ground. Numerous warm springs, issu-
ing, in some instances, from beneath the snow, add to the sanetity of the place. This river, before entering the plains, waters the fertile valley of Sirmoor. From the sources of the Jumna, the mountains E. rise gradually till they attain a height of $22,000 \mathrm{ft}$. Here, under the Panehaparvata or five mountains, rise the streams which unite to form the Ganges. The nost celebrated and saered of these sources is the Gangavatari or Gangootri, about $13,000 \mathrm{ft}$. above the sea, in lat. $81^{\circ} \mathrm{N}$. The valley of the upper Ganges is named Gurhwal, and is altogether a land of narrow defiles and hill forts; to the S. and E. lies Kunaōn, separated from the higher land of Gurhwal by the river Pindar. In the lofty mountains S.E. of Nanda Devi, lie the sources of the Gogra, more anciently named the Saraju; the alpine land whieh it visits in its downward course is not known by any collective name, but is usually described as the 22 prineipalities. Here we have reached the highest part of the Ilimálaya, as far as it is known and measured. The Dhawalagiri (lon. $83^{\circ}$ E.), the Gosain-than (lon. $86^{\circ}$, a nameless summit about 40 m . E. of the preceding, and Kangehang or Kurchain-junga (lon. $88^{\circ} 12^{\prime}$ ), are all said to be of nearly equal heights, and to exceed $28,000 \mathrm{ft}$. the last, which is the highest, having an absolute elevation of 28,178 ft ., or $5 \frac{1}{3} \mathrm{~m}$.
5. The tract, about 350 m . in length, comprised within the extreme limits above mentioned, is partitioned, nearly in the middle, by a lofty ridge, projecting $S . W$. from the Gosainthan; all the mountain streams W. of the last-named height, or between it and the Dhawalagiri, are collected, within the mountains, into the Gandak; and hence they are called the Sapt-Gandaki or the seven Gandaks.
6. In the E. division, between the Gosain-than and the Kangehang, the rivers all unite to form the Kosi or Koose; their collective name, therefore, is the Napt-Kosika. One of these, the second from the E., and properly named the Arun, rises in the table-land N. of Kangchang, and flowing from E. to W. at a little distance from the snowy ridge of the Ilimálaya, is said to divide this from a still more elevated ridge to the N. The valleys of the Sapt-Gandaki and Sapt-Kosika, were formerly known as the 24 principalities; but the Goorkhav, the possessors of one of these independent hill states, gradually extended their sway over the whole, and have formed them into a powerful kingdom under the name of Nepaul.
7. An arm of the Kangehang, extending S., separates Nepaul, on the W., from the valley of the Tista or Teesta, on the E. This comparatively narrow but interesting territory, walled in on three sides by stupendous mountains, from 17,000 to $28,000 \mathrm{ft}$. high, forms the independent state of Sikkim And here terminates the region of the middle Himálaya; all the streans from which, from the Junna in the W. to the Teesta in the L., unite in the Ganges.
8. The E. Himalaya, whieh extends from Sikkin, E., to the Brahmapootra, and completes the elain, sends all its waters to the last-named river, and is all comprised in the country named Bhotan or Bootan, with which Europeans are, as yet, but little aequainted. A little to the E. of the Sikkim IImalaya, the Chamalari is scen to attain the height of $23,930 \mathrm{ft}$. A bout 250 m . further E. (in lon. $92^{\circ} 50^{\circ}$ ), a conspieuous group has been observed with two peaks, named the Gemini or Twins, $21,500 \mathrm{ft}$. ligh. Thence, towards the E., the mountains sink rapidly, and may be said to disappear altogether on the r. bank of the Bralnnapootra; E. of this river the snowy heights recommence.

Geology.-Wherever the geology of the Ilimataya has been examined, from Cashmere in the N.W., to Sikkim in the S.E., the same rocks, in the same relations, and with great uniformity of character, have been found throughout. The connected results of the observations in this department-made, indeed, only at a few points of a vast region, the complete examination of which is physically impossible-must here serve as a general outline of the geological constitution of the whole. It appears that the snowy ridge, with all its towering sum-mits-the IImalaya proper, in short-is everywhere formed of granite, the roek which has elevated or upheaved the rest, and with which are immediately associated gneiss, and, lower down, mica slate. These are followed in the ordinary succession by metamorphie and secondary rocks, till we arrive at the diluvial formations, and the more recent alluvial deposits. This descending series is found as here indicated, on the S. side of the Ilimalaya, from the granite protruding through the per-
petual snows, to the sandstone of the Siwalik hills, and the ulluvium of the plains. But it must be remembered, that the same forces which thrust forward the granite ridge, raised up also the table-land of Tibet, where, consequently, the same series of rocks is found at very different elevations. Near the Spiti (lon. $78^{\circ} 30^{\prime}$ ), at a height of $15,000 \mathrm{ft}$., is found a soft limestone, consisting almost wholly of shells, with various fossils, chiefly molluses, such as are found on the S . side, at a height of 5000 ft . Tertiary deposits, of inmense depth and extent, occur on the table-land of Tibet, as well as on the plains of India. The inclination of the strata is said to be gencrally N.E. or S.W.; but this probably applies only to that part of the range, the axis of which lies N.W. and S.E. Lacustrine deposits are of frequent occurrence; and it has been even asserted, that indubitable traces of the former presence of the sea may be found at a great elevation. Fossil remains of the largest extinct mammalia lie in heaps at the foot of the sandstone range (the Siwalik lills) which borders the plains; and it is reported that similar bones, prized for their colossal size, are sometimes brought from Tibet by native traders. It is manifest that the stratified rocks and sedimentary deposits of the Himalaya, were all formed previous to the convulsions which have set them in their present position; that is to say, the bursting forth of the granite, and the upheaving of the Himalaya, therefore-the loftiest, and, in all respects, most stupendous, chain of mountains on the earth-took place at a later period than that of the tertiary formations, and, therefore, may be reckoned as one of the most recent of those convulsions which have given the earth its present form and aspect. Earthquakes are still frequent within this region; and hot springs gush forth in abundance, even from beneath the snow.

Climate.-The S. face of the Himálaya presents every variety of climate that can be found between the tropics and the poles. While the S.W. monsoons prevail (from May to September), the snows rapidly diminish, and have reached their lighest limit in the latter month, when the rains are at an end. At the same time snow begins to fall, but melts immediately, in the Middle Himálaya, up to a height of $15,000 \mathrm{ft}$. Further W., where the atmosphere is drier, the snow, at this season, does not lie lower than $17,000 \mathrm{ft}$. In Tibet, N. to Kiang Lah (the ridge behind the Arún), snow often falls in August, but melts to a height of $19,000 \mathrm{ft}$. It is remarkable that the snows descend lowest in the E. part of the Himalaya, which reaches, nevertheless, $6^{\circ}$ further S., than the W. extremity of the chain; the obvious reason is, that the snows, as well as rains, are more abundant towards the E.; whereas, at the W. end of the IIimalaya, the climate is dry to excess, and most of the rivers cease to flow during the summer. The average annual fall of rain at the equator, is about 90 inches; in W. India, about 70 inches; but in the. W. Himálaya, probably not half so much. At Darjiling, in Sikkim, it amounts to 120 inches. But at Churra, in the Khasya mountains, S. of Bootar, no less than 530 inches have fallen in one year ; and 120 inches in the single month of July I In lon. $78^{\circ}$, at an elevation of 2000 ft ., the thermometer varies throughout the year from $100^{\circ}$ to $37^{\circ}$; at the height of 7000 ft., its range is from $80^{\circ}$ to $26^{\circ}$; and at $12,000 \mathrm{ft}$., the nocturnal temperature begins in September to fall below zero.
Snow and Glacier Lines.-Recent investigations have had, in general, the effect of raising the estimated level of perpetual suow in the Himalaya, and of explaining the apparent irregularity of that line. The limit of perpetual snow, in the middle division (lon. $78^{\circ}$ E.), is now stated to be at the height of about $15,500 \mathrm{ft}$., on the S. side; and $18,500 \mathrm{ft}$. on the N . side of the ridge. But towards the E., in Sikkin, the snow line descends on the $S$. face of the $S$. ranges to $14,500 \mathrm{ft}$; while further N . in the interior, it rises to a level of 19,600 ft . Were it possible, in every case, to ascertain the exact height of the suow line, on the whole contour of the mountain, it is probable that the bearing of its greatest elevation would be found to vary, according to local circumstances of exposure, between N.W. and N.E. At all events, it is now certain that the apparent anomalies in the height of the snow line depend much less on conditions of radiation and evaporation, than on the more or less abundant supply of snow, and the direction whence it comes. The existence of real glaciers of amooth ice in the Himálaya, long doubted, is also now fully established. The Himálayan glaciers are, in truth, numerous,
and descend from the limits of perpetual snow to a beight of $11,500 \mathrm{ft}$.

Botany.-In the lower region of the Iimálaya, up to 4000 ft., we find, with little modification, the vigorous vegetation of the plains. The forests of the Bhaver, and the Dhuns, consist chiefly of the largest timber trees, the saul and teak, with the bombax or cotton-tree, fig-trees (Ficus Indicus and Religiosus), and acacias. Here also the palm (a Phomix) associates with the pine (Pinus longifolia), tree ferns of stately growth mix with European species. The bamboo is common; the pisang or plantain grows wild; and rice is cultivated in the valleys. This crop is sometimes succeeded the same year by wheat, which, with barley, grows abundantly higher up. At the height of 7000 ft ., the woods consist of oak, maple, elm, chestnut, magnolia, laurel, tree rhododendron, \&c.; and the fruits now cultivated in most parts of Europe here grow wild. Maize and millet are the chief summer crops at this height, wheat and barley are reaped early in the spring. As we ascend, the pine trees of various species grow more numerous. Walnut, willow, birch, and juniper, with many species of dwarf rhododendron, now appear to advantage; at length the pine ceases at about $11,500 \mathrm{ft}$; the juniper ascends perhaps 1000 ft . ligher; and the rhododendron seems capable of advancing still further. These estimates of height all refer to the S. side of the range; on the N., the juniper thrives to a height of $14,400 \mathrm{ft}$; the rhododendron and lonicera to $17,000 \mathrm{ft}$.; and humbler vegetation reaches even to $19,000 \mathrm{ft}$. Cultivation ceases on the S. side, at an elevation little exceeding $10,000 \mathrm{ft}$. ; while on the $N$. , crops of rye and buckwheat are gathered at the height of $13,500 \mathrm{ft}$. Tropical forms sometimes make their way up the mountain much higher than might be expected; and bamboos are sometimes met with at heights of 8000 or 9000 ft . This phenomenon is particularly striking in Sikkim, where the humidity of the atmosphere is favourable to tropical vegetation. But at $15,000 \mathrm{ft}$. all the species are new; and, on the table-land, most of them disappear altogether, owing to the dryness of the air. Yet it was lere, at a height of $19,000 \mathrm{ft}$., that Dr. J. D. IIooker deseried the Lecanora miniata-a lichen, conspicuous from its bright orange colour-which he had previously discovered on Cockburn Island, near the Antarctic circle.

Zoology.-The lower region of the Himálaya is the favourite abode of the elephant and rhinoceros; and of the bibos and bubalus, or wild buffalo. Deer, of several kinds, are very numerous; and antelopes, of which the tetroceros or fourhorned species, is the most remarkable. The apes, also, among which are the Entellus and Macacus chiefly innabit the lower region, though one species is found in the pine forests at the height of 9000 ft . or even $11,000 \mathrm{ft}$. The carnivorous animals are more numerous and various in the lower valleys, but, with some modifications, they extend throughout; the tiger, glutton, bear, badger, and mangoose, remaining below; while leopards, hyænas, wolves, and wild dogs, extend higher up; the ounce, the mountain fox, and the cat-lory, launting even the lighest region. To the middle region belong the true ox (Bos), the common hare, and several species of deer. In the upper region we find the bison, the yak (Bos poephagus or grunniens), the wild goat (Ibex), and wild sheep (Pseudois), the marmotte, pikas (Lagomys), and the bear. The feathered tribes of the Himálaya are so numerous, so widely diffused, and so frequently nomadic, as to defy all attempts to classify them, with respect to habitation, within a moderate compass. The common fowl (Gallus), and the francolin, prefer the forests at the foot of the mountain; the bustards choose the middle region; while the pheasant species occupy the pine woods at the summit. Of doves, nearly every zone has its own variety. The birds of fine plumage (shrikes, parrots, \&c.) belong chiefly to the lower region; where also are found the Muscicapidas or flycatchers, and the Tenuirostres. The Sylvice, or singing birds, are more equally diffused; and the birds of prey are found everywhere.

Ethnology.-The ethnological line of demarcation connected with the Himálaya, does not coincide with the line of the Ghâts or passes. Along the whole range, except towards its W. extremity, the vicinity of the snowy crest is occupied, on the S. as well as N., by Bhótias, or people of Thibetan origin and Mongolian race. At the N.W. end of the chain, the Hindoos, of Arian race (that is, whose forefathers spoke Sanscrit), have taken possession of the whole of its $S$. face, and have
even crossed the ridge; but E. of the sources of the Ganges, the mountains seem to have had no attraction for them, and the Bhotia mountaineers were allowed to descend towards the plains; and are found, at the present day, more unmixed the further we go E. Of the original oecupants of the plain, speaking the Tamál language, a few tribes also sought refuge in the mountains, at the time of the Arian invasion ( 12 or 13 centuries b.c.) These Tamílian tribes, eight in number, are confined to the lower resion, exclusively, of the Middle Limalaya. The tribes of Mongolian origin amount to at least $2 \overline{5}$, speaking different dialeets; and, in some cases, nearly savage. Their migration from the N. is assigned, by tradition and collateral evidence, to the fifth and sixth eenturies of the Christian era, anterior to the introduction of Buddhism and eivilization into Tibet. A few tribes only, as the Khásyas, have mixed freely with the Hindoos, ehanging their manners, and, in some degree, their language also. The chief families avong the Ghoorkas, in Nepaul, have, through frequent intermarriage with Brahmins and Rajpoots, completely lost the Mongolian features and peeuliar complexion; and would fain believe that they are altogether of S . extraction. It is remarkable that the hill tribes become attaehed and naturally inured, to certain elevations, and cannot change their residence up or down, without serious inconvenience. Notwithstanding the great extent of the inhabited Himalayan region, and the warlike habits of many of its tribes, it is, taken altogether, politically weak; for it is but a loug ehain of petty states, separately strong only in defence, and incapable of union.(Gerard's Tours in the IImálaya, 1839; Colebrook, On the Heights of the Himálaya, Asiatic Researches, 1816; Hodgson, On the Meights of the Mimálaya, Asiatic Researches, 1822 ; Numerous Papers by Colebrook, Webbe, Frazer, IIerbert, IIutton, Strachey, \&e., in the Asiatic Researches, in Jour. Asiatic Society, Bengal; and in Jour. Roy. Geo. Soc., London.)

IIIMBERG, a market tn. Lower Austria, in a somewhat bleak and exposed situation, on the Kaltengange, 8 m . S.S.E. Vienna. It is well built, has a market-place, adorned with an obelisk, an old ehureh, old townhouse, and burgher hospital ; has manufactures of linen, cotton, ehintz, muslin, and calico a madder-mill, and trade in corn. Pop. 1319.

HIMBLETON, par. Eng. Woreester; 2040 ac . Pop. 424.
IIIMLEY, par. Eng. Stafford; 1200 ac Pop. 409.
IIIMMELKたON, a vil. Bavaria, eirele Upper Franconia, r. bank White Main, 9 m . N.N.E. Baïreuth, with a eastle, in the ehapel of which several of the Margraves of Baireuth have been buried. The mulberry is cultivated here, and some silk is produced. Pop. 682.

HINCKLEY, a market tn. and par. England, co. Leicester. The town, 12 m . S.W. Leicester, on the line of Watling Street, coutains many good houses, an ancient and spacious parish chureh, with a tower, and finely-proportioned spire; several places of worship for Dissenters, a national, and an infants' sehool. Large quantities of cotton and worsted hose, espeeially the former, are manufactured here. There are also manufactories of coarse cotton thread and worsted. The town was created a barony soon after the conquest. Near it are some interesting Roman remains. Area of par., 6200 ac. P. 7291.

HINDELANG, a market tn. Bavaria, eirele Swabia, 15 m . S.S.E. Kempten; with a royal castle, an iron, and other mills, and a trade in cattle. Near it are iron mines. Pop. 1288.

II INDELOOPEN, a maritime tn. Holland, prov. Friesland, 25 m . S.W. Leeuwarden ; lat. $52^{\circ} 53^{\prime} \mathrm{N}$. ; lon. $5^{\circ} 17^{\prime} 18^{\prime \prime}$ E. It is a bare place, washed on three sides by the sea, and has a good harbour, frequented by small vessels. It is traversed by numerous eanals, has a townhouse, also serving the purposes of a weighhouse, prison, \&c.: two eliurehes, an orphan hospital, house of correction, school, and two annual cattle markets. Inluabitants mostly seafaring. Pop. 1229.

IIINDERCLAY, par. Eng. Suffolk; 1750 ac. Pop. 387.
HINDERWELL, par. Eng. York (N. Riding); 3960 ac. Pop. 1970.

IIINDIA, a tn. IIindoostan, Scindia's dominions, l. bank Nerbudda; lat. $22^{\circ} 26^{\prime} \mathrm{N}$. ; lon. $77^{\circ} 5^{\prime} \mathrm{E}$.; of little strength, but of some importanee, from its commanding some of the best fords over the Nerbudda, whieh is here 1000 yards broad.

HINDLEY, a vil. and township, England, co. Laneaster, 3 mm . S.S. E. Wigan, on the railway thenee to Bolton. It
high; water deficient ; and las Episeopalian, and several Dissenting places of worship; several schools, an important-looking police station, and exteusive manufactures of cotton; but many of the people are employed in collieries. Pop. 5459. -(Local Correspondent.)

HINDMARSH.-1, A eo., S. Australia, comprising the peninsula of whiel. Cape Jervis forms the S.W. extremity.2 , An isl. S. Australia, in the entrance to Lake Alexandrina. -3, A vil. S. Australia, 2 m . from Adelaide.-4, A lake, Victoria, 30 m . in circumference, discovered by Mr. Eyre; lal. $36^{\circ}$ S.; lon. $141^{\circ} 30^{\prime}$ E.

HINDOEN, the largest isl. of the Loffoden group, N. W. coast, Norway, from which it is separated by a narrow ehannel. It is of irregular shape, being both indented by numerous, and penetrated S . beyond its centre by a deep, narrow ereek; length, N.E. to S.W., about 50 m .; mean brealth, nearly 30 m . The fishery on its coasts is very productive.

IIINDOLVESTON, par. Eng. Norfolk; 2720 ae. P. 839.
HINDON, a market tn. and par. England, eo. Wilts. The town, 15 m. W. by N. Salisbury, on a gentle eminence, has an old church, dissenting chapels, and a free sehool for boys and girls. Near it, linen, dowlas, and bed-ticking are manufactured ; and there are traces of a British village, where Roman coins, pottery, \&e., lave been found. Area of par., 270 ac. Pop. 772.

IIINDONE, a tn. India, prov. of, and 65 m . S. W. Agra; lat. $26^{\circ} 47^{\prime} \mathrm{N} . ;$ lon. $76^{\circ} 54^{\prime}$ E. ; with many of the houses built either wholly, or in part, of a fine dark-red sandstone, eut in large quadrangular masses, and well polished; and some Hindoo temples built in the Mahometan style.

IHINDOU KOOSH, Coosif, or Indian Caucasus, a vast mountain system of Central Asia, generally considered a continuation of the llimálayas, but regarded by IIumboldt as a prolongation, rather, of the Kuen-lun; the direction of its axis corresponding with the latter, both being E. and W., while that of the IIimálayas is S.E. and N.W. Viewed as an extension of the Himalayas, the Hindoo Koosh may be said to commence E., at the point where the Indus interseets the former, and to terminate W. indefinitely with the Ghur Mountains (ane. Paropamisus), in N. Afghanistan; thns traversing the countries of Kafferistan, Koonduz, and Budukshan, and filling them with its lofty and rugged elevations. The range takes its name from one vast and lofty mountain namel IIndoo-Koh, N. of Cabool; lat. $35^{\circ} 40^{\prime} \mathrm{N}$. ; lon. $68^{\circ} 50^{\circ} \mathrm{E}$.; erowned by a suecession of lofty peaks, with sides often perpendicular, and wrapped in a perpetual covering of snow in all parts not too steep to admit of its lying. It has never been measured, but the eulminating point has been conjectured to exeeed $20,000 \mathrm{ft}$., being visible at a distance of 150 m . The next lighest peak is Kohibaba, 17,905 ft. Transverse valleys are more numerous in this range than in the Himálaya proper; above 20 occur within a distance of 150 m ., between the Kawak l'ass and Bamian. Many of them, although treeless and shrubless, are beantiful, being traversed by meandering streams, whieh, in winter, dash through them with noisy and impetuous foree, but, in summer, pursue their way ealmly and gently. In the vieinity of IIindoo-Koh, the geological strueture of the mountains consists of a core of beautiful granitethe felspar being purely white, and the horneblende glossy, black, and colleeted into large spheroidal masses. This granite has been ascertained to form the interior part of the range to a great extent, in some plaees assuming an appearanee resembling basalt. On each side of the granite are hugo strata of slate, gneiss, chlorite, earbonate of lime, quartz, and, exterior to these, secondary limestone and fossiliferous santstones. The principal minerals are silver, lead, iron, zine, and antimony. Gold and copper are also said to exist. The Hindoo Koosh is, in general, characterized by barrenness, and, in a remarkable degree, by want of timber. Dwarf firs, wil lows, poplars, birches, and numerous frnit-trees are grown, but these have been all introdueed by man. Rhubarb, however, appears to be indigenous to these regions, growing wild in vast quantities, and of a quality equal to that produced in any other loeality. At certain elevations on the N. side of the range, vegetation is poorer in forms and individuals than on the $S$. side, and has, from the saline soil, a greater preponderance of curious suceulent Chenopodiacere. The only green spots visible are those confined to the banks of rivers ; and in such plaees as are not under cultivation, cool, green,

## HINDOOSTAN

1216
HINDOOSTAN
turfy sward occurs. The general fuel is a serubby sort of furze bush, affording a very scanty and insufficient resource in this bitter climate. The animals inhabiting these regions are the kiang, an equine quadruped about the size of a small horse, and which, in form, it resembles; the $y$ alc or grunting ox; the zho, a mule between the yak and the cow; the kutchkar or wild sheep, a large animal with huge curled horns; the rass, a species of antelope; musk-deer, ibex, goat-deer, bear, wolf, leopard, lynx, fox, ounce, marmot, hare, eagle, vulture, raven, and various kinds of partridges. The passses over the Hindoo Koosh, though not the highest known, are very formidable. Amongst the principal are the Khawak Pass, $13,200 \mathrm{ft} . ;$ the Akrobat, $10,200 \mathrm{ft} . ;$ the Kara Kotul, 10,500 ft ; and the Dundun Shikun, 9000 ft . Various large streams have their sources in this range; the principal of which are the Oxus or Jihoon, and the Ielmund.

HINDOOS'TAN [Persian, Hindust'han, the country of the IIindoos, or ' Negroland '], an extensive region, consisting of the central of the three great peninsulas of Southern Asia, and extending between lat. $8^{\circ}$ aud $35^{\circ} \mathrm{N}$., and lon. $68^{\circ}$ and $91^{\circ}$ E.; bounded, N. by the Himalaya Mountains, W. by the Indus and the Indian Ocean, E. by the Brahmapootra, the Bay of Bengal, the Indian Ocean, and Palk's Strait, with the Gulf of Manaar, which separate its S. part from the island of Ceylon. Its extreme length, N. to S., from the Himalaya to Cape Comorin, is about 1900 m . ; and breadth, W. to E., 1500 m . Its area may be estimated at nearly $1,280,000$ sq. m., or more than one-third of the entire extent of Europe; and its population has been supposed to amount to upwards of $147,500,000$, or considerably more than half of the number occupying the European continent and islands.

Geographically, this region is separated into two grand di-visions-Hindoostan proper, between the Himalaya and the Vindhyan Mountains, in about lat. $23^{\circ} \mathrm{N}$. (this division also including the Punjab and Scinde); and what is more strictly called ' Peninsular India,' bounded, W. and E., by the Indian Ocean; and which is again subdivided into the Deccan (Daks'hina, ' the south'), and India-south-of-the-Krishna, or Kistuah river, extending from that river, in about lat. $16^{\circ} \mathrm{N}$., to Cape Comorin, and embracing the greater part of the British presidency of Madras. By the natives the country is further subdivided, according to the various languages or dialects spoken in its several parts. Thus, the Tamul nation inhabit the S. part of the peninsula; N. of these are the Karnata race; the Mahrattas, stretching through the W. half of India; the Ooriya and Telinga races, in the central E. part ; the Bengalis to the N.E. of these; the Hindi, or Hindoostanees, occupying all the upper plain of the Ganges and Jumnawhich last have given name to both India and Hindoostan proper, and are, in general, physically and intellectually superior to the other Indian races. But Europeans are less familiar with the foregoing subdivisions than with those instituted by the Mahometan conquerors of India; which, with a few provinces still retaining their native designations, may be thus tabulated:-

Great Divisions.
Delhi Malometan, \&c., Provinces.
Delhi, Agra, Malwa, Rajpootana (or Ajmere),
Hindoostan Proper, or
N. India. Goojerat, Cuteh, Scinde, Mooltan, Lahore, Cashmerc, Kumaon, Gurhwal, N Candeish, Berar, Aurungabad, Beeder, Hyder abad, Gundwana, Orissa, the Northern Circars, and a part of Bejapoor.
2. The Deccan, \&c.........
8. India South of the Kistnal. Part of Bejapoor, Canara, Balaghaut, Mysore Salem, Coimbatoor, Malabar, Travaincore, Madura, and the Carnatic.
Since the European conquest of India, however, these subdivisions also have, for the most part, become obsolete; and the whole of IIindoostan, Nepanl excepted, is now included in the British presidencies of Bengal, Madras, Bombay (and Lahore), and the native states dependent on the same, which will be found enumerated in our article India (British).

Physical Geography.-The great mountain systems of IIindoostan are the Himalayas, the E. and W. Ghauts, and the Vindhya range. The IIimálayas, forming the N. boundary of this region, are one of the loftiest and most stupendous chains of mountains in the world. Their average height is about $15,700 \mathrm{ft}$.; but their loftiest summits, Dhawalagiri and Kunchainjunga, attain an elevation of upwards of $28,000 \mathrm{ft}$. -(see Himalaya). The E. Ghants commence in the south, about lat. $11^{\circ} 20^{\prime}$ N., and, pursuing a N.E. direction across
the country, extend to the banks of the Kistnah, in lat. $16^{\circ}$ N., separating the Carnatic from the table-land of the Deccan. The utmost height of this range does not exceed 3000 ft . The W. Ghauts extend from Cape Comorin to the river Taptee, about lat. $21^{\circ} \mathrm{N}$. ; extending through about $13^{\circ}$ of latitude, and running parallel to the W. coast, from which they are seldom more than 70 m ., and generally only about 40 m . distant. Their highest elevations reach to from 5000 to 6000 ft . above sea-level. An offset of this range, however, stretching N.E., was found by Colonel Lambton to have an elevation of 7364 ft . This summit, called Mount Permaul, is N.W. from Dindigul, in the S. Carnatic ; and it is believed that there are higher elevations farther W. The Vindhya Mountains run E. and W. across the central part of India; constituting a base to the triangle, of which the $E$. and W. Ghauts form the other two sides, and complete the boundary of what is called the table-land of the peninsula. Their greatest height is not supposed to exceed 3000 ft . The surface of the Deccan is between 3000 and 4000 ft . above the sea, and is a collection of plains, interspersed with ridges of rock, and insulated flat-topped hills, which are numerous, especially in its N.E. parts. These solitary and almost inaccessible heights rise abruptly from the plains, with all but perpendicular sides, which can only be scaled by steps eut in the rock, or by dangerous and winding paths. Many are fortified, and have been strongholds from remote antiquity. S. of the Deccan is the table-land of Mysore, 7000 ft . above the sea, surrounded by the Nilgherry or Blue Mountains, and their branches, which rise to 3000 ft . higher. The base of this plateau, as of all the Deccan, is granite; there are also many syenitic and trap rocks, with an abundance of primary and secondary fossiliferous strata. The sea-coasts on the two sides of this part of the peninsula are essentially different; that of Malabar, on the W. side, is rocky, but in many parts well cultivated; and its mountains, covered with forests, form a continuous wall of very simple structure, 510 m . long, and rather more than 5000 ft . high. On the coast of Coromandel the mountains are bare, lower, frequently interrupted, and the wide maritime plains are, for the most part, parched. The Gangetic plain comprehends the vast tract of level country drained by the Ganges, and its affluents; extending from the Himalaya, on the N., to the Vindhyan, and other ranges, on the $\mathrm{S} . ;$ and on the W. to the Indian Desert and the mountains of Rajpootana. The lower portion of this plain (Bengal, \&c.) is annually submerged for several months by the inundation of the Ganges. This plain is the most fertile, best cultivated, and most thickly inhabited portion of Hindoostan, containing more than one-half of its entire population. The desert of the Indus, or Great Sandy Desert, extends from the S.E. confines of the Punjab to the Runna distance of about 500 m .; and is connected on the N.E. with the high country which separates the plain of the Ganges from that of the Indus. It stretches in a direction parallel to the latter river, but divided from it by a fertile tract of land, from 10 m . to 15 m . in width. It contains several large oases, of which considerable portions are under cultivation. The $S$. part of this desert embraces nearly the whole of the delta of the Indus; across which river it is continuous with the desert of Beloochistan, and with that wide band of sandy and sterile regions stretching from central Africa N.E. over the whole centre of the Asiatic continent.

The rivers of Hindoostan, like its mountains, are on the most magnificent scale. The principal are the Indus, Ganges, and Brahmapootra. The Indus, which forms the W. boundary of Hindoostan proper, after having passed the Himalaya, flows in a S.W. direction. Its sources lie in Tibet, between lat. $31^{\circ}$ and $32^{\circ}$ N. IIaving traversed the Punjab and Scinde, comprising a course of about 1000 m ., it falls, by several mouths, into the Indian Ocean, in about lat. $24^{\circ} \mathrm{N}$.; lon. $68^{\circ}$ E. Its stream is foul and muddy; and so full of shoals and shifting sands, that it can only be navigated with safety by flat-bottomed boats; with these, it is navigable for about 1200 m . from the sea. It is said to discharge nearly as much water as the Mississippi, and four times more than the Ganges -(see Indus). The Ganges, though not the largest, is the most important of the Indian rivers, from the fertility it diffuses around it, and the facilities it affords for internal communication. It rises about lat. $31^{\circ}$ N.; lon. $79^{\circ}$ E.; and after pursuing a S.E. course of about 1100 m. , enters, by numerous
months, into the Bay of Bengal. It is held in high veneration by the Hindoos; who consider its waters so sacred, that to swear upon them constitutes their most binding oath- (see Ganges). The Brahmapootra exceeds the Ganges in size, and probably in the length of its course. Its sources are very imperfectly known; but the main stream is traced to about lat. $28^{\circ}$ N., and lon. $96^{\circ} \mathrm{E} .$, in Upper Assam, where it is considered to be formed by a junction of the Dihong, Dibong, and Lopit rivers; the second of which penetrates into Assam, from Tibet, breaking into S. Asia, like the Indus and Sutlej, by gorges in the Himálaya: The Brahmapootra enters Bengal in the Rungpore district; and, having run a course subsequently of nearly 500 m . in a S. and S.E. direction, falls into the Bay of Bengal, in about lat. $22^{\circ} 50^{\prime} \mathrm{N}$.; lon. $90^{\circ} 45^{\prime}$ E.; in conjunction with the largest branch of the Ganges. For the last 30 m . of its course it has a breadth of from 4 m . to 5 m ., increased to 10 m . at its mouth-(see Brairmapootra). Amongst the other rivers of note in Hindoostan are -the Jumna, Chumbul, Sone, Gunduck, Goggra, Teesta, \&c., tributary to the Ganges; the five rivers of the Punjab-the Sutlej, Bees, Ravee, Chenab, and Jailum, affluents of the Indus; and in peninsular India-the Nerbudda and Taptee, flowing westward; and the Kistnah or Krishua, Godavery, and Mahanuddy, entering the sea on its eastern side.

In remarkable contrast to its mountains and rivers are the lakes of Ilindoostan; the latter being few in number, shallow, and comparatively small in size. Anıongst the largest are the Chilka and Colair lakes, both on the eastern shore of the peninsula. The former, a salt water lake, separates the five northern circars, towards the sea, from the district of Cuttack. It is about 35 m . in length, and 8 m . in average breadth; its general depth being $4 \frac{1}{2} \mathrm{ft}$. It abounds in fish, and large quantities of salt are manufactured on its banks. The Colair, a fresh water lake, is situated between the Godavery and the Krishna, about 5 m . E. from Elloor. It is of an oval form; and, in the dry season, is about 25 m . in length, and about 10 m . in breadth at its widest part. In the rainy season, it greatly exceeds these limits. It contains numerous islands; which disappear as the lake swells, and re-appear as the floods subside. On a failure of the periodical rains, it dries up altogether. To make up, however, for the want of natural reservoirs, the whole surface of India is more or less interspersed with tanks, or artificial collections of water, made for the purpose of irrigation; and the construction of which has been always held highly meritorious by the professors of the Brahminical religion. Some of these are of such considerable size as almost to merit the name of lakes; and jeels or large ponds, formed by some of the large rivers during their inundations, are also numerous in several provinces; as in lingal, and elsewhere. On the W. side of Hindoostan is a remarkable tract of morass, called the Rumn, lying between the province of Cutch and the S.E. parts of Scinde, and having communieation with the Gulf of Cutch. It is about 150 m . in length, and in greatest breadth about 60 m ; ; its total superfieies amounting, at different periods, to between 5000 and 8000 sq. m. Neveral rivers disembogue into this tract, which is diversified with several verdant oases, and on which the phenomenon of the mirage is of frequent occurrence. The coastline of Hindoostan, having an extent of nearly 3100 miles, is particularly defiesent in islands and in inlets; of the latter, two only are of much size - the gulfs of Cutch and Cambay, both on the western side. Along all the W. coast, Bombay, Cochin, and a few less important localities, are those only which present any good accommodation for shipping; and on the E. coast, from Cape Comorin to Bengal, there is not a single good harbour.

Climate.-From the vast extent of IIindoostan, stretehing, as it does, tlirough no fewer than $27^{\circ}$ of latitude, its climate and productions, particularly the former, by position and local influences, can be here spoken of but cursorily ; the reader being referred for more minute and ample information on these and other subjects, either not at all, or but slightly, noticed in this artiele, to the accounts of the various presidencies, states, provinces, and districts of which the territory is composed, and which will be found under their respective heads. Gencrally speakiug, IIndoostan has three seasons; the hot, wet, and cold. The first commences about the middle of March, and continues for three months. The lieat is, for the most part, intense, and in some places so excessive,

Vol. I.
especially on the Coromandel coast, as to destroy vegetation ; the thermometer ranging, in the sun, from $100^{\circ}$ to $110^{\circ}$, and rising as high even as $120^{\circ}$ Fah. The wet season also occurs during the S.W. monsoon, in most parts of India; though, in the country E. of the Ghauts, the rains occur when the wind blows from the opposite quarter. The rains are ushered in with a dreadful commotion of the elements-lightning, thuuder, and tempest ; and the rain which it brings, though falling for some time at intervals only, gradually becomes a continuous deluge. These rains, however, though excessive, are highly bencficial ; refreshing the earth, invigorating vegetation, and cooling and purifying the atmosphere. The N.E. monsoon blows during the winter months, and the S.W. during the rest of the year; but both are subject to various modifications, according to local circumstances, particularly the direction of mountain-ranges. In the cold season, fogs and dews are common; and the degree of cold is so great, in some places, as to render fires necessary. Even in Calcutta, the thermometer falls as low as $52^{\circ}$ in December, with a N.E. wind; and in some of the N. provinces to $45^{\circ}$ and $35^{\circ}$. Still, the whole of Ilindoostan, except the higher mountain-ranges, may be considered as having a hot climate; for although, N . of lat. $27^{\circ}$, the climate, from November to March, is comparable with that of Italy, the larger part of the territory is within the tropic ; and in the low plains, as far N. as lat. $18^{\circ}$, winter is hardly perceptible. At Bombay, the mean annual temperature is stated to be about $82^{\circ}$; at Madras, $84^{\circ}$; and at Calcutta, $79^{\circ}$, Fah.
Natural Products.-The principal vegetable productions of Ilindoostan are-rice, maize, wheat, barley, cotton, indigo, sugar-cane, opium, tobacco, ginger, saffron, cardamoms, pepper, cocoa, areca, and other palms yielding nuts, which are extensively consumed by the native population; anise, silk, various dyes, flax, hemp, \&c. The principal indigenous fruits arethe mango, the finest of all the Indian fruits; pisang or plantain, pomegranate, citron, date, almond, grape, pine-apple, and tamarind. In the N. provinces, apples, pears, plums, apricots, and other European fruits abound. Oranges and lemons are also to be met with, but are of an inferior quality.

The minerals of this vast territory are as various as its other products. The Ilimálayan mountains abound in iron, copper, and lead; the mines have, however, been only superficially worked. Graphite has been found in the province of Kumaon, and traces of lignite in the tertiary formation; where immense deposits of fossil bones have also been discovered. Deposits of coal stretch across India from E. to W.; from Assam and Sylhet into Burdwan, where some coal mines are wrought for the supply of Calcutta; and along the course of the Nerbudda, as well as in the W. district of C'uteh. Agates and carnelians abound throughout Central India; and at Surat and other places, on the W. side of the peninsula, carnelians are cut and wrought with great ability by native artists. Nitre and nitrate of soda effloresce in great quantities on the soil in different parts of Ilimdoostan; and all, or nearly all, the supply of those minerals to Great britain is now derived from lndia. Gold is procured by washing the sand of some rivers, and iron is in many parts abundant; but few mines of any metals exist. Diamonds are found at Panna, in Bundelcund; the mines of which, under the name of Pa nassa, are mentioned by Pliny. They are also found in the Deccan, but few are now produced. A species of carbonate of lime, termed hauhar, and poreclain clays, are plentiful ; as are marbles of various colours. Alum is obtained in Cuteh in considerable quantities.

It is pretty generally believed in Europe that the natives of India live ehiefly upon rice. This is by no means the case; for, excepting Bengal, the number of those who seldom taste rice probably far exceed those who live upon that grain. Wheat, barley, jowary or common millet (Holcus soryhum), bajree or bajury (IIolcus spicatus), sesamum, and several grains peculiar to the country, constitute the staple products forming the nourishment of the llindoos. Of wheat, several varieties are grown; some of very fine quality-as the soft wheat, called pyssec, and the hard, called jullalya. Indian corn or maize is cultivated, in small quantities, all over Hindoostan, but not as a corn erop; being eaten chiefly in a green state, and after the grains have been roasted. The great millet, or durra of the Arabs, jowary of India (Holcus sorghum), occupies the place of maize in other

## HINDOOSTAN

parts of Asia. But, besides the cereals, a great variety of pulses are cultivated; also yams, sweet potatoes, onions, garlic, \&c. Sugar-cane is raised, less for the manufacture of sugar than the consumption of the cane itself, as a sweetmeat and article of food; though some of the finest grain sugar is produced in Hindoostan. The opium-poppy is cultivated to supply opium for foreign exportation, exclusively in the provinces of Bahar, Benares, and Malwa; and is supplied by the cultivators, at fixed rates, to the Anglo-Indian government, to which it continues to yield a large revenue; being almost entirely exported by the British to the markets of China, and the Indian Archipelago. Indigo is raised in great quantities in the lower plain of the Ganges, particularly in Bengal, but also in other parts of Hindoostan; and it forms one of the most profitable of Indian crops. Cotton, of several kinds, is produced, chiefly on the tableland of the Deccan; and if ready means of transit for it thence to the coast existed, India could be made to yield an all but inexhaustible supply, at prices which might defy competition. Cardamoms and pepper are amongst the most valuable products of the Malabar coast; to which locality their culture is almost exclusively confined. Benzoin, camphor, sarsaparilla, and many other drugs, are indigenous. The forests of IIindoostan contain an immense variety of large trees, little known in Europe; but capable of yielding valuable timber, and distinguished by their fragrance, luxuriant growth, or adaptation for manufactures. Teak, of the first quality, grows on the W. Ghauts. Other forest trees, characteristic of Indian scenery, are-the banian, sappan, saul (Shorea robusta), sissoo (Dalbergia sissoo), \&c.; with which are seen the oak, cypress, poplar, \&e. Large and beautiful flowering shrubs are in great variety. Forests of bamboo are numerous; and so rapidly does their growth proceed, that some of these reeds have been reported to attain a height of 60 ft . in the course of five months! Extensive tracts of the country are coverd with dense jungles, the resorts of formidable wild animals; mangroves cover the swamps at the mouths of the rivers; and the whole of that wide tract, termed the Sunderbunds, at the united delta of the Ganges and Brahmapootra, is a rank forest, inhabited by tigers, deer, und elephants; and the rivers traversing which are, in many parts, rendered impassable by ships, on account of the obstacles to which its thick vegetation gives rise.

The elephant, tiger, leopard, panther, hyæna, wild boar and ass, deer, bears, jackals, foxes, marmots, the ourangoutang, and numerous other kinds of apes, are natives of Hindoostan. Lions are found in the N., but they are not of the same species with the lion of Africa. The elephant, buffalo, dromedary, horse, and ass, have been domesticated; the firstnamed has, from time immemorial, formed an important appendage to the retinue of Indian princes, and the right of property in wild elephants was claimed by them as a royal privilege. The Mahratta horse is a small and active animal, but ungainly; and Hindoostan has never been particularly famous for its breed of horses. The wild ass is a native of the desert. Troops of pariah dogs infest the cities and towns of Hindoostan. In the lower forms of animated life, Hindoostan equally abounds as in the higher. Alligators and gavials are abuudant in the tanks and rivers; and some of the most formidable serpents known inlabit this region.

Population.-The inhabitants of IIindoostan have been estimated to amount to upwards of $150,000,000$-(Trigonom. Survey of India, Rep. 1851, p. 60)--by far the grcater number of whom are Hindoos; the Mahometans-of Arab, Persian, or other descent-being vaguely estimated at $10,000,000$, and the Europeans, amongst the entire population, at no more than 60,000 . The Hindoos are not the aboriginal inhabitants of India; but, having arrived from the N.W., they first ocenpied that portion of the country to the N. of the Nerbudda, called, emphatically, Hindoostan; and subsequently crossed the Nerbudda into the Deccan, or 'South,' where they dispossessed the natives, as before. The native tribes, however, were by no means exterminated; and, under the various denominations of Bheels, Coolies, Catties, Coles, Gonds, \&c., they still exist in the peninsula, to the number, it is computed, at the least, of two or three millions. They are mostly of small, active frame, dark-coloured, and with a peculiarly quick and restless eye; uncivilized, or owning only a few importations of Hindoo superstition or civilization. They have
little clothing, and few arms, beyond bows and arrows; their ordinary food consists of wild berries and game; they have no repugnance to killing or eating oxen; and they bury their dead, instead of burning them. The aboriginal tribes chiefly

inhabit the fastnesses of Gundwana, the Vindhya, and Sautpoora mountain-ranges, and their offsets and continuations, as far E. as the hills of Bhaugulpoor (Bengal); they are also to be found on the E . frontiers of Bengal, and, in considerable numbers, in Candeish, Goojerat, and along the line of the W. Ghauts. There is, in fact, scarcely any considerable mountain or hill region in India where some of them are not to be found: and the districts they inhabit are the wildest and most unreclaimed portions of the whole peninsula, many of them remaining still unexplored by Earopeans.

The Hindoos.-Although commonly darker in colour than the rest of the nations composing the Caucasian race, the Hindoos are held to belong to this great division of mankind. They are well formed, and, in some parts of India, as in the Deccan and the upper plain of the Ganges, they are even robust, energetic, and hardy; but the chief bodily characteristic of the Hindoos is extreme suppleness and flexibility of the animal fibre ; rendering them the best runners, climbers, leapers, and wrestlers in Asia, though incapable of maintaining exertion, or resisting fatigue, for any lengthened period. The face of the Hindoo is oval; the eyes are unifornly dark brown, with a tinge of yellow in the white; and the hair as constantly long, black, and straight. The upper classes, especially in Hindoostan proper, and eminently so toward the N.W.. are nearly as light in colour as the natives of S. and central Europe; and they are also far more handsome and tall than the lower classes. In proportion as we proceed toward the S. extremity of the peninsula, the hue of the skin is observed to darken; until, in the lower castes, it assumes almost the blackness of the negro. The females of the inferior ranks are diminutive, and by no means attractive; but those of tho ligher are frequently quite the reverse, possessing graceful forms, finely tapered and rounded limbs, soft dark eyes, long fine hair, and a glowing complexion. As to dress, the labouring population of both sexes go almost naked; a turban, and a cotton covering around the loins, constituting the whole of their apparel, though the different castes have usually some distinctive peculiarity of costume, indicative of their position in the social scale. Amongst the upper classes, the dress of the females, particularly, is elegant; consisting of a jacket, with half-sleeves, fitting closely to the shape, and often made of rich silk; a flowing garment, of silk or cotton, called a shalice, and so disposed as to fall in graceful folds; embroidered slippers; and the hands, arms, ankles, and ears, profusely ornamented with rings and jewellcry. The prevalence of ornament extends throughout nearly all ranks of the population; and it is common to see females adorned with gold armlets, anklets, \&c., but with scarcely a shred of
clothing. Subtlety and shrewdness are the most conspicuous mental characteristics of the Hindoos; and they have been properly described as 'the acutest buyers and sellers in the world.' In their manners they are mild and retiring; timidity and indecision are all but universal qualities; and yet, when officered by Europeans, they have proved themselves faithful and obedient soldiers, and courageous in the field. Artifice and deceit, a want of probity and candour, are sinongst their conspicuous failings.

Arts and Manyfacturcs.-In a few arts and manufactures -such as weaving, dyeing, carving, stone-cutting, architecture and sculpture of certain kinds, and the fabrication of some metallic artieles-the Hindoos have undoubtedly excelled. The cotton, muslin, and silk fabrics, the carpets and the shawls, of India, have deserved celebrity; amongst these goods, the muslins of Daeca, formerly made in much larger quantities than at present, in and around that eity, claim the foremost notice. These muslins are known by various names; chiefly denoting the fineness, beauty, or transparency of their texture. The finest of all is the mulmus khas-(literally, muslin made for the special use of a prince, or great personage). It is woven in half-pieces, measuring 10 yds . in length and 1 yd. in breadth, having 1900 threads in the warp, and weighing only about $3 \frac{3}{4} \mathrm{oz}$. avoirdupois. Some of the other muslins are also beautiful productions of the loom; as abruwan, compared by the natives, from its clear pellueid texture, to ' running water;' and shub-num, so named from its resemblanee, when it is wetted and spread upon the bleaching-field, to the 'evening dew' on the grass. Embroidery (zur-dozee) is an art in which the Mohammedans of Dacea display extraordinary skill. They embroider Cashmere shawls and scarfs, muslins, and net fabrics, with silk, gold, and silver thread, in a manner probably unrivalled in any other part of the world. In Scinde and the Punjab, also, this branch of industry is conducted with eminent skill. The muslin manufacture, like the production of Indian cotton goods of all other kinds, has materially declined within the present century, in eonsequence of the competition of loritish goods; nor would there appear any prospect of the revival of Indian manufacturing prosperity, at least as to common woven fabrics, in the face of such powerful rivalry. Masulipatam, and various other places on the E. side of the peninsula, have been famed for chintz, and other coloured cotton goods; which are still made there, as well as at Surat, near the Gulf of Cambay. The silks of India are inferior to those of China; but for the production of shawls, the country is unrivalled, especially the province of Cashmere, where these goods are woven from the fine hair of the Tibet goat. Trichinopoly is noted for the manufacture of gold chains of exquisite workmanship; and at several plaees, on the W. side of the peninsula, carnelians, bloodstone, and other products of the same character, which are abundantly found in that region, are, as already stated, cut and polished in superior style. In filigree work, and stone, wood, and ivory carving, pottery, and engraving on gems, the Hindoos are highly respectable artizans; and the beauty, brillianey, and durability of their dyes, were as celebrated among the Greeks and Romans as they are at the present day -madder, indigo, lae, turmerie, sappan, \&e., dyeing materials of the first importance, being native products. Numerous manufactures, calculated to give a bigh idea of Indian ingenuity and taste, appeared at the Great Exhibition in London, in 1851. Amongst these were various articles in agate from Bombay, mirrors from Lahore, marble chairs from Aj meer, kincobs from Benares, embroidered silk shawls and scarfs, carpets from Bangalore, and a variety of articles in iron, inlaid with silver.

All the excellence hitherto evinced by the Hindoos, in the prosecution of arts and seienees, appears, however, to have been wholly manipulative. The people, with a few rare ex-ceptions-anongst which Rammohun-Roy has been a striking example-have evinced no grasp of intelleet, enabling them to become versed, beyond a very limited extent, in the higher branches of learning. In arithmetie, algebra, geometry, and astronomy, they have made some rudimentary progress; and their genius is somewhat adapted to metaphysical speculations, and the intricacies of grammar and jurisprudence; but their geography, medicine, and other practical sciences, are a chaos, and their agriculture is of the rudest kind.

In literature the IIindoos are, and always have been, far
behind aeveral neighbouring nations. Except some of their theological writings, the only works of any celebrity amongst them are the Mahabarat and the Ramayana; the one recording the wars of the sous of Baharat, and the other the adventures of Rama. They are both poems, there being hardly any prose compositions in Hindoo literature, and both extremely bad; being destitute of every quality they ought to possess, and having nearly all they ought not. The state of education is equally backward, there being scarcely one man in a hundred who can read a common letter; neither can they derive any benefit from such scientifie, or other useful works, as they have, in consequence of them being all written in Sanscrit, with which the mass are entirely unacquainted. Th3 females are, in general, utterly ignorant of reading and writing; a Brahminical prejudiec existing against female edueation.

India, and especially the Decean, abounds with stupendous and highly-elaborate arehitecture; not, indeed, possessing the elegant proportions of the edifices of aneient Greece, but rather exhibiting the ponderous sublimity which characterize those still extant in Egypt, with the addition of a great deal of ornamental and minute seulpture, representations of the deities of the Hindoo pantheon, and their reputed acts, \&e.; not generally conceived or executed in good taste, or with any regard to delicaey of sentiment. Amongst the most remarkable monuments of the kind are the excavated temples of Elora, Elephanta, Carlce, and Baug, on the W. side of the peninsula; the pyramids of Pooree (Juggernaut) in the E.; and the temples of Tanjore, Trichinopoly, \&c., in the S. Most of these are Brahininical, others of Buddhist, and some of Jain origin; all have been constructed at epochs long passed, and some may perhaps boast of a high antiquity. In the region of Ilindoostan proper, which was the great seat of Mahometan ascendency, many beautiful structures, constructed by the western invaders of IIindoostan, exist; the most elegant of which is the Taj-Mehal, at Agra-a splendid mansoleum, constructed by the Emperor Shah-Jehan. In the Mahometan edifices marble is plentifully employed-a material never used in IIindoo structures; all of which have been either excavated in sandstone, or hewn out of granite. Throughout the centre and S. of India, hill-forts, on heights difficult of access, are numerous, and have proved formidable strongholds of native chiefs. But, with exception of the latter, and of the embankments, tanks, and other constructions for facilitating irrigation-in which endeavour the Hindoos have displayed much care and ingenuity-nearly all the great arehitectural efforts of the Hindoos have been spent on structures conneeted with their religion. From the palace of the sovereign to the hut of the peasant, their habitations are, for the most part, meanly built; in some hilly parts the walls are constructed of stone, but elsewhere only of mud or sun-dried bricks, and roofed with bamboo or palmyra leaves; except in the principal cities and towns, where more attention is paid to solidity in domestic architecture.

Religion and Castcs.-The Brahminical religion dates, no doubt, from a very remote epoch. It acknowledges a aelfexistent Supreme Being, who, however, is held by it to tako no concern in the government of the universe; this is delegated to his triune manifestation-Brahma, Vishnu, and Siva -who are respectively emblematical of the creating, preserving, and destroying powers. To Brahma-except amongst a sect termed the Jaugams, who inhabit eliefly the S . of India -there is but one temple dedicated, which is situated near Ajmeer, in Rajpootana. The great bulk of the IIindoo population are Vaishnevas, or followers of Vishnu; or Saivas, votaries of Siva; besides which llivinities, a vast multitude of inferior deities are worshipped-their number amounting, according to the Brahmins, to $333,000,000$ ! Figures of a great many of these deities and their attributes are aculptured in the temples, and retained as household gods in the dwellings of the people, to receive daily adoration; and however, at first, the llindoo pantheon might have merely represented emblematically the forces of nature, and changes in material bodies, it has given rise to the most gigantic and degrading system of idolatry in the world. The temples and worshippers of Siva, the destroyer, are far more numerous than those of any other IIindoo idol; and his worship, like that of the goddess Kali or Doorga, is, at certain periods, marked by acts and sacrifices of the most brutal and savage kind. The worship of Vishnu, the preserver-which is chiefly prevalent iu

## Hindoostan

Bengal and Orissa-and that of Krishna, the representative of the sun, are unpolluted by any such barbarities. The votaries of Siva and Vishnu are distinguished by certain coloured marks on the forehead; those of the Saiva sect being horizontal, and those of the Vaishnevas perpendicular. The supremacy of the Bralimins, and the doctrine of metempsychosis, or of the transmigration of the soul, after death, into the bodies of anintals or human beings, for a long series of ages, according to the purity or impurity of previous life, are leading dogmas of the Brahminical faith. Pilgrimages to remote and holy places, penances, and offerings to the priesthood, are held in high esteem; the avoidance of impure or forbidden food, especially the flesh of the cow, and the preservation of caste, are amongst the most important moral duties enjoined on the Hindoo. In no country does the religion of the inhabitants appear so prominent, in every act, as in Hindoostan. It pervades the entire frame of civil society, and mixes itself up with every concern of life-public, private, and domestic. The whole of Indian theology is professedly founded on the Vedas, four in number, and believed by the Hindoos to have been revealed by Brahma himself; but, practically, the Pu ranas and the Institutes of Menu, compositions of later dates, and which insist more strongly on the supremacy of the priesthood, are the basis of the existing Brahminical system. Further on, will be found a few specimens from these productions, showing the spirit in which they have been composed.
The institution of caste, so characteristic of society throughout nearly the whole of India, cannot be considered entirely peculiar to that region, since prejudices of rank and position prevail even in Europe, in many curious respects, similar to those which divide the classes of the population in Hindoostan; but nowhere are such prejudices and distinctions pursued to such ramifications, and in so arbitrary and often merciless a manner, as in that portion of the globe under consideration. In the outset, the Ilindoos are divided into four great classes or castes-the Brahmins, or sacerdotal class; the Kshetriyas, warriors and rulers; the Vaisyas, capitalists, traders, and farmers; and the Sudras, labourers, artizans, and menial servants. 'These divisions are heredi tary, impassable, and indefeasible.' The three first classes are termed 'twice born,' and are fabled to have sprung respectively from the mouth, the breast and arm, and the thigh of Brahma, while the Sudras, at an immeasurable distance below the rest, are deemed only 'once born, and to

have sprung from the foot of the divinity. But, in addition to the foregoing, there are a vast number of subdivisions constituting so many different castes, originating in intermarriages of the four great orders, or dependent on the employments, trades, or professions they pursuc-some of which (as indeed in Europe), are held to be much more honourable and worthy than others; and, in addition, a very large number amongst the population, particularly in certain districts, are
outcasts, or of no rank whatever; and some are so utterly abominable that a Bralmmin is defiled by coming within their sladow! Purity of caste is incapable of acquisition; and the Mahratta chieftain, besides others who, at various times, have

hindoo weaver and windea of thread.
From Solvyns' Costune of lliudoostan
acquired sovereign dominion, have been still held to be no more than Sudras, or of the servile class. The Bralimins are regarded as greatly superior to the rest of the population, and are distinguished by wearing a certain cord termed the 'thread;' they may engage in warlike or literary pursuits, and some others are held not derogatory to their dignity; but they are mostly attached to the pagodas, and live by giving instruction, or on the alms of the charitable and devout. The following passages will denote what obsequious reverence the Brahmins claim for their order:-'A Brahmin, whether learned or ignorant, is a powerful divinity.'-(Institutes of Menu, vol. ix., pp. 316, 317.) 'Those excellent Brahmins who are guilty of such crimes as theft, are offenders against themselves, not others. Brahmins are masters of the Kshetriyas, Vaishyas, and Sudras ; they are masters of one another, and to be worshipped, being earthly gods.'- (Padma Purana, ch. $\mathbf{x x}$.) 'Whatever exists in the universe is all in effect, though not in form, the wealth of the Brahmin, since the Brahmin is entitled to it all by his primogeniture and eminence of birth. . . The Bralımin eats but his own food, wears but his own apparel, and bestows but his own in alms. . . He alone deserves to possess the whole earth.'-(Ibid.) A remarkable section of the religious orders is formed by the fakeers or mendicant monks. They dress in rags, and live in filth and perpetual poverty on the alms of the faithful; practise on themselves the most unheard-of descriptions of ascetic tortures; perform pilgrimages; pretend to the gift of prophecy; and, though held in high vencration by the mass of the people, they are of the most abandoned habits, and the greatest of Hindoo cheats and deceivers. The military profession is held to be nearly as honourable as the sacerdotal; the Vaisyas or mercantile classes are regarded with much less consideration. Contrary to the opinion commonly entertained, there is nothing to prevent the son of a potter from becoming a worker in metals, or the son of a washerman from becoming a weaver; but occupations usually depend on hereditary descent. Thus, amongst the mixed castes, the Vaidya, whose function is medical, is the son of a Brahmin by a woman of the Vaisya class; the Vaideha is the descendant of a Vaisya father and a Brahminical mother, and his business is to wait on women; the Vena, the offspring of a Vaideha and a Vaidya, is a musician; the Abhira, descended from a Brahmin and a Vaidya, is a cowherd; and the Kayastha, born of a Vaisha and a Sudra, is a writer. Agricultural employments are generally held to be creditable, as are ordinary trades, except those of fishermen,

## HINDOOSTAN

curriers, and others having to do with animals and animal products; as also those which are concerned with spirituous liquors, which are abstained from by the pure castes. Burners of the dead, and public executioners, are held to be wholly impure ; and basket and mat makers, in some districts, as that of Patna, for instanee, are considered so despicable that they are not allowed to enter the villages. With all these finedrawn diversities of rank and respectability, the division into superior and inferior castes is not attended in Ilindoostan with any feeling of humiliation on the part of the latter. Every caste, and subdivision of a caste, forms a little distinct society in the general community. Its members enjoy the sense of equality among themselves, whilst their position, in all respects, towards the other members of the general community, is determined before their birth. The divine origin of castes being universally admitted, there is no ground for personal animosity. The members of the higher castes feel no malice or pity for, but rather indifference towards, those of the lower, nor the latter any envy or hatred of the former. Each caste has peculiar notions of purity and uncleanness by which their manner of living and gencral conduct is regulated; and men of all castes are found serving together, with equal discipline and efficiency, in the ranks of the Anglo-Indian armies. Degradation of caste follows the use of forbidden food, and the eating, drinking, or intermarrying with persons of a lower caste (which, it may be said, is, in a minor degree, the case even in Europe.) To avert the penalties of such intermarriages, the Jharejahs of Cutch, and the Rajpoot military tribes, continue to destroy a great number of their female children soon after birth. Such are a few of the peculiarities of the social system of the IIindoos. It cannot be wondered at that, with a debasing superstition, and institutions that have oppressed and split its people into a multitude of unsympathizing sections, India, with a vast population and abundant resources, should have been, during all its history, the prey of one invader after another.

The institution of caste, thus arbitrarily stereotyped upon the Hindoos, has produced a multitude of monstrous anomalies which pervade the whole framework of society in India. In one caste, and one alone, the females are permitted to cohabit, or form matrimonial alliances with Europeans; from another caste, a certain proportion of the females, regarded as incapable of marriage, are contributed to be brought up as bayaderes, nutch, or dancing-girls in the Brahminical temples,

where they minister to the appetites of the priesthood. Some of the population, following the destinies which their descent has marked out for them, have become illustrious as thieves, highwaymen, or professional assassins, without thereby losing considerationor respeet from their compatriots. Anongst these, the Thugs have been the most conspicuous; they are roblers, united by religions or superstitious ties, who mainly subsist by strangling and plundering travellers; their secret practice of murder excited the interference of the British government,
by which it is believed that Thuggee, in the territories under its control, has been nearly extirpated. The Hindoos mostly burn their dead, but some, like the aboriginal tribes, practiso burial ; in other castes, the dead are consigned to the waters of the Ganges, or other rivers ; and in some districts, as Bahar, according to IIamilton, persons when about to die are turned into the open air, and exposed to any weather. Slavery is very general, as is inheritance by adoption. On the Malabar coast, in S.W. India, sovercignties, property, \&c., descend in the female line, so that not a man's own children, but his sister's, or those of his nearest female relative, become his heirs. But despite of all sorts of incongruities in the Hindoo social system, the internal government of the villages and communities is remarkable for its perfect organization and adaptation to the requirements of the people-(see indiaBritisn). India is, in fact, a land of contradictions; and the most childlike inanity and consummate wisdom, are to be met with in its institutions, side by side.

Other Forms of Religion, Nations, \&c.-Buddhism, which now prevails over all Central and E. Asia, appears to have originated in Hindoostan, but it is now all but extinct there. Various traces, however, exist of its former supremacy, especially at Buddha-Gaya, in Bahar, in the cave temples of India, and even at the temple of Juggernaut, which is resorted to by vast numbers of Brahminical pilgrims, but within the precincts of which no recognition of caste exists-a distinguishing characteristic of the Buddhist faith. (For an account of Buddhism, see Tibet.) The Jains, a numerous seet, inhabiting the W. part of the peninsula, especially Gujerat, Candeish, \&c., are supposed to have been an offset of the Buddhists at the time that Buddhism was extirpated in Hindoostan ; they, also, do not recognize caste, and, with the addition of worshipping a small number of deified saints, their form of religion presents some striking similarities to that of Buddhism. The Seik or Sikh religion is confined to the Punjab and adjacent territories; it is an heretical form of the Brahminical religion, which originated in the I5th century, and its chief characteristics are perhaps the intolerance of its followers, and their perfect abstinence from eating the flesh of the cow (see Punjab). The Mahometans, who form about one-fifteenth of the entire population of India, are of Afghan, Persian, Toork, Belooch, and Arabic origin, being the descendants of the numerous invaders who have entered Hindoostan from the N.W. since the commencement of the 11 th century. Singular to say, they are not most numerous around Delhi, Agra, \&c., which were the chicf seats of the Moslenı empire in India; but in many parts of Bengal, which was at the extremity of that dominion, they constitute the majority of the inhabitants; and the same is the case in various parts of the Deccan. Of the sovereign states they established, the principal now existing is that of Hyderabad or the Nizam. At Bombay, Surat, \&c., Parsees are numerous; they are the descendants of the ancient Persians, expelled from the table-land of Iran at the Mahometan conquest of Persia, and preserve the worship of fire and the sun, with other ancient customs, in great purity: they are mercantile, industrious, often learned, and many of them are amongst the opulent individuals in India. In the S. of the peninsula are a great number of native Christians; in many localities they predominate, in point of numbers, over the rest of the population, particularly on the coasts, where they are chicfly engaged in fishing and maritime traffic. They are partly Nestorians, or of the Syrian church, the doctrines of which appear to have been introduced into India in nearly the earliest ages of Christianity; and partly I. Catholics, especially on the Coromandel coast. Abyssinians in Gujerat, Armenians, Jews, Tartars, some Malays, and Europeans of various nations, with a considerable number of native descendants of Portuguesa settlers, make up nearly the remainder of the motley population of India. Goa, Damaun, and Diu, all in W. India, belong to the Portuguese; Pondichery, Chandernagore, and a few smaller settlements on the Coromaidel coast, to the French; and Tranquebar, on the same coast, to the Danes; but, with these exceptions-and Nepaul and Bootan, states which are still independent, as well as Buddhist-the whole of India is substantially under the British dominion.

History.-The Assyrians under Semiramis, and the Persians under Darius, are said to have penetrated into the N.W. part of this region, but the information we have respecting their
expedition thither is very fragmentary; and the earliest details giving any connected account of Hindoostan, are those by the historians of Alexander. This conqueror traversed the Punjab, but did not establish any permanent dominion beyond the Indus. Seleucus Nicator, one of his successors, is believed to have adranced with an army into the heart of India, against Sandracottus (Chandragupta), and he afterwards sent Megasthenes on an embassy to that sovereign, at his capital Palibothra, which is conjectured to have been either Patna or Bhaugulpoor. The Greek monarchs of Bactria appear really to have pushed their conquests into India, and subsequently the Parthians and Scythians. The author of the Periplus of the Erythrean Sea, and Pliny, give some descriptions of the W. coast of India; but from the decline of the Roman empire, a lapse of many centuries occurs before we arrive at any further authentic information concerning the countries beyond the Persian desert. The modern history of Hindoostan commences with A. D. 1000 , when Mahmoud of Ghuznee, a Mahometan sovereign, whose dominions reached from the Indian Ocean to the Caspian, made the first of his 13 successful expeditions into Hindoostan, which region he penetrated as far as Kanoje, Bundelcund, and Gujerat. In 1174 , the Ghaznevide dynasty was overturned by Mahomet of Ghore, who also invaded India on several occasions, and whose successor Cuttub, in 1215, founded the Patan or Afghan sovereignty, which had its seat at Delhi. The Patan dynasty lasted till 1525, and, during its continuance, Hindoostan suffered from the successive devastations of Jenghiz-khan and Timour. Baber, a descendant of Timour, in 1526, established the Mogul dynasty; of which, after himself, Akbar, Jehangire, Shah Jehan, and Aurengzebe, were the inost celebrated sovereigns. In the time of Aurengzebe, the Mogul dominion had reached its culminating point, and in his reign the Mahometan conquest of the Decean was achieved; but his rule was disturbed by the rise of the Mahratta power under Sevajee, and after the death of his successor Shah Allum, in 1713, the Mogul sovereignty rapidly waned into decrepitude. The Nizam, and other viceroys of the empire, then founded for themselves independent kingdoms in different parts of India, which were soon afterwards devastated by the incursions of Nadir Shah, and a fresh invasion of Afghans. Meanwhile that the foregoing dynasties ruled in Hindoostan, S. India was long the seat of several independent Hindoo sovereignties; the principal of which were Bejapoor and Bijnagur, but which were successively conquered by the Mahometans. Shortly after the fall of the Bhamenee empire of the Deccan, and 27 years before the foundation of the Mogul empire by Baber, the Portuguese under Vasco de Gama, in 1498, arrived at Calicut, which was then governed by a prince named the Zamorin. Within a short period they had possessed themselves of Goa, Diu, and other places, on the W. side of India; the trade of which coast was for a period wholly under their control. They were followed by the Dutch, who, however, nearly confined themselves to trading with India, and never made any important settlement on its soil. In the 18 th century, the French found means to establish colonies, chiefly on the E. side of India; but before the termination of that century, their progress toward domination in India was checked; and, early in the present ceutury, their influence over Indian polities and native sovereignties, was thoroughly destroyed by the British; the rise of whose power will be hereafter described in the article India (Brimish.)-(Von Orlich; Jacquemont; Hamilton, Hindoostan and E. India Gaz.; Conder, Modern Traveller; Bell ; N. British Review ; Picture of India; Crawfurd, Asiat. Researches; Journals of the Royal Asiat. Soc., and Asiat. Soc. of Bengal; Bombay and Madras Journals; Calcutta Review, 1850-51, \&c.)

HINDRINGHAM, par. Eng. Norfolk; 2990 ac. P. 721.
HING, several places, China:-1, (-Hao), a maritime tn., prov. Fokien, on a bay in the channel of Fokien, 45 m . S.S.W. Foo-Choo; with a small port, and some coasting trade.2, (-Ngin), a tn., prov. Quangtong, 175 m . N.E. Canton.3, ( $-M e$ ), a tn., prov. Quangsee, 50 m . S.S.W. Sin-Tchou.

HINGENE, a vil. and com. Belgium, prov. of, and 12 m . S.S. W. Antwerp, in a marshy district, on the Scheldt, near the confluence of the Rupel and Viet, protected from inundation by embankments. It has three churches, a magnificent castle, manufactures of linen, soap, and cordage; oil and corn mills, several breweries, and a trade in linen, corn, flax,
and hay. A good many of the inhabitants are connected with shipping. Pop. 3709.

HINGHAM.-1, A small, neat market tn. and par. England, co. Norfolk. The Town, 14 m . W. by S. Norwich, is abundantly supplied with water; has a fine chureh, chiefly in the decorated English style, and a free grammar school. Area of par., 3630 ac. Pop. 1691.-2, A small seaport and township, U. States, Massachusetts, S. side of Boston Bay, about 15 m . S.E. Boston. It has several churches, two academies, and about 80 vessels in the fisheries and coasting trade. Pop. 3564.

HINGUNGIIAUT, a large trading tn . Hindoostan, prov. Gundwana, 50 m . S. Nagpoor ; lat. $20^{\circ} 37^{\prime}$ N.; lon. $78^{\circ} 54^{\prime}$ E.

HINKSEY, two pars. Eng., Berks:-1, (North); 900 ac . P. 295.-2, (South); 550 ac. P. 153.

HINLIP, par. Eng. Worcester; 1140 ac. P. 139.
HINOJARES [anc. Traximum], a tn. Spain, Andalusia, prov. of, and $38 \mathrm{~m} . \mathrm{S} . E$. Jaen, at the foot of the sierra of same name. It has a church, courthouse, prison, and primary school ; manufactures of blue vitriol, a flour-mill, and a trade in unmanufactured esparto. Pop. 935.

HINOJOS, a tn. Spain, Andalnsia, prov. of, and 30 m . E.S.E. Huelva; with a church, a handsome townhouse, and prison; two schools, pitch ovens, several oil and flour mills, and a trade in corn and fruit. Pop. 1061.

HINOJOSA, several places, Spain:-1, (-del-Duque), a tn. Andalusia, prov. of, and 40 m. N.N.W. Cordova. It has several clean, wide, and well-paved streets; one principal, and four smaller squares; a parish church, five chapels, two convents, two primary schools, an hospital, town and session houses, a prison, manufactures of linen and woollen fabrics, soap, hats, white wax, earthenware, leather, and chocolate; and a trade in grain, vegetables, and manufactured goods. Pop. 7748.-2, (de-Duero), a tn. Leon, prov. of, and 50 m . W. Salamanca, near 1 . bank Duero; with steep streets, two squares, a parish church, townhouse, school, prison, cemetery, and manufactures of serge and coarse cloth. Pop. 1526. 3, (-de-San-Viccute), a tn. New Castile, prov. of, and 38 m W. by N. Toledo, near r. bank Alberche; with a church, townhouse, prison, school, and manufactures of silk fabrics. Esteemed wine is grown in the vicinity. Pop. 1154.

HINOJOSOS (Los), a vil. Spain, New Castile, prov. of, and $60 \mathrm{~m} . S . W$. Cuenca. It consists of the two contiguous places of Hinojoso del Orden and Hinojoso del Marquesado ; is poorly built, though the streets are level and well formed; has two churches, a courthouse, prison, and primary school ; several flour-mills, and a trade in corn. Pop. 2088.

HINSDALE, a vil. and township, U. States, New York, on the New York and Erie Railway, 287 m . W.S.W. Albany; with two churches, an academy, and several mills. P. 1937

HINSTOCK, par. Eng. Salop; 6720 ac. P. 897.

P. 797.-5, (Little), Wilts; 2230 ac. P. 324.-6, (Martell), Dorset; $1860 \mathrm{ac} . \quad$ P. 290.-7, (-on-the-Green), Gloucester; 2030 ac. P. 178.-8, (in-the-Hedges), Northampton; 2070 ac. P. $171 .-9$, (Parva or Stanbridge), Dorset; 430 ac. P. 47.-10, (St. George), Somerset; 1480 ac. P. 832.-11, (St. Mary), Dorset ; 1170 ac. P.361.-12, (Waldridge or Waldrist), Berks; 2180 ac. P. 353.

HINTS, par. Eng. Stafford; 1570 ac. P. 213.
HINWEIL, a vil. and par. Switzerland, can. of, and 15 m . S.S.E. Zürich ; with a parish church on a height, and forming a conspicuous object for a very great distance; manufactures of cotton goods, and cotton and silk mills. Near it are the Gyren baths, long known, and much frequented by the inhabitants of the district. Pop. 2729.

HINXHILL, par. Eng. Kent; 650 ac. P. 171.
HINXTON, par. Eng. Cambridge; 1503 ac. P. 382.
HINXWORTH, par. Eng. Hertford; 1440 ac. P. 328.
HIPPOLYTE (St.), two ths. France:-1, Dep. Gard, picturesquely situated at the foot of the Cevennes, near the sources of the Vidourle, 27 m . W.N.W. Nismes. It is defended by some fortifications, and is well built; has a court of primary resort, manufactures of silk and cotton hosiery, woollen stuffs, and glue; several extensive tanneries, a trade in silk and fruit, and four annual fairs. Pop. 4773.-2. Dep.

## HITZKIRCH

ITant-Rhin, 12 m . N. Colmar, on a hill of same name. It is defended by a strong castle, and contains a parish church and an hospital. Coal is worked in the vicinity. Pop. 2129.

Hirchova, or IIirsova, a fortified tn., European Turkey, prov. Bulgaria, r. bank Dannbe, 52 m . N. E. Silistria. It stands on a steep rock, at the bottom of which are the suburbs, inhabited by Wallachians and Grecks. Pop. 4000.

HIRNANT, par. Wales, Montgomery. P. 301.
HIRRLINGEN, a vil. Würtemberg, circle Black Forest, near the Starzel, 15 m . W.S.W. Reutlingen; with a church, an old castle, now used as a townhouse; a small bathing establishment, and several mills. Pop. 1517.

HIRSCHAU, several places, Germany, particularly1, A tn. Bavaria, Upper Palatinate, 37 m. N.N.W. Ratisbon; with two churches, a castle, and an old monastery ; manufactures of earthenware, and slate quarries. Jerome of Prague was arrested here in 1415, and carried off to Constance, where he was shortly afterwards burnt. Pop. 1406.-2, A vil. Wiirtemberg, circle Black Forest, on the Nagold, 21 m . W. Stuttgart; with a church, the remains of an old monastery, manufactures of spoons and morocco leather, and a worsted, paper, and other mills. Pop. 610.

HIRSCHBERG, numerous places, Germany, particu-larly-1, A tn . Prussia, prov. Silesia, gov. of, and $26 \mathrm{~m} . S . W$. Liegnitz, cap. circle of same name, beautifully situated in a valley at the foot of a mountain, l. bank Bober. It consists of the town proper, surrounded by walls with three gates, and of three suburbs; is regularly built, has a court of law, several public offices, a Protestant church, with a cemetery, in which are some curious monuments ; four R. Catholic churches, one of them a handsome Gothic structure; a gymnasium, industrial, and several other schools; a savings'-bank, arsenal, orphan, and ordinary hospital ; manufactures of linen, woollen, and cotton goods, calico, porcelain, and refined sugar ; worsted mills, bleachfields, and a considerable trade in linen, which here has its central entrepôt for the province. The environs of Hirschberg are beautiful, and furnish fine promenades. l'op. 7315.-The circle is hilly throughout, and contains very little arable land, but rears a considerable number of cattle. Area, 174 geo. sq. m. Pop. $56,069 .-2$, A tn. Rhenish Prussia, gov. of, and 10 m . N.E. Arnsberg; with a church, and manufactures of linen. Pop. $950 .-3, \mathrm{~A}$ tn., principality Reuss-Lobenstein-Ebersdorf, r. bank Saale, 9 m . E. S.E. Lobenstein ; with a castle, situated on a height ; a church, townhouse, manufactures of linen and cotton goods, hosiery, and leather, and several annual fairs. Pop. 1700.

II IRSCHBERG, or Dokzy, a tn. Bohemia, circle of, and 15 m . N. W. Bunzlan, on a large lake, in a momntainous district. It has a court of justice, a castle, a handsome church, and manufactures of chintz and calico. An old ruined castle stands on an island in the lake. Pop. 1946.

Hifsciffelidau (Mittel, Nieder, and Ober), three nearly contiguous vils. Prussia, prov. Silesia, gov. Liegnitz, circle Sagan; with a R. Catholic church, a castle, tile-works, and several mills. Pop. 1551.

IIIRSCIIFELDE, a vil. Saxony, circle of, and 26 m . S.E. Bautzen, l. bank Neisse; with a handsome church, bleachfield, and dye-works. Pop. 1551.

HIRSCHIIORN, a tn. Hesse-Darmstadt, on a hill-slope, above r. bank Neckar, at the coufluence of the Finkenbach, 9 m. E.N.E. IIeidelberg. It is finely sitnated, but poorly built; has a castle, a church, and several mills. Pop. 1694.

HIIRSIIOLM, or Hirscholy, a vil. Denmark, isl. Seeland, 14 m. N. Copenhagen; with new church, built on the site of a large and magnificent castle which had bcen erected by Christian VI., but, from a defect in its foundation, soon gave way, and was obliged to be taken down. The inhabitants live chiefly by agriculture, and have some land trade. P. 500.

H1RSHOLMEN, a group of small isls. Denmark, in the Kattegat, off N.E. coast, Jutland, bail. Hjürring, 4 m . N.E. Frederickshavn, completely covered with large boulder stones, and having so thin a soil as to be uncultivable. The inhabitants live by catching seals and fish. The largest, Hirsholm, has a church, and a lofty lighthouse. Pop. 200.

HIRSON, a tn. France, dep. Aisne, 10 m . N.E. Vervins, on the Oise; with extensive manufactures of nails, lace, and earthenware. Near it are cotton mills. Pop. 3024.

IlIRZEL, a vil. and par. Switzerland, can. of, and 12 m . S.S.E. Zürieh, in one of the most beautiful districts of the
canton. In 1443, a bloody battle was fought here between the Confederates and the Zürichers. Pop. 639.

HISINGEN, an oval-shaped isl. Sweden, formed by the two arms of the Göta-Elf, S. W. coast of län Göteborg ; greatest length, N.E. to S.W., 15 m .; central breadth abont 7 m . It forms the two districts of E. and W. Hisingen. Gottenburg was originally built upon it.

HISSA R.-1, A small Asiatic mountain state, Turkestan, N. from Budukshan and Koondooz, near the sources of the Oxus. Its cap., Ifissar or Shadman, lies about 140 m . N.E. Balkh, about lat. $38^{\circ} 20^{\circ} \mathrm{N}$.; lon. $68^{\circ} 30^{\prime} \mathrm{E}$. The territory is traversed N . to S . by a mountain range Kohitan, 4000 ft . high; it is well watered, and yiclds rice and rock salt. It is governed by an Usbek chief, and the people use a peculiar kind of saddle.-(Ritter.)-2, A ruined tn. Hindoostan, prov. of, and 105 m . W.N.W. Delhi. The ruins cover a large extent of ground; in the centre are the remains of a palace having very extensive subterranean apartments. There are also several large tanks and wells.

HISTON, par. Eng. Cambridge; 2300 ac. P. 859.
HI'T, a tı. Asiatic Turkey, r. bank Euphrates, pash. of, and 115 m . N.W. Bagdad. It contains about 1500 houses, built all round an elongated hill rising from, and parallel to the river. The honses are chicfly of clay, one or two stories high, flat-roofed, and many of them covered or repaired on the top with bitumen; the streets are narrow, dirty, and frequently steep, rising one above the other along the side of the hill, with a dusty, black appearance, owing to the smoke from the constantly boiling bitumen; the preparation of which is one of the chief employments of the place. The hill and town are inclosed by a high mul wall, with semicircular towers, but no ditch. One graceful minaret appears amid this mass of brown clay; and some respectable specimens of Arabesque architecture are displayed in some of the saints' tombs, a little way outside the town. Besides the preparation of bitumen, that of wool, and boat-building, burning lime, and making salt, are carried on.--(Chesney.)

HITA, a tn. Spain, New Castile, prov. of, and 12 m . from Gnadalajara. It is built in the form of an amphitheatre, on the side of a hill crowned by an old castle; has two parish churches, a townhouse, convent, primary school, and a trade in corn, wine, oil, cattle, wood, and charcoal. Pop. 987.

HITCIIAM, two pars. Eng.:-1, Bucks; 1370 ac. P. 267. -2, Suffolk; 4040 ac. P. 1065.

HITCIIENDEN, or IIUGHENdon, par. Eng. Bucks; 5970 ac. P. 1481.

HI'TCHIN, a market tn. and par. England, co. Ifertford. The Town, 13 m . N.W. Hertford, is irregularly laid out, but the houses are, in general, well built, and the streets spacious, partially paved, and lighted with gas. It has a handsome church, with a low massive embattled tower, surmounted by a spire; several places of worship for Dissenters, a free grammar school, Lancasterian, endowed, infant, and national schools; some benevolent bequests, apprenticeship funds, a dispensary, and a number of almshouses. Its principal trade is in corn, malt, and flour. There are several breweries, some of which are upon a large scale, and a silk-mill. Many females are employed in straw-plaiting. Market day, Tuesday. Hitchin was a place of some importance in the reign of Alfred, and formerly comprised in the Mercian territory. Area of par., 6150 ac. Pop. 6125.

H1TTEREN, an isl. Norway, off the coast of S . Trondhjem; greatest length, E.S.E. to W.S.W., $30 \mathrm{~m} . ;$ mean breadth about 12 m . A good many cattle are reared upon it, and an active fishery is carried on on its coasts. Pop., including several adjoining islets, 3685 .

HlTTERÖE, an isl. off S. coast, Norway, prov. Chris tiansand, bail. of, and nearly opposite Mandal. It has a parish church, and a fertile soil. Pop. 1158.

HITTISLEIGII, par. Eng. Devon; 1090 ac. P. 199.
HITTORF, a vil. Rhenish Prussia, gov. Luisseldorf, circle Solingen, on the Rhine; with manufactures of tobacco, and a large trade in corn, coal, and wood, which is here cut up in large quantities and exported. Pop. 1428.

HITTYIAS, a vil. Iungary, co. Temesvar, 6 m . from Kiszeto; with a Greek church. Pop. 1120.

HITZKHRCH, a vil. and par. Switzerland, can. and 12 m . N. Luzern, near the N. extremity of lakeBaldegg; with a parish church, and the buildings of a commandery of the Teutonic
order, which make a very conspicuous appearance. Much fruit, and some wine, are grown in the vicinity. Pop. 565.

HIVAOA, an isl., S. Pacific, the largest of the S.W. proup of the Marquesas; lat. (N. point) $9^{\circ} 34^{\prime} \mathrm{S}$.; lon. $139^{\circ} 4^{\prime}$ W. (R.); 22 m. long E. to W.; about 10 m. greatest breadth. Mountainous, and bearing indications of volcanic eruptions. Pop. about 6500.

HJARNÖE, an isl. Denmark, off E. coast Jutland, bail. Weile, at the entrance of the bay, and 8 m . E. by S. the tn. of Horsens. It forms a parish of same name, and has in the deep strait, which separates it from the mainland, a winter haven of the first class. Area, 4 geo. sq. m. Pop. 170.

HJELMAR, Hielmar, or Jelmar, a lake, Sweden, bordering on, and partly belonging to each of the three läns Orebro, Nyköping, and Westerås; greatest length, E. to W., about 40 m .; greatest breadth about 15 m . It receives the Svart, at its W. extremity, near Örebro, and discharges itself, at its E. extremity, by the Thorshälla, into Lake Mälar. It also communicates with this lake by the canal of Hjelmar, which proceeds from its N. shore, and is carried to the Arboga.

HJERTING, a vil. Denmark, Jutland, E. shore of Hjerting-Reveer. It carries on an active seal fishery, and, though it has no proper harbour, the roads are well sheltered, liave good anchorage, and form a kind of winter haven of the fourth class, with from 10 to 15 ft . water. A considerable export, particularly of oil and tallow, takes place here. Pop. 400.

HJORRING, a tı. Denmark, Jutland, bail. of same name, 29 m . N. by E. Aalborg. It is an old place, has frequently suffered from fire, and is now improving in condition. It has an iron foundry, but its inhabitants are chiefly agriculturists; a few are engaged in shipping. Pop. 1800. Area of bail., the most N. in Jutland, 820 geo. sq. m. Pop. 67,800.

HJORTOE, a small isl. Denmark, S. of isl. Funen. The inlabitants live by fishing and agriculture.

H'LASSA, cap. Tibet. See Lassa.
HLBOKE-Feisö, or Hornyo, a vil. Hungary, co. Trentschin. It is a straggling place, in a mountainous district, and has a R. Catholic church. Inhabitants, Slowacks. Pop. 2598.

HLINSKO, a tn. Bohemia, circle of, and 15 m . S.S.E. Clirudim, traversed by the Chrudimka. It has a large modern church, a townhouse, and a superior school ; mannfactures of linen and earthenware, tileworks, several saw, and other mills. Pop. 3264.

HO-Kien, a tn. China, prov. Chihle, in a plain between the Tac-ho and the Hou-to-ho, 102 m . S.S.W. Pekin. It is one of the largest towns in the province, and is surrounded by lofty walls; but the houses, in general, have no great appearance. It has a kind of college.

HOAI-Ho, a river, China, formed by the numerous streams which rise in prov. Honan, flow S.E. and E.S.E., and unite in prov. Ngan-hoei. Thence the stream flows E.N.E. to prov. Kiang-soo, where it falls into lake Hong-tse. Total course about 400 m .

HOANG-Ho, or Yellow River, a large river, China, the sources of which are in mountains in the Koko-Nor territory, N. from Tibet, about lat. $34^{\circ} 30^{\prime}$ N., and lon. $97^{\circ} 30^{\prime}$ E. Its course is exceedingly devious. After flowing in all directions, excepting towards the $S$. , through a winding course of several hundred miles, it proceeds nearly due N. to about lat. $41^{\circ}$; then $E$. for nearly 200 m. , when it suddenly bends round, and flows directly S. for about other 200 m . ; then turns abruptly E., and finally discharges itself into the Yellow Sea, in lat. $34^{\circ}$ N., long. $119^{\circ} 30^{\prime} \mathbf{E .}$; after a course of about 2280 geo. m., although the distance, in a direct line, from its source to its mouth, is only 1150 geo. m . It is a turbid, furious, and impracticable stream, and is but little used by the Chinese for navigation. From its frequent floods, the cities on its banks -including Lanchoo, Poo, and Kaifong-are in constant danger of being submerged; to prevent which, and other damage, great expense is incurred in maintaining artificial embankments. In its progress, the IIoang-Ho receives fewer tributaries than any other large river in the world, except the Nile. The principal are-the Hoei-ho and Lo-ho, in prov. Shense; the Fuen-ho, in Shansee; aud the waters of the lake Hong-tse, in Kiangsoo, about 60 m . above its outlet, where it is crossed by the Imperial Canal. It derives its name from the vast quantities of yellow mud held in a state of solution by its waters.

HOATH, par. Eng. Kent; 1660 ac. Pop. 394.

HOATHLY, two pars. England, co. Suesex :-1, (East); 2000 ac. Pop. 607.-2, (West); 4420 ac. Pop. 1095.

HOBART' TOWN, or Hobarton, cap. of Tasinania or Van Diemen's Land, S.E. side of the island, r. bank Derwent; lat. $42^{\circ} 54^{\prime}$ S.; lon. $147^{\circ} 28^{\prime}$ E.; occupying a commanding and extremely picturesque position, at the head of a sheltcred bight, called Sullivan's Cove, about 20 m . from the sea. It

covers from 1 to $1 \frac{1}{2}$ sq. m. of gently rising ground, backed by an amphitheatre of lofty and well-wooded hills. The streets cross each other at right angles, are airy, pretty wide, and some of them macadamized; those, however, that are not are much cut-up by the constant transit of carts and cattle. The principal streets are lined with excellent houses and handsome shops. The more modern buildings are chiefly of brick, or a dark-coloured freestone; the older principally of wood. The public edifices are numerous, and some of them liandsome; particularly the churches, of which five belong to the Church of England. There are, besides the Presbyterian churches, various chapels and meeting-houses belonging to different denominations, a R. Catholic chapel, and a Jewish synagogue. The other more remarkable public buildings are-the government-house, female house of correction or factory, the military and prisoners' barracks, custom-house, commissariat stores, police-office, colonial hospital, \&c. The manufactories comprise breweries, tanneries, foundries, timber-mills, flourmills, coach-building, cabinet-making, and ship-building; the last now become an extensive occupation. The liarbour is excellent, and well-adapted for trade. The tide is irregular ; rising at times 7 ft . or 8 ft , but usually only 4 ft . or 5 ft . Along the water's edge is a spacious wharf, at which vessels of the largest burden may lade or unlade. On either bank of the Derwent, both above and below the town, are numerous beautiful villas and agricultural farms. Hobart Town was founded in 1804. Pop., tn. and dist., (1843), 37,088.

HOBKIRK, par. Scot. Roxburgli; 11 m . by 3 m . P. 776 .
HOBOKEN, a vil. and com. Belgium, prov. of, and 4 m . S. Antwerp, r. bank Scheldt, with manufactorics of chicory, three breweries, a flour and a malt mill. Pop. 2488.

HOBRO, a tn. Denmark, Jutland, bail. of, and 16 m . N.N.W. Randers, at the W. extremity of the Mariager-fiord.

It has a church, a townhouse, and a winter-haven, of the fifth class, with 7 ft . water. Pop. (agricultural), 1000.

HOBY, par. Eng. Leicester; 1060 ac. P. 392.
HOCH-WESELY, or Wesely, a market tn. Bohemia, circle of, and 7 m. N. W. Bidschow, in a valley, l. bank Cydlina, with a castle, chureh, townhouse, school, court of justice, and a trade in linen, yarn, and cattle. Pop. 992.

HOCLIBERG, a vil. Bavaria, Lower Francenia, dist. Würzburg, with a R. Catholic parish chureh and a school. Pop. 1148 .

IIOCHFELDEN, a vil. France, dep. Bas-Rhin, 13 m. N. W. Strashurg, with madler and plaster-mills. P. 2558.

HOCHIIEIM, a th. Nassan, cap. bail. of same name, on a gentle slope fronting the S., and descending gradually to r. bank Main, on the Taunus Railway, 4 m. E.N.E. Mainz. It has a parish church, and a deanery, now a summer residence of the Duke of Nassau, and is famous for its wine; the best of which is grown in vineyards, through which the railway passes, immediately S. of the chureh. From this winc, called in Germany Hochheimer, is derived the English name $I T o c k$, applied indiscriminately to the wines of the Rhine, Main, \&c. Pop. 2270.

HOCHKIRCH, a vil. Saxony, circle of, and 6 m . E.S.E. Bautzen, with a church and sehool. It is memorable as the spot where, in 1758 , the Prussians, under Frederick the Great, were surprised during the night by the Austrians, under Marshal Daun, and lost 100 cannon and 9000 prisoners. Marshal Keith, a Scotchman, and one of Frederick's best generals, was killed, and is buried in the chureh, where a monument has been erected to him.

HOCLISPEIER, a vil. Bavaria, Palatinate, near Kaiserlantern, with a parish charch, and a trade in wood. P. 1332.

IIOCIIST, two places, Messe-Darmstadt:-1, A vil., prov. Starkenburg, l. bank Münling, 20 m . E.S.E. Darmstadt, with a church, courthouse, tile-works, and several mills. Pop. $1320 .-2$, A vil. Oberhessen, circle Friedberg, on the Nidder, with a Protestant church, and a castle, with a small picture-gallery, a cabinet of coins, and library of nearly 50,000 volumes. Pop. 539.

HÖCIS'T, a tn. Nassau, cap. bail. of same name, on the Main, 14 m. E.N.E. Wiesbaden, with manufactures of woollen and linen eloth, some shipping, and trade. Pop. tn., 1800 ; bail., 17,081 .

HOCIS'TID'T, several places, Germany :-1, A market tn. Hesse-Cassel, prov. of, and 5 m . N.W. Hanau. It is walled, flanked with towers, and has tile-works and a trade in wine. Pop. 793.-2, (Ober and Nieder), two nearly contiguous vils. Bavaria, Palatinate. They contain a I'rotestant and a R. Catholic chureh, and a courthouse. Pop. 1757.

HOCIISTADT, or Wisowks, a tn. Bohemia, circle of, and 29 m . N.E. Bunzlau, built almost entirely of wood, with a parish chureh, townhouse, and school ; flax, and other mills, and a trade in yarn. 1'op. 1604.

IIÖCHs'l' $A^{\prime} D^{\prime} T$, several places, Bavaria, particularly:1, A tn. circle Upper Franconia, l. bank Aisch, here crossed by a bridge, $20 \mathrm{~m} . \mathrm{N} . N . W$. Niumberg, with two churches, a castle, and hospital ; potash works, saw, and other mills. Pop. 1713.-2, A tn., circle Swabia, l. bank Danube, 23 m . N. W. Augsburg, with a court of justice, castle, two churches, a Capuchin hospitium, hospital ; and a trade in corn and cattle. Several great battles have been fought near it. The most memorable is that of Blenheim, in 1704 ; when the French and Bavarians, under Marshal Tallard and the Elector of Bavaria, were signally defeated by Marlborough and Prince Engene, with a loss of $40,000 \mathrm{men}, 120$ pieces of cannon, and 300 standards. Pop. 2460 .

HOCISTETTEN (Geoss), a vil. and par. Switzerland, can. of, and $10 \mathrm{~m} . \mathrm{S} . E$. Bern, well built, with a handsome parish church. Pop. 4453 .

IIOCKENDORF, a vil. Saxony, circle of, and 15 m . N.N.E. Dresden, with manufactures of linen, saw, oil, and flour mills, sone trade, and a silver mine. Pop. 780.

HOCKENIIEIM, a vil. Baden, circle Lower Rhine, 10 m. S.W. Ifeidelberg, with two churches, and numerons brewerics. Many of the inhabitants are engaged in cutting turf, in which there is a considerable trade. Pop. 2555.

IIOCKERING, par. Eng. Norfolk; 1980 ac. P. 457.
HOCKER'TON, par. Eng. Nottingham; 1510 ac . P. 136. HOCKHAM, par. Fing. Norfolk; 3860 ac. I'. 644 .

Vol. I.

HOCKIIOCKING, a river, U. States, Ohio, which, after a S.E. course of 80 m ., falls into the Ohio, at Troy, 25 m . below Marietta. It is navigable for boats 70 m ., and affords good water-power.

HOCKLFY, par. Eng. Essex ; 3460 ac. P. 850.
HOCKLIFFE, par. Eng. Bedford; 1370 ac. P. 435.
HOCKWOLD-cum-Wilton, par. Eng. Norfolk; 7400ac. Pop. 949.

HUCKWORTHY, par. Eng. Devon; 1970 ac. P. 369.
HODDAM, par. Scot. Dumfries; 5 m. by $3 \frac{1}{2} \mathrm{~m}$. P. 1627.
HODDESDON, a market tn. England, co. of, and $4 \frac{1}{4} \mathrm{~m}$. S.E. Hertford, consisting principally of two long streets, well lighted. It has a small townhall and police station, with a clock-tower; a commolious and neat church, Independent chapel, Friends' meeting-house, a national and British school, a practical school of agriculture, and an extensive brewery. The ancient inns of Hoddesdon are alluded to by Prior and Izaak Walton. Pop. 1743.

HODEIDA, or Modida, a seaport tn. Arabia, on the Red Sea, 100 m . N. Mocha. It is of considerable size, has a fine appearance, from its numerous and conspicuous domes, minarets, and mosques; houses generally well built ; market well supplied with articles of comfort and luxury.

HODGES'TON, par. Wales, Pembroke; 709 ac. P. 75.
HODIMONT, a vil. and com. Belgium, prov. of, and 18 m. E. Liége, on the Vesdre, so near Verviers as to be properly only one of its suburbs. It has extensive manufactures of woollens and acids, a foundry, a brewery, a cotton, a fulling, and numerous worsted mills. Pop. 2680.

HODNE'T, par. Eug. Salop; 13,920 ac. P. 2185.
HODONY, a vil. IIungary, Thither Theiss, Banat, co. Temesvar, about 4 m . from Kis-Betskerek, with a Greek church. Pop. 1369.

HODSAK, or ODsak, a market tn. Hungary, Hither Danube, co. Bacs, in a beautiful valley, 14 m . from Zombor, with a R. Catholic church. Pop. 3110.

IIOE, par. Eng. Norfolk; 1610 ac. P. 220.
HOEDIC, an isl. France, dep. Morbihan, opposite the mouth of the Vilaine. It has no proper harbour, but is defended by a small fort. Some corn is grown upon it. The inhabitants are mostly fishermen. Pop. 250.

HOEI, numerous cities and tns., Chinese empire, includ-ing:-1, (Hoci-Ngan), prov. Kiangsoo, 100 m . N.N.E. Nankin, on the Imperial Canal, and near r. bank IIoang. IIo. It is surrounded by a triple wall, and is a place of great bustle and activity.-2, (Hoci-Ning-Tching), Chinese Turkestan, 15 m . N.E. Ili, with a garrison of 1900 men. -3 , (Hoei-Tchou), prov. Quangtong, on an affluent of the Cauton river, 75 in . E. Canton. It is well built, and has some fine edifices, with a bridge of 40 arches across the river. Articles of shell are manufactured, and there is an active trade.-4, (Hoci-Tong), prov. Quangtong, E. coast isl. Hainan, 50 m . S. Kiung-chau-fu. It has extensive but thinly inhabited suburbs. The walls of the town are high, the streets paved, and narrow; and the houses built of red brick. Pop. about 44,000 .

HOE1-IIo, a river, China, provs. Kansoo and Shense, forming the principal affluent of ILoang. Ho or Yellow River; which it enters in lat. $34^{\circ} 45^{\prime}$ N., 75 m . E.N.E. Si-Ngan.

HOEKSCHE-waAMD (DE), an isl. Holland, prov. S. Holland; bounded, N. by the Old Maas, E. by the Dortsche-kil, S. by Hollands-diep, and W. by the spui. It includes sixteen parishes, is fertile, and has a pop. of 22,000 .

HOELLALIOL, a vil. Iudian Archipelago, S. coast isl. Ceram; with a school, and 400 inhabitants, all Christians.

HOEN-IIo, a river, China, prov. Chihle, which joins the Peiho, at T'ien-Sing, 70 m . S.E. Pekin, after a S.E. course of about 300 m . Principal tributaries, the Tae-IIo and IIouto- Ho.

HOEVLAKEN, a vil. IIolland, prov. lielderland, 14 m . S. W. Harderwijk; with a court of justice, a chureh, and school. Pop. 742 .

HOEYLAER'T, a vil. and com. Belgium, prov. Brabant, on the Yssche, ricar the forest of Soignes, 7 m . N.E. Brussels. It has a brewery, a flour-mill, a limestone quarry, and limekilns; but the greater part of the inhabitants are employed in agriculture, or in liewing wood in the forest. Pop. 2181.

HOEITIAINEN, a lake, Russian Finland, near the centre of circle Kuopio; greatest length, N. to S., 30 m .; greatest breadth, 12 m . It communicates, at the $\mathrm{S} . W$., with lake Winijarvi.

154

HOF.-1, A tn. Bavaria, Upper Franconia, cap. dist. of same name, l. bank Saale, and on the Saxon and Bavarian Railway, 28 m. N. N. E. Baireuth. It is a regularly built, clean town; has a court of law and several public offices, four Protestant churches, a gymnasium, Latin, agricultural, and industrial schools; a poorhouse, hospital, and orphan asylum; manufactures of woollen, linen, and cotton cloth; several breweries and mills, and a general trade. Marble is quarried, and ironstone mined in the vicinity. P.8049. Area of dist., 84 geo. sq. m. P. 14,442.-2, A market tn. Lower Austria, circle Manhartsberg, on the Leitha hills, above the Leitha. The inhabitants live chiefly by agriculture, and have a little transit trade. Near it are the ruins of the old castle of Sharfenegg. Pop. 1285.-3, (or Dworec), A tn. Moravia, circle of, and $30 \mathrm{~m} .$, N.E. Olmuitz, with a church, and a trade in linen. Pop. 2457.

HOFFENHEIM, a vil. Baden, circle Lower Rhine, 21 m. S.S.E. Manheim, with a church. Pop. 1494.

HÖFFLEIN, or HöFFLEın-bEi-Bruck, a vil. Lower Austria, on the Leitha, near Bruck. It is poorly built, and contains a parish cliurch. Pop. 1110.

HOFGEISMAR, a tn. Hesse-Cassel, Niederhessen, cap. circle of same name, in the valley of the Esche, 14 m . N.W. Cassel, on the railway thence to Hanover. It is walled, has four gates, two parish churches, and handsome barracks; sugar-works, and a paper-mill. Near it are chalybeate thermal springs, with a bathing establishment, but not much frequented. Pop.tn., 3503 ; circle, $38,869$.

HOFHEIM, several places, Germany:-1, A tn. Bavaria, circle Lower Franconia, on the Aurach, 39 m. N.E. Wuirzburg, with a church, potash works, a gypsum quarry, and two mills. Pop. 850.-2, A vil. Hesse-Darınstadt, prov. Starkenburg, near the Rhine, 16 m . S.W. Darmstadt, with a R. Catholic church, and a trade in tobacco, which is extensively grown in the vicinity. Pop. 1270.-3, A vil. Nassau, on the Guldenbach, 10 m . N.E. Mainz. It is walled, has a church, and an iron, and several other mills. Near it, on a wooded height, is a chapel, to which numerous pilgrimages are made. Pop. 1471.

HÖFLEIN (Gross), or Nagx HÖflein, a market tn. Hungary, co. of, and 10 m. N.W. Ödenburg, with a R. Catholic church. Pop. 1321.

HOFSTADE, a vil. and com. Belgium, prov. E. Flanders, on the Dendre, 18 m . E. Ghent. It has extensive manufactures of linen and yarn, a hemp, and several oil and flour mills. Pop. 1910.

HOFTEREN, an isl. Norway, off the coast of S. Bergenhuus, $20 \mathrm{~m} . \mathrm{S} . \mathrm{S} . \mathrm{W}$. Bergen; length, N. to S., 12 m. ; mean breadth, about 4 m .

HOFVA, a vil. Sweden, län Skaraborg, 18 m . N.E. Mariestad, in the forest of Tived; with a market, and some trade.

HOFWYL, a vil. Switzerland. See Hofweil.
HOG ISLAND.-1, An isl. Flores Sea, off S. extremity of isl. Celebes; lat. $6^{\circ} 10^{\prime} \mathrm{S}$. ; lon. $120^{\circ} 22^{\prime}$ E. (r.) - 2 , An isl. N.W. coast Sumatra ; lat. (N. point) $2^{\circ} 50^{\prime}$ N.; lon. $95^{\circ} 40^{\prime}$ E.; 40 m . to 50 m . long, and 9 m . to 12 m . broad; high, hilly, and covered with trees, and may be seen 30 m . off.- 3 , An islet group, Bay of Honduras ; lat. (N.E. one) $15^{\circ} 59^{\prime} \mathrm{N}$. ; lon. $86^{\circ} 28^{\prime} \mathrm{W}$. (R.)-4, A group of islets, off S. W. coast Ireland, co. Kerry, near the mouth of Kenmare river, 3 m . W. Lambhead.-Hoghead, a headland, forming the N. W. entrance of same river.

HÖGANÄS, a vil. Sweden, län Malmö, near the N.E. entrance of the Sound, $37 \mathrm{~m} . \mathrm{N}$. Copenhagen. It depends chiefly on the coal-mines, which are worked to some extent in its vicinity; but has also glass-works, manufactures of firebricks, and a fishery.

11OGE, a small isl. Denmark, off W. coast Schleswig, bail. and 16 m. W.S.W. Bredstedt. The inhabitants, about 180, rear some cattle, but are chiefly sailors and fishermen.

IIOGGESTON, or Hogston, par. Eng. Bucks; 1250 ac. Pop. 204.

HÖGLAND, an isl. Russia, Gulf of Finland, about 24 m . off the coast; lat. $60^{\circ} 6^{\prime} 18^{\prime \prime} \mathrm{N}$. ; lon. $26^{\circ} 58^{\prime} 30^{\prime \prime}$ E. (R.); greatest length, about 6 m ., and breadth about 1 m .; steep and rocky surface, with a few intervening spots laid out in gardens and pasture. The inhabitants, about 350, are chiefly fishermen and pilots. A number of dangerous shoals surround the island, and two lignts have been erected upon it.

HOGNASTON, par. Eng. Derby; 1270 ac. P. 272.
HOGOLEU ISLANDS, a group, Caroline Archipelago, Pacific Ocean, about lat. $7^{\circ} 20^{\prime} \mathrm{N} . ;$ lon. $151^{\circ} 50^{\prime} \mathrm{E}$. The largest is about 10 m . in circumference. The natives are treacherous, and affect a friendly disposition only to deceive.

HOGSHAW, par. Eng. Bucks; 1030 ac. Pop. 50.
HOGSTHORPE, par. Eng. Lincoln; 2870 ac. P. 790.
HOGUE (Cape la). See Hague (Cape la).
HÖGYESZ, a market tn. Hungary, Thither Danube, co. of, and 17 m. N.N.W. Tolna, with a R. Catholic church, a castle, and a trade in tobacco, wine, and fruit. Pop. 3070.

HOHENAU, or Hochenav, a market tn. Lower Austria, near l. bank March, here crossed by a long wooden bridge, 12 m. S.E. Feldsberg, with a church, and a celebrated breeding stud belonging to Prince Liechtenstein. Pop. 1557.

HOHENBRUCK, or Trzebochowhce, a tn. Bohemia, circle of, and 8 m . E. Königgrätz, on both sides the Diedina, here crossed by a covered wooden brilge. It has two churches, townhouse, hospital, and school; tile-works, and a saw, and other mills. Pop. 2231.

HOHENELBE, or Hochelbe [Latin, Albipolis], a tn. Bohemia, circle Bidschow, on both sides the Elbe, here crossed by three covered bridges, at the point where the river leaves the narrow valley of the Hochgebirge, and enters that of the Vorgebirge, 18 m . N.E. Gitschin. It has an ancient deanery church, with a massive tower; a castle, now used as a courthouse; a school, two hospitals, a printfield, and manufactures of cotton and paper. Pop. 3257.

HOHENEMS, a market tn. Tyrol, Vorarlberg, at the foot of a hill of same name, crowned by the ruins of an old castle, not far from the Rhine, 10 m . S. Bregenz, with a castle, church, and manufactures of ribbons; tile-works, a worsted-mill, and a much-frequented sulphur bath. P. 2346.

HOHENFURT, or Wyssebrod [Latin, Altovadum], a market tn. Bohemia, circle of, and 25 m . S. Budweis, r. bank Moldau, at its junction with the Dirnau. It has a chureh, townhouse, and Cistertian abbey; a bleachfield, and several smithies and mills. Pop. 1042.

HOHENHAMELN, a vil. Hanover, landrostei, and 9 m . N.N.E. Hildesheim, with a Protestant and a R. Catholic church. Pop. 1031.

HOHENHASLACH, a vil. Wiirtemberg, circle Neckar, on a hill, 18 m. N.N.W. Stuttgart, with a church. Good wine is grown in the vicinity. Pop. 1348.

HOHENLEUBEN, a market tn. Reuss-Schleiz, on the Leube, 15 m. N.W. of Schleiz; with a castle, church, and school; manufactures of linen, woollen, and cotton goods; dycworks, and a trade in cattle. Pop. 2200.

HOHENLINDEN, a vil. Upper Bavaria, 20 m . E. Munich; memorable as the scene of the battle in which the Austrians, under Archduke John, were signally defeated by the French, under Moreau. This battle forms the subject of a fine lyric by Campleell.

HOHENLOHE, a principality, Germany, now mediatized, and, with exception of a small part in Bavaria, included in the circle of Jaxt in W uirtemberg. The princes of Hohenlohe derive their descent from Everhard of Franconia, brother of Conrad, first king of Germany; and their name from an old castle, the ruins of which still exist, near the village of Hohlach, about $4 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Uffenheim. The first prince, Crato, lived in the 9 th century.

HOHENMAUTH, or Wysoke Meyto, a tn. Bohemia, circle of, and 15 m . E. Chrndim, on the Lanczna, and a station on the railway from Prague to Olmiitz. It consists of the town proper, surrounded by dilapidated walls, flanked with towers, and of three suburbs; contains a large square, two churches, one of them a large and handsome structure; a townhouse and barrack; and has several mills, a trade in cattle, a weekly market, and six annual fairs. Pop. 4623.

HOHENS'IADT [Moravian, Habrzeh], a tn. Moravia, circle of, and 26 m . N.W. Olmiitz, on the Zasawa, and the railway to Olmütz ; with a castle, which once belonged to the Templars; a church, school, and hospital. Pop. 1494.

HOHENSTAUFEN, a vil. W ürtemberg, circle Dannbe, 27 m. N.N.W. Ulm. It is overhung by a conical height, crowned by the ruins of an old castle, the cradle of the family of Hohenstuafen, from which several of the emperors of Germany were descended; and contains a very ancient church, with a pgrtrait of the Emperor Barbarossa. Pop. 1106.

HOHENSTEIN, or Hohnstein, two tns. Saxony:-1, Circle of, and 10 m. N.E. Zwickau, on the slope of a lofty hill. It centains a handsome church, and a poorhouse; and lias manufactures of woollen and cotton goods, flannel, and hosiery; dye-works, tile-works, spinning-mills, a chalybeate spring, and three annual fairs. Pop. 4670.-2, Circle of, and 18 m . E.S.E. Dresten, cap. bail. of same name, on a height above I. bank Polenz; with the remains of an old castle, a court of justiee, and manufaetures of linen. Pop. tn., 994 ; bail., 27,295 .

HOHENSTEIN, or Olstrneb, a tn . Prussia, prov. E. Prussia, gov. of, and 78 m . S.S.W. Königsberg, on the Amelang; with a court of justice, a castle, chureh, and a trade in cattle. Pop. 1270.

IIOHENTIIINGEN, a vil. Würtemberg, circle Danube, $40 \mathrm{~m} . \mathrm{S} . \mathrm{W} . \mathrm{Ulm}$, with a R. Catholic church. In 1799, it was more than once taken by the French and burned. P.410.

HOHENWESTEDT, a vil. Denmark, Itolstein, bail. of, and 15 m . S.S.W. Rendsburg; an ancient place, and at one time of considerable importance. It has a church, manufaetures of linen, and an annual fair. Pop. 1169.

HOHENZOLLERN, a territory in the S.W. of Germany, consisting of a long, comparatively narrow, and very irregular tract, and constituting two contiguous, but independent principalities; bounded, N., E., and W., by Würtemberg, and S., and partly W., by Baden:-
I. Hohenzollern-Heehingen, a prineipality, forming the twenty-seventh member of the Germanic Confederation; the more N. of the two ; area, 90 geo. sq. m . ; is almost wholly situated between the Hernberg and the Rough Alp, and lias a very rugged, and even mountainous surface-several of the summits exceeding the height of 2660 ft . Between the hills, a number of small valleys intervene, and are drained by small afluents of the Neckar; but the climate is generally severe, and the soil by no means fertile. Where practicable, however, it is well cultivated; and, where the plough cannot be used, there is much excellent pasture-land, on which great numbers of eattle are reared. The minerals are of little value, and are chiefly confined to building-stone, limestone, and potters'-clay. Manufactures are not much advanced; but some woollens are made, and a good deal of worsted and cotton is spun. The government of HohenzollernHechingen is a constitutional monarchy. As a member of the Germanic Confederation, it has a vote in the plenum, and shares a vote in the minor diet with Hohenzollern-Sigmaringen, Liechtenstein, Waldeck, Reuss, Lippe-Detmold, and Lippe-Schaumburg. Its contingent to the Confederation is 145 men. Its capital is IIechingen; besides which, there are several small villages. Pop. 20,143.
II. Hohenzollern-Sigmaringen, a prineipality, forming the twenty-ninth member of the Germanic Confederation; the more N. and larger of the two ; area, 266 geo. sq. m.; is situated partly on the Rough Alp, and partly in the valley of the Danube, which crosses it W. to E., and within it receives the Lauchart, and other small afluents. A small portion in the N. is drained by affluents of the Neckar; and henee part of the great watershed, which divides Europe inte two great basins, is formed in this principality. The surface is, in general, very mountainous, and is intersected by only a few narrow valleys. The best part of it is in the $S$., on the $r$. bank of the Danube; elsewhere, the climate is severe, and the soil of a stony and ungrateful nature. Agriculture, however, forms the principal employment; and, being conducted with considerable skill and industry, grain is produced sufficient, in ordiary years, to meet the home consumption. The minerals include bog iron-ore, bituminous coal, gypsum, limestone, rock-salt, and fullers'earth. A considerable part of the higher ground is covered by wood, chiefly pine. Manufaetures have not made much progress; but there are several iron works, and numerous oil, saw, and other mills; breweries and distilleries. The government is a constitutional monarchy. As a member of the Germanie Confederation, Ho-henzollern-Sigmaringen has a vote in the plenum; and takes the lead of several other small principalities in sharing the sixteenth rote in the minor diet. Its capital is Sigmaringen; besides which, there are several other small towns and villages. 1'op. 35,560 .

IIÖIIR, a vil. (iermany, duchy Nassan, bail. Montabaur; with manufactures of water-jugs, plates, and numerous other
articles in earthenware; more especially botiles for Seltzer water. Pop. 1171.

HÖHSCHEID-wrif-Merscheid, a township, RhenishPrussia, gov. of, and 17 m . E. Duisseldorf, circle 'Solingen; with extensive lead-works, and numerous forges, which are employed chiefly in supplying the Solingen factories. Pop. 11,395.

HOHW ACHT, a vil. Denmark, N.E. coast IIolstein; with a harbour and fine roadstead, the latter having 15 ft . to 20 ft . water. Exports-grain; imports-coals from England, and timber from Sweden. Numerous herses, sent from the Danish islands to the IIolstein markets, are landed here.

HOIER, originally Hötuer, a vil. Denmark, Schleswig, bail., and 8 m. W.N.W. Tondern, on the Seiersbek, near where it falls into the month of the Widane, or rather the Ruttebiiller canal; in whieh it has a dock, with from 8 ft . to 9 ft . water. It has a ehureh, a custom-house, and some shipping trade; bnt the chief employments are agrieulture and cattle-rearing. Höier is protectel by a strong outer embankment. P. 1000.

HOJA-Jamote-Ka-Gote, a vil. Beloochistan; lat. $26^{\circ} 13^{\prime}$ N.; lon. $66^{\circ} 55^{\prime}$ E. The place itself is insignificant, consisting only of about 40 huts, made of mats; but has attracted attention from its having been aseertained that there are rich lodes of copper in its vicinity. Ores of antimony, lead, and silver, are also reported to be abundant.

IIOKIANGA, a broad river, New Zealand, in the N. isl., W. coast. It flows S.S.W., and enters the sea in lat. $35^{\circ} 30^{\circ}$ S., 115 m . N.N.W. Auckland.

HOLABRUNN (Ober), or Holeilsdorf, a market ta. Lower Austria, on the Göttersbach, in a valley, covered with vineyards. It has a square, adorned with a fountain and statue; a handsome church, infirmary, and poorhouse; and a considerable trade in corn and wine. Pop. 2688.

HOLAR [Danish, Holum], a tn. Ieeland, on the N. of the island, near the Skager-fiord. It is a very aueient place, and was once the see of a bishop, foundel in the beginning of the 12th eentury. It still possesses its cathedral, and has a sehool and a printing-press.

HOLBEACH, a market tn. and par. England, eo. Lineoln. The rown, 37 m. S.S.E. Lincoln, in a low marshy district, about 5 m . from the sea, las a large and handsome chureh, a Wesleyan chapel, a free sehool, and an hospital for 15 poor persons. Market day, Thursday. Area of par., 20,240 ae. 1'op. 4637.

IIOLBECK, a vil. and ehapelry, England, co. York (W. Riding), in the bor. of, and $1 \frac{1}{2} \mathrm{~m}$. S.S.W. Leeds; with a handsome chapel, several Dissenting plaees of worship, extensive mills for spiming flax and thread, works for construeting steain-engines, and all kinds of machinery, and other important manufaetories. Pop. (1851), 14,152.

IIOLBEK, a seaport tn. Denmark, isl. Seeland, cap. bail., and on a fiord of same name, forming an arm of the lsefiord, 33 m . W.N.W. Copenhagen. It contains a parish church, formerly belonging to a inonastery; a school, and a townhouse; and has a distillery and a harbour, which forms a good winter haven, of the fourth class, admitting vessels drawing 9 ft . to 10 ft ., and at which a considerable trade, chiefly in corn, is carried on. In early times, Holbek was one of the most important towns in the kingdom, and possessed a strong castle, demolished by the Swedes, in 1659. Pop. tn. 2300. Area of bail., 438 geo. sq. m. Pop. 73,200.

HOLBETON, par. Eng. Devon; 4800 ac. P. 1120.
HOLBROOK, par. Eng. Suffolk; 1720 ac . P. 747.
hoLCAR, or llolkai's Dominions. See Indorf.
HOLCOMBE, three pars. England :-1, Semerset; 60 n ac. P. 468.-2, (Burnell), Devon; 1890 ac. I. 306.-3, (Rogus), Devon; 2750 ac. P. 843.

HOLCOT, par. Eng. Northampton; 1670 ac. P. 456.
HOLCUT, par. Eng. Bedford; 1000 ae. P. 62.
HOLDENBY, par. Eng. Northampten; 1790 ac. P. 187.
IIOLDENIIU RST, par. Eng. Hants; 7320 ac . P. 905.
HOLDERNESS, a dist. England, co. York (E. Riding), occupying the S.E. projection of the co., which terminates at the mouth of the llumber. It is remarkable for its fertility, and possesses a soil suitable to every purpose, either of arable or stoek husbandry.

HOLDFAST BAY, S. Australia, Gulf of St. Vineent, en. Adelaide, about 55 m . N. Cape Jervis. It is merely an open roadstcad, exposed to the S.W. gales; which are by far
the most violent that blow on the eoast of Australia. A treinendous sea runs into the anchorage during a S.W. storm.

HOLDGATE, par. Eng. Salop; 2840 ac. P. 224.
holeschowitz, or Hollesowice, a vil. Bohemia, circle Rakonitz, l. bank Moldau, 2 m . from Prague; with a school, manufactures of calico, and a trade in wine. P. 1001.

HOLFORD, par. Eng. Somerset; 250 ac. P. 185.
HOLGUIN, a to., isl. Cuba, dep. Oriental, 50 m . N.N.W. Santiago ; lat. $20^{\circ} 40^{\prime} \mathrm{N}$. ; lon. $76^{\circ} 10^{\prime} \mathrm{W}$. ; the eentre point of a sugar-growing district. Pop. 4199.

HOLICS, or Holitsch, a market tn. Hungary, Hitler Danube, co. Neutra, 1. bank March, 3 m . S.W. Szakolcza; with a Protestant and a R. Catholic church, a synagogue, and a magnificent imperial palace; manufactures of stoneware, and a fine breeding stud. Pop. 4333.

HOLITZ, or Neu Holitz, a ti. Bohemia, eircle of, and 11 m. N.E. Chrudim. It is almost entirely built of wood; has a parish chureh, townhouse, and school. A battle was fought here, in 1758, between the Prussians and the Imperialists. Pop. (agricultural) 3424.

holland (New). See Australia.
HOLLAND, two pars. Eng. Essex:-1, (Great);2220 ac. P. 481.-2, (Little); 740 ae. P. 75.

HOLLAND (Parts of), a dist. England, one of the three portions into which the co. Lincoln is divided. It occupies the S.E. part of the co. round the Wash, and consists almost entirely of low, marsl, and fen-land; the marsh being the portion nearest to the sea, and the fen that which lies more inland. It is principally included within what is called the Great Level of the Fens, being defended from the sea, and from the overflowing of the rivers, by immense embankments.

HOLLAND (Kingdon of), the name usually given, in this country, to the kingdom of the Netherlands. Though now, strictly speaking, only applied to the provinces of N. and S. Holland-(see next article) -this name was associated with that kingdom for four years (1806-1810), under the rule of Louis Bonaparte. The kingdom of Holland, during that time, included nearly all the territories composing the present kingdom of the Netherlands, together with part of Hanover and the duchy of Ollenburg See Netherlands.

HOLLAND, the most important and interesting portion of the Low Countries, now included in the kingdom of the Netherlands, and divided into two provinces, N. and S. Holland. It lies between $51^{\circ} 40^{\prime}$ and $53^{\circ} 10^{\prime} \mathrm{N}$. lat., and $3^{\circ} 36^{\prime}$ and $5^{\circ} 30^{\prime} \mathrm{E}$. lon.; and is bounded, W. and N., by the German Oeean; E. by the Zuider Zee, provs. Utrecht and Gelderland; and S. by the Maas and its estuary-one branch of which, the Grevelinge, separates Holland from Zeeland. Its length. N. to S., is about 85 m. , or 110 m ., including the islands of Texel and Vlieland, N. of the Zuider Zee; and its breadth, at its S. limit, about 45 m ., decreasing towards the N.; area, about 1954 sq. m., of which 1074 belong to S. Holland. The line of demareation between the two provinces crosses the S . angle of the lake of Haarlem, and winds, in a very sinuous course, near the parallel of $52^{\circ} 15^{\prime}$. N. Holland, the smaller, but more densely-peopled province, was formerly called W . Friesland, and is still so denominated in some public doeuments; though Friesland, properly so called, lies wholly on the E. side of Zuider Zee.

Holland is altogether a flat and depressed tract, sinking, N. and W., towards the German Ocean; consequently, N. Holland is lower than the S. provinee, and some portions of it-as Waterland, Kennemerland, and Purmerland-are, partially at least, below the level of the sea. A broal margin of downs or sandhills, often 180 ft . high, extending along the coast from the mouth of the Maas to the Helder, protects this low country from the waves of the sea, and cheeks the encroachments of the element to which it owes its origin. Where this natural embankment ceases, the work of man begins; and dykes, raised by the persevering toil of ages, along the remaining shores of the German Ocean, on the W., and those of the Zuider Zee, on the E., in a winding line of more than 100 m ., save the green fields from the devastation threatened by the waters that roll above. The sand-hills of Holland are supposed to gain slowly in extent and stability by the gradual retirement of the sea; but they are liable to
sudden and unaccountable changes. The Dutch, taught by experience, are ever on the watch to secure every spot as soon as it is raised above the waters by casual deposition. Holland was originally a series of banks of sand or mud, exposed to inundation from the Rhine, and other rivers, as well as from the sea; and thus exhibited a succession of slimy marshes and barren sands. But patient industry, by raising dams against the sea and rivers, has converted the waste into a smiling garden. These dams or dykes form the characteristic and most remarkable feature in the Dutch landscape; being generally about 30 ft ., in some cases 60 ft ., in height, and sometimes planted with rows of trees, between which run the canals and roads of the country. Wind-mills, the office of which is to pump the redundant water from the inclosed land or polder into the eanal, are constant accompaniments of the dykes.

The rivers of Holland are:-In the N. province, the Vecht, Amstel, Zaan, Spaarne, Gein or Gaya, Gasp, Diem, and KorteDiem or Slochter-most of these, however, are but sidecanals from the Zuider Zee, or Rhine; in S. Holland, the Rhine, with its numerous branches; the Leck, Linge, Merwede, Ijssel, Gouwe, and Rotte. Several lakes still remain in N. Holland; as the Haarlem, Wyker, Naitrder, Horster, Leg, Lange, and Uitgester lakes. In N. Holland 43 lakes have been drained-in S. Holland, 40; but it is said that the increase of peat-bog in the still-remaining morasses nearly keeps paee with the work of reclamation.

Two-thirds of the population are Protestants of varions sects-the Calvinists and Mennonites (Anabaptists) predominating; the rest are R. Catholics and Jews, to the number of 25,000 . The public schools, in 1849 , were 951 , attended by 114,829 pupils; and are carefully watehed by the provincial administration. The University of Leyten maintains its longestablished reputation, and boasts of a matehless museum of natural history. The hospitals, as well as schools, of Holland, are well endowed; and 37,000 poor are maintained by public charity.

Holland is the most populous part of the kingdom; and, indeed, with respect to density of population and the development of industry of every kind, it is one of the most remarkable countries in the world. The entire population is ( 1850 ), $1,049,019$; of which number 562,354 belong to the larger-that is, the S. province; and 476,665 to the N. province. Yet the density of population is greater in N. Holland, where there are about 520 inhabitants to the square mile; but this density of population, in a country of polders, closely interlaced with dykes, rivers, and eanals, becomes intelligible, when it is considered that the small territory of N. Holland reckons, besides numerous goodly villages, 11 towns-namely, Alkmaar, Amsterdam, Edam, Enkhuizen, Haarlem, Hoorn, Medemblik, Monnickendam, Purmerend, Weesp, and Zaardam; while the S. province has 13-Brielle, Delft, Dordrecht (Dort), Gorinchem (Gorkum), Gouda, Leyden, Maassluis, Rotterdam, Schiedam, Schoonhoven, S'Gravenhage (the residence of the king), Vlaardingen, and Woerden.

HOLLAND-Preussich, a tn., E. Prussia, gov. of, and $55 \mathrm{~m} . \mathrm{S}$. W. Königsberg, cap. circle of same name, on a height above the Weetzke. It has a court of justice, several public offices, a Protestant parish church, a chapel, old castle, and hospital; manufactures of woollen and linen eloth; and bark, walk, and flour mills. Pop. 3465.-The clrcle is flat, and generally fertile. Area, 255 geo. sq. m. Pop. 35,400.

HOLLANDS-dief, the inner part of the estuary of the Waal, Holland. It separates provs. S. Holland and N. Brabant; and, flowing W. from the Biesbosch, for about 14 m ., divides into the Haringyliet and the Volke-rak, which inelose the island of Over-flakke.

HOLLESCHAU, or Holleschow, a tn. Moravia, circle of, and 18 m . N. Iradiseh, on the Russawa; with a deanery church, a fine castle, a townhouse, three chapels, a synagogue, and a trade, chiefly in the hands of the Jews, in wax, honey, hides, and wool. Pop. 4589.

HOLLFELD, a tri. Bavaria, circle Upper Franconia, 12 m. E. Bamberg, with two churches, two chapels, an hospital, and a trade in cattle. Pop. 1048.

HOLLIDAYSBURG, a tn., U. States, Pennsylvania, 118 m . W.N.W. Harrisburg; with five churches, five schools, and two printing-offices. Pop. 1896.

HOLLINGBOURN, par. Eng. Kent; 4860 ac. P. 1300.

HOLIINGSTED'T [formerly Hyllingsteda], a vil. Denmark, Schleswig, bail. Gottorp, l. bank Treene, here crossed by a long bridge, 12 m . W.S. W. Schleswig. It was, in early times, a place of considerable importance, and carried on a consitlerable trade with England. The spacious old warehouse [Stapelhaus] now forms the church. The W. part of the celebrated wall called Damnewerk, terminated on tho Treene, near Hollingstedt.

HOLLINGTON, par. Eng. Sussex ; 2290 ac. P. 386.
HOLLUM, a vil. Holland, prov. Friesland, S.W. end of isl. Ameland, consisting of well and regularly built one-story houses. It has a Calvinistic chureh, two Baptist mectinghouses, a school, and a large store for stranded goods. Pop. (fishermen and seamen), 16.5 .

HOLLYM, par. Erg. York (E. Riding) ; 3350 ac. P. 373.
HOLLYMOUNT, a tn. Ireland, co. Mayo, $14 \frac{1}{2} \mathrm{~m}$. S. by E. Castlebar; with a handsome parish church, several schools, a dispensary, market-house, and police barrack. Pop. (agricultural), 454.

HOLLYWOOD, a tn. and par. Ireland, co. Down. The Town, agreeably situated on the E. shore of Belfast Lough, 5 m. N.E. Belfast, has an ancient church, with a handsome spire; two Dissenting mecting-houses, and several schools. It is a constabulary police, and a coast-guard station. Pop. 1532 . Area of par., 8064 ac . Pop. 5045.

HOLLYWOOD, twopars. Irel.:-1, Wicklow; 18,383ac. P. 2770.-2, Dublin; 3998 ac. P. 1022 .

HOLM-Lacy, par. Eng. Hereford; 3310 ac. P. 369.
HOLME, par. Scotland, Orkney; 9 m . by 4 m . P. 866 .

P. 222.-9, (Upon Spald-ing-Moor), York (E. Riding); 10,820 ac. P. 1509 .

HOLMER, par. Eng. Hereford; 3110 ac. P. 628.
HOLMES Hole, a scaport vil., U. States, Massachusetts, 89 m . S.S.E. Buston; with two churches. It has a safe, commodious harbour, and several fishing vessels. Pop. 600.

HOLMES'TRAND, a maritime tn. Norway, bail. Jarlsberg and Jaurvig, in the gulf, and 33 m . S. W. Christiania. It has an old wooden church, two schools, a brandy distillery, and a tobacco work. Retail trade and shipping are the main occupations, but there is no proper harbour. P. (1845), 1746.

HOLMFIN'TII, a manufacturing vil. and dist. Eugland, co. York (W. Riding). The viliage, $6 \frac{1}{2} \mathrm{~m}$. S. by W. Iluddersfied, on the stream of same name, in a beautiful valley, sheltered by lofty hills, is somewhat irregularly laid ont; houses built of sandstone; supply of water ample. It has a commodious townhall, a handsome church, and chapels for Independents and Wesleyans; a national school, and a mechanics' institute. Woollen cloth, plain and fancy, extensively manufactured. On Febriary 5, 1852, about 100 lives were lost, and property to a vast amount destroyed, by the bursting of the retaining dam of an immense reservoir, 3 m . above the town; the water of which supplied motive-power to many of the factories in the valley, and which, rushing out with overwhelming force, swept before it trees and cattle, houses and factories. Pop. 13,400.

HOLMON, or Golma, an isl. Sweden, gulf of Bothia, 20 m . E. Umeả ; lat. $63^{\circ} 40^{\prime} \mathrm{N}$. ; lon. $21^{\circ} \mathrm{E}$. It belongs to the Quarken group.

HOLMPA'TRICK, par. Irel. Dublin; 2131 ac. P. 3152.
HOLMP'TON, par.Eng. York(E. Riding); 1290ac. P.197.
IIOLMS (Tine), two sinall isls. England, Bristol Channel, Flatholm, the most $N$. being about 2 m . N. by E. Steepholm, and having a bright fixed light 156 ft . above water-level, in lat. $51^{\circ} 22^{\prime} 36^{\prime \prime} \mathrm{N} . ;$ lon. $3^{\circ} 7^{\prime} \mathrm{W}$.

HOLMSLAND, an isl. Denmark, Jutland, in the N. of the Kingkjobing ford, about $1 \mathrm{~m} . \mathrm{N} . \mathrm{N}$. W. the tn. of Ringkjöhing. It forms two parishes. Area, 6 geo.sq. m. P. 1800.

IlULNE, par. Eng. Devon; 2040 ac. P. 394.
IIOLNES'I', par. Eng. Dorset; 1970 ac. P. 139.
HOLSTEBRO, a tn. Denmark, N. Jutland, bail. of, and 24 m . N.E. Kingkjöbing, on both sides of the Molstebro or Stor; with a church, and several annual fairs, chiefly for horses and cattle. Pop. 1300.

HOLSTE[N (Duchy of) [Latin, Holsatic], a prov. Denmark, bounded, N. by the Baltic and duchy of Schleswig, from which, with exception of a small tract of land, it is separated by the Vider, and the Schleswig-Holstein Canal ; E. by the Baltic and territory of Liibeck; S. by Liibeck, duchy of Lauenburg, and territory of Hainburg; S.W. by the Elbe, separating it from Hanover; and W. by the N. Nea or German Ocean. Its shape, though irregular, may be regarded as that of a triangle, the apex of which is at Hamburg, while the base lies on the N.; greatest length, W. to E., 95 m . ; greatest breadth, 69 m. ; area, 2476 geo. $\mathrm{sq} . \mathrm{m}$. The surface of Holstein, in geological formation, is cretaceous; and, ir general appearance, very much resembles that of the duchy of Schleswig. The central part consists of a large open plain, covered, for the most part, with sandy heaths, but presenting occasional patches of rectaimed arable land, and not unfrequent tracts of bog and low meadow flats. The W. coast generally, as well as the banks of the Elbe, consist of marsh land, little raised above sea-level, and not protected, like the W. ceast of Schleswig, by chains of islands which break the force of the waves, but lying completely exposed to their devastating effects. Hence it has become necessary to protect the coasts with strong and lofty dykes. The E. coast, and a considerable part of the interior behind it, are finely undulated, and present numerous tracts, where fertile corn-fields, and richly-wooded knolls, in which numerous lakes lie embosomed, unite in forming enchanting landscapes. The highest points in the duchy oceur in the N.E., but only attain, in their loftiest peak, lungsberg, a height of 500 ft . They are generally of a swelling rounded form, and occasionally exist as isolated hills. The Elbe and the Eider skirt the frontiers of Holstein. The proper rivers of the duchy are the Trave and the Stor, which, rising in the same central plateau near each other, take opposite courses, and proceed, the former to the E., and the latter to the W. coast. The two principal lakes are the Plïn and Seelent, both in the N.E., and both abundantly supplied with fish. The elimate of Holstein differs much according to the locality, and the nature of the surface. On the elevated grounds of the centre, and on the E. and S. sides, the air is clear and salubrious; in other quarters, it is overcharged with humidity. The localities where fens and marshes prevail are decidedly unhealthy. The vegetable productions include all the ordinary cercal, leguminous, root, and fibrous crops. On the E. side of the duchy, wheat of excellent quality is grown. In ahnost every quarter, potatoes may be regarded as a staple article of produce. It is estimated that arable land occupies rather more than $\frac{1}{2}$ of the surface; marshland not quite $\frac{1}{7}$; moorland and pasture $\frac{1}{1}$; woodland $\frac{1}{1}$; and heath $\mathrm{I}_{1}^{1}$. Great attention is paid to the rearing of stock. Grass land is managed with a skill which almost rivals that of the best English graziers; and both the horses and horned cattle of Holstcin have long been famous. Sandstone, limestone, gypsum, clay, and a little salt, are the only minerals wrought. Neither manufactures nor trade have made much progress: the chief locality of both is Altona. Almost all the inhabitants are of German origin, use only the German language, and are so decidedly German in all their feelings, habits, and tendencies, that the question of severance from the Danish government has not only been mootel, but arms have been taken up, and battles fought, by which the general peace of Enrope has been more than once scrionsly endangered. Holstein, though belonging to Denmark, forms one of the states of the German Confederation ; and, in conjunction with the duchy of Lamenburg, gives the Danish sovereign one vote at ordinary meetings, and three votes in the plenam. The capital is Gliickstadt ; but Altona is the largest town, besides being one of the chief places of commerce in Denmark; Kiel and Renilsburg are also important towns. For administrative purposes, it is classed under the separate heads of -1 , Towns; 2, Amts or bailiwicks; and 3, Conventual districts and lordships. Of the first there are 14; of the second 21 ; and of the third, three conventual districts and nine lordships. Pop. 479,350.

HOLS'IE1N'TIIOR, a vil., forming properly a suburb of Liibeck; with a school, various manufactures, a bleachfield, and three mills. Pop. 1:00.

HOLSTON, a river, U. States, Tennessce, which unites with the Clinch at Kingston, to form the Tennessee. It is navigable 70 m ., and near its sources are valuable salt works.

HOLSWORTHY, a market tn. and par. England, co. Devon. The Town, 36 m . W. by N. Exeter, nearly surrounded by the Derril, is compaet and well built ; has an ancient ehureh, two Dissenting chapels, a national, and other schools, and several eharities. Weekly markets on Wednesday and Saturday; three annual fairs ; and numerons great markets for eattle and sheep. Pop. 834. Area of par., 8870 ac. Pop. 1850.

HOLT.-1, A market tn. and par. England, eo. Norfolk. The town, $21 \mathrm{~m} . \mathrm{N} . \mathrm{N} . W$. Norwieh, is pleasantly situated on rising ground, strects straight, paved, and lighted with gas; houses neatly built of brick and stone. It has an Established ehurch, several Dissenting ehapels, a Friend's mecting-house, a slire-lall, free grammar-school, founded in 1554 , and endowed in 1556 , by Sir John Gresham, a native of Holt, and founder of the Royal Exchange, London, and Gresham College; a ehurch, national, British, and infant schools. Area of par., 2950 ae. Pop. (agricultural), (1851), 1723.-2, A par. Woreester; 2930 ac. Pop. 557.-3, A par., parl. and municipal bor., N. Wales, co. of, and 29 m. E.S.E. Denbigh. The nonovait, though anciently a place of some note, is now only an inconsiderable village, situated on an eminence on the 1. bank Dee. The church is a handsome old edifice, with a square embattled tower. There is one Dissenting place of worship, and several schools. Arca of par., 2726 ac. P. 1634.

HOL'T, or Yermaloff, an isl. Pacifie Ocean, Low Arehipelago; lat. $16^{\circ} 20^{\prime} \mathrm{S}$. ; lon. $143^{\circ} 6^{\prime} \mathrm{W}$. (r.) It is very low, encloses a lagoon, produces some cocoa-nut trees, and is sometimes inhabited by a few families.

IIOLTBY, par. Eng. York (N. Riding); 850 ac. P. 146.
HOLTEN, a tn. Rhenish Prussia, gov. of, and 21 m . N. Duisseldorf, on the IOltenroder. It is built in the form of a cross; has two ehurehes, manufactures of linen cloth and muslin, and a trade in eattle. Pop. 910.

HOLTON, six pars. Eng.:-1, Oxford; 1680 ac. P. 289. -2 , Somerset; 1520 ac. P. 700.-3, Suffolk; 1130 ac. P. 541.-4, (Beckering), Lineoln; 1700 ac P. 191.-5, (-le-Clay), Lineoln; 1530 ac. P. 263.-6, (St. Mary), Suffolk; 1340 ae. P. 187.

HOLVERSTONE, par. Eng. Norfolk; 480 ac. P. 37.
HOLWAN, a ruined city of antiquity, Persia, prov. Irak-Ajemi, near the sources of the Diyalah, 130 m . N.E. Bagdad. Major Rawlinson has identified the ruins of Holwan, with those of the ancient city of Calah ; lat. $34^{\circ} 30^{\prime} \mathrm{N}$. ; lon. $45^{\circ} 15^{\prime} \mathrm{E}$.

HOLWELL, two pars. Eng.:-1, Bedford; 650 ac . P. 182.-2, Dorset; 2330 ae. 1. 397 .

HOLWERD, a maritime vil. Holland, prov. Friesland, 6 m . N.W. Dockum. It is an old place, and has a kind of harbour, used by small vessels; but fishing, formerly actively carried on, is now wholly given up, the inhabitants following agrieulture. It has two ehnrches, a sehool, a distillery, and a eorn mill. Pop. 1741.

HOLY-Cross, two pars. Eng. :-1, (and St. Giles), Salop; 14,680 ae. P. 1742.-2, (Westgate Without), Kent; 100 ac . P. 1020 .

## HOLY-Rhood, par Eng. Southampton. Pop. 2036.

HOLY ISLAND [ane. Lindisfarne], an isl. N.E. coast, England, co Durham, 9 m. S.E. Berwiek-on-Tweed; lat. (castle) $55^{\circ} 40^{\prime} 12^{\prime \prime} \mathrm{N}$. ; lon. $1^{\circ} 47^{\prime} \mathrm{W}$. (n.) It is $1 \frac{1}{2} \mathrm{~m}$. from the mainland, with which it is conneeted by a narrow neek of sand, traversable by foot passengers at low water, but dangerous without a guide. It is of an irregular form, about $3 \frac{1}{2} \mathrm{~m}$. in length, and about $1 \frac{1}{2} \mathrm{~m}$. in breadth at the broadest part; the N.W. diminishing to half a mile. The N.W. part of the island consists ehiefly of barren soil and sand hills, and is overrun with rabbits. The S.E. end terminates in a perpendieular rock, 60 ft . high, crowned by a small fort or castle. The cultivatable soil is fertile, producing excellent erops of corn, turnip, \&c. Limestone and iron ore abound, and eoal, also, has been met with. On the W. coast are some curious eaves, the largest extending 50 yards inwards from the entranee; and also the small, but finely-situated village of Lindisfarne, now much resorted to by summer visitants. The inhabitants are chiefly engaged in fishing, and in taking lobsters, which are sent to the London market. Close by the village is a small harbour.

The ehief objeet of interest here is the celebrated ruined abbey of Lindisfarne, 'a solemn, huge, and dark-red pile' of great antiquity; which. thouglı frequently plundered for
the erection of houses in the village, are still magnificent and are now secured from further dilapidation by their pro prietor. The length of the chureh is about 138 ft ., and its breadth 36 ft ; the style of arelitecture somewhat resembles that of Durham eathedral. 'The arehes are, in general, strictly Saxon ; and the pillars which support them, short, strong, and massy. In some plaees, however, there are pointed windows, which indicate that the building has been repaired at a period long subsequent to the original foundation.' The exterior ornaments of the building, being of a light sandy stone, are much wasted. Area of par., 3320 ae. Yop. 809.

HOLY TRINITY, several pars. Eng.:-1, Dorset. Pop. 1145.-2, Dorset. Pop. 769.-3, Surrey. Pop. 1376.-4, Warwick; 2420 ac. Pop 12,207.

HOLYBOURNE, par. Eng. Hants; 1150 ac. Pop. 522.
HOLYCROSS, a vil. and par. Ireland, co Tipperary. The village, $3 \frac{7}{4} \mathrm{~m}$. S.W. Thurles, r. bank Suir; has the parish chureh and a R. Catholic chapel. Near it are the ruins of Holycross abbey, founded in 1182, by Donald O'Brien, King of Limerick ; one of the finest remains of the pointed style of architecture in Ireland. Area of par., 8138 ac. P. 3446 .

HOLYHEAD [Welsh, Caer-Gybi, 'The Fortress of Cybi '], an isl., parl. bor., seaport tn., and par. N. Wales, co. Anglesea. The island, which is about 7 m . long and 5 m . broad at the widest part, is situated off the W. side of Anglesey, with which it is connected by a long eauseway over a channel fordable at low water. It is mostly a barren rock, ending in the N. in a huge headland of serpentine, presenting, in some parts, immense perpendieular preeipices, in others magnifieent caverns, excavated by the action of the waves. N.W. of the head, on two rocks called the N. and S. stacks, are two revolving lights, visible 20 m . distant. The S . stack is connected with the head by a handsome suspension bridge, extending over a chasm 90 ft . wide, through which the sea roars and boils with great impetuosity. Area of par. which oceupies its N. end, 3000 ac . Pop. 3689 .-The Town is on the N.E. side of the island; lat. (pier light) $53^{\circ} 20^{\prime} \mathrm{N}$. ; lon. $4^{\circ} 37^{\prime}$ W. (R.), 67 m . W. Liverpool. It is irregularly built, but eontains many good houses, has a handsome parish church, several Dissenting chapels, a national, and British sehool, a library, and savings-bank. There are no manufactures, but shipbuilding and rope-making are carried on to some extent. From its advantageous sitnation, Holyhead has been seleeted as the principal station of the post-office packets for conveying the mails to Dublin, from which it is 69 m . distant. The harbour is formed by a pier 900 ft . in length, having, at the head of the latter, a depth of 14 ft . at low water during ordinary tides, and a handsome lighthouse; on the land side is a triumphal arch of Anglesey marble, ereeted to commemorate the landing of George IV. in 1821. Holyhead is also one of the places selected, by Government, at which to form a harbour of refuge. The Chester and Holyhead Railway company have an extensive terminus here. A submarine electrie telegraph was laid down across the ehannel from Holyhead to Howth, on Jure 1, 1852. Pop. 2974.

HOLYTOWN, a mining vil. Seotland, co. Lanark, 13 m . E. by S. Glasgow. Near it are extensive eoal and iron works. Pop. 900.

HOLYWELL, a market tn., municipal and parl. bor. and par., N. Wales, eo. Flint, on a declivity near the S. shore of the estuary of the Dee, 14 m . S. W. Liverpool, with a station on the Chester and Holyhead Railway. 1t has one prineipal street, and two smaller; the former tolcrably straight, the latter the reverse. In wet winter weather, the streets are excessively dirty. The houses are of brick, and of very indifferent construetion. The town is lighted with gas, and supplied with water, ehiefly from the celebrated St. Winifred's well. It has a parish ehureh, a plain structure, with a square embattled tower; nine Dissenting, and one R. Catholie ehapel, and a Mormonite meeting-house; several minor schools, a dispensary, and savings-bank. The prineipal manufacturing establishments in the town and vicinity, are flour and flannel mills, copper-works, white and red lead works, a shot tower, employing from 200 to 300 hands. Near it are several productive mines of lead, zine, copper, and coal, and an extensive limestone quarry, from which many thousand tons are shipped annually to various parts of England. Holywell is a contributory parliamentary borough to Flint. Area of par., 8500 ac . Pop. 10,834.

HOLYWELL cum Needing worti, par. Eng. Huntingdon: 3290 ac. Pop. 959.

HOLYWOOD, par. Scot. Dumfries; 10 m . by $1 \frac{1}{2} \mathrm{~m}$. l'op. 1061.

HOLZENÖE, an isl. Norway ; lat. $60^{\circ} 34^{\prime} \mathrm{N}$.; and lon. $5^{\circ} 10^{\circ}$ E., 8 m . N.N.W. Bergen; greatest length, N.E. to S. W. 15 m .; mean breadth about 3 m .

HOLZEMME, a river, Prussian Saxony, which rises anong the lofticst of the IIarz Mountains, flows N.E. past Halberstadt, and joins l. bank Bode, a little below Gröningen, after a course of about 30 m .

HOLZGERLINGEN, a vil. Würtemberg, circle Neckar, $11 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. stuttgart, with a Protestant church. Near it is the castle of Kaltencek. P'op. 1638.

HOLZMINDEN, a tn. Brunswick, cap. circle of same name, on the N. extremity of a spur of the Sollinger forest hills, above r. bank Weser, 55 m . S.S.W. Brunswick. It is well built, has two churches, a synagogue, a gymnasium, and several schools; manufaetures of flamnel and hosiery, important iron and steel works, several mills, one of them for cutting paving stones, which are largely exported; and a trade in iron and linen. P. 3409. Area of circle, 239 geo. sq. m. P.44,443.

HOLZTHALLEBEN, a vil. Germany, principality, Schwarzburg-Sonderhausen, 12 m . W. Sonderbausen, with a church and several mills. P'op. 1147.

HOMBEECK, a vil. and com. Belgium, prov. of, and $15 \mathrm{~m} . \mathrm{S}$. Antwerp, on the Seme, and on the railway from Malines to Termonde. It has manufactures of linen, two breweries, an oil and a flour mill, and a trade in linen, corn, flax, and foggage. Pop. 1825.

HOMBERG, two tus. Germany :-1, Hesse-Darmstadt, prov. Oberhessen, r. bank Olmn, at the foot of a hill crowned by a castle, 16 m . E.S. E. Marburg. It is walled, has two churches, an hospital, and quarries of sandstone and basalt. 1'op. 1692.-2, IIesse-Cassel, prov. Niederhessen, cap. circle of same name, on the Efze, 22 m . N. Cassel. It is walled, has a church, normal school, hospital, and castle, situated on a height, with a well about 480 ft . deep. Manufactures of woollen and linen cloth, ordinary and white leather, cutlery, and paper, a bell fomadry, several dye-works, and a trade in cattle. Coal is worked in the neighbourhood. Pop. 3815. Area of eircle, 90 geo. sq. m. ''op. 23,529.
hombourg (liaut), or Holmericii, a vil. France, dep. Moselle, $15 \mathrm{~m} . W$. Sarreguemines, on the side and at the foot of a hill crowned by the ruins of a strong castle, and washed by the Roselle. It has a paper-mill, blast furnaces, and other iron works. Pop. 1049.

HOMBOURG, a vil. and com. Belgium, prov. of, and 19 m . E.N.E. Liége, on the Gueale and the Gulpe, with manufactures of potash, and several mills. Pop. 1795.

HOMBRECIITIKON, a vil. and par. Switzerland, can. Zuirich, on a height above the S.E. extremity of lake Zürich, near Rapperswyl, and the confines of St. Gall. It contains a parish church, and stands in the midst of some very romantic scenery. P'op. 2475.

HOMBRESSEN, a vil. Hesse-Cassel, on the Lemp, N. W. from Cassel. It has a parish church, and manufactures of harpsichords and pianos, iron and steel wire, particularly axes and seythes. Pop. 1357.

HOMBURG.-1, A th. Bavaria, Palatinate, cap. dist. of same uanc, on the Little Erbach, an affluent of the Blies, 49 m . W. Spires. It is prettily sitnated and well built, has a R. Catholic, and two I'rotestant parish churches, a Latin school, manufactures of beet-root sugar, a trade in horses and cattle, and three mills. Near it are the ruins of the old strong castle of Karlsberg. Pop. tn., 3107 ; dist. 45,168.-2. (Hom-burg-vor-der-Hïhe), a th. Hesse-Homburg, cap. dist. of same name, beautifully situated on a gentle rising ground, half surrounded by projections of the Tamus hills, 9 m . N.N.W. Frankfurt. It is well and regularly built, contains the palace in which the prince resides, a gloomy-looking structure, with a conspicuous tower, surrounded by gardens, well laid-out, but poorly kept; three churches, a synagogue, orphan and ordinary hospital, and mineral springs, with a Kurhaus or bathing establishment, having ganing-tables attaehed, at which numbers of visitors are annually victimised. The water, supplied by five springs, containing more carbonic aeid gas than any other saline spa known, is said to be very efficacious in affections of the liver and stomach. Pop. 4500.

HOME, a dist. Upper Canada, consisting of York county and Toronte city. It is situated near the centre of the province, bounded, E. by the Newcastle and Colborne districts; N. by the Simcoe districts, and lake Simcoe; W. by Simcoe, Wellington, and Gore distriets, and S. by Lake Ontario. It comprises a great varicty of soil and climate, being in some parts poor and sandy, and in others extremely fertile. Next to Gore, it is the best settled district in the province, but till of late laboured under the disadvantage of bad roads. Pop. (1842), 58,853.

HOME BAY, an inlet, N.E. coast, British N. America, S. side of Baffin's Bay; lat. $68^{\circ} 30^{\circ}$ N.; lon. $68^{\circ} \mathrm{W}$. It is broad but shallow.

HOMER, a vil., U. States, New York, r. bank Toughmioga, 125 m . W. Albany; with four churches, an academy with 350 students, and manufactures of woollen cloth, and earthenware, a cotton faetory, several tameries, and mills. 1'op. 1300.

HOMERSFIELD, par. Eng. Suffolk; 580 ac. Pop. 291.
HOMINGTON, par. Eng. Wilts; 1340 ae. Pop. 171.
HOMOLITZ, a vil. Hungary, Banat, co. Torontal, r. bank Danube, 6 m . S.S.E. Pancsova, with a R. Catholie, and two Greek churches, and several mills. Pop. about 1740.
hOMONNA, or HUmene, a market tn. Hungary, Hither Theiss, co. Zemplin, 30 m . E. Eperies, with a Greek and a I. Catholic church, a synagogne, and two castles, a large weekly market, and seven important amnal fairs. P. 2956.

HOMS, a th. Syria. See Hens.
HONAN, a large and populous city, China, prov. of same name, on an affluent of the Hoang-ho, 113 m . S.W. Kai-fung; lat. $34^{\circ} 43^{\prime} 15^{\prime \prime}$ N.; lon. $112^{\circ} 28^{\prime} 3^{\prime \prime} \mathrm{E}$. ( 1. ), and considered by the Chinese to occupy the centre of the empire. It is surrounded by mountains; its environs and suburbs are adorned with gardens; it gave China the first Emperor of the Song dynasty, and, under the name of Toung-king, played a conspicuous part in the former revolutions of the country.The province lies between lat. $31^{\circ} 30^{\prime}$ and $37^{\circ} \mathrm{N}$.; lon. $110^{\circ} 5^{\prime}$ and $116^{\circ} 35^{\prime}$ E.; area, $65,104 \mathrm{sq} . \mathrm{m}$.; bounded, N. by provinces Shansee, Chihle, and Shantung; E by Kiang and Nganhoei ; S. by Houpe; and W. by Shense. It is generally level, but is traversed in a S.E. direetion by a range of low lills, and is watered by the Hoang-ho and its affluents. The soil is fertile, carefully cultivated, and produces more food than supplies the province; likewise cotton, hemp, flax, and silk. The forests in the W. supply timber; and mines sield tutenag, cimalar, mica, \&c. Honan is divided into nine principal departments ; capital, Kai-fung. l'op. 23,037,171.

HONDA.-1, A tn. New Granada, dep. Cundinamarea, prov. Mariquita; lat. $5^{\circ} 13^{\prime} \mathrm{N}$.; lon. $74^{\circ} 50^{\prime}$ W., l. bank Magdalena; streets regular, and all pavel. It contains some good edifices, including two convents, two hospitals, and a college; and is an entrepott for the merclandize of the S. and N. provinces, whiel is despateled hence into the interior. Pop. 4500.-2, A bay, New Granada, N. coast, near the N.E. extremity of the state.-3, A bay, N.W. coast Cuba, 52 m . W. by S. Havana.

HONDEN, an uninhabited coral isl., S. Pacific Ocean, Low Archipelago; lat. $14^{\circ} 50^{\prime} \mathrm{S}$.; lon. $138^{\circ} 47^{\prime} \mathrm{W}$. (r.) It has little or no soil, but abounds with birds of various kinds. The sea swarms with fish, inchuling enormous sharks, while shells and large molluses lie thick on the shores. Suakes, crabs, and spiders are also numerous. It was visited by Van Schouten and Le Maire, April 10, 1616.

HONDON-de-mas-Nieves, a vil. Spain, Valencia, prov. of, and about 25 m . from Alicante, with a church, on an isolated height, which rises up in the centre of the village; a primary school, several distilleries, and oil-mills; and a trade in corn, wine, and oil. 1'op. 1378.

HONDSCHOOTE, a tu. France, dep. Nord, 10 m. E.S.E. Dunkirk, on a branch of the canal of Basse-Colme. It is an ancient place, supposed to have been founded about the 10 th century, and has been repeatedly reduced to ruins by war and tire. It has manufactures of linen and chicory, a bleachfield, breweries, tameries, oil mills, and two amual fairs. Ifcre the French gained a victory over the British, in 1793. 1'. 2250.

HONDURAS (British), or Belize, a British territory, E. coast, Central Ameriea. It lies between lat. 15 54' and $18^{\circ} 30^{\prime} \mathrm{N}$. ; and lon. $88^{\circ}$ and $90^{\circ} \mathrm{W} .$, having, N. and W., Yucatan; W. and S., Guatemala; and E. the Bay of Honduras ; length, N. to S. 175 m ; breadth, E. to W. about

90 m ., but part of the S.W. boundary line, towards Guatemala is quite undetermined. Area, upwards of $16,000 \mathrm{sq} . \mathrm{m}$. Excepting the river Hondo, which forms the Yucatan frontier, the only rivers of consequence are the Belize, which traverses the territory S.W. to N.E., dividing it into two somewhat equal parts, and the New River, which, rising in the New River lake, flows in a course nearly parallel to the Belize, till it reaches the Caribbean Sea, a few miles S. from the mouth of the Hondo. The country N. of the Belize River, and traversed by the New River, is low and level; towards the shore, swampy, and interspersed with several lakes. E. of the New River, however, is a range of hills stretching N.E. to S.W. and joining on to the mountains of Guatemala. S. of the Belize River, the country, though also swampy on the coast, rises inland much more rapidly, and may be generally described as mountainous. It is intersected by a ridge parallel to that W. of the New River, and also joining on with the mountains of Guatemala, the E. part, both N. and S. of this ridge, being covered by its lateral branches. The mountains, and the wide valleys between them, are covered with extensive forests of the finest timber, including cedars, pines, iron-wood, log-wood, braziletto, mahogany, and cabbage and silk cotton trees.
The climate, especially during the wet season, is considered by some more healthy than any of the W. India Islands; though the low swampy N. portions can scarcely fail to exhale pestilential vapours. The mean annual temperature is $80^{\circ}$, but the heat is seldom oppressive, from the beginning of July to the begiuning of April, being tempered by refreshing seabreezes; but during the other three months, it is excessive, though mitigated, occasionally, by violent thunder-storms. The most rainy months are July, August, and September. The cultivable portion of the soil is extremely fertile, producing readily all kinds of tropical produce, of which plantains, yams, mandioca, and maize, are grown, and also arrow-root and rice to a small extent. Sugar, coffee, cotton, and indigo, might likewise be raised, but are neglected. Sarsaparilla is collected in the S. districts. The wild animals are those usual in such regions of America-ounces, panthers, tapirs, deer, peccaries, agoutis, armadilloes, and monkeys. Manatis and alligators frequent the lagoons; birds, aquatic and land, abound; fish, turtle, lobsters, and shell-fish, are plentiful, and of excellent quality.
The exports, in 1847, consisted of $6,502,777 \mathrm{ft}$. mahogany, the staple article of the country, a quantity much smaller than in the two preceding years; cedar, $10,337 \mathrm{ft}$., logwood, $3222 \frac{3}{4}$ tons; rosewood, $206 \frac{3}{4}$ tons; cochineal, 5684 seroons; indigo, 611 seroons; sarsaparilla, 53,689 lbs.; hides, 1299 ; tortoise-shell, 45 lbs. and one box; lignum-vitae, 10 tons; tobacco, 23 bales and 22 boxes. The clief imports from Great Britain are dry goods and fancy articles, for tlee Belize and Spanish markets; wine, spirits, gunpowder, and occasionally provisions. From the United States, provisons, shingle, and lumber.

The government is administered by a superintendent, nominated by the Crown, and seven magistrates, who form a council, and are elected anuually by the inhabitants. The only town in the colony is Belize or Balize (which see). Honduras was transferred by Spain to England, by treaty, in 1670, but at different times its occupation was contested by the Spaniards till 1798, since which period it has remained quietly in the possession of Great Britain. The population is composed chiefly of negroes, who were first brought to the country as slaves. With exception of a few Caribs, who have fled into it as a place of refuge, there appear to be no native tribes in the territory. The white inhabitants are exclusively occupied in commerce, and the regroes in cutting mahogany and dye-woods, and in fishing. Pop. (1845), whites, 399 ; coloured, 10,410. Total pop. 10,709.

HONDURAS, an independent republican State, Confederation of Central America; lat. $13^{\circ}$ to $16^{\circ} \mathrm{N}$.; lon. $85^{\circ} 40^{\prime}$ to $89^{\circ} 5^{\prime}$ W., bounded, N. and E. by the Caribbean Sea and Mosquitia; W. Guatemala; S. Salvador, and the bay of Conchagua on the Pacific ; S.E. Mosquitia and Nicaragua; area, $3680 \mathrm{geo} . \mathrm{sq} . \mathrm{m}$. Its surface is irregular, being traversed by numerous mountain-ranges, in all directions, but generally of moderate elevation. The valleys between are numerous and fertile, and there is one lake about 18 m . long by 10 m . broad, near the centre of the state. Its mineral wealth is very con-
siderable, but was turned to much better account formerly than now; it comprises gold, silver, lead, and copper; the two latter found in a variety of combinations, and the two former frequently combined with each other; also opals, emeralds, asbestos, and cinnabar. There are some considerable rivers in the state, the largest of which are the Chamelicon, Ulua, and Aguan, all flowing to the Caribbean Sea, and the Choluteca, an affluent of the Pacific. The climate is, upon the whole, extremely good and salubrious, especially in the interior parts, but it inclines to a temperature rather high; particularly close on the N. coast, and the shores of the Pacific, where deposits of mud, acted upon by a tropical sun, with a heat often of $120^{\circ}$, produces miasma, clouds of mosquitoes and sand-flies, and almost every other description of annoying insects. There are some extensive forests, abounding in fine timber, such as mahogany, cedar, mora (a species of fustic), \&c. The principal cultivated productions are maize, beans, some wheat, rice, and plantains, but, being almost exclusively a mining district, it is doubtful if the quantity raised is sufficient for the whole population. Some tobaceo also is grown. The country abounds in cattle of a fine breed, but this description of property does not afford much revenue to the owners, the price of the animals slauglitered for consumption being extremely low. The state is divided into the seven departments of Comayagua, Santa Barbara, Gracias, Yoro, Choluteca, Segovia, and Tegucigalpa, all named after their principal towns, of which Comayagua is capital also of the country. Its principal ports are Truxillo on the Caribbean Sea, and Port San Lorenzo in the Bay of Conchagua, in the Pacific. Pop. (1840), 350,000.-(Baily's Central America.)

HONDURAS (Bay of), a wide inlet of the Caribbean Sea, mostly between lat. $16^{\circ}$ and $18^{\circ} \mathrm{N} . ;$ and lon. $84^{\circ}$ and $80^{\circ} 50^{\prime}$ W.; having, S., Mosquitia and Honduras, and W., British Honduras and Yucatan. Along its shores are the islands of Bonaca, Ruatan, Utila, Turneff, and numerous islets and reefs called cays. It is divided into several smaller bays, of which that of St. Thomas, the innermost in the gulf of Amatique, is spacious and deep. Several considerable rivers fall into the bay, namely, the Belize, Dulce, Motagua, Chamelicon, and Ulua.

HONEOYE FALLS, a vil., U. States, New York, 214 m. W. by N. Albany, on Honeoye Creek, which has a fall of 30 ft . in the centre of the village. It contains four clurches, and various kinds of factories and stores. Pop. about 1000.

HONESDALE, a tn., U. States, Pennsylvania, 172 m . N.E. Harrisburg. It has a tannery, and several grist-mills, two academies, and two schools. The Lackawaxen Canal and railway terminate here. Pop. 1086.

Honeybourne (Church) with Poden, par. Eng. Worcester; 1290 ac. Pop. 119.

HONEYCHURCH, par. Eng. Devon; 710. ac. Pop. 69.
HONFLEUR, a seaport tn. France, dep. Calvados, agreeably situated on l. shore estuary of the Seine, 7 m . S.E. Havre. It is a poorly built and dirty place, but considerable improvements have recently been made, and promise to give the town a more attractive appearance. It is the seat of a court of first resort, possesses an exchange, and a hydrographical school of the fourth class; contains several churehes and public buildings, remarkable only for their antiquity, and some peculiarities of structure; and has manufactures of lace, ship-biscuits, casks, and mineral acids, rope-works, tanneries, building-yards, and a harbour accessible only at high water. The trade, once important, has been almost destroyed by the rise of Havre. The chicf exports are corn, cider, salt provisions, dairy, and other produce. About 7000 dozen eggs are said to be exported weckly to England. On the hill above the town, is the chapel of Notre Dame de Grace, much frequented by sailors, and filled with their votive offerings. Honfleur was long in possession of the English, and makes a considerable figure in their French wars. Sir Sidney Smith was taken prisoner here, in 1796, while leading off a vessel which he had captured. Pop. 9006.

HONG-hat, an islet, China Sea, off the coast of Quangtong; lat. $22^{\circ} 45^{\prime}$ N.; lon. $115^{\circ} 12^{\prime} \mathrm{E}$.

HONG KIANG, a name given to the Longkiang, a river, China, during a portion of its course in prov. Quangsee.

HONG-KONG [Red Harbour], or Hiang-Kiang [The Fragrant or Flowing Streams], a small isl. off S.E. coast, China, prov. Quang-Tong, now belonging to the British. It

## HONG-KONG

is situated at the mouth of the estuary that leads to Canton, from which it is distant, S.E. 75 m .; and from Macao, 40 m . E.; lat. (Victoria church; $22^{\circ} 16^{\prime} 30^{\prime \prime} \mathrm{N}$. ; lon. $114^{\circ} 14^{\prime} 45^{\prime \prime}$ E. (R.) It is about 10 m . in extreme length, N.W. to S.E.; and $7 \frac{1}{2} \mathrm{~m}$. in extreme breadth, separated from the mainland

On the $N$. side of the island, and situated in a magnificent bay of same name, capable of accommodating any number of vessels, affording excellent anchorage and deep water close in shore, is the thriving town of Victoria, the chief town of the island, and centre of its commerce. This bay presents a lively and busy scene, being crowded with shipping of every nation, and with dense masses of Tanka boats and other Chinese craft. From Victoria, a road leads across the island to Stanley, a small town on a bay of same name, on the S.W. peninsula. Another road, 24 m . leng, nearly encircles the island. The European slipping that arrived at Victoria, in 1847, consisted of 694 vessels, 229,465 tons. In 1849 , the total number of native boats fre quenting the harbours of Hong-Kong, was 1242 , including 200 fishing eampans; importing sugar, alum, sulphur, rice, nutoil, dye-barks, provisions, \&c.; taking, in exchange, opium, manufactured goods, saltpetre, and stones, which are quarried in the island. A promising trade in Chincse sugar has arisen at Victoria. It is shipped for New S. Walcs, England, India, and Shanghae.

Hong. Kong was ceded to Great Britain by the treaty of Canton, in 1841, and again by the treaty of Nan-King, in 1842 . Since then, many wealthy Chinese merchants have cstablished branch houses there, and have begun to charter British ships, to carry British goods to the N. ports. The government of the colony is vested in a governor, lieutenant-governor (who is likewise a commandant), chiefjustice, attorney-general, legislative coun-
by a atrait, which, at lymoon Pass, is only about a quarter of a mile wide. Its coast is indented by numerous bays, of which the most considerable are on the S.E. end of the island, which they form into two peninsulas. The general appearance of the island is somewhat picturesque and curious, but on the whole, exceedingly unprepossessing, being composed mostly of lofty barren rocks that rise from the sea, to heights of 1000 and 2000 ft ., and so abruptly, as to leave hardly any space to build upon. There are no trees of any size on the island, and few valleys of any extent. Some rank vegetation here and there, with a little herbage and brush-wood growing in the intervals between the masses of granite, and a few plants on the margins of the streams, form almost its only vegetable productions. Good water, however, is abundant, and some of the cascades are sufficiently picturesque.

The climate, at one time considered very unhealthy, is now believed to be quite as well suited to European constitutions as that of any of our Eastern tropical possessions, and by judicious treatment, the great mortality whieh
 unfortunately took place among the troops, has been materially lessened. In 1849, the total Europeans on the island, including women and children, numbered 987 , of whom 64 died, being at the rate of 6.48 per cent. In 1847, the total population, exclusive of troops, was 23,872; per cent. of death, $1 \cdot 18$. In 1848 and 1849 it was as follows:-

|  | European. | Portuguese. | Indians \& Mulaye. | Chinere. | Total. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1848 | .... 642 | $3: 1$ | 213 | 20,838 | 21,514 |
| 1549. | . 656 | 331 | 223 | 26,297 | 29,507 |

and the per centage of deaths in 1848 was $1 \cdot 78$, and in 1849 $0 \cdot 65$. The annual deaths per cent. in London, are $2 \cdot 72$. Vol. 1.
and burglaries have been much diminished, and life and property, formerly unsafe, have been rendered secure. This service has been much improved by the introduction of a native force. Education also is in process of being atterded to, schools laving been erected at Victoria and other parts of the island. The population, which, on the first occupation of the island by the British, was only 5000 , amounted, in 1849 , exclusive of troops, as above stated, to 29,507.-(Voy. of the Samarang; Government Reports aud Papers; Davidson's Fur East; Martin's China, \& c.)

HÖNGG, a vil. and par. Switzerland, can. of, and 4 m . N.W. Zürich, on a height above r. bank Limmat; surrounded by a number of fine country seats. It has a handsome parish church, manufactures of woollen cloth, a cotton-mill, and a trade in fruit and wine, grown largely in the vicinity. P.1531.

HONILY, par. Eng. Warwick; 660 ac. Pop. 50.
HONING, par. Eng. Norfolk; 1310 ac. Pop. 344.
HONINGHAM, par. Eng. Norfolk; 2780 ac. Pop. 358.
HONINGTON, three pars. Eng.:-1, Lincoln; 1250 ac. Pop. 149.-2, Suffolk; 1450 ac. Pop. 273.-3, Warwick; 2600 ac. Pop. 335.

HONITON, a parl. bor. and market tn. England, co. Devon, 1. bank Otter, 17 m . E.N.E. Exeter. It consists principally of one spacious street, nearly 1 m . in length; well paved and lighted, and amply supplied with water. It has a church, situated on a hill about $\frac{1}{2} \mathrm{~m}$. from the town; a chapel, and various Dissenting meeting-houses ; a free grammar-school, poorly endowed; a national school, and one of industry for girls; and several small charities. The chief branches of manufacture here are serge-weaving and lace-making-for the latter of which it is quite noted, though both have now much declined. The butter of Honiton is also much esteemed, and large quantities of it are sent weekly to the metropolis. Shoes, coarse pottery-ware, and sharping-stones for scythes, are made to a small extent. Market-days-Tuesday, Thursday, and Saturday.

Honiton was given by William at the conquest to the Earl of Montague ; and in the reign of Henry I. the manor was granted to Richard de Rivers, from whom it descended to the Courtenays, earls of Devon. It is a borough by prescription ; and has returned two members to the House of Commons since the 28th of Edward I. Registered electors (1851), 240. Pop. 3895.

HONLEY, a vil. and chapelry, England, co. York, W. Riding, $3 \frac{1}{2} \mathrm{~m}$. S. by W. Huddersfield, r. bank Holme; with a church, and several Dissenting chapels; national, and other schools; and a mechanics' institution. The inhabitants are chiefly employed in manufacturing fancy vestings of silk, cotton, and woollen, and plain and fancy woollen cloth. Pop. (1851), 5597.

HONNEF, a vil. Rhenish-Prussia, gov. Cologne, circle Sieg, on the Rhine; with a R. Catholic church; and in the vicinity mines of lead and copper. Pop. 2750.

HÖNNINGEN, a vil. Rhenish-Prussia, gov. of, and 15 m. N. W. Coblenz, r. bank Rhine; with a parish church and a castle. Pop. 1477.

HONO, a small triangular isl. Sweden, in the Kattegat, and W. of Gottenburg.

HONOLULU, or Honoruru, the principal tu. and seaport of the Sandwich Islands, S. side of isl. Woahoo; lat. (fort), $21^{\circ} 18^{\prime} 12^{\prime \prime} \mathrm{N}$.; lon. $157^{\circ} 55^{\prime} \mathrm{W}$. (R.) It is about $\frac{1}{2} \mathrm{~m}$. long, and about $\frac{1}{4} \mathrm{~m}$. broad; and consists of one good street, with a number of narrow irregular alleys. Most of the houses are built in the native fashion; but there are also many substantial wooden edifices, in the European style,
out of town. The more respectable of the foreign residents have their rural boxes up the adjacent valleys.' Sunday is ushered in with great decorum and quietness. There are several congregations of natives, some of which consist of 2000 persons, all decently clad and well-conducted. There are several schools, under the superintendence of the missionaries. The mouth of the harbour is formed by an inlet through a coral reef; it has a bar, with only 20 ft . water upon it at ebb. The bar is about 50 fathoms in breadth, and consists of smooth coral rock, having 10 fathoms close to its outer edge, and 7 fathoms on the inner. The basin or anchorage inside, which is of a semicircular form, is capable of containing between 70 and 80 ships, well protected in all weathers. During the first quarter of 1850 , the arrivals at the port of Honolulu were 90 vessels, aggregate tonn. 23,610; and on the 24th of June, in the same year, above 40 vessels of various dimensions were lying in the harbour. The total number of vessels that entered the port, in 1846, was 34, aggregate tonn. 8161 ; cleared, 32 , tonn. 7771 . Pop. 6000.

HONRUBIA, a tn. Spain, New Castile, prov. of, and 26 m. S.S.W. Cuenca. It is generally poorly built; has illpaved, dirty streets; a handsome parish and three minor churches ; a townhouse and primary school; and a trade in agricultural produce. P. 1861.

HONTH, a co. Hungary, Hither Danube, bounded, N. by co. Sohl, E. Neograd, S. Pesth and Gran, W. and N.W. Bars; area, 738 geo. sq. m . In the N . it is traversed by ramifications of the Carpathians. It slopes gradually towards the S ., and belongs wholly to the basin of the Danube, being watered by its tributaries-the Ipoly or Eipal, and Gran. The soil, particularly in the valleys, is generally fertile, and produces large crops of wheat, and other cereals; hemp, flax, and tobacco. A considerable quantity of wine also is grown. The minerals, including gold, silver, and iron, \&ce, have long been worked to great extent, particularly in the extensive district around Schemnitz; and form an important branch of the public revenue. The inhabitants are chiefly Germans and Slaves. For administrative purposes it is divided into the four districts-Bath, Bozok, Ipoly-Sagh, and Schemnitz. The capital is Ipoly-Sagh. Pop. 123,800.

HONTH, a vil. Hungary, Hither Danube, co. same name, 4 m . E.S.E. Ipoly-Sagh, on the Ipoly; with a church, and a mill; and on a hill, in the vicinity, the ruins of the old castle of Honth, which gives name to the country. Pop. 683.

HONTUR, a tn. Spain, Murcia, prov. of, aud 24 mm . from Albacete ; with a church, courthouse, two schools, and a prison, forming part of an old castle; manufactures of coarsa woollen and linen cloth; and a trade in corn, maize, oil, and wine. Pop. 1204.

HOO, three pars. Eng.:-1, Suffolk; 540 ac. Pop. 211. -2, (St. Mary), Kent; 1920 ac. Pop. 297.-3, (or St. Werburgh), Kent; 4460 ac. Pop. 390.

HOO ISLES. See Boo.
HOOBLY, a tn. peninsular Hindoostan, prov. Bejapoor, 13 m . S.E. Darwar; lat. $15^{\circ} 20^{\prime} \mathrm{N}$. ; lon. $75^{\circ} 15^{\prime}$ E., a place of considerable trade; but containing no public or private buildings of any note. There are two forts, but neither of them capable of opposing any resistance to an attacking force. In the neighbourhood are numerous ruins of mosques and Malometan burying-grounds. The surrounding country is well-wooded and watered. Pop. 15,000 to 20,000.

HOOD'S ISLAND.-1, The Fetuka of the natives, one of the Marquesas Islands; lat. $9^{\circ} 25^{\prime}$ S.; lon. $138^{\circ} 57^{\prime}$ W. (R.), said to be uninhabited. It consists of a single ligh rock, flat at the summit, with a gentle inclination N. to S.-2, One of the Galapagos group, Pacific Ocean; lat. $1^{\circ} 22^{\prime}$ S. ; lon. $89^{\circ} 44^{\prime}$ W. (r.)-3, An isl. Low Archipelago, Pacific Ocean; lat. $21^{\circ} 31^{\prime}$ S. ; lon. $135^{\circ} 33^{\prime}$ W. (R.)

HOOE, par. Eng.Sussex; 2290ac. P.519.
HOOF, a vil. Hesse-Cassel, Niederhessen, circle of, and near Cassel; with a parish church; enclosed within small gardens of exotic and indigenous ornamental plants. 'But already,' says Sir George Simpson, ' has
this inciplent metropolis begun, like its older models, to go
and a lignite mine, which employs the greater
part of the inhabitants. Pop. 909.
HOOFDPLAAT, a vil. Holland, prov. Zeeland, l. bank W. Scheldt, 6 m. E.S.E. Flushing, with a good littlc harbour,

## HOPPER

suitable for market boats; two churches and a school. Pop., chiefly agricultural, 1031.

HOOGEVEEN, a vil. Holland, prov. Drenthe, 20 m . S. Assen; with a church, synagogue, seven schools, a poorhouse, and a weekly and several annual markets. Agriculture, and turf-cutting and selling, are the chicf occupations. P. 3275.

HOOGEZAND, a vil. Holland, prov. of, and 8 m . E.S.E. Groningen, on the Winschoterdiep; with a church, synagogue, and schools; some transit trade, buat-building, four distilleries, and several mills. Pop. 1575.

HOOGHLY, a tn. Hindoostan, presid. and prov. Bengal, cap. dist. and on r. bank river of same name, 21 m . N. Calcutta, in an elevated situation. It contains a handsome conspicu-onsly-placed church; and a Hindoo temple, which, during the Rath festival, is visited by thousands of pilgrims; and a flourishing college, in which English, Persian, and Arabic are taught. Hooghly is now comparatively of little note, though still thriving, and having a considerable population. The French, Dutch, Portuguese, and Danes, had each a factory here. The first English factory was built in 1640 . The first action fought in Bengal took place here in 1686 . It arose from a quarrel in the bazaar between some English soldiers and the nabob's peons. The latter were attacked and defeated by the garrison of the English factory, while the town was bombarded by an English fleet, and 500 houses destroyed. -The district, between lat. $22^{\circ} 15^{\prime}$ and $23^{\circ} 10^{\circ} \mathrm{N}$., and lon. $87^{\circ} 30^{\prime}$ and $88^{\circ} 45^{\prime}$ E., bounded, N. by Burdwan and Kishenagur, S. by the sea, E. by the Sunderbunds, and W. by Midnapoor, is low and flat, but extremely fertile, excepting the sea-coast, which is covered with jungle, and is very unhealthy. Being intersected in every direction by rivers, it possesses an extensive inland navigation. On the banks of its numerous streams, near the sea, large quantities of salt are manufactured, on Government account.-The RIVER, formed by the junction of the Cossimbazar and Jcllinghy, the two most W. branches of the Ganges, which unite about 55 m . N. Calcutta, flows S. past Hooghly, Chinsurah, Chandernagore, Calcutta, and Culpee, to the Bay of Bergal, which it enters by a wide estuary. It is the only branch of the Ganges esteemed sacred by the Hindoos; and is likewise the only one navigated by large vessels. The scenery on its banks is extremely beautiful ; but its navigation is rendered difficult and dangerous by its shifting bed, rapid currents, and the influx of the tide, called the bore, which rushes upwards at the velocity of 15 m . an hour. Total course about 200 m .

HOOGLEDE, a vil. and com. Belgium, prov. W. Flanders, 17 m. S.W. Bruges ; with distilleries, several breweries, manufactures of hosiery, a rope-work, flour and oil mills. Pop. 4627.

HOOGSTRAETEN, a vil. and com. Belgium, prov. of, and 20 m . N.E. Antwerp, on the Merck. It has a beautiful church, with finely painted glass; a chapel, a courthouse, a diocesan seminary, a primary school, two orphan hospitals, and a poorhouse; manufactures of common cloth, earthenware, and leather; brick-works and distilleries. Hoogstraeten ranked as a town in the 12 th century, and afterwards became the capital, first of a county, and then of a duchy. P. 1578.

HOOGVLIET, a vil. Holland, prov. S. Holland, 6 m . S.W. Rotterdam, r. bank Old Maas; with a small harbour, a church, and a school. Pop. 702.

HOOK.-1, Par. Irel. Wexford; 1065 ac. P. 523.2, Par. Eng. Dorset ; 1190 ac. Pop. 268.

HOOKERY, a decayed tn. Hindoostan, prov. Bejapoor, 55 m. S.S.W. Merritch; lat. $16^{\circ} 13^{\prime} \mathrm{N}$. ; lon. $74^{\circ} 47^{\prime} \mathrm{E}$. It still exhibits some vestiges of ita former prosperity.

HOOLE, par. Eng. Lancaster; 2500 ac. Pop. 989.
HOONAN, an inland prov. China, between lat. $24^{\circ} 50^{\prime}$ and $30^{\circ} 10^{\circ} \mathrm{N}$.; lon. $109^{\circ}$ and $114^{\circ} 10^{\circ} \mathrm{E}$. , bounded, N. by Houpe, W. Sechuen and Koeichoo, S. Quangsee and Quangtong, and E. Kiangsee. It is generally hilly, and rises into mountains on the S.; is intersected by several rivers, of which the Long-Kiang, the Yuen-Kiang, and the Lo-Kiang, are the most considerable, all falling into Tonting-hoo, the largest lake in China, abont 60 m . long, by 30 m . broad, which lies on the N. side of the province. The country around the lake is extremely fertile; rice, \&c., are raised in abundance; pine, cassia, \&c., are obtained from the mountains; and malachite, iron, lead, and coal, are mined. Capital town, Chang-cha-foo. Pop. 18,652,507.

HOOPER'S ISLAND, an isl. Corea Sea, off the S. coast of Quelpart Island; lat. $33^{\circ} 10^{\circ} \mathrm{N}$. ; lon. $126^{\circ} 30^{\prime} \mathrm{E}$.

HOORMARA, a small tn. and port, Beloochistan, on the Arabian Sea; lat. $25^{\circ} 18^{\prime} \mathrm{N}$.; lon. $65^{\circ} 6^{\prime} \mathrm{E}$. A few small vessels belong to the port, which trade to the shores of Arabia, Persia, Scinde, and Cutch. The sarrounding country is extremely barren and dreary. Pop. about 2000.

HOORN, three places, Holland: 1, [Latin, Horna], A seaport tn., prov. N. Holland, 20 m . N.N.E. Amsterdam, on a small bay of the Zuider Zee, which forms a convenient roadstead; lat. (tower of the great church), $52^{\circ} 28^{\prime} 38^{\prime \prime} \mathrm{N}$. ; lon. $5^{\circ} 3^{\prime} 52^{\prime \prime}$ E. (L.) It is fortified; has four gates; and the country around it can easily be inundated. Its four principal streets are broad, and meet in the great market-place; and the town is traversed by numerous canals, communicating with the harbour, which is divided into two sections-one for war vessels, the other for merchantmen. It lias an old neat townhouse, a weigh-house, and several other important buildings, many of which, since the town has declined, are diverted to purposes for which they were never intended; they include the offices once belonging to the E. India Company, the mint, arsenal, \&c. Besides the Grootekerk [great church], the most important in the town, there are other two Calvinistic churches, a Lutheran, and two R. Catholic; several benevolent institutions, and numerous schools. Hoorn has an extensive trade in cheese-upwards of $5,000,000$ of pounds' weight being brought to its market annually; it likewise has extensive cattle markets; some ship-building, rope-spinning, \&c.; and saw, trass, walk, and corn mills. Hoorn is the birth-place of the navigator Schouten, who first doubled the S. point of S. America, and named it Cape Hoorn or Horn, from his native town; and the port where was bnilt the great fleet of Admiral de Ruiter. Pop. 8177.-2, A vil., S. end isl. Texel; with a church and schools. Inhabitants engaged in cattle-rearing and agriculture. Pop. 569.-3, A vil., isl. Schelling, generally named de Hoorn. Inhabitants engaged in agriculture, sca-faring, and the taking of wild ducks, which here are numerous. Pop. 122.-(Van der Aa.)

HOORN, an isl. Indian Archipelago, in the roads of Batavia, about 2 m. N.E. Onrust; the inhabitants of which subsist by taking trepang.

HOOTON, two pars. England, York (W. Riding):-1, (-Pagnell); 2740 ac. P. 423.-2, (-Roberts); 1050 ac. P. 175.

HOPE, six pars. Eng.:-1, Derby; 36,160 ac. P. 4434. -2 , (-All Saints), Kent; 1550 ac. P. 21.-3, (-Baggot), Salop; 650 ac. P. 75.-4, (-Bowdler), Salop; 2470 ac. P. 184.-5, (Mansell), Hereford; 1190 ac P. 187.-6, (-UnderDinmore), Hereford; 3660 ac P. 586.

HOPE.-1, A group of islets, N.E. coast, Australia, S.E. Cape Grafton. A deep and clear channel of 1 m . wide separates these islands, the larger of which is surrounded completely, and the smaller partially, by an extensive reef. The former, or W. one, is merely a long stripe of heaped-up coral and shells, overrun with low bushes, and a few other plants. The $E$. and N. islet is nearly circular, $\frac{1}{2} \mathrm{~m}$. in circumference, formed of coral and shell-sand, covered with bushes and small trees.-(Voy. of M.M.S. Rattlesnake).-2, A small isl., Arctic Ocean, S.E. Spitzbergen; lat. $76^{\circ} 20^{\prime}$ N.; lon. $19^{\circ} 55^{\prime} \mathrm{E}$. It has a wild and desolate appearanco ; but has good anchorage on its N. coast ; and is sometimes visited by whalers. It was discovered in 1613.

HOPE, or Estyn, a small parl. bor. and par., N. Wales, co. Flint. The town or village, agrecably situated on the Alyn, 5 m . N.N.W. Wrexham, has an ancient church and two national schools, and the ruins of a castle, erected prior to the conquest of Wales by Edward I. The bor. is contributory with Flint. Area of par. 8500 ac. Pop. 2916.

HOPE (Cape of Good). See Cape of Good Hore.
HOPESAY, par. Eng. Salop; 3010 ac. Pop. 660.
HOPEWELL HEAD, a cape, W. coast, Labrador, projecting into Hudson's Bay ; lat. $57^{\circ} 10^{\circ} \mathrm{N} . ;$ lon. $78^{\circ} \mathrm{W}$.

HOPITAL (L), a tn. Sardinian States. See L'Hopital.
HOPPER [Apamama], an isl. Pacific Ocean, Gilbert group; lat. $0^{\circ} 30^{\prime}$ S.; lon. $173^{\circ} 54^{\prime}$ E. (r.) $; 10 \mathrm{~m}$. long, N.W. to S.E., 5 m . wide, N. and S.; but rises only 5 ft . above sealevel. It has a large population; but yields little more than will supply their wants. A little fresh water may be had by digging; but neither wood nor refreshments can bo obtained.

## HORNCASTLE

HOPTON, six pars. Eng.:-1, Suffolk; 1250 ac. P. 251. -2, Suffolk; 1440 ac. P. 623.-3, (Castle), Salop; 2260 ac. P. 164.-4, (-theHole, or Hopton-Cangeford), Salop; 320 ac . P. 30.-5, (-Monk), Salop; 3190 ac. P. 189.-6, (-Wafers), Salop; 1890 ac. P. 481.

HOR (Mount), a mountain, Arabia Petræa, on the confines of Idumea, about mid-way between the Dead Sea and the Gulf of Akabah; lat. $30^{\circ} 18^{\prime} \mathrm{N}$. ; lon. $35^{\circ} 33^{\prime} \mathrm{E}$. Gömör, on the Jolsva, in an unfertile district, 15 m . from Rosenau; with an iron, and several saw mills, charcoal furnaces, and a trade in wood. Pop. 1814.3, (Hoszuszo), a vil. Hungary, Thither Theiss, co. Temesvar, 10 m . from Lippa on the Maros; with a Greek non-united church. Pop. 1360.

HÖTENSLEBEN, a vil. Prussia, prov. Saxony, gov. of, and 26 m . W. Magdeburg; with a church, a distillery, and several mills. Near it are saltpetre works, and gypsum and limekilns. Much fossil wood also is obtained. Pop. 1181.

HOTHAM, par. Eng. York (E. Riding); 2530 ac. P. 430.
HOTHFIELD, par. Eng. Kent; 1900 ac. Pop. 408.

HOTTENTOTS, a peculiar African race, the aboriginal occupants of the S. end of that continent, at and near the Cape of Good Hope. Their limits may be said, in general terms, to have been the river Orange, on the N. and N.E., and the Kei, on the E. ; but their E. boundary appears to have been fluctuating, and, owing to their mixture with the Kafir race, not definable. On the N.W. they passed the Orange, and advanced N. and N.E. far into the interior, as shall be explained lower down. The name now given to the whole race was that of the tribe in the immediate vicinity of the Cape of Good Hope, with which the Dutch settlers first became acquainted. The Hottentots are generally tall and meagre, of a pale olive complexion; their cheek-bones project much, and their chins narrow and pointed, so that the face is tri-

angular. They have thick lips, a flat nose, with wide nostrils; woolly liair, and little beard. The women are often elegantly formed in early life, but their bloom is transient; they are marriageable at 12 or 13 , and become hideons in a few years. They have certain physical peculiarities, long contested and misunderstood. Both sexes are distinguished also by excessive incurvation of the spine.

When the Dutch first settled at the Cape, the Hottentots were a numerous nation, of pastoral and partially nomadic habits, and occupied a territory of $100,000 \mathrm{sq}$. m. They were rich, according to their own ideas, having abundance of horned cattle and sheep; and it is supposed that the seven tribes, into which they were divided, made up together a population of at least 200,000 . At the present day this race is nearly extinct within the wide territory which formerly belonged to it. Constantly harassed and hunted down by the Boers, who confessedly sought their extermination, their only chance of escape was to engage in the service of their persecutors. But this domestication was fatal to the purity of the breed; and of those classed as Hottentots within the limits of the colony, the greater majority are in reality Bastaards, as the Boers call them, or people of mixed race. The mixture of European blood has much improved their physical appearance, but the indigenous manners and the language have nearly disappeared. Of the 50,000 Hottentots, as they are called, now reckoned in the population of the colony, there are not 200 -exclusive of the Namaquas, added to the colony by a recent change of boundary - who understand the Hottentot language. Their language at present is the Cape Dutch jargon. From their ancient pastoral habits, they still retain traditionally their passionate love for the Beesties or cattle. Hottentot life, with its numerous whimsical peculiarities, belong therefore to history. It exists no longer in what may be properly called the land of the Hottentots.

But, connected with this great utterly decayed trunk, are certain offshoots and collateral stems, which call for notice.

A large body of the Hottentot population, recognized in the colony as the Bastaards, wandered some years ago in search of a settlement along the banks of the river Orange, at that date beyond the colonial boundary. Their disorderly and improvident movements awakened some alarm, and, fortunately, commiseration also in the colony; and they were strongly urged, by philanthropic friends, to get rid of the colonial name of Bastaards, by the adoption of some other, and to settle down in a carefully-organized community. They consequently assumed the name of the Griquas, an ancient extinct tribe, and fixed themselves at Klaarwater, on the river Orange. The experiment has succeeded completely. Their chief, having shown his capacity for government, now receives a small annual grant of money and fire-arms from the colony; and here a mixed Hottentot population of some thousands has at all events emerged from utter barbarism.

The Koras or Korannas [shoe-wearers)], higher np the river Orange or Garièp, as they call it, still remain a favourable specimeu of the pure Hottentot race. They are, however, taller, stronger, and cleaner, than the tribes further W. Most of them possess cattle; those who do not, soon degenerate into Bushmen. On the E. frontier of the colony are still some remnants of the Gona or Gonaqua tribe; but they have nowhere preserved their ancient usages and purity of blood, but are much mixed with the Amakosa or Kafirs, the clucking sounds of whose language proves their ancient admixture with the IIottentots. The Namaquas dwell towards the mouth of the river Orange, towards the N.W. border of the colony. Little Namaqualand, on the S. side of the river, is now within the colonial limits. Opposite to it, a large tract, watered by the Fish river, and some other occasional streams, bears the name of Great Namaqualand. This W. side of the continent is far more hot and dry than the E., in the same latitude, and all the peculiarities of character traceable to precariousness of life, suffering, and frequent famine, are fully developed among the Namaquas. Yet they are much attached to their country ; and thongh diminished in numbers, by want and disease, yet their villages, it is said, often contain examples of great longevity. Their huts are erected in the old Hottentot fashion, bcing hemispheres of boughs covered with mats, and about 6 ft . high.

The Bushmen, or, in colonial language, Boschjesmanns, are also of Hottentot race, and call themselves Sa-qua. Their proper country is between the Roggenveld mountains and the river Orange ; but they are to be found wherever the absence of a stronger population permits their increasc. Their general height is about $4 \mathrm{ft} .6 \mathrm{in} . ;$ they are, at the same time, slender, but well-made, and very active. Their only covering, if they lave any, is a skin round the loins. They wear a belt, called, by the colonists, the belt of hunger, which they keep as tight as possible, to mitigate the pain of inanition. They live on gaine, antelopes especially, which they kill with poisoned arrows. Their great feasts are after violent thunderstorms, in which many antelopes are struck by lightning. On such occasions, these little men eat till they resemble barrels. Their life is always fluctuating, between a feast or a famine; but the latter predominates. Bushinen have been met with who had gone 15 days without food. But it is remarkable, that the constant comforts of civilized life can never wean them from the occasional pleasures of the descrt. The young Bushman, in the scrvice of the Boers, though treated with the greatest kindncss, is sure to run off when the ants' nests are in scason; and his pleasure consists not merely in sprawling on the ground to devour these, his face covered with worms, but in his concealment, and being able to elude his civilized acquaintances. As to the number of these singular and degraded people, it is impossible to form any trustworthy estimate of it.

Beyond, or N. of Great Namaqualand, on the W. side of Africa, in lat. $21^{\circ}$ to $23^{\circ}$, are the Damaras, of whom those called Hill Damaras are of Hottentot race. Respecting the condition of these people, we have no details; but we know that the Hottentot race has spread E. from the Damaras hills, and that a large, if not the chief portion of the population round Lake $\overline{\mathrm{N}}$ gami, recently discovered in lat. $20^{\circ} 40^{\prime}$; lon. $24^{\circ}$ E., is of Hottentot descent. The Bechuanas call them Bakoba, which means scris or vassals; but their more general name is Bayeye, Baclecle, or Batletle, all evidently Bechuana plurals of the unutterable Ifottentot word qaqa,
men. The Bayeye are the boatmen and chief navigators of Lake Ngami, and it is said that they are numerous also on the navigable rivers further N. - (Travels of Ten-Rhyn, Kolbe, Sparmann, Lichtenstein, and Patterson. In Appleyard on the Kafir language, is an interesting account of the Hottentot grammar.)

HÖTTING, a vil. and par. Austria, Tyrol, circle UnterInnthal, on the Inn, here crossed by a bridge close to Innsbrück; with a castle, and a church. Pop. 2524.

HOTZENPLOTZ.-1, A tn. Moravia [Moravian, Osoblaha], circle, and 24 m . from Troppau, on a small stream of same name; with two churches, a townhouse, and hospital; and some general trade. Pop. 2572.-2, A river, which rises in the N. slope of the Sudetes, near Wurbenthal, flows N.E. past the towns of Johanthal and Hotzenplotz, enters Prussian Silesia: passes Ober Glogau, and after a course of about $40 \mathrm{~m} .$, joins l. bank Oder, at Krappitz.

HOU-Tchou, an important tn. China, prov. Che-Kiang, 70 m. N. W. Ningpo.

HOUAT [Latin, Siata], an isl. France, off dep. Morbihan, 9 m . N.E. Belle-Ile, abont 3 m . long by $\frac{1}{2} \mathrm{~m}$. broad, and inhabited by fishermen. Pop. 250.

HOUDAN [anc. Housdenium], a th. France, dep. Seine-et-Oise, at the confluence of the Vesgre and Opton, 34 m . W.S.W. Paris; with a fine old Gothic church, manufactures of woollen hosiery, and a trade in poultry, corn, wool, horses, and cattle. Pop. 2056.

HOUDENG, two places, Belgium:-1, (-Aimeries), a vil. and com., prov. Hainaut, on the Tiriau, 10 m . W. Mons. It has several forges and tanneries, a trade in cattle and agricultural produce, and a colliery, which employs 900 persons. Pop. 2556.-2, (-Goegnies), a vil. and com., near the former. Inhabitants chiefly employed as miners, or in connection with the coal works in the vicinity. Pop. 2775.

HOUFFALIZE, a vil. and com. Belgium, prov. Luxembourg, on the Ourthe, 35 m . N. Arlon, once the capital of a lordship, and surrounded with walls. It has an old castle on a height, a church, two chapels, a courthouse, and prison, tanneries, breweries, and an extensive trade in medieinal plants, which grow in the vicinity. Pop. 1124.

HOUGAER De-Bost Overlaek-Rommersom, a vil. anil com. Belgium, prov. Brabant, on the Great Geete, 28 m . E. Brussels; with a large and handsome church, several distilleries, and breweries, famous for a white beer, which is largely exported. Pop. 3478.

HOUGH-on-tile-mile, par. Eng. Jincoln; 3600 ac . P. 582.
HOUGHAM, two pars. Eng.:-1, Kent; 2770 ac. $P$. 1311.-2, Lincoln; 2590 ac. P. 337.

IIOUGHTON, 12 pars. Eng. :-1, IIuntingdon; 1640 ac. P. 424.-2, Hants; 1790 ac. P. 458.-3, Sussex; 1630 ac. P. 177. - 4, (Conquest), Bedford; 3380 ac. P. 746. -5 , (Great), Northampton; 1570 ac. Pop. 332.-6, (in-the-hole), Norfolk; 1060 ac. P. 242.-7, (Little), Northampton; 1070ac. P. 566.-8, $($ Long $)$, Northumberland; 3990 ac. P. 772.-9, (New), Norfolk; 1510 ac. P. 303.-10. (-on-the-hill), Leicester; 2450 ac. P. 451 - - 11, (on-the-hill), Norfolk; 470 ac. P. 41.-12, (Regis), Bedford; 4500 ac P. 1661.

HOUGIITON-LE-Sphing. a market tn., township, and par. England, co. Durham. The town, 6 m . S.S.W. Sunderland, is small but neat, has a fine large venerable church, and spacious burial-ground. There are, besides, meeting-houses for Methodists, Baptists, and Independents ; a national school, a charity-school for girls, some almshouses, and a mechanics institution. The prosperity of the town depends on the numerous mines in the neighbourhood, and is proportioned to their success. The coal of Houghton-Le-Spring is of a superior description, and commands the highest price. Its annual fair lasts several days. Area of par., $14,560 \mathrm{ac}$. Pop. 16,833.

HOULME, a small dist. France, which belonged to prov. Lower Normandy, and is now included in dep. Orne.

HOULME (Le), a vil. France, dep. Seine-Inferieure, $5 \mathrm{~m} . \mathrm{N} . \mathrm{N}$. W. Rouen, r. bank Cailly. It is a cheerful-looking place, and has manufactures of cotton goods, bleachfields, and a cotton and paper mill. Pop. 2035.

HOUNAM, par. Scot. Roxburgh; 8 m. by 6 m . P. 280 .
HOUNAN, prov. China. See Hoonan.
HOUND, par. Eng. IIants; 2990 ac. P. $460^{\circ}$.
HOUNSLOW, market tn. and chapelry, England, co. Middlcsex, 11 m . W.S.W. London. The Town, which stands
on the edge of Hounslow heath, consists of a long street irregularly paved, and lighted with gas. The church, erected on the site of an old priory, is a handsome structure, in the modern English style; there are likewise several Dissenting chapels, and a charity school for 100 boys and 100 girls. Near the town are some extensive powder-mills, a flax-mill, a mill for rolling copper, and a cavalry barrack, erected in 1793. The adjoining heath, notorious for the robberies committed on it in former times, is now almost entirely enclosed. Marketday, Thursday. Pop. 3097.

HOUPE [North of the lakes], a central prov. China, between lat. $29^{\circ}$ and $33^{\circ} \mathrm{N}$.; lon. $108^{\circ} 35^{\prime}$ and $116^{\circ}$ E.; bounded, N. by Houan; E. by Nganhoei and Kiangsee; S. by Hoonan; and W. by Sechuen and Shense. It is intersected by the Han-kiang and the Yang-tse-kiang, and its surface, particularly towards the S., is dotted with numerous lakes. lt is considered one of the most fertile parts of the empire; produces bread stuffs, silk, cotton, tea, fish, and timber; and manufactures cloth, paper, and wax. With Hoonan, it formerly constituted one province, named Hukwang. Provincial capital, Woo-Chang-foo. Pop. 37,370,098.

HOUPLINES, a vil. France, dep. Nord, 10 m. N.W. Lille, r. bank Lys; with manufactures of laces, and cotton twist, tanneries, breweries, a cotton, oil, and fulling mill. Pop. 1055.

HOURN (Locr), an inlet, W. coast, Scotland, co. Inverness, stretching inland for 10 m . opposite the S.E. coast of Skye. It is about 3 m . wide at the entrance.

HOUSE, one of the Shetland isls. See Burra.
HOUSSA, or Haussa, an independent kingdom, N.W. Africa, central Soudan, between lat. $11^{\circ}$ and $14^{\circ} \mathrm{N} . ;$ and lon. $4^{\circ}$ and $11^{\circ}$ E. ; bounded, E. by Bornou; W. by the Quorra; N. Sahara; and S. Borgoo. This country, though yet little known, is represented as extremely fertile, and as being cultivated with a skill little inferior to that of Europeans. Here, it is said, the hot winds come from the E., and the cold from the W., and that rains are neither so frequent nor violent as in other parts of Africa. The natives are said to be of mild and courteous manners, and cheerful dispositions, being much given to dancing, and singing, and other amusements. They are expert weavers, as well as agriculturists, and manufacture large quantities of cotton cloths, with which they supply Fezzan. They are also well acquainted with tanning, and working in iron. Where the country is not cleared for cultivation, it is covered with forest-trees, especially mimosas and acacias, and there is rarely a spot without vegetation. There are two large towns in this kingdom-Saccatoo, and Kashna, about 150 m . distant from each other. These towns carry on an extensive trade with the countries of N. W. Africa, particularly Fezzan and Tripoli.

HOUSTON.-1, A vil. and par. Scotland, co. Renfrew. The village, 5 m . N.W. Paisley, has extensive cotton factories, employing the great bulk of the inhabitants. Length of par., about 6 m .; breadth, 3 m . Pop. 2818.-2, A city, U. States, Texas, co. Harrisburg, 70 ft . above the sea-at the extreme point of Buffalo Bayou, that can be reached even by small boats, 50 m . N. W. Galveston. It has four churches, a theatre, several manufactories, and numerous stores. It was commenced in 1837, and is rather unhealthy. P. about 4000 .

HOUTMAN'S ABROLHOS, three separate groups of isls., S. W. coast, Australia, between lat. $28^{\circ} 15^{\prime}$ and $29^{\circ} 10^{\prime}$ S.; lon. $113^{\circ} 30^{\prime}$ and $114^{\circ} 3^{\prime}$ E.; separated from the mainland by Geelvink Clannel, which is about 30 m . broad. The names of the several groups are, respectively, Pelsart Group, Northern Group, and Easter Group. They extend in a N.N.W. direction 48 m ., diminisling in breadth towards the N. Pelsart Group is separated from Easter Group, by a channel about 4 m . broad, and the latter, again, from Northern Group, by a strait 6 m . wide.

HOUX, A vil. and com. Belgium, prov. of, and $12 \mathrm{~m} . \mathrm{S}$. Namur, r. bank Meuse. It has two blast furnaces, a marble quarry, and the ruins of the ancient strong castle of Poilvache, standing on the summit of a lofty rock overhanging the river, and in which is a well, sunk about 250 ft . through the rock, to the level of the Meuse. The castle figures much in the early history of the Netherlands.

HOVE, par. Eng. Sussex; 720 ac. Pop. 2509.
IIOVEKINGHAM, par. Eng. Notts; 1050 ac. P. 398.
HOVETON, two pars. Eng. Norfolk:-1, (St. John); 1460 ac. Pop. 317.-2, (St. Peter) ; 980 ac. Pop. 137.

HOVINGHAM, par. Eng. York (N. Riding) ; 8630 ac, Pop. 1277.

HOW-Caple, par. Eng. Hereford; 970 ac. Pop. 140.
HOWAKEL, an isl. Red Sea, off the coast of Abyssinia; lat. $15^{\circ} 9^{\prime}$ N.; lon. $40^{\circ} 19^{\prime}$ E. (R.) It is lofty, rugged, and about 9 m . long.

HOWDEN, a market tn. and par. England, locally situated in co. York (E. Riding); but a dependency of co. Durham. The Town, 17 m . S.S.E. York, a station on the York and N. Midland railway, is small; houses generally rather of a mean appearance; but streets lighted with gas. Its church, a noble cruciform structure, is unsurpassed for the beauty of its architecture by any other edifice of its kind in Great Britain. Close by the church, are the remains of an ancient palace of the bishops of Durham, now converted into a farm-house. There are several places of worship for Dissenters, a free and a national school, several other small charities, and an elegant union workhouse. Bricks and tiles are made in the neighbourhood. There are, likewise, some considerable tanneries, and several corn-mills; but no other manufactures. Marketday, Saturday. There are several annual fairs; one of which, held in September, is said to be the largest for horses in England. The supply of horses for the army is chiefly obtained at this fair, which is likewise resorted to by foreign dealers and breeders. Area of par. $14,510 \mathrm{ac}$. P. 4860.

HOWE, par. Eng. Norfolk ; 970 ac. Pop. 92.
HOWE (Cape).-1, The most S.E. point of Australia, 280 m. S.W. Sydney; lat. (islet close off) $37^{\circ} 31^{\prime} \mathbf{S}$. ; lon. $150^{\circ}$ E. (r.)-2, (W. Cape Howe), S. coast W. Australia, forming the W. side of Torbay, co. Plantagenet; lat. $35^{\circ} \mathbf{9}^{\prime} \mathrm{S}$. ; lon. $117^{\circ} 40^{\prime}$ E. (r.)

HOWELL, par. Eng. Lincoln; 1650 ac. Pop. 72.
HOWI-Howe, a considerable tn. China, prov. Quangtong, S. coast isl. Hainan, about 3 m . from Hush-Eon, on a narrow peninsula, with a deep bay to the N.E., and traversed by a river from E. to W. The streets have considerable breadth, and are clean and well paved. It is the residence of the viceroy of Hainan, and the principal commercial town of the island. The exports consist chiefly of sugar, betel-nuts, cocoa-nuts, cocoa-nut oil, salt, and tanned leathers; and the imports of different articles from China, fine English cloths, gun-flints, and opium.

HOW ICK.-1, An inland co. W. Australia, of a triangular form, about 52 m . long, E. to W., and about 46 m . in breadth. In the centre of the county are some salt-water swamps, and a range of hills, with some good pasturage intermingled. 2, An isl. group, N.E. coast Australia; lat. $14^{\circ} 30^{\prime}$ S.; lon. $145^{\circ} 0^{\prime}$ E., nearly mid-way between Cape Flattery and Cape Melville; about 10 in number, all low, and covered for the most part with mangroves; and abounding in turtle and vampirebats. 'Here,' says Macgilivray, 'as elsewhere on the man-grove-clad islands, a large honey-sucker (Ptilotis chrysotis), filled the air with its loud and almost incessant, but varied and pleasing notes, the only bird we ever met with on the N.E. coast of Australia which produced anything like a song.' -(Voy. H.M.S. Rattlesnake.)

HOWICK, par. Eng. Northumb.; 1520 ac. Pop. 242.
HOWICZY, a vil. Austria, Moravia, circle Mradisch, about 40 m . from Weisskirchen, on the Betschwa; with a church and two mills. Pop. 3407.

HOW'TH, a par. and small tn. Ireland, co. Dublin. The Town, extending along the N . side of the hill of Howth, 7 m . E.N.E. Dublin, with which it is connected by railway, consists of a single street, with numerous small cabins straggling around, has a church, a R. Catholic chapel, the ruins of Howth abbey, a religious establishment, founded early in the 13th century; and a large harbour of refuge, with lighthouse, \&c., constructed by Telford, but so obstructed by rocks and accumulations of sand as to be almost useless. It is chiefly inluabited by fislermen, who supply the Dublin markets. Near the town is Howth castle, the residence of the earls of Howth. The peninsula on which the town stands, called the Hill of Howth, forms the N. enclosure of Dublin bay, and is a very striking and remarkable object. It is about 3 m . in length, by 2 m. in breadth, and terminates towards the sea, in a rocky elevation of 563 ft . in height. On June 1, 1852, a submarine electric telegraph was laid down between Howth and Holyhead. Pop. 692. Area of par., 2670 ac. Pop. 1538.

IIOXNE, a parish England, co. Suffolk; 1890 acres. Pop. 1333.

HÖXTER, a tn. Rhenish-Prussia, gov. of, and 40 m . S.S.E. Minden, cap. circle of same name, l. bank Weser, here crossed by a stone bridge 500 ft . long. It is walled, defended by a fort; has a court of law, several public offices; a Protestant and a R. Catholic church; a syuagogue, hospital, and burgher school; manufactures of wax candles and chicory ; a bleachfield, paper-mill, brewery, distillery; a trade in cattle, wood, yarn, and linen. In the vicinity is the suppressed Benedictine abbey of Corvey, a handsome modern edifice, now the scat of Prince Hohenlohe Schillingfïrst. Pop. 3657.-- The circle is hilly, but productive. Area, 208 geo. sq. in. P. 50,679.

IIUY, an isl. and par. Scotland, Orkness, N. W. side Pentland Firth, $2 \frac{1}{2} \mathrm{~m}$. S. Stromness; about 14 m . long, by 6 m . broad; in some parts tolerably fertile; but generally mountainous, and covered with heath. Near its S.E. extremity is the safe, well-known harbour of Long-Hope. P. (isl.) 1486.

HOYA.-1, A tn. Hanover, l. bank Weser, here crossed by a bridge, 40 m . N. W. Hanover ; with a court of justice; a church, townhouse, and castle; some shipping; and a trade in linen. Pop. 2134.-2, (-Gonzalo), A tn. Spain, Murcia, prov. and 15 m . from Albacete; with a parish church, and primary school; and a trade in saffron, wool, and eattle. P. 1125.

HOYEISWWERDA, or Wojerezy, a tn. Prussia, prov. Silesia, gov. of, and 85 m . W. by N. Licgnitz, cap. circle of same name, on the Black Elster. It has a court of law, several public offices, a castle, Protestant chnrch, chapel, townhouse, and hospital ; manufactures of linen and hosiery; and numerous distilleries. Pop. 2170.-The circle is generally a sandy plain. Area, 199 geo. sq. m. Pop. 27,718.

IIO YLAND-Higir, par. Eng. York (W. Riding) ; 1080 ac. Pop. 2757.
hoybe Lake, or hoy Lake, a vil. England, co. Chester, at the mouth of the Dee. 8 m . W. by S. Liverpool, much resorted to during the bathing season. There are two lighthouses, with fixed lights; lat. $53^{\circ} 24^{\prime} \mathrm{N}$. ; lon. $3^{\circ} 11^{\prime} \mathrm{W}$.; leading into the roads, which afford safe anchorage. P. 444.

HOYM, a tn. Germany, Anhalt-Bernburg, cap. bail. of same name, on the Selke, 19 m . W. Bernburg. It is walled; has a castle, a church, townhouse, tile-works, and three mills. Pop. tn., 2300 ; bail., 5000.

HOYO-de-Pinares, a tn. Spain, Old Castile, prov. Avila, 35 m . W. Madrid; tolerably well built; with two squares, a parish church, townhonse, a primary school, manufactures of woollen cloth, and a trade in corn and cattle. Near it are mines of argentiferous lead, silver, and copper. Pop. 917.

HOYOS, several minor places, Spain, particularly a vil. Estremadura, prov. of, and 48 m. N.N.W. Caceres; with a church, chapel, three schools, a townhouse, prison, public fountain, and some trade in oil. Inliabitants engaged in tillage and cattle-rearing. Pop. 2136.

IIRADISCH-Ungariscir, a tn. Austria, Moravia, eap. circle of same name, l. bank March, at the confluence of the Ossowa, 42 m . E.S.E. Briiun. It stands in a fertile district, subject, however, to frequent inundations; consists of an old and a new town; contains a large market-place, four churches, a townhouse, courthouse, high school, and barrack; and has a trade in corn and cattle. Pop. 2100.-The chncle is hilly, and adapted for pasture; but has some fertile valleys and undulating flats. Area, 1021 geo. sq. m. Pop. 310,191.

HROCIIOW-TEINITz, a market tn. Bohemia, circle of, and 5 m . E.N.E. Chrudim, on the Lezak; with a eastle, church, townhouse, school, and a mill. Pop. 964.

HROZINKAU (Alt and Nev), two large vils. Anstria, Moravia, circle Hradisch. The former contains a chureh; and has in its vicinity the castle of Swietlan. Pop. 2240. The latter, on the Betschwa, about 48 m . from Weisskirchen, has a parish chureh. Pop. 3050.

HIRUBIESZOW, a tn. Russian-loland, 64 m . S.E. Lublin, among marshes, on the Hulzwa. It has three churches and a convent; a considerable trade in Hungarian wine and mead, and several large annual fairs. Pop. 1700.

HUACIIAPURE, a headland, Chili; lat. $34^{\circ} 58^{\prime}$ S. ; lon. $72^{\circ} 17^{\prime} \mathrm{W}$.

HUACIIO, a small bay, Pern, 63 m . N.N.W. Callao; with good anchorage in 5 fathoms. About 1 m . from the coast, is a small town of same name, at which provisions can be obtained at a moderate price.

Vol. I.

HUAHEINE, an isl. Pacific Occan, Socicty group; lat. $16^{\circ} 43^{\prime} \mathrm{S}$. ; lon. $151^{\circ} 7^{\prime} \mathrm{W}$. (R.) It is mountainous, but fertile ; and is nearly surrounded by a coral reef. It is the most frequented of the Society islands, and furnishes abundant supplies. Coffee thrives in the gardens of the missionaries. On the N.W. side of the island, there is a safe and capacious harbour, though somewhat difficult to enter, called the Bay of Fare. Pop. estimated at 2000.

IIUALLAGA, a river, Peru, which rises on the E. slope of the Andes, near N. Lake Chinchaycocha, and falls into the Marañon, at La Laguna, after a course, chiefly N., of about 450 m . It receives numerous affluents, of which the Moyobamba, the IIuagabamba, and the Apiconcho, are the most considerable.

HUAMBLIN, or Socorro, an isl. W. coast, Patagonia ; lat. $44^{\circ} 49^{\prime} \mathrm{S}$. ; lon. $75^{\circ} 15^{\prime} \mathrm{W}$. (r.)

HUAMACIIUCO, a tn. Peru. See Guamachuco.
IIUAMANGA, a tu. Peru. See Guamanga.
húncavelica, a tn. Peru. See Guancarelica.
huanuco, a tn. Peru. See Guanuco.
IIUAQUI, or YAQUi, a river, Mexico, which rises in dep. Sonora, about lat. $31^{\circ} 40^{\prime}$ N.; lon. $108^{\circ}$ W., flows S.S.W., then W., and falls into the Gulf of California, 20 m. S.E. Guaymas; total course abont 400 m . It is broad, liable to floods, and its banks are extremely fertile.

HUARAZ, a tn. Peru, dep. Tarma, 80 m . S.E. Trixillo; with two churches, a convent, and an hospital. Pop. 5000.

HUARTE, two places, Spain:-1, A tn. Navarre, prov. of, and 3 m . E.N.E. Pampeluna. It is a poor place, consisting of a small square, and a few irregular streets; with a parish church, courthouse, two schools, and some trade in hides. Pop. 600.-2, (-IIuarter-Araquil), A tn. Navarre, prov. of, and 16 m. W.N.W. Pampeluna; with a well-planted promenade, a parish church, townhouse, prison, school ; and a trade in corn and cattle. Pop. 575.

IfUASCO, or Guasco, a seaport, Chili, r. bank, and near the mouth of the Huasco, prov. of, and 98 mn . N. Coquimbo ; lat. $28^{\circ} 18^{\prime} \mathrm{S} . ;$ lon. $71^{\circ} 1^{\prime} \mathrm{W}$. It derives its chief importance from the silver mines in its neighbourhood, large quantities of that metal being exported from it. . The country around has a barren, miserable appearance. The river is small, and a heavy surf breaks outside of it; but the water is excellent. - At Iluasco the phenomenon of the parallel terraces is very strikingly seen; no less than seven perfectly level, but unequally broad plains, ascending by steps, occur on one or both sides of the valley.'-(Darwin.)

IIUBB, two rivers, Beloochistan:-1, Supposed to rise near Lus, in lat. $26^{\circ} 12^{\prime} \mathrm{N}$. ; lon. $66^{\circ} 55^{\prime} \mathrm{E}$. For about 25 m . in the upper part of its course, it flows S.E., and then turning due $S$., holds its way for about 50 m . in that direction. It then turns to the S.W., and after a total course of 100 m ., falls into the Arabian Sea, on the N.W. side of Cape Monze, in lat. $24^{\circ} 50^{\prime} \mathrm{N}$.; lon. $66^{\circ} 36^{\prime} \mathrm{E}$. Its whole course is described as a succession of rocky or gravelly gorges, in the rugged and barren Pubb mountains.- $2, \mathrm{~A}$ small stream, which rises in the hilly country N.E. Bela, prov. Lus. It takes a S. W. course, and, 4 m . N.E. from the town of Lyaree, falls into the Poorally, in lat. $25^{\circ} 40^{\prime} \mathrm{N}$; lon. $66^{\circ} 26^{\prime} \mathrm{E}$.

IIUBBERSTON, par. Wales,Pembroke; 1270ac. P. 1174.
HUBERT (St.), a tn. Belgium, prov. Luxembourg, 33 m . N. W.Arlon, in the forest of same name, which has a circumference of 40 m . It is a miserable-looking place; but possesses two churehes, one of which, the abbey church of St. IFubert, is one of the finest religious edifices in Belgium. Its W. front, and two towers, are Italian, but its interior is Gothic, and is adorned with fine marbles. Part of the extensive buildings of the ancient abbey are occupied as a penitentiary for juvenile convicts. Tho manufactures are ironmongery, leather, oil, and glue; and the trade in horned cattle and sheep is considerable. Pop. 1842.

HUBER'TH (Szent), or Nagy-Onoszin, a vil. Hungary, Thither Theiss, co. Torontal, 8 m . from Kikinda; with a R. Catholic church; and a trade in corn, maize, and butter. P. 1051.

HǗCKESWAGEN, a tn. Rhenish-Prussia, gov. of, and 24 m . E.S.E. Düsseldorf, r. bank Wupper; with a R. Catholic and two Protestant churches, a burgher school, manufactures of woollen, cotton, and linen good3, and of articles in steel and iron; tanneries, lye-works, and a cotton-mill. P. 2937.

IIUCKING, par. Eng. Kent; 1290 ac. Pop. 117.

HUCKNALL-Torkard,par.Eng.Notts; 3270ac. P. 2680.
HUDDERSFIELD, a flourishing manufacturing tn ., parl. bor., and par. England, co. York (W. Riding). The town, situated on an acclivity, rising gently from the Colne, $37 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. York, on the railway from Leeds to Manchester, comprises about 50 principal streets, nearly all running at right angles to each other, well paved, drained, and carefully kept; houses, remarkable for their uniformity, generally of a very superior description, and built of the best Yorkshire sandstone. The town is well lighted with gas, and amply supplicd with water. The places of worship consist of four Episcopal churches, eight Dissenting chapels, a Friends' meet-ing-house, a Unitarian, and R. Catholic chapel; some of these are very handsome edifices. The other public buildings of note are the cloth-hall, the riding-school and gymnasium, the station of the London and North-western railway-an elegant structure, in the Roman-Corinthian style; the George hotel, a large and fine Italian building; the infirmary, and Northgate and Seedlill schools. There are twenty respectable academies in the town, eight church, national, or British public schools, and two large colleges; one of which is immediately connected with the church establishment; the other is of a more general character, and is now incorporated with the London University. The literary and scientific institutions are, the philosophical society, with library and museum; the mechanics' institute, and school of ornamental art. The principal manufactures, extensively carried on in the town and adjacent villages, are plain and fancy woollens, consisting of broad and narrow cloths, serges, kerseymeres, cords, and a great variety of fancy goods, as shawls, vestings, \&c.; composed generally of worsted, silk, and cotton ; some wholly of the first, others of certain admixtures of wool and the other matcrials. Cotton manufactures are also carried on to some extent. An extensive trade exists with America and Germany in plain and fancy woollen goods. Upwards of 600 manufacturers, from the town and vicinity, attend the clothhall on each market day (Tuesday). Pop. (1841), 25,068. Area of par., 15,080 ac. Pop. 38,454.-(Local Correspondent.)

IIUDDINGTON, par. Eng. Worcester ; 890 ac. P. 424.
HUDIKSVALL, a seaport tn . Sweden, län Gefleborg, in the Gulf of Bothnia, between two bays connected by a channel which traverses the town, 70 m . N. Gefle. It is regularly and tolerably well built, and has manufactures of snuff and tobacco, a harbour, at which some trade is carried on, chiefly in hemp, flax, deals, and salt-fish. The last consist mostly of strömlings, which are about the size of a sprat, and are here taken in great numbers. They are cured like herrings, and have a great sale in the N. parts of the Baltic. P. (1855), 2300.

HUDLITZ, or HUdlice, a vil. Bohemia, circle Rakonitz, about 4 m . from Beraun; with a church and school. Near it are iron mines and blast furnaces. Pop. 1181.

HUDSON, a tn . and port, U. States, state of, and 116 m . N. New York, l. bank Hudson. It is very regularly built, all the streets, with the exception of two, which follow the line of the river, intersecting each other at right angles; the main street being above 1 m . long. Its principal building is the courthouse, surmounted by a dome, and with a portico of Ionic columns; and it also has eight churches, numerous academies and schools, a lunatic asylum, and Franklin literary institution, with a respectable library and philosophical apparatus. Several streams in the neighbourhood furnish waterpower, which is made available for manufactures. At one time, the chicf trade was with the W. Indies, but it is now supplanted by the whale-fishery. A steam ferryboat plies between Hudson and the opposite bank, while the Hudsnn and Berkshire railway connects it with Boston. P. (1850), 6263.

HUDSON, a river, New York, and, though not the largest, yet, in some respects, one of the most important rivers in the U. States. It rises, by two branches, in the N. part of the State, about lat. $44^{\circ}$ N. The E. branch passes through Lake Schroon, and joins the W. or main branch coming from the N.W., after a separate course of about 40 m . each. The united strcam proceeds first S.E. 15 m ., to Hadley Falls, and then N.E. 20 m ., to Glen's Falls. From this point to its embouchure in New York Bay, its direction is almost due S. Its whole course exceeds 300 m . Its chief affluents are the Sacandaga and the Mohawk. The former it receives about 15 m . after its branches unite ; the latter, and the more important of the two, 40 m . below Glen's Falls. The tide flows a little
above Albany, to which, 145 m . above New York, it is navigable for sloops and steam-boats; to Hudson, 118 m ., it is navigable for the largest vessels. For a considerable part of its course, particularly at first, the banks of the Hudson are high, rocky, and precipitous; and the scencry along them is very picturesque. The chief places on it are-New York, Newburg, Poughkeepsie, Hudson, Albany, Troy, and Catskill.

HUDSON STRAIT. See Hudson's Bay.
HUDSON'S BAY, an extensive bay, or rather an inland sea, British America, N. of Canada, extending between lat. $51^{\circ}$ and $64^{\circ} \mathrm{N}$., and lon. $77^{\circ}$ and $95^{\circ} \mathrm{W}$.; length, N. to S., about 800 m .; greatest breadth, about 600 m . ; area, $296,000 \mathrm{sq} . \mathrm{m}$., including, in this, different gulfs; the principal of which are St. James' Bay, forming the S. part of Hudson's Bay; Port Nelson and Chesterfield Inlet on the W., and Welcome Sea, or Sir Thomas Roe's Welcome, on the N. Hudson's Strait, which is its N.E. continuation, itself a sea 460 m . long, and 100 m . broad, connects it with the N. Atlantic. Hudson's Bay is navigable only a few months in the summer, being completely frozen over or obstructed by drift ice, during the rest of the year. It is full of sandbanks, reefs, and islands; the best known of the latter being Southampton and Mansfield islands. The shores around it are rocky and steep, the climate is extremely rigorous, and the contiguous countries are of a barren and repulsive character. Numerous rivers fall into this great inland sea; the chief are Great Whale, on the E. coast; Main, Abbitibbe, Moore, and Albany, in St. James' Bay ; and Weenisk, Severn, Hayes, Nelson, Churchhill, and Seal, on the W. coast. The beluga, or white whale, is found occasionally in its waters; but fish, and also crustacea, are scarce. The Hudson's Bay Company have several settlements and forts, especially on the W. coasts, and carry on a lucrative traffic with the aborigines for peltry, \&c.

HUDSON'S BAY TERRITORY, a vast tract of country, comprising nearly the whole of British N. America, with the exception of the Canadas, New Brunswick, Nova Scotia, Newfoundland, and the other British settlements on this part of the E. coast, which, with the U. States territory, form its limit on the $\mathbf{S}$.; the Atlantic bounding it on the E., the Pacific on the W., and the Arctic Ocean on the N. In this space is comprchended the great inland sea, known as Hudson's Bay, and an immense number of large lakes and rivers W. of it, many of the former upwards of 100 m . in length. Amongst these are the Great Bear Lake, Great Slave Lake, Deer Lake, Winnipeg, \&c. It also comprises a portion of the Rocky Mountains, and several islands on the W. coast, including that of Vancouver, about 300 m . long, and upwards of 50 broad. The peninsula of Labrador forms its most E. portion. This country is divided into four large departments or regions:-The N. department, which includes all the establishments in the far N. and frozen regions, comprises the valley of the Mackenzie river, and the country betweeh the sterile region and the Rocky Mountains N. of Lake Athabasca. The S. department extends on both shores of James' Bay, and along the S. shores of Hudson's Bay, as far W. as Cape Churchill. It extends inland to the ridge which forms the N. boundary of Canada, and to the lakes Superior, Winnipeg, Deer, and Wollaston. Along the shores of the lakes it is swampy, but inland it is well wooded; surface undulating, but not hilly. It produces the fur-bearing animals in great abundance. The Montreal department, including the country in the neighbourhood of Montreal, up the Ottawa River, and along the N . shore of the Gulf of St. Lawrence and Esquimanx Bay; and the Columbia department, which comprehends an immense extent of country to the W. of the Rocky Mountains. Nearly all the rivers in the IIudson's Bay territory flow N.; those in the S. parts falling into Hudson's and James' Bays, and those in the N.W., including the Great Mackenzie River, discharging themselves into the N. Ocean. The country on the E. side of Hudson's Bay, forming part of the peninsula of Labrador, is called East Main; that on the S.W., New S. Wales. The latter, which is much better known thar the former, abounds in lakes and rivers. The Hudson's Bay territory has yet been little explored, but its S. and S. W. parts are known to be well adapted for agriculture. Meantime, it is used by the Hudson's Bay Company, in whose possession it is, mercly as huntinggrounds, from which to obtain supplies of furs for the markets of the world. These are probably upwards of 20 diffe-
rent kinds; the most valuable of which is that of the black fox. The other articles of commerce are oils, dried and salted fish, feathers, quills, and walrus ivory. The lludson's Bay Company was chartered by Charles II., in 1670.
hue, Thua Then, or Phuxuan, the cap. eity of Anam, and of a prov. of same name, on the river Hué, which is here navigable for small cratt, 10 m . from its mouth in the Hue road, Gulf of Tonquin, about lat. $16^{\circ} 28^{\prime}$ N.; lon. $107^{\circ} 12^{\prime}$ E. It is composed of two cities-an exterior and an interior. The former is surrounded by the river, and by walls 5 m . in circumference, and 60 ft . high, fortified in the European manner; is entered by 10 bridges, correspouding to as many gates; and contains the houses of the near relatives of the king, the different public offices, barracks, prisons, magazines, and granaries, and a few poor, petty traders, who sell rice, betel, and other commodities required by the soldiery. In the middle of the exterior is the interior city, also surrounded with walls, containing the palace or seraglio of the king, the palace of the king's mother, the house in which the sovereign receives the mandarins, and a guard-room for the soldiers on duty at the gate. Probably no capital presents a more dismal aspect than Hué; every one in it groaning under the tyranny of a despot who imagines himself to be the only person in his kingdom who ought to be happy, and of mandarins who only study to deceive the king, and oppress the people for their own profit. Hué is likewise the ordinary station of a portion of the navy, and has extensive building-yards, which are alleged to be in constant activity; and a large caunon foundry. The country around being very imperfectly cultivated, the capital obtains its supplies of rice from the N. provinces. Pop. estimated at 60,000--(Jour. Indian Arehip.)

HUÉ, a river, Anam, which, alter a E.N.E. course of about 100 m ., falls into the road of same name, $65 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Turon harbour ; lat. $16^{\circ} \mathrm{N}$. It is broad, shallow, and only navigable for small craft; but the road into which it falls forms an excellent harbour, where vessels of 200 tons can ride in safety during the S.W. monsoon.

HUEBRO, a vil. Spain, Andalusia, prov. of, and about 20 m . from Almeria, poorly built, with a church, courthouse, prison, primary school, and the ruins of an old castle; manufactures of woollen and linen cloth, numerous flour-mills, and some trade in alcohol, corn, and esparto. Pop. 1010.

IIUECIJA, a vil. Spain, Andalusia, prov. of, and 13 m . N. Almeria; with two squares, a parish chureh, a primary school, and an annual fair, which lasts six days. Pop. 1027.

IIUEHUETOCA, or Gueguetoca, a vil. Mexico, 27 m . N. Mexico, in the upper part of the basin of the Tula, 7000 ft . above sea-level. It gives its name to the canal which serves to protect Mexico from inundation, by diverting the waters of the Guantitlan from the adjacent lakes.

HUELMA [anc. Acatucci], a tn. Spain, Andalusia, prov. of, and 20 m . S.E. Jaen, tolerably well built, with wide, but steep and unpaved streets; three squares, a parish chureh, chapel, two schools, a townhouse, prison, and storehouse; and mannfactures of linen and esparto fabrics, soap, glass, tiles, and earthenware. Pop. 2973.

HUELVA, a prov. Spain, occupying the W. extremity of Andalusia; bounded, N. by prov. Balajos, E. by Seville, S.E. by Cadiz, S. by the Atlantic, and W. by Portugal ; area, 4579 geo. sq. m. The N. part is occupied by the W. portion of the sierra Morena and its offsets; the highest peak is San Cristobal, at the base of which are the celebrated copper-mines of Rio Tinto. The mountains yield pine, oak, beech, chestnut, holly, and good pasturage, on which great numbers of sheep, goats, horned cattle, pigs, horses, mules, and asses are fed. The S. part of the province is comparatively level, and has a rich and alluvial soil. The chief rivers are the Tinto, Martiga, Piedras, Odiel, and Changa; the last separating Andalusia from Portugal, till it falls into the Guadiana. Copper, iron, lead, and coal, are wronght, and some linen and woollen fabries, and other articles for home use, manufactured. Shipbuilding, seafaring, and fishing, employ a number of the people. Education is deplorably backward, even for Spain. Pop. 153,462.

HUELVA [anc. Onobu], a tn. and port, Spain, Andalusia, cap. above prov., in a bay formed by the mouths of the rivers Odiel and Tinto, 51 m . W. by S. Seville. It is well built, has wide, clean, paved, and straight streets ; two large squares, two parish churches, several chapels, town and session houses;
a Latin, and three elementary schools, an orphan asylum, hospital, prison, storehouse, custom-house, three convents, one now used as a barrack; manufactures of hempen and esparto ropes, sails, bloeks, and other articles requisite for shipbuilding, a sinall trade in fruit, and some tunny fishing. P. 7416.

IIUENEJA, a tn. Spain, Andalusia, prov. of, and 39 m . E. Granada. It is indifferently built, has crooked, steep, illpaved, and narrow streets; two squares, a churel, townhouse. prison, two sehools, several promenades, and is commanded by an ancient and decayed fortress surrounded by rainous walls. Pop. (agrieultural) 2498.

IUUERCAL, a vil. Spain, Andalusia, prov. of, and about 3 m . from Almeria, well built, with a parish church, coarthouse, primary sehool, an oil and a flour mill, and a trade in corn. Pop. 1600.
hUERCAL-Obera, a tn. Spain, Andalusia, prov. of, and 42 m. N.E. Almeria, near 1. bank Almanzora. It is well built, has wide, clean, and level streets, numerons squares, a handsome parish church, several chapels, a college, two Latin, and five primary sehools; town and session houses, a prison, three store-houses, and a fountain; manufactures of lineu and woollen fabrics, soap, saltpetre, earthenware, and brandy. Near it are the mines of the sierra de Almagrera, in which many of the inhabitants are employed. Pop. 12,336.

HUERTA, several places, Spain, particularly-1, (-de Valdecarabaños), a th. New Castile, prov. of, and 20 m . E. Toledo; with a parish church, townhouse, prison, school, an old castle, on a commanding eminence; and a trade in hemp. Many of the inhabitants are muleteers. Pop. 2005.-2, (-del Rey), a tn. Old Castile, prov. of, and 48 m . S.S.E. Burgos, at the foot of the sierra de Soria; with narrow and ill-paved streets, a parish chureh, prison, primary sehool, manufactures of leather and refined wax, and a dye-work. Pop. 563.

HIUESA, a tn. Spain, Aragon, prov. Teruel, 45 m. S. Saragossa; tolerably well built, with a parish chureh, a townhouse, prison, primary school, and manufactures of linen and earthenware, several flour mills, and a dye-work. l'op. 636.

HUESCA, a prov. Spain, Aragon, bounded on the N. by France; E. by prov. Lerida; S. and S.W. by Saragossa; and W. and N.W. by Navarre. Area, 7526 sq. m. The N. portion of the province is unusually rugged and mountainous, being covered with offsets of the Pyrenees, some of the loftier summits of whieh are covered with perpetual snow. In some places they are precipitous and bare, in others covered with timber and yielding excellent pasturage. Iron, copper, and antimony are wrought in them. The S. districts, on the contrary, are ehiefly level, with a rich alluvial soil, producing excellent grain, wine, oil, fruits, and vegetables, hemp, and silk; and depasturing domestic cattle, especially a superior breed of mules. Huesea is irrigated by the Cinca, Essera, Alcanadre, Gallyo, Aragon, Arva, and numerous smaller streams, all affluents of the Ebro. The climate of the N. region is cold, damp, and exposed; in the $S$. it is mild and soft, being sheltered from the N. and E. winds by the Pyrenees and highlands of Catalonia. Linen, woollen, and hempen fabries, earthenware, glass, soap, and leatler, are manufactured; and some trade is carried on in timber, iron, copper, wine, fruits, cattle, and agricultural produce. Education is on the advance, and crimes against the person are of rare occurrence. The inlabitants are, however, mueh addieted to smuggling. P. 247,105.

HUESCA [anc. Osca], a city, Spain, A ragon, cap. above prov., the see of a bishop, 35 m . N.E. Saragossa, r. bank Isuela; well built, partly surrounded ly ancient and deeayed walls, with wide, clean, and well paved streets and squares; a magnificent Gothic cathedral, in which are some good pictures; four parish churches, six convents, several chapels, a university, and many elementary sehools, an hospital, town and session houses, two prisons, two theatres, a bull ring, barrack, and the ancient palaee of the kings of Aragon, containing a vault called La Campana, 'the bell;' so named from King Ramiro 11., in 1136, having beguiled his turbulent aristocracy to his palace, under the pretence of being present at the casting of a large bell; as each one arrived, he was deprived of his head, and his bolly thrown into this vanlt. In the environs, several delightful promenades. Manufactures: -soap, earthenware, tiles, brieks, and bardware. Trade in fruits, cereals, and cattle. Pop. 9200.

HUESCAR, a tn. Spain, Andalusia, prov. and 70 m . N.E. by E. Granada, r. bank Bravata; tolerably well built,
the old part with narrow, crooked, and ill-paved, and the modern with clean, wide, and well-paved streets; three squares, three churches, and several chapels, town and court houses, an hospital, storehouse, prison, four schools, and a convent. Manufactures:-linen, cloth, baize, blankets, and quilts, earthenware, and soap, which are exported. P. 5759.

HUETE, a city, Spain, New Castile, prov. and 35 m . W.N.W. Cuenca, l. bank Huete. It has wide, regular, and well-paved streets; several squares, four parish churches, four chapels, two convents, two hospitals, town and court houses, a prison, storehouse, cemetery, four fountains, and a very handsome Episcopal palace. Manufactures:-linen, coarse cloth, shoes, white wax, glass, and earthenware. Trade, in its manufactures, and agricultural produce. Pop. 2746.

HUETOR, two places, Spain, Andalusia:-1, (-Tajar), A tn. prov. of, and 26 m. W. Granada, r. bank Genil; with a parish church, courthouse, prison, primary school, brick and tile-works, an oil, and two flour mills, and a trade in corn. Pop. 1317.-2, (-Santillan), a tn., prov. of, and 7 m . E.N.E. Granada, with a parish church, townhouse, school, prison, and seyeral oil and flour mills. Pop. 813.

HÜFINGEN, a tn . Baden, Lake circle, cap. bail. of same name, 1. bank Bregach, 18 m. N.N.W. Schaffluausen, with a church, a castle, manufactures of clocks and watches, spinning, saw, and other mills. Pop. tn., 1600; bail., 11,808.

HUGGATE, par. Eng. York (E. Riding); 6500 ac. P.482.
HUGHLEY, par. Eng. Salop; 1330 ac. P. 127.
HÜHNERWASSER, or Kukziwody, a tn. Bohemia, circle, and 12 m. N.W. Bunzlau, on a height, surrounded by forests, with a church, castle, townhouse, and school; manufactures of linen, pitch-ovens, and lime-kilns Pop. 1102.

HUISH, five pars. England:-1, Devon; 1130 ac P. 141.-2, (Champflower), Somerset ${ }^{-}$ 1920 ac. P. 454.-3, (Episcopi), Somerset; 1780 ac. P.713.-4, (North), Devon; 2510 ac. P. 483.-5, (South), Devon; 1050 ac. P. 368.

HUISNE [Lat. Vinea Idonea], a river, France, which rises at St. Hilaire de Souzay, near the forest of Belesme, arrond. Mortagne, dep. Orne, flows in a generally S.S.W. course till it joins l. bank Sarthe, a little below Le Mans, after a course of about 60 m .

HUISSEN, a tn. Holland, prov. Gelderland, 3 m. S.W. Arnhem, formerly fortified; but now of small extent, with only one good street, and a small market-place, a church, two sehools, and the remains of its fortifications, and an old castle. Pop. (agricultural), 1263.

HUIZEN, a vil. Holland, prov. N. Holland, 15 m. E.S.E. Amsterdam, close on the Zuider Zee, which is here so very shallow that one may wade in above a mile without the water reaching higher than the middle. It is a pleasantly-situated beautiful village, and has a Calvinistic church, with a heavy lofty tower; a Baptist church, and school. Agriculture and fishing are the main occupations. Pop. 2478.

HUIZUM, or Husum, a vil. Holland, prov. Friesland, 1 m. S.W. Leeuwarden, with a church, school, and poorhouse. Pop. 676.

HUJAMREE, one of the mouths of the Indus, an offset of the Sata, or great E. channel, called, in the upper part of its course, the Seeahu. The Hujamree mouth is wide, but rapidly narrows inland to about 500 yards; lat. $24^{\circ} 10^{\prime} \mathrm{N}$.; lon. $67^{\circ} 28^{\prime} \mathrm{E}$.

HUKONG or Payendwen, a valley in the N. of Burmah, on the Assam frontier. "It is an extensive plain, bounded on all sides by hills; its extent, E. to N.W., being at least 50 m ., and varying in breadth from 45 m. to 15 m. ; the broadest part being to the $\mathbf{E}$. The hills bounding the valley are a continuation of the Shuedounggyi range, which is high, commences at Mogaung, and seems to run in a direction of N.N.E." The principal river of the valley is the Numtunace or Khyendwen, which, rising in the Shuedounggyi mountains, after receiving numerous smaller streams, quits the valley at its N.W. corner, and again enters the
defiles of the hills, beyond which its course is no longer per ceptible. The greater part of the low hills are under cultivation. The mineral products of the valley are salt, gold, and amber; for the last, indeed, it is the chief locality in Burmah; coal has also been met with. The villages are few and small on the W. side, but the E. is said to be more populous. The inhabitants are chiefly Singphoos, and their Assamese slaves; and carry on a good deal of trade with the surrounding countries. This valley is supposed to have at one time constituted an alpine lake.-Jour. Asiat. Soc. Bengal, April, 1837.

HUKWANG, an anc. prov. China, now divided into the two provinces of Hoonan and Houpe.

HULCOTT, par. Eng. Bucks; 850 ac. Pop. 133.
HULDENBERGH, a vil. and com. Belgium, prov. Brabant, on the Yssche, with a brewery, a paper and corn mill; employments are agriculture and cattle-rearing. Pop. 1520.

HULEIN or Hulin, a market tu. Moravia, circle of, and 10 m . S. Prerau, on the Russowa, and on the railway from Vienna to Olmütz, with a church, and two mills. Pop. 1968.

HULL (Kingston on), a large river port, municipal and parl. bor. England, and co. of itself, locally situated in co. York (E. Riding), on the N. shore of the estuary of the Humber, where it is joined by the Hull, 34 m. E.S.E. York, at the junction of the Hull and Selby and the Hull and Bridlington railways ; lat. (oitadel) $53^{\circ} 44^{\prime} 36^{\prime \prime} \mathrm{N}$. ; lon. $0^{\circ} 20^{\prime} \mathrm{W}$. (R.) The town, which has been greatly enlarged and improved of late years, stands on a low and level tract of ground, about

1. St. Mary's Church.
2. Trinity Church.
3. St. John's Church. 5. Christ Church. 6. St. l'aul's Church.
4. St. Mark's Church
5. Townhall.
6. Custom-House.
7. Master Mariners' Hespital 12. Wilberforce Monument. 13. 1 nfirmary
8. Charter House
9. Lunatic Asylum. 16. New Jail.
10. Zoological Gardens 18. Botanic Gardens. 19. Railway Station for Passen 20. Railway

20 m . from the mouth of the Humber, and stretches alongst the banks of the river, from the inundations of which it is secured by strong embankments. The houses are nearly all of brick, and are in general well built. The older streets are narrow and incommodious, but those of later formation are spacious and regular, lined with handsome buildings, well paved, well lighted with gas, and amply supplied with water. There are altogether 11 churches in Hull, besides a great number of chapels, belonging to Dissenters of every denomination. Many of these are handsome edifices, particularly the church of the Holy Trinity; which is a large cruciform structure, in the florid Gothic style, with an elegant tower. The other public buildings of note are, the custom-house, Trinity-house, public rooms, philosophical society's room, mechanics' institute, grammar-school, exchange, pilot office, townhall, infirmary, dispensary, subscription libraries, and almshouses. To these may be added the monument to Wilberforce, who was a native of the town; consisting of a fino column, surmounted by a statue of that illustrious person.

In the market-place is a bronze equestrian statue of William the Conqueror. The number of schools is about 100 , of which the grammar-sehool is the principal. Charities, benevolent, literary, and scientific institutions are numerous;

THE CHURCH OF THE HOLY TRINITY, HULL.

the more remarkable already named. A botanical and zoological garden; the former about 1 m . from the town, comprising $10 \mathrm{ac} . ;$ the latter, $6 \mathrm{ac} .$, with handsome buildings for the various animals. There are two large cotton-mills, and four or five extensive iron-foundries; the other principal branches of industry comprehend seed-crushing, colonr-making, boiler and steam-engine making, turpentine distilling, tobaceo manufacturing, oil-boiling, and ship-building. Hull now ranks as the third port in the kingdoin, and the extent of her ship accommodation, docks, quays, \&c., is commensurate with this eminent position; the former, with the harbour, oceupying an area of about 60 ac . The docks, constructed suecessively since 1775 , have an aggregate length of 1087 yds ., breadth varying from 250 to 400 ft ., and a total arca of 24 ac ., besides a basin between two of the piers on the Humber; they are surrounded by broad quays and large warehouses, have a depth varying at high tides from about 20 to 27 ft ., and are crowded with vesscls from all parts of the world. The principal exports are hardware, and woollen and cotton goods; imports-timber, corn, iron, wool, flax, hemp, tallow, hides, piteh, tar, rosin, bones, and horn; in 1850, these amounted to about $£ 10,366,610$. The nature and extent of the imports will be learned from the following table of the principal articles imported in 1851 :-

| Bones ...... | 15,000 tons. | Be | 88,000 grs. |
| :---: | :---: | :---: | :---: |
| Brandy .............. | 75,000 gallons. | Rye | 8,500 do. |
| Wines. | 98,400 do. | Linseed | 322,000 do. |
| Butter | 8,200 ewts. | Maize | 2,100 do. |
| Cattle | 5,500 head. | Rape | 25,000 do. |
| Raw Fruit | 215,000 baskets. | Clover Seed | 22,000 ewts. |
| Wood. | 144,000 loads. | Tares. | 6,500 do. |
| Woollen Rags...... | 10,600 cwts. | Mustard Seed | 1,000 cwts. |
| Toys... | £95,000. | Hemp... | 55,000 do. |
| Iron. | 22,000 tons. | Flax | 10,000 do. |
| Bristles | 2,200 cwts. | Whate Oil | 400 tuns, |
| Sheep's Wool | 524,000 lbs. | Rape do............ | 780 do. |
| Russan Glue. | 1,150 cwts. | Olive do. | 3,500 do. |
| Linseed Cake | 12,250 do. | Tallow | 51,000 ewts |
| Rape do | 4,500 tons. | Turpentine | 30,000 barrels. |
| Wheat | 268,000 qrs. | Madder. | 18,000 cwts. |
| Barley | 292,000 do. | Dried Yeast, from |  |
| Oats. | 42,000 do. | 1lolland. |  |
| Pease | 46,000 do. | Cotton Woo | 96,000 do. |

The number and tonnage of vessels registered at the port of Hull in December 31, 1850, were-sailing vessels, 453, tonn. 62,472; steamers, 34, tonn. 7143. Hull has an extensive commerce with the Baltic, Mediterranean, America, \&c., besides a large coasting trade. The whale fishery was formerly one of its most important branches of industry, but has greatly declined of late years. The government of Hull
is vested in 14 aldermen (one of whom is mayer), and 14 councillors. The name of Kingston-on-Hull was given to it by Edward I., who erected a fortress, and constituted it a chartered town and port. When Edward III. invaded France, in 1359 , Hull contributed 16 ships and 470 mariners. In the reign of Charles I., Hull was the first place to elose its gates against the king, who shortly after besieged it; and would have taken it by stratagem, if the treachery of its governor had not been discovered in time to prevent its being surrendered to the royalists. The town was afterwards besieged by the Marquis of Newcastle, and successfully defended by Lord Fairfax. At the close of the reign of James II., the town, fort, and garrison, being in the hands of the Jacobite party, the place was surprised, and the Prince of Orange proclaimed king; the anniversary of which event is still kept as a holiday. Andrew Marvel was a native of the town. Mull sends two members to the House of Commons. Registered elcctors (1851), 5298. Pop. of bor. (1851), 82,520.

HULL-Bishors, par. Eng. Somerset; 1670 ac. Pop. 1263.

HULLAVING'TON, par. Eng. Wilts; 3200 ac. P. 634.

HULME, a chapelry, England, co. Lancaster, par. Manchester, within the vounds of the bor. of which it is included, and from which it is separated by the Medlock. It contains several cotton mills, a cavalry barrack, a handsome chapel, with a tower 135 ft . high; several Dissenting places of worship, numerous daily, Sunday, and infant schools, a workhouse, and an asylum for female penitents. Pop. 26,982.

HIULIE (La), a vil. and com. Belgium, prov. Brabant, near the forest of Soignes, 9 m . S.E. Brussels. It has an extensive paper-mill, at which a beautiful paper is made; a brewery, and distillery. Many of the inhabitants are employed hewing wood in the forest. Pop. 1457.

HULS, a vil. Rhenish Prussia, gov. of, and 17 m . N.W. Duisseldorf, with a castle and a R. Catholic chureh, and manufactures of linen, silk, and velvet. Pop. 2144.

HULST [Lat. Hulstum], a tn. Holland, prov. Zeeland, 16 m. W.N.W. Antwerp. It has good straight streets, several market-places, the principal of which is the great market, in the middle of the town, where stands the townhall, the former government-house, and an elegant ehureh, part used as a Protestant, and part as a R. Catholic place of worship. It has also two sehools, manufactures of salt and leather, four breweries, some trade, several mills, and two annual cattle markets. It is one of the oldest places in Flanders, and was formerly fortified. Pop. 2389.

HULTSCHIN, a tn. Prussia, prov. Silesia, gov. and 53 m. S. Oppeln, I. bank Oppa; with a castle, a ehureh, chapel, and synagogue; manufaetures of eloth, several dye-works, a worsted and other mills. Near it coal is worked. Pop. 2538.

HUMANBY, par. Eng. York (E. Riding); 8660ac. P. 1277.
HUMBEEK, a vil. and com. Belgium, prov. Brabant, on the canal from Brussels to Willebroeck, 9 m. N. Brussels. It has a brewery, and a trade in agricultural produce. P. 2053.

HUMBER, par. Eng. IIereford; 1490 ac. Pop. 247.
HUMBER, a large river, or rather estuary, on the E. side England, between the counties York and Lincoln. At its W. extremity it is joined by the Ouse, after the latter has been angmented by the Derwent and Aire; below Goole it receives the Don, lower down the Trent, and still lower the IIull from the opposite side. Its whole length, from the confluence of the Ouse to Spuruhead, on the N. sea; lat. $53^{\circ}$ $34^{\prime} \mathrm{N} . ;$ lon. $0^{\circ} 13^{\prime} 30^{\prime \prime} \mathrm{W}$. (n.) ; is abont 35 m . Average breadth, 2 m . to 3 m ., expanding, however, towards its $\mathbf{E}$. extremity to 5 m . or 6 m . Its general direction, from its W . end to IIull, which is nearly in the centre of its length, is W. by. N., thence to Spurnhead S.S.E. The basin of the Humber comprises an area of 1178 ac ., or, including those of the Ouse and Trent, 9550 ac. Hull is the principal port, and next to it are Goole and great Grimsby. At Hull, spring-

## hungary

tides rise about 22 ft ., and neaps about 13 ft. ; and as there is at all times a considerable depth of water in the fair way of the channel, that port is accessible by very large vessels; the navigation from Spurnhead being safe and easy. Vessels drawing 15 and 17 ft . may ascend to Goole, which is 22 m . further inland. The sea has made extensive inroads on the shores of the Humber, many towns once of note on the estuary laving been swept away-extensive sands, dry at low water, alone remaining in their stead. Fears, said to be not unreasonable, are also entertained that, at some future time, Spurnhead will become an island, and that the ocean, entering into the Humber, will cause great devastation.

HUMBERSTONE, two pars. Eng.:-1, Leicester; 2630 ac. Pop. 462.-2, Lincoln; 2930 ac. Pop. 269.

HUMBIE, par. Scot. Haddington; 6 m . by 5 m . P. 881.
HUMBLETON, par. Eng. York (E. Riding); 6110 ac. Pop. 568.

HUMBOLDT, several places, U. States :-1, A considerable river, Utah, rising from two streams issuing N. and S. from the mountains of same name, flowing in a tortuous course, first W. and afterwards S., and falling into a marshy salt lake of same name, which has no outlet; lat. $40^{\circ} 20^{\prime} \mathrm{N}$.; lon. $118^{\circ} 18^{\prime} \mathrm{W}$. Its total length is fully 300 m .; it receives no affluents after the junction of the head streams, and loses much of its volume in its course by evaporation and absorption. Along its $r$. bank lies the great emigrant land route from the E. states to California.-2, A considerable mountain range, Utah, named from the river, about $150 \mathrm{~m} . \mathrm{W}$. the Great Salt Lake. It extends S.S.W. to N.N.E. from about lat. $38^{\circ} 50^{\prime}$ to $41^{\circ} 35^{\prime} \mathrm{N}$. The mountains rise from 2000 to 5000 ft . above the surrounding country, and 10,000 to $11,000 \mathrm{ft}$. above sea-level.-3, A maritime settlement, Upper California, 270 m . N.N.W. San Francisco, on an extensive land-locked bay or harbour of same name, in Trinidad bay; lat. $40^{\circ} 42^{\prime} \mathrm{N}$. ; lon. $124^{\circ} 2^{\prime}$. W.

HUMMELO, a vil. Holland, prov. Gelderland, 14 m. E. by N. Arnhem, with a church and school, two breweries, and some trade in wood and bacon. Pop. 1293.

HUMMOCK ISLAND. See Hunter Islands.

HUMOS (CAPE), a headland, Chili, S. the mouth of the Maule; lat. $35^{\circ} 22^{\prime} \mathrm{S}$.

HUMPOLETZ, a tn. Bohemia, circle of, and 25 m . S. Czaslau, well built, with three public squares, two churches, a synagogue, and two hospitals; extersive manufactures of woollen cloth, and large weekly cattle-market. Pop. 4139.

HUNDLEBY, par. Eng. Lincoln; 980 ac. Pop. 612.

HUNDON, par.Eng. Suffolk; 3800 ac. Pop. 1095.

HUNDSDORF or Hunsdorf, a vil. Hungary, co. Zips, r. bank Popper, near Käsmark, with an old tower, which forms a conspicuous object at a distance; two churches, a synagogue, several chateaux, and manufactures of linen. Pop. 2148.

HUNDSFELD, a tn. Prussia, prov. Silesia, gov. of, and 5 m . N.E. Breslau, on the Weyda, with two churches and a synagogue, and a trade in cattle. Pop. 868.

HUNDSHÜBEL, a vil. Saxony, circle Zwickau, 21 m . S.W. Alt-Chemnitz, with manufactures of tin-ware, and two mills. Near it are iron and other mines. P. 1283.

HUNDSRU̇CK [Dog's Back], a mountain range, Germany, chiefly in the S. of Rhenish Prussia, and partly also in the palatinate of Bavaria, and forming a continuation of the Vosges mountains. It consists of an elevated, bleak, uncultivated, moorland waste, with occasional forests, and a number of hills rising from it; which, in tho S.W., in the Idarwald, attain the height of 2263 ft . It stretches
between the Rhine, Moselle, and Nahe, with a nearly equal length and breadth of about 45 m . It is chiefly composed of calcareous rocks.

## HUNERW ASSER. See Hühnerwasser.

HÜNFELD, a tn . Hesse-Cassel, prov. of, and 10 m . N.N.E. Fulda, cap. circle same name, on the Hanne, with two churches, an hospital, manufactures of leather and linen, and a considerable trade in the latter. Pop. 2118. Area of circle, 104 geo. sq. m. Pop. 28,996.

HUNGARY [Latin, Ungria and Hungaria; Hungarian, Magyar-Orszag; German, Ungarn; Dutch, Hungarije; French, Hongrie ; Italian, Ungheria; Spanish, Ungria], a country of S.E. Europe, forming a large portion of the Austrian empire, and which, in its most extensive acceptation, includes also Transylvania on the E., and the Banat, Sclavonia, and Austrian-Croatia, on its S. and S.W. sides, extending on the S.W. so far as to comprise a strip of coast on the Adriatic Sea, termed the Hungarian Littorale. But in a more restricted sense, and conformably to the new organization of the kingdom, Hungary proper is limited to the territory between lat. $45^{\circ} 30^{\prime}$ and $49^{\circ} 40^{\prime}$ N., and lon. $16^{\circ}$ and $25^{\circ} \mathrm{E}$., encircled from the E. round the N., to the N.W. by the Carpathian mountains, which separate it from Bukowina, Galicia, and Moravia; W. by the river March, and some offsets of the Noric Alps, bounding it on the side of Austria and Styria; S.W. by the Drave, which divides it from Croatia and Sclavonia; S. and S.E. by the Banat or New Servian Voivodina, and by Transylvania.

Subdivision and Population.-Previously to the late revolu. tionary war, Hungary was subdivided as follows:-

| Circles and Counties. | Area in sq. m. | Pop. | Circles | and Countios. | Area in sq. m. | Pop. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

The Almanach de Gotha, for 1849, estimates the above territory to comprise $100,742 \mathrm{sq} . \mathrm{m}$., and to have had $11,538,530$ inhabitants in 1842 ; of which there belonged to HungaryProper, with its military frontier, $84,395 \mathrm{sq}$. m., and approximatively, $9,907,000$ inhabitants-that country is therefore of about the same extent as Great Britain, with a population about two-thirds that of England and Wales. In 1849, however, by an imperial decree, not only were Croatia and Sclavonia offieially disconnected from IInngary, but the Banatcos. Temesvar, Torontal, Krasso, and part of Arad-together with the co. Bacs, between the Danube and Theiss, was severed from it, and erected into a Servian voivodina, or separate 'crown-land' of Austria; and Hungary-Proper, divested also of the previously-annexed Transylvanian counties, and the Littorale, was divided into the following provinces, the former subdivision of circles and counties being abolished :-

New Organization of 1849.

| Provinces. | Situation. | Official Languag s. |

Hungary has been termed by Csaplovics, 'Europe in miniature, on account of the great number of different nations located on its soil. Fényés, whose statistics are entitled to the highest consideration, thus estimated the relative numbers of the races inhabiting IIungary, Transylvania, Croatia, and Sclavonia:-

The Magyars, who are the dominant race, are, for the most part, compactly located in the centre of the kingdom, and surrounded on nearly all sides by the Slavonic tribes, whose ancestors they dispossessed at their irruption into Europe in the 9 th century ; on the W. they eome into contact with the German race, and on the E. with the Wallacks. The Slovacks inhabit the N.W. or Upper IIungary; the Rusniaks the N.E.; the Servians the S. ; and the Croats and Illyrians the S.W. parts of the country. The Magyars also pcople a large part of Transylvania, and many are settled in Moldavia; where the Csango-Magyars inhabit 70 villages, and are supposed to number from 12,000 to 15,000 individuals; there are abont 7000 in the Bukowina, and others are to be found in Bosnia, and in seattered localities in the Russian dominions. In Hungary, nearly $2,500,000$ Magyars are R. Catholies, about 1,740,000 Protestants-chiefly Calvinists, and 105,000 Catholies of the Greek chureh. They are a high-spirited race, brave, and warlike, generous to profusion, and, according to travellers, more sincere than their Servian and Wallack neighbours; impatience of control, pride, indolence, and ignorance, are their besetting faults. Their general deportment is serious; and in many respects they resemble the Turks, who followed them out of Asia, and belong to the same great family of mankind. The Magyar costume is remarkable for its picturesque elegance. The Magyar language is analogous in its construction to the Turkish; and one peculiarity of it is, that it has no separate dialects-rich and poor alike use the same
language. Most of the IIungarian nobles are Magyars ; and it is by this section of the population that the constitutional form of government and municipal institutions have been mainly, if not wholly, upheld. The Slovacks are amongst the people apparently the earliest settled in Hungary; they inhabit 12 counties in the N.W., and are similar in race, customs, and language, to the adjacent Moravians, to whose extensive empire they belonged before the Magyar conquest. They are mostly R. Catholies ; but number also upwards of 500,000 Protestants-chiefly Lutherans. The Ruthen or Rusniaks, inhabit 13 connties, in and beneath the N. and N.E. Carpathians; they are nearly all of the Greek united chureh. The Wallacks oceupy a tolerably wide tract of country on both sides of the W. and N. boundaries of Transylvania; like the Rusniaks, they chiefly profess the Greek form of religion. They are far behind the Slovacks and Illyrians, and indeed nearly all the other nations of IIungary, in education and civilization, and hold, in fact, a position amongst the rest of the population much like that of the lower elasses of the Irish in Great Britain. They are distinguished by a slender make, and good conformation, with much plıysical activity-which, however, is not exercised to advantage in their domestic arrangements; for their dwellings are uniformly more wretched, and their condition more backward, owing to their indolence and reckless habits, than those of any other people in Hungary. They appear to be the descendants of Italian colonists, placed in Dacia during the Roman dominion there, and have been accordingly called Daco-Romans-an epithet to which their classic features, easy manners, language, and antique costume, seem to give them a claim. They call themselves Romouni; and speak a dialect of Latin, which is reported to rescmble more perfectly that tongue than does the modern Italian ; but they write it with the Cyrillian or Russian character. In this last particular, they unite with their Servian neighbours, inhabiting the Banat on their S.W. The Schokzen and Croats, both of the Sclavonic race, in the S. and S.W., people nearly all Sclavonia and Croatia, and stretch into seven of the counties of IIungary proper, as far as the county Pesth; they are nearly all Roman or Greck Catholics. The Wends (Vandals) inhabit two counties in the W. ; the Bulgarians the town of Theresianopel, and a few other parts of the Banat; the Montenegrins a part of the county Temes; and the Armenians portions of three of the E. counties. The Germans appear, in the first instance, to have emigrated into the country during or before the 7th century, subsequently to which many successive immigrations took place, especially under Geysa, king of Hungary, who ascended the throne A.D. 1141, and who established large numbers of German colonists from Franconia, Thuringia, and Alsace, in several of the N. counties, and in Transylvania. They speedily became dispersed in detached settlements over all Hungary; and early in the 13 th century Pesth was deseribed as a 'large and rich German town.' In the last century, other Tcutonie immigrants, with some French refugees, settled in the kingdom. The Germans are marked by their industry and thrifty condition; but also, it is said, by their litigious and avaricious propensities. They peeple the greater part of the W. fronticr, from Pressburg, and around the shores of Lake Neusiedler, S. nearly to the limit of Croatia; elsewhere they are most numerous in the co. Zips, the mining districts, the Banat, and espccially in the towns, where they compose the bulk of the trading population. About 860,000 of these are R. Catholies, and 180,000 Lutherans.

Physical Geography.-IInngary, considered as a whole, is a large basin surrounded by mountains on every side, except the S.; but even there the natural boundaries of this geographical basin are completed at no vast distance from the frontier, by the high lands of Croatia, Bosnia, and Servia, that meet those of Wallaehia and Transylvania at the 'iron gate'-a pass formed by the abrupt division of the mountains on either side of the Danube, which there forms a celcbrated rapid. From that point the Carpathians proceed at first E., but afterwards successively N.W. and S.W., receiving in their course the various names of the Czerkat, Karpfen, Freistadt, Tatra, Neutra, Jablunka, \&c., ranges. Many of their summits rise to between 8000 and 9000 ft . above the sea; their chief geological formations are granite, gnciss, primitive limestone, trachyte, greywacke, and sandstone. A third part of the whole extent of IIungary is covered with
their ramifications; and amongst these are the Matra and Hegyallya ranges, on the sides of which latter are the vineyards yielding the far-famed Tokay wine. The Carpathians are richly wooded in many parts, their branches are interspersed with numerous romantic and fertile valleys, and contain many productive mines. A range of mountains, separating Hungary from Transylvania, is rugged and precipitous, and rises in some places to 3600 ft . in height; it consists of formations similar to the above-named, with sienite, porphyry, \&c., and is traversed by rich metallic veins. Mica and quartz appear in the cliffs constituting the 'iron gate.' On the W., the Leitha mountains, a spur of the Alps separating Hungary from Styria and Austria, progressively decline towards the Danube. The Bakonywald [Bakony forest mountain], another Alpine spur, upwards of 2000 ft . in height, and clothed with dense forests of oak, beech, and other trees, intersect the S.W. quarter of Hungary, in a N.E. direction, to near Waitzen, where the Danube bends S., and with the Matra mountains, beyond that river, divides central Hungary into a greater and a smaller plain, respectively about 21,000 and 4000 sq . m. in extent. The Danube and Theiss rivers traverse the S . half of the country, in parallel streams about 60 m . apart, the former previously flowing from the W., and the latter from the E. or N.E., to near the latitude of the capital, Buda-Pesth. Near Eszek, in Sclavonia, the Danube, met by the Drave, turns suddenly again to the E., and forms all the rest of the S. frontier of Hungary, receiving, in this part of its course, the Theiss, and several minor affluents. The March, Waag, Neutra, Gran, and Ipoli, in Upper Hungary, flow to the Danube from the N.; the Bodrog, Schajo, Hernad, and Zagyva, flowing from the same direction, unite with the Theiss; and the Szamos, Körös, Maros, \&c., join that river from the E. The Poprad, in the N., flows into Galicia, and is tributary to the Vistula-it being the only Hungarian river not belonging to the basin of the Danube. The Drave forms the S.W. frontier on the side of Croatia and Sclavonia, and is joince in Hungary by the Mur from Styria. Excepting these two, the Raab, which joins the Danube near the town of its name, is the only river of much magnitude in the S.W. quarter of the country ; but in that division of Hungary are its two principal lakes, on either side of the Bakonywald -Balaton, in the great plain, and the Neusiedler-See [Hnngarian, Fertö Tava], close to the border of Austria, and on the banks of which are the palaces and chief possessions of the Esterhazy family. Lake Balaton is nearly 50 m . in length, by 10 m . in breadth; the Neusiedler-See is equally broad, but only about half as long as the other lake. See Balaton, Neusiedler-See. In the Carpathians are several smaller lakes, between 4000 and 5000 ft . above the sea. Between Pressburg, and Comorn, and Raab, the Danube divides into branches enclosing the Great and Little Schütt, two islands of considerable size and high fertility. Numerous other islands are formed by it, and by the Theiss, in the great plain; and along both of these rivers, in the lower part of their course, are extensive marshes and swamps, especially along the Theiss. The total area of the morasses in Hungary has been estimated at $1,500,000 \mathrm{ac}$., or upwards of 2300 sq . m. ; within the present century, enough marsh-land has been drained to furnish subsistence for 500,000 inhabitants. Mineral springs are numerous; the most celebrated are those which form the baths of Meliadia in the Banat.

Climate.-In the Carpathians, the winter is long and cold; snow begins to fall in September, and remains on the mountain summits till May or June; but while it still covers the co. Marmaros, in the N.E., the heat in the Banat is oppressive. At Buda, near the centre of the kingdom, the average temperature of the year is $54^{\circ} 30^{\circ} \mathrm{Fah}$., and the average range $23^{\circ}$; in the great plain, the climate resembles that of N. Italy. In the dry and sandy wastes around Pesth, arid and parching winds are frequent in summer, but the nights throughout the year are generally cool. Along the Drave, and in the adjacent lower parts of Sclavonia, the climate and vegetation are those of S. Europe ; the forest-trees put forth in February or March; fruit-trees are in bloom in the middle of April; rye and winter-corn are ripe in May, and grapes in June. At Buda, the rain which falls is estimated at 16 inches, and the number of rainy days at 112 annually. The marshy tracts have, as elsewhere, the reputation of insalubrity; yet, on the whole, Hungary is as liealthy as any of the neighbouring
countries, and, amongst its natives, noted for longevity, one is cited who attained the age of 145 , and another that of 172 years.

Productions, and Rural Industry.-A late traveller in Hungary has remarked-' In equidistance from the pole to the equator, Hungary possesses, in a fertile soil, the first element of prosperity, for all Europe may be searched through without finding an alluvium superior to that which covers the Banat. All round her N. frontier, in a great semicircle, the Carpathians protect, from the chilling blasts of Poland, those gentle eminences on which are grown the luscious Tokay, and other wines of nearly equal worth, if not of equal note. The most voluminous water-way of Europe rolls through her very heart; and in the mineral, not less than the vegetable kingdom, Hungary takes a rank of the first European importance.' -(Paton, Highlands, \&c., of the Adriatic, vol. ii., p. 206.) Of the entire surface of Hungary, Croatia, and Sclavonia, about 55,300 sq. m. are estimated to be under culture, or capable of cultivation; 33,800 sq. m. mountainous; and $14,800 \mathrm{sq}$. m. occupied by sandy deserts. Of the productive portion of the surface, about 7,140,000 ac. are arable; 932,900 ac. in gardens; $1,330,400$ ac. in vineyards ; $11,264,200 \mathrm{ac}$. in meadow and pasture land ; and $13,057,000 \mathrm{ac}$. in forests. Wheat is raised in large quantities in the S., chiefly in the rich lands of the Banat, and the contiguous counties between the Theiss and the Danube, and the Maros and Körös rivers. But a great drawback interferes with the prosperity of Hungary, as a wheat-exporting country, in the want of ready means of transit to the Adriatic; the way to which sea is across high alpine chains, which defy the formation of any navigable canals, and almost of railways. The Drave and Save flow in the wrong direction to facilitate the communication of Hungary with W. Europe. The Danube is the great outlet for the produce of the country; the traffic upon it has, however, long been crippled by Austrian fiscal regulations; and obstacles thrown in the way of the trade of Russia at the mouth of that river, tend still further to shut the products of Hungary out of the Mediterranean. Added to which, the greater length of transit sufficiently augments the expense of the wheat of the Banat to prevent its competing in lowness of price with that of Wallachia, Moldavia, and Bulgaria, which is brought to the Danubian ports.

Barley and oats are cultivated, but not for exportation; and the maize which is grown is used chiefly for feeding cattle. In the upper Carpathians, rye, oats, and luckwheat are almost the only grains produced; potatoes, which are there planted, are eaten by the Slovacks and the German colonists, but little, if at all, by the Magyars. Millet, turnips, rape, cabbages, pulses, hemp, and flax, are raised in different parts. Tobacco is an important product; it is grown chicfly in the centre and S. of Hungary. The annual produce of it is estimated at 400,000 centners or cwts., of which somewhat less than onefourth may be consumed at home. Wine, to the extent of about $96,000,000$ gallons, is made annually; the most famous growth is that of Tokay, raised on the Hegyallya Mountains, near the upper Theiss, over an extent of 100 sq . m. , the annual produce being probably $1,000,000$ gallons. It is a sweet, rich, and full-bodied red wine; the superlative kinds of which are only met with at imperial tables, and those of the higher nobility. Next to it in celebrity is the Menes wine, so called from the village of that name; around which, and Gladova, \&c., in the S., it is raised upon a tract which has been named the Arad-Hegyallya. The Ruszth wine, from the vicinity of the Neusiedler-See; the white and red wines of the counties of Pesth, Pressburg, and Baranya (the chief trade of which last is in wine) ; and those of Erlau, Visonta, Neszmely, \&c., follow in rank. Wine is a universal beverage amongst rich and poor in most parts of Hungary; the best is made by the Magyars, and next by the Sclavonic population. Fruits are of various descriptions, from the cherry, apple, and pear, in the N., to the fig, almond, and olive in the S.: apricots, walnuts, chestnuts, melons, and pumpkins, are very generally raised; but the most abundant orchard-tree is the damson, from the fruit of which brandy, and the national liqueur, slivovitza, are made. In the military frontier are a great many mulberry plantations, introduced there in the time of Maria Theresa, and considerable quantities of silk are obtained. Cotton, in the S., woad, sumach, and other dye-plants, are other articles of culture.

The farming arrangements and implements, in Hungary, are usually of the rudest kinds. The ploughs, except a coarse ploughshare, are wholly constructed of wood, and so ill-built that six oxen are employed to draw them, where, with a tolerably good instrument, two would suffice. The harrow is formed of lopped branches, pegged together in the roughest manner, and is very inefficient for its purpose. The corn is mown like grass, and heaped in stacks, when, if not trodden out by horses on the spot, it is often suffered to lie on the ground till it is again green. No thrashing is carried on, except on a model farm ; and the operations of mowing, stacking, and treading ont the grain, are often performed in the same field at the same time. The farm buildings are on a par with the rest of the appliances; the granaries consist of bottle-shaped holes excavated in the earth, and lined with straw, where the corn is suffered to remain until it acquires a very mouldy taste. So little are the rural districts supplied with competent artizans, that, in many parts of the country, if a wheel goes wrong, some one must be obtained from Pesth or Vienna to set it right. In the N.W., amongst the Slovacks, some better farming is scen than elsewhere. The employment of manure for enriching the land seems to be quite repudiated by the Magyar cultivator; but it is far from being useless in portions of the great plain, where, from the absence of wood, it forms, with straw and stubhle, the prineipal fuel. At Altenburg, Keszthely, and some other places, colleges have been established for instrnetion in agrieulture; but it may be conceived that, amongst a raral population so little advanced in arts as that of Hungary, their influence has been but little extended beyond their immediate neighbourhood.

The rearing of shcep has been greatly extended of late; and, in the census of 1846 , their number is given at $17,000,000$, exclusive of Trannsylvania. They have become muel improved by crossings with the merino breed, and both sheep and wool are largely exported. The native horned cattle, said to number $4,260,000$, are a fine and large race of a gray colour, except in the N., where they are of a smaller breed, and black or brown. Tyrolese, Swiss, and Friesland eattle have been introdnced. To improve the native horses, which are small, and not robust, much pains has been taken by the Hungarian nobility; and at Mezohegyes, in the county Csanal, is the largest stud in Europe, founded by the Emperor Joseph, and where from 8000 to 10,000 horses are kept, including many of the best stallions. The number of horses, in I846, is given at $1,000,000$. De Gerando, a late writer on lIungary, gives a graphic deseription of the nomadie herdsmen and herds on the pnsztas, or plains, or steppes, of central Hungary, and the natural aspect of that region. 'Everywhere are seen conched on the prairic imumerable herds of horses, oxen, and buffaloes, with here and there large villages, formed of low white houses, ranged like tents. Those who inhabit them are not of one nation, but of 20 different races, living distinct from each other, as if newly come to seek a fresh abode. Around these bivouaes extend cultivated fields, the fertility of which supersedes the labour of men. Here the inhabitants keep an attitude which they have maintained during 10 centuries. It is almost like that of a camp on the eve of a great battle. The shepherd, the soldier, and the labourer, cultivating the soil in moustaches and spurs, are the true deseendants of the Magyar warriors, who arrived here 10 centuries ago, sword in hand, from the steppes of Asia.--(De Gcrando, quoted in the Bulletin de la Société de Geographié, 1849, vol. ii.) Vast numbers of swine feed on acorns in the forests, and, as in many other countrics, bread and bacon form a chief part of the labourer's diet. On the sandy heaths around Debreczin, millions of geese are kept; poultry are almost everywhere plentiful. Wild animals include the Carpathian bear, chamois, and marmot; the wolf, lynx, wild boar, stag, roebnek, wild eat, fox, hare, two species of eagles, and many other birds of prey, with black grouse, and other kinds of game, in great quantities. Fish are especially plentiful in the Theiss; and the insect tribes are more numerous in IIungary than in any other part of Europe. The swarms of gnats which abound on the great rivers are extremely annoying to man and beast; but some of a harmless species are met with in such numbers and floating masses on the streams, that they are given to the cattle for food! The Hansag, and other large bogs, supply leeehes in great abundance, which are a valuable export to foreign countries.

Vol. I.

Minerals and Mining.-The minerals of this region constitute a large proportion of its wealth. Hungary, with Transylvania (where the metal is still more plentiful), yields half of the entire quantity of gold produced in Europe; of silver, nearly one-third; and, after England, it is the richest in copper of any European country. The quantity of gold annually obtained in Hungary-Proper, amounted, lately, to 1950 marks, of about the value of $£ 71,400$. It is met with at Kremnitz, Schemnitz, and other places in the N.; and also at NagyBanya, on the borders of Transylvania, where it is found in veins lying on, and in trachyte and porphyry. Silver is found with the gold, and also alone, in varions localities, to the amount, lately, of nearly 63,000 marks yearly. In addition, it is supposed that a considerable proportion of the precious metals raised is embezzled; and that, for state-reasons, the whole quantity which reaehes the Austrian treasury is not made known. Copper is met with in conjunction with the foregoing metals, and in springs which yield a solution of it called 'cement-water.' Iron, lead, cobalt, cinnabar, and otlier ores of mereury ; antimony, arsenie, sulphur, and alum, ure, amongst other minerals, obtained in eonsiderable quantities. The metallic ores exist chiefly in the trachyte region on the declivity of the Carpathians, and the mines are classed into the four distriets of Schemnitz, Sehmolnitz, Nagy-Banya, and the Banat, of which the first-named is by far the most important; the town of Schemnitz may be considered the mining capital of Hungary. The works there are on the most extensive scale, and quite honeycomb the mountain on which the town is built. As many as 20,000 miners are said to be employed in the Schemnitz distriet; but the mining regulatlons there, and the processes employed, seem to be very defective. Most of the gold and silver raised in Hungary is sent to Kremuitz to be coined; and, according to Mr. Paget, the quantity of bullion annually converted into money there, was, a few years since, equal to about $£ 250,000$ sterling; besides which, nearly 270 marks of gold, and 18,000 marks of silver, find their way yearly to Vienna as ingots.-(See Paget, Hungary and Transylvania; and the Artizan, No. xvii., 1844, p. 105.) At Szlatina and elsewhere, in the co. Marmaros, at the N.E. angle of the country (between the Carpathians and N. Transylvania), are large mines of rock-salt, which is carefully hewn out in blocks of a certain magnitude, on penalty of a deduction of half the pay for the same from the miner's wages. Soda lakes are scattered in great number over both of the Hungarian plains, and formerly it was free to any of the population to collect soda; but with an inerease of the manufacture of soap at Szegedin and other places, tho soda deposits are now more strictly watehed as private property than formerly. Nitre, also in vast quantities, sulphate of soda, and potash, are native; coal is procurable, in the sandstone formations, in various places ; and opal of the finest quality is found in some famons mines in the IIegyallya, near Eperies.

Manufactures, Trade, cond Communications.- Iungary has scarcely any manufactures but such as are domestic. In all parts, the rural families weave their own household fabries, and construct most of the artieles necessary for the pursuit of their ordinary occupations: even at Szegedin, where soap is made to some extent in about 20 factories, the manufacture is conducted at home, and by the hands of the women, while the proprietor of the house travels to obtain orders; assistant handieraftsmen, not of the family, are unknown. Linen cloths in the N., and woollens in the S., are indeed made for sale, but they scarcely pass beyond the frontiers, and the fine woollens used are imported from Austria, Bohemia, and W. Germany : in fact, for all articles of luxury, Hungary is dependent on foreign countries. Leather is one of the principal artieles made, and in their saddlery the Hungarians certainly excel, though the fashion of their goods undergoes no alteration or improvement; and, as has been remarked, 'the saddle of the Magyars is the same as that they brought with them out of Asia.' Felt hats in the large towns, earthenware, iron goods, some glass, rope, paper of inferior quality, and beet-root sugar, are other prineipal articles of manufacture. At Pesth some silks are made, and a few cotton factories are here and there established. In all parts of Ilungary, earthen jars of a peenliar kind, narrow-neeked, and varnished all over, are fabricated; their price being the amount of corn which will fill them. About 300 breweries exist, chiefly in the capital and the N . counties; brandy distilleries are pretty numerons. At Sze
gedin, the best and cheapest boats are built; that place and Comorn may be considered the great seats of the shipping interest. The Jews monopolize the larger share of the internal trade; the Jew trades early in the spring, makes his annual tour, and bargains with the gentry for their wool, wine, corn, and other produce. The exports of the country are mostly confined to its natural productions-tobacco, corn, wax, honey, soap, bacon, wine, wool, turnip-seed, hemp, cattle, hogs, hides, galls, iron, copper, \&c.; and a few years ago they were estimated to amount, in annual value, to about $£ 824,000$; the imports being valued at $£ 943,000$. Most of the trade is with Austria, Moravia, and Galicia, and carried on up the Danube, and down the Poprad. The former river is navigated by stean-vessels; but goods are chiefly conveyed, on the large rivers, in barges, some of which are from 100 to 150 ft . in length, averaging 20 ft . in breadth, and capable of carrying from 1500 to 2000 quarters of wheat. From the great plain, merchandize is taken into Croatia, \&c., up the Save to Sissek, or by the Kulpa to Carlstadt, and thence sent by land to Laybach and Trieste, or to Fiume, on the Adriatic, by the Louisenstrasse. This, which is a noble road, carried over the Alps by the spirited contributions of the Hungarian magnates, is the finest work of its kind throughout Hungary or its former dependencies; the other roads are generally very inferior, except in the N. county of Arva, and in parts of the Banat, which also, in the style and appearance of its towns, seems to be much in advance of most parts of Hungary. The Franzen Canal, between the Danube and Theiss, is the most extensive; several other canals exist, especially in the S. Banat. The adit of Joseph II., connected with the mines of Schemnitz, is a stupendous subterranean passage of a somewhat similar nature, and one of the most remarkable public works of which Hungary has to boast. Across the Danube, between Buda and Pesth, a magnificent suspension bridge has been erected by an English engineer, and opened for traffic in 1849. It forms a mighty contrast to most of the bridges in Hungary; which are but rude and often unsafe structures, composed of rough planks and unhewn timber. Railways have been carried from Vierna, on the S. side of the Danube, around both shores of the Neusiedler-See to Raab, and, on the N. side of the river, through Pressburg to Pesth ; thence to Szolnok, on the Theiss, and to be continued to Debreczin, Arad, Temesvar, and to Hermannstadt, in Transylvania, with a branch to the coal district of Oravicza, near Weisskirchen, in the Banat.

Costume. -The IUngarian costume, as worn in full dress by the ligher classes, is remarkable for its elegance. It forms the basis of the uniform of the hussar regiments in almost every country. When worn by the Hungarian of rank, the material consists of green and gold, with a mantle, richly lined with fur, hanging over the shoulder, and disposed with singular grace; but in this case the attilla or frock, and the mente or long surcoat, trimmed with fur, are often substituted for the hussar jacket, and have a still more elegant appearance. 'This rage for gay and martial attire is extended by masters to their footmen; who appear in hussar uniform, with sabre and spurs gingling as they move along. 'It is startling to a foreigner,' says Paget, 'to find himself served at table by a smart-looking hussar, be-whiskered and be-spurred as fiercely as if he were handling a sabre, instead of presenting a knife and fork.' The hussar jacket, with light pantaloons, light boots, and a huge-brimmed hat, form the costume of the lower orders. The Sclavonian peasant women are distinguished by a white kerchief, folded neatly over the head and neck, and gay blue petticoats, with deep edges of bright red. The dress of the Wallachian women consists of a long white linen shirt, embroidered with red or blue wool at the collar and cuffs; two aprons, bound before and behind, serving in place of petticoat and gown. A small sheep-skin jacket, trimmed and richly embroidered, is also sometimes worn. Another variety of costume is found amongst the Puszta shepherds or shepherds of the plains. It consists of loose linen drawers, and a short shirt, both black; the latter descending scarcely below the breast, and sometimes surmounted by the gaily-embroidered waistcoat or jacket. The feet are protected by long boots or sandals, and the head by an enormous hat, from beneath which hang two broad plaits of hair; over the whole is generally cast the bunda or hairy cloak. The last is composed of the skins of the long-woolled Hungarian sheep,
which undergo some slight process of cleansing, but far from being sufficient to remove the natural odour of the article. The wool is left in its original state on the skin, and is turned

SCLAVON1AN WATER-CARRIER AND SHEPIIERD, of the vicinity of Pressburg.-From a Sketch by C. J. Zeitter.
out or in, as the weather demands; out when it is hot, and in when it is cold.

History, Government, \&.c.-Hungary, S. and W. of the Danube, and S. and E. of the Theiss, was included in the Roman empire; the former region being termed Pannonia, and the latter known as a part of Dacia; while the portions of the country north of the rivers were inhabited by the independent Quadi, Jazyges, \&c. In the decline and fall of that empire, the territory was successively occupied by the Goths, the Huns under Attila, and the Avars; from which last two tribes its present name is supposed to have been derived. Toward the end of the 9th century, the Magyars, a people from the steppes of Western Asia, cognate with the Turks, Finns, and probably with the Huns, under their duke Arpad, broke into the country, and in ten years had established their dominion there, having shattered the Slovack kingdom of Moravia at the battle of Pressburg in 907. Their sovereignty was made hereditary in the family of Arpad, whose grandson, Geysa, embraced Christianity. Stephen I., in 997, assumed the title of king, and added Transylvania to his realn; Sclavonia, Croatia, and Dalmatia were afterwards subdued, and the sway of Hungary subsequently extended also over Bosnia, Servia, and Galicia. In 1301 the line of Arpad became extinct, and soon afterwards Charles of Anjou was called to the throne. He was succeeded by Lonis the Great, who, becoming king of Poland, ruled from the Adriatic to the Baltic. Mathias Corvinus, unanimously elected king in 1458, governed an empire as extensive as that of Austria in the present day; but about this time the Turks began to trouble Hungary, and, after the total defeat and death of Louis II., at the battle of Mohacs, in 1526, they overran the greater part of the country, which they retained for the next 160 years. In 1526, Ferdinand, archduke of Austria, was elected by the Diet king of Hungary, and the sovereignty has ever since been vested in the House of Hapsburg; but the despotism of the Austrian sovereigns became so intolerable to the Hungarian nobles, that, after repeated insurrections, in 1683, they rose under Teleki, called the Turks to their aid, and besieged Vienna, which was only saved by the timely assistance of Sobieski, king of Poland. The Turks were soon afterwards expelled from the whole of their Hungarian possessions, by the troops under Prince Eugene, and Duke Charles of Lorraine.

Before the late struggle in Hungary (1848-49), the government was a limited monarchy, the Austrian emperor being
represented by the Palatine or viceroy, who, from the time of Maria Theresa, had been a member of the imperial family. The Palatine, however, was not directly nominated by the sovereign ; being chosen by the Diet from a list of four persons named by the emperor. The prerogatives of assembling and dissolving the Diet; of declaring war, or making peace; of nominating to arehbishopries and bishopries; appointing the officers of state, lords-lieutenant of counties, and the presi dents, councillors, and judges of the royal and district courts ; of levying troops, and calling out the 'insurrection' or military force of the country; of pardoning, coining money, granting patents, legitimizing, appointing commissions to examine into the county-administration of funds, \&c., were vested in the Crown, and exercised agreeably to orders from the cabinet of Vienna. The laws, however, were enacted in conjunction with the Diet, which consisted of two chambers -the upper, or chamber of magnates, being composed of the higher clergy, the barons and counts of the kingdom (or great officers of state and lords-lieutenant), and the magnates by birth and title, or higher nobility; and the lower chamber, consisting of two deputies from each county, and from the districts of Great and Little Cumania, and Jazygia, and the Haiduck towns; and deputies sent by the other towns, the clergy, magnates, and widows of magnates. Many of the deputies had the right to speak but not to vote, and all were paid for their services at the rate of $12 s$. per day while the Diet was sitting. The deputies from the counties and districts were elected by the nobles-a name, however, not synonymous with that of aristocracy in other constitutional countries, but rather with that of freeholders-nobility in Hungary being the possession of a privilege, and not a social rank. Whoever owned land became thereby a noble, and was en titled to vote as an elector, and this privilege was also shared by others in virtue of descent alone; the total number of electors being between 200,000 and 300,000 , many of them in a very inferior station of life. The 'Personal,' or president of the lower house of the Diet, was named by the sovereign. In the counties the Fo-ispan, or lord-lieutenant, was chosen by the king from amongst the magnates having pro perty in the county, but in eleven cases this dignity was hereditary. Under him were two vice-lieutenants or sheriffs (al-ispan), chosen freely ly the gentry, and who were constantly resident to exercise the highest administrative functions in the county-the lords-lieutenant, except on special occasions, being commonly resident in the capital. The counties were subdivided into trom two to six circles [stuhl], each presided over by ober-stuhlrichter or under-sheriffs; subordinate to whom were vice-stuhlrichter or police-officers. The county mayistrates were elected triemially, at meetings called restorations; and the counties were (or ought to have been) governed, as to their internal affairs, by the congregations or assemblies of the nobles, which were held at least four times yearly; and which elected, instructed, and, if necessary, recalled the deputies sent to the Diet, and voted the taxation of the county. The government of the districts and Haiduck towns was vested directly in the Palatine, and their officers also were appointed triennally. The municipalities had their senatus or court of aldermen, and koszeg or common council; but their magistrates were not freely elected like those of the counties, but appointed by the crown-hence, being deemed especially under the influence of the court, the deputies of the royal free towns were excluded from the privilege of voting in the Dict. The villages were each under the rule of the lord of the manor, whose court had jurisdiction in disputes between the peasantry. In suits between the peasant and his lord, special courts (sedes dominales) were empannelled, consisting of the vice-stuhlrichter, and four other persons unconnected with the disputants. Other tribunals were those of the stuhlrichter, the al-ispan, and the county courts of session; and the highest of all was the septemviral-table or court of king's bench, which originally consisted of seven, but later of a much greater number, of judges, presided over by the 'Personal.' Altogether the internal arrangements of llungary bore a singular resemblanee, in many important features, to those of England; and the parallel is rendered more remarkable by the fact, that great and analogous epochs in the histories of the two countries took place within comparatively short periods from each other. Upwards of a century, indeed, elaped between the time when Alfred finally
consolidated the heptarchy, and divided England into counties and that when St. Stephen, in A.D. 1000 , abolished the octarehy, and subdivided Hungary into counties, almost with their late extent and organization; but the Golden Bull which Andreas II, was compelled to grant, and which limited the power of the crown, and established the rights of the Hungarian frecmen, dates in 1222 , or only seven years after our own Magna Charta, and contained some very singular provisions; and the Pragmatic Sanction, which fixed the succession to the erown of Hungary hereditarily in the Austrian line, was made in 1687, or the year before our great Revolition, which eventuated the Hanoverian succession in Great Britain.

Hungary, although united under the same crown with Austria, has been constitutionally as integral and distinct from the latter as Hanover from England; and its separate rights were repeatedly guaranteed by Dictal enactments, ratified by the sovereign. To quote one of these-the 10 th Act of the Diet of 1790 , sanctioned by Leopold II., expressly states: ' Mungary, in her entire system of legislation and government, is a free and independent kingdom, and is, therefore, to be ruled and governed by her legally-crowned hereditary kings, according to her national laws and customs.' And since 1622 , a king of Hungary, previous to his coronation, has been obliged to sign a document called the ' haugural Diploma,' which is inserted in the acts of the Diet, and by which he binds himself ' to maintain, and cause to be maistained, all the rights, liberties, privileges, immunities, customs, and usages of the kingdom of Hungary, which have been instituted during the reigus of his predecessors, or which may be in stituted during his own reign.'-(Szemere.) The Hungarians, however, complain that the Austrian government continually evaded the fulfilment of the compact; and that it has for ages endeavoured to encroach on their constitutional rights and privileges, and to bring Ifungary under the same centralizing system pursued with regard to the other portions of the Austrian empire. The county administration had, previously to 1848 , become in a great measure nullified by the establishment of a royal council, consisting of the Palatine and twentyfive members, nominated by the emperor from amongst the magnates and gentry, and which assumed the functions of corresponding with the county congregations, regulating the aecounts of the taxes, superintending the military and police establishments, and communicating between the counties and the sovereign-all the commumications passing through the Hungarian state Chaneery at Vienna. Side by side with the county magistrates elected at the restorations, other officers, named 'administrators,' were plaeed by the Austrian court, who interfered with their duties. For the last thirty years the IIungarians had been remonstrating against this, and numerous other interferences in their home govermment; they complained that liberty of speceh, and the publication of the debates in the Diet were prohibited; that heavy duties levied on the frontiers prevented the exportation of the produce, and espeeially the manufactures of llungary; that the country was indirectly taxed in favour of the German provinces of Austria; that the efforts of the Diet to liberate the peasantry from feudal burdens, and give them the right to acquire property, were foiled by Vienna intrigues, \&c. They demanded, amongst other reforms, the exclusion of deputies of chapters, and of magnates, from their lower chamber; that the military frontiers should be placed under the command of the Palatine, and governed by Hungarian laws; that the duty on salt should be reduced; that the edicts of the govermment to officers of justice in Hungary should be discontinued; that the laws respecting the taxcs on the clergy should be observed that the Hungarian chancery should be made really, not merely nominally, independent of the Anstrian chancery that the coinage should bear the arms of llungary; that a budget should be presented; that there should be a responsible ministry; that the IIungarian (Magyar) language should be used in all official business instead of the Latin, \&e. These, and other reforms, continually voted hy the Dict, were rejected by the Austrian court; until, in the session of 1848 (atter the French revolution), the Diet passed acts for the emancipation of the IIungarian peasantry from feudal burdens, for a fair representation of the whole people in the Diet, for the aboli tion of all exemptions from taxation, for the freedom of the press, and for trial by jury. The emperor gave, to a deputation headed by the Palatine, his assent to these enaetments,

## HUNSINGORE

on April 11 of the same year, on which a Hungarian force retired from the W. frontier. Immediately afterwards, however, it is undeniably proved that the Austrian government excited insurrections of the Servians and Wallacks, in the S . and E. of Hungary, who were in open revolt early in June, and carried on fearful devastations. On the 9th of September, Jellachich, who had taken possession of the Littorale, and had, without the consent of the Hungarian ministry, been appointed Ban of Croatia, crossed the Drave with an irregular army of $48,000 \mathrm{men}$, reinforced by Austrian regular troops, and invested with full authority to act against the Diet. Jellachich was defeated, on September 29, by the landsturm or militia, near Stuhlweissenburg; and, taking advantage of a truce, he suddenly withdrew, with a part of his forces, to retake Vienna, then in the hands of the revolutionists. The troops and commanders of fortresses in IIungary had received orders from the court to obey its directions alone, and not those of the constituted authority-the Hungarian war-office; and, by an Austrian decree, dated October 3, they were all placed under the command of the Ban, when the Hungarian government at once began to organize regular troops for the defence of the country. On the 28th of the same month a Hungarian army crossed the Austrian frontier; but, after some partial actions near Vienna, it retreated to Pressburg. In the middle of December, the Imperialists, under Prince Windischgrätz, invaded Hurgary; and the Hungarians, sustaining several reverses, retired before them towards the banks of the Theiss, while the Diet transferred its sittings from Pesth to Debreczin. After the successes of Radetzky in Italy, the Austrian government, on March 4, 1849, promulgated an edict, by which Hungary and its dependencies were divided into provinces or 'crown lands' of the Austrian empire, and the Hungarian constitution was abrogated. The Hungarian parliament, on the 9th of March, declared these measures illegal ; and, on April 14, decreed the deposition of the House of Hapsburg from the sovereignty. At and before this period General Görgey, with an army of $20,000 \mathrm{men}$, manceuvred with great ability in Upper Hungary ; Mleszaros, Dembinsky, Klapka, \&c., operated in the N.E.; Bem commanded the Hungarians in Transylvania (where his successful generalship secured some of the most brilliant results throughout the war); Perczel, Leiningen, \&c. in the S.; and, after five great defeats, in April, 1849, the Austrians, Croatians, and their Russian allies lost in Hungary nearly every military position they had gained. On May 21, Buda was stormed and taken by the Hungarians under Görgey, and, on June 7, the Diet once more removed to Pesth; but by this time large Russian armies were collected on the frontiers, and in July they simultaneously poured into Hungary from the N . and E., while the Croats, under Jellachich, advanced from the S., and the Austrians from the W. The seat of war was now again transferred to the banks of the Theiss, and rapidly to the region S.E. of that river: several battles were lost in succession by the Hungarians; and, while some considerable advantages were being obtained by their garrison at Comorn, and S.W. of the Danube, the struggle was brought towards a close by the surrender of Görgey, with an army of between 30,000 and 40,000 men, to the Russians at Vilagos, near Arall, on August 13, 1849-two days after the governorship of the country had been resigned to him by Kossuth. Peterwardein next capitulated to the Austrians; and finally Comorn, on September 27, which event put an end to the war. The forces brought into the field by the Hungarians at any one time never exceeded from 130,000 to 135,000 men, with 400 pieces of artillery; against whom were opposed, in the last campaign, 150,000 Russian, and 110,000 Austrian, troops, besides insurgent Servians, Wallacks, \&c., making a total of upwards of 300,000 men. Many of the chiefs of the revolution fled into Turkey; others suffered military execution, especially at Arad, on October 6, 1849.

According to the new organization, Hungary Proper is divided into five provinces (named in the carly part of this article) ; Transylvania, which had been imperially incorporated with it in 1848, is disjoined, and, like the Banat, erected into a separate voivodina; Croatia, Sclavonia, Dalmatia, and the Littorale, form the separate kingdom of Dalmatia, which, like Hungary, is under the immediate government of the Austrian cabinet. The Palatine has been replaced by an officer named the Statthalter, who resides in

Pesth; the old Hungarian code of laws is substituted by a new legal system, closely resembling that of the other Austrian provinces; every municipal functionary is appointed by the court at Vienna; all communications with the Austrian government are conducted in the German language; Hungary is to bcar its proportionate share of the taxation of the whole empire; and the prohibition duties on the trade between it and the other parts of the monarchy have been abandoned.(Das Land der Ungarn, Leipzig, 1849; Csaplovics Gemälde von Ungarn; Paget's Hungary and Transylvania; Paton's Highlands, \&c. of the Adriatic, and The Goths and Huns, 1851; Klapka's Memoirs of the War of Independence in Hungary; Von Beck's Personal Adventures, \&ic.; Kossuth's Speeches in England; Szemere's Letters to Prince Esterhazy; Bulletin de la Soc. de Geographie; Public Journals, 1848-49, dic.)

HUNGEN, a tn. Hesse-Darmstadt, cap. circle same name, 24 m. N.N.E. Frankfurt, with a Protestant church, and a castle, long the residence of the princes of Solms-Braunfels; distilleries, and a trade in cattle. Near it are iron mines. Pop. tn., 1033 ; circle, 12,158.

HUNGERFORD, a bor., market tn., and par., England, partly in co. Berks, and partly in co. Wilts. The town, on the Kennet, over which is a handsome bridge of five arches, 60 m. W. London, has a station on the Great Western railway, and consists chiefly of one long street, containing many good houses. It has a market-house, a large granite edifice, with an elcgant front to the river; a handsome church, chapels for Independents and Wesleyan Methodists, a free grammar-school; some extensive breweries, and a good business arising from the traffic on the Kemet, and Avon canal, which passes near the town. Hungerford is a borough by prescription, and is governed by a constable, chosen annually, on Hock Tuesday, by the inhabitants, who, on these occasions, are called together by the sound of an ancient brass horn, known as the 'Hungerford Horn,' presented to the town by John of Gaunt, when he granted the inhabitants a fishery in the Kennet. Market on Wednesday. At the S.E. end of the town is Hungerford Park, a noble mansion, in the Italian style, and occupying the site of an old residence presented by Queen Elizabeth to the Earl of Essex. Area of par., 6940 ac . Pop. (1851), 3081.

HUNGERTON, par. Eng. Leicester ; 2910 ac. P. 267.
HUNINGUE [German, Hïningen], a tn. France, dep. Haut-Phin, 1. bank Rhine, little more than 1 m . N. Basel. It was one of the strong places constructed by Vauban, and had barracks for 4000 men, but is now almost a heap of ruins. The Austrians took it in 1815, after a valiaut defence by a very feeble garrison, and in 1816 its fortifications were completely demolished, in accordance with the treaty of Paris. This place was sometimes called Great Hüningen, to distinguish it from the small Swiss village of same name on the opposite bank of the river. Pop. 1422.

HUNKIN, a maritime tn . Corea, near the mouth of a river on its E. coast; lat. $39^{\circ} 53^{\prime}$ N.; lon. $127^{\circ} 30^{\prime}$ E

HUNMANBY, a vil. and par. England, York (E. Riding.) The village, 34 m . N.E. York, is well built, and pleasantly situated in a fertile district, about 4 m . from the coast; has a very ancient church, places of worship for Baptists and Wesleyans, a parochial library, national school, and a set of almshouses. Area of par., 8660 ac . Pop. 1277.

HUNNINGHAM, par. Eng. Warwick; 1170 ac. P. 245.
HUNSDON, par. Eng. Hertford; 1760 ac . Pop. 430.
HUNSE, a river, Holland, which rises in the Bourtanger Moor, in prov. Drenthe, flows N.N.W., and, during the early part of its course, is named also the Drenthe. It receives several affluents, enters prov. Groningen, forms lake Sudland, and, after uniting with the Ahe, at the town of Groningen, falls into the Lauwer Zee, under its own name, or that of Reitdiep. Total course about 60 m . It is navigable for large vessels to Groningen, and for small craft a considerable way above that town.

HUNSHAW, par. Eng. Devon; 2390 ac. Pop. 296.
HÜNSHOVEN, a tn. Rhenish Prussia, gov. and 15 m . N. Aix-la-Chapelle, on the Worm. It has manufactures of linen and cassimere; tobacco and chicory factories, soapworks, tanneries, and breweries. Pop. 637.

HUNSINGORE, par. Eng. York (W. Riding) ; 2660 ac. Pop. 625.

HUNSLET, a chapelry and township, England, co. York (W. Riding), in the bor. and par. of Leeds, of which it is a populous suburb. It has an Episcopal and several Dissenting clapels, extensive pottcries, chemical, crown and flint glass works, and several large flax spinning-mills. 1':(1851), 19,472.

HUNSTANTON, par. Eng. Norfolk; 2180 ac. P. 227.
IIUNSTON, two pars. Eng.:-1, Norfolk; 1120 ac. Pop. 162.-2, Sussex; 880 ac. Pop. 193.

HUNTE, a river, Germany, which rises in Hanover, ahout 3 m . N. Melle, landrostei Osnabriick, flows N.N.W. circuitously, and through a very marshy country, expands into lake Dummer, passes the towns of Diepholz, Kornau, and Barnstorf, forms part of the boundary between Hanover and Oldenburg, enters the latter, proceeds first N.W. to the town of Oldenburg, then turns suddenly E.N.E., and joins 1. bank Weser, at Elfleth, about 20 m . below Bremen, after a course of nearly 130 m . Its chief affluents are, on the r. the Aue, and on the l. the Elze. It is navigable in the lower part of its course.

HUNTER, two places, New S. Wales:-1, A co. about 75 m . long, and 27 m . broad; area 2056 sq . m. Its mountains, which are numerous, have a wild and savage aspect. The principal rivers are the Hunter and Goulburn. Jerry's Town is the cap. Pop. 1190.-2, A river, about 70 m . N. Port Jackson, flowing W. to E., and forming the boundary between cos. Hunter and Northumberland on the S., and cos. Gloucester and Durham on the N.: principal affluent, the Goulburn. It discharges its waters into Port Hunter, and is navigable for about 25 m . inland.

IIUNTER ISLANDS.-1, A group, Bass's Strait, between S. Australia and Van Diemen's Land, comprising Barren Island, Three Hummock, Albatross, and several smaller islands, about lat. $40^{\circ} 23^{\prime}$ S.; lon. $144^{\circ} 58^{\prime}$ E. -2 , One of the Carolines, Radick group; lat. $5^{\circ} 42^{\prime} \mathrm{N}$.; lon. $169^{\circ} 6^{\prime} \mathrm{E}$. (r.) It is small, but ligh enough to be seen 33 m . to 36 m . off.-3, (or Onaseuse), Fecjee group; lat. $15^{\circ} 31^{\prime}$ S.; lon. $176^{\circ} 11^{\prime} \mathrm{E}$. (n.) 1 t is of volcanic origin, well peopled and cultivated, affording yams, fruit, and hogs. The natives have hitherto proved friendly.

HUNTINGDON [contracted Hunts], a small inland co. England, surrounded by the cos. Northampton, Cambridge, and Bedforl, about 30 m . long N. to S., and 20 m . broad at the broadest part; area, $238,080 \mathrm{ac}$., of which 220,000 aro arable, meadow, and pasture. In the W. and S. parts, the surface is slightly varied. The N.E. portion, comprising about $44,000 \mathrm{ac}$., is wholly included within the level of the fens, and is principally devoted to grazing. There is comparatively little timber in the county, although it was at one time covered with wood. Soil generally clayey or gravelly loam, but, excepting the meadows, which are among the richest in England, not very fertile. Agriculture has been much improved of late years, the fen-men, in particular, excelling in the management of the plongl; ; but it is, on the whole, still in a rather backward state. The principal crops are wheat, oats, beans, barley, and hemp. Rape and mustard are also extensively raised, and turnip on some of the drier soils. The breed of sheep is of a mixed description, nearly approaching to the Leicestershire and Lincolnshire species, with which the native breeds have been much crossed. The cattle, formerly of mixed, and generally inferior breeds, have been improved by the introduction of short horns. Dairy farming, however, is not much followed, althongh some very fine cheese and butter are made in various places. Pigeon-houses are extremely numerous; more so, it is said, than in any other comuty of England, excepting Cambridge. Estates generally extensive. A number of the farms are large, but small oncs predominate, and are mostly let from year to year. There are no manufactures in this countr, with exception of a little wool-stapling and yarn-spiuning, carried on by the women and children during the winter season. The principal rivers are the Ouse and Nene. In the N. quarter of the comnty there is a shallow lake, called Whittlesea Mere, containing about 1570 ac. It abounds with aquatic wild fowl, affords good fishing, agreeable sailing, and is much frequented by pleasure parties. There were other lakes or meres of this kind in the same part of the county, but they lave been recently drained. Springs are deficient; and water for household purposes is mostly obtained from ponds. Huntingdonshire is diviled into four hundreds, exclusive of the town of Hun-
tiugdon, and 103 parishes; and is traversed by the Great Northern, and the Cambridge and Muntingdon railways. It returns two members to parliament. Kegistered electors (1851), 2892. Chief towns, Huntingdon, St. Ives, St. Neots, and Kimbolton. The county formed a part of the British kingdom of the Iceni, and of the Saxon Mercia. It was entirely under forest law till the reign of Henry 11. David, prince of Scotland, was, through marriage, created Earl of Huntingdon, in 1108. Pop. 64,183.

HUN'I'INGDON, a parl. and municipal bor. and market tn. England, cap. above co., a station on the Great Northern railway, 59 m . N. by W. London, pleasantly situated on a gentle acclivity, l. bank Ouse, over which is an ancient stone bridge. It consists of one principal strcet, about 1 m . long, and several smaller, paved, lighted with gas, and amply supplied with water. The houses are in general spacious and well built. There are two churches, both fine old structures; three Dissenting chapels, a Friends' mecting-house, a spacions market-place, a neat townhall, a county and a borough jail, and house of correction, a free grammar, green coat, an infant, and some well-endowed national schools, and several sets of almshouses; two public reading-rooms, a literary and scientific institution, and a horticultural society. Monthly assemblies are held during the season, in a handsome suit of rooms appropriated to the purpose, and races are held every August. Small vessels ascend the Ouse to Iluntingdon. The principal trade is in wool and corn. There are also two extensive breweries, a steam oil-mill, and oil-cake manufactory. Huntingdon sends two members to the Ilouse of Commons. Registered electors (1851), 405 . Oliver Cromwell was born here April 25, 1599 ; it confers the title of Earl on the noble fanily of Ilastings. 1'op. parl. bor., 5500 .

IIUNTINGDON, an isl. off E. coast Labrador, at the entrance of Sandwich bay; lat. $54^{\circ} \mathrm{N} . ;$ lon. $56^{\circ} 30^{\circ} \mathrm{W}$.

HUN'IINGFIELI), par. Eng. Suffolk; 2570 ac. P. 397.
IIUN'TING'TON, two pars. England:-1, Hereford; $2120 \mathrm{ac} . \quad$ P. 262.-2, York (N. Riding); 4830 ac. P. 652.

HUNTING'TON, several places, U. States, including:1, A vil. and township, Connecticut, 17 m . W. Newhaven. with two churches, and several manufacturing establishonents, P. 1326.-2, A vil. and township, New York, on an arm of Iluntington bay, 189 m . S. by E. Alhany, with three churches, several woollen, leather, and other manufactories, and a fine larbour. P. 6562.-3, A tn. Pennsylvania, 62 m. W.N.W. Harrisburg, with a courthouse, jail, six churches, five schools, and manufactories of various kinds. P. 1145.

HUNTLEY, par. Eng. Gloncester; 1480 ac. P. 511.
HUN'TLY, a bor. of barony, market tn., and par., Scotland, co. Aberdeen. The town, 33 m . N. W. Aberdeen, near the confluence of the Bogie and Doveran, embosomed in hills, is regularly laid-out, well built, and lighted with gas; has a parish, a Free, and U. Presbyterian church, Independent, Scotch and English Episcopal, and R. ('atholic chapels, several well-conducted schools, several religious and charitable societies, three libraries, and a flourishing savings'-bank. Its only trade is with the surrounding district. Brewing and distillation are carried on to some extent in the town and neighbourhood. Not far from the town are the ruins of Huntley Castle, an ancient seat of the Gordon family, destroyed in 1794; and Huntley Lodge, the seat of the Duke of Richmond. Pop. 2731. Area of par., 9 m . by 4 m . Pop. 3642.

IIUN'TON, par. Eng. Kent; 1910 ac. 1'. 740.
IIUNTSIIAM, par. Eng. Devon; 2930 ac. P. 157.
IIUNTSPILL, par. Eng. Somerset; 5010 ac. P. 1643.
IIUN'SSVILLE, a vii., U. States, Alabama, 123 m. N.N.E. Tuscaloosa, with a courthouse, market-louse, five churches, and two schools. Pop. 2496.

HUNWHRTH, par. Eng. Norfolk; 940 ac. P. 234.
HUNYAD, a co. in the S.W. of Transylvania, bounded N. by co. Zarand, N.E. and E. Unter Weissenburg, S.E. and S. the principality of Walachia, and S.W. and W. Hungary; area 1835 geo. sq. m . It is mountainous, particularly towards the S. ., where it is covered by part of the Carpathian chain. It belongs wholly to the basin of the Danube, to which it sends its waters, chiefly by the Maros, which traverses the county E. to W.; but in the S. partly through the Schyl, which breaks through the Carpathians. For administrative purposes, the county is divided into three circles-subdivided into nineteen districts. The capital is Veva. Pop. 96,800 .

HUNYAD-Vajda, or Eisenmarkt, a market tn., Transylvania, co. of same name, l. bank Cserna, 60 m . W. Hermannstadt, with a castle, three churches, and, near it, extensive iron mines. Pop. 1600.

HUON, an imperfectly-known river, Van Diemen's Land. Its estuary forms part of the E. boundary of Hobart Town district ; it lies N. to S. and S.W., and is about 20 m . long, by 3 m . wide, at the mouth, where it enters D'Entrecasteanx channel. Before entering the estuary, the Huon flows E.N.E. along the S.E. frontier of Norfolk district.

HÜRBEN, a vil. Bavaria. circle Swabia, dist. Krumbach, with a church, synagogue, and Jewish school. Pop. 1171.

HURDSFIELD, a township, England, co. Chester, forming a suburb of Macclesfield. Pop. 3551.

HURDWAR or Heri-Dewar [the gate of Heri or Vishnu], a tn. Hindoostan, presid. Bengal, prov. of, and 105 m . N. by E. Delhi; lat. $29^{\circ} 56^{\prime}$ N. ; lon. $78^{\circ} 10^{\prime}$ E.; at the foot of the Himalayas, r. bank Ganges, which here, where it enters the great plain of India, is a beautiful limpid stream. Hurdwar is one of the principal places of Hindoo pilgrimage in connection with the ceremonial of bathing in the Ganges. The pagodas, with the ghauts (flights of steps) for bathing, occupy the r. bank of the river, under the town. The Fakeers, who make Hurdwar their abiding place, have generally caves hollowed out in the rock above the pass, and accessible by means of ladders only. The holy bathing spot is reached through a passage which will admit only four persons abreast, while, during the season of the pilgrimage, from 200,000 to 300,000 devotees are pressing earerly forward to gain precedency in plunging into the sacred stream. In 1819, 420 persons were squeezed to death in the dreadful struggle thus occasioned. No particular ceremony is used in bathing, which consists merely of simple immersion. The depth of water at the proper season is only 4 ft ., and both sexes plunge in indiscriminately. A great fair is held simultaneously with the pilgrimage, when countless multitudes of all ages, all costumes, and all complexions are assembled from every part of India; and animals of all kinds, and from all parts of the globe, are exposed for sale, including leopards, bears, and sometimes the cubs of the tigress, horses, elephants, camels, buffaloes, cows, sheep, dogs, cats, monkeys, \&c.; likewise shawls from Cashmere, woollen cloths and sances from England, watches from France, pickles from China, guins and spices from Arabia, and rose-water from Persia. When a transaction is about to be entered into, the bnyer and seller, in order to conceal what passes from bystanders, throw a cloth over their hands, and treat as to prico by pressing certain joints of each other's fingers. The number of visitors to Hurdwar have been estimated, one year with another, at two millions, or rather more.

HUREEKE, a vil. Punjab, r. bank Ghara; lat. $31^{\circ} 10^{\prime}$ N.; lon. $74^{\circ} 53^{\prime}$ E. Though a small place, the trade is very important, as nearly the whole traffic with Hindoostan, from Afghanistan, Cashmere, and the Punjab, passes through it. There is great local traffic between the districts in its immediate vicinity on both sides of the river.

## HURLEY, par. Eng. Berks; 4530 ac. P. 1119.

HURON (LAKE), one of the five great lakes of N. America, having W. the U. States territory, and on the other sides Upper Canada. It is 218 m . long N. to $\mathrm{S} ., 180 \mathrm{~m}$. broad at its widest part, and 594 ft . above sca-level; but the S. division of the lake, for 50 m . N. from its outlet by the river St. Clair, is not wider than 50 or 60 m . The great Manitoulin Islands, in the N. part of the lake, and the long peninsula, which terminates in Cabot's Head and Cape Hurd, divide Lake Huron into two parts-the $N$. portion being ealled Georgian Bay. This bay is studded with islands, several thousands in number, and varying in size from a few square feet to many acres. Great Manitonlin island, the largest of a group known by the same name, is about 100 m . long, and from 4 m . to 25 m . wide; it is the only one inhabited. Lake Huron receives the waters of Lake Michigan, through Strait of Michilimackinac, on the N.W.; and the waters of Lake Superior, t' rough the river St. Mary, on the N.N.W., and empties itself, by the St. Clair river, into Lake St. Clair, whence, by the Detroit river, it enters Lake Erie. The waters of the lake are remarkably pure and clear. The shores are generally barren and broken, especially towards the N., where a bold ridge of lills, called the Cloche mountains, extend
about 40 m . along the coast. Clay cliffs, rolled stones, abrupt rocks, and woody steeps, of various elevations, constitute the general character of the coast in most parts of the lake; but the lands above these forbidding shores are frequently of an excellent quality, especially to the E.-The IIuron district, in Upper Canada, extends along the S.E. shore of the lake, and is watered by the Maitland, Bayfield, and Thames rivers. A large portion of the land is good, although some parts are rather hilly and broken. It is settled alinost exclusively by emigrants from England, Ireland, and Scotland, and a few Germans.

HURON, a river, U. States, Michigan. It flows S.E., affords extensive water-power, and enters Lake Erie, a few miles S. W. of the mouth of the Detroit. Total course, 90 m .

HURREEPORE, a tn. Hindoostan, Punjab, 73 m. N.E. Amritsir ; lat. $31^{\circ} 57^{\prime} \mathrm{N}$. ; lon. $75^{\circ} 55^{\prime} \mathrm{E}$. ; consisting of 1000 to 1500 houses. It is much infested by snakes and centipedes; the most common of the former is the spectacle snake, or cobra-de-capello.

HURR1AL, a commercial mart, Hindoostan, prov. Bengal, where the E. Irdia Company has long had an established factory for the purchasing of silk and cotton goods; lat. $24^{\circ} 19^{\prime}$ N. ; lon. $89^{\circ} 17^{\prime}$ E.

HURRUR, or Horrur, a tn. E. Africa, cap. of a small state of that name, about 192 m . E. Ankobar, and 150 m . S.S.W. Zeylah, in a verdant valley, almost encircled by hills. It is surrounded with a wall, composed of stones and mud, 12 ft . high, 3 ft . thick, and about 5 m . in length, with five gates; carries on an extensive trade by means of caravans, with Zeylah, Berbera, and other towns on the coast, and with other places in the country of the Somauli. The articles of export are coffee, ivory, ghee, ostrich feathers, gums, \&c.; and slaves, for which are received in exchange, blue and white coarse cotton and Indian manufactures, Indian piece goods, English prints, silks, shawls, red cotton-yarn, beads, zinc, copper, copper-wire, \&c.; and, from the Somauli country, frankincense. The people of Hurrur are rigid Mahometans; their language bears an affinity to the Amlaric, and they use the Arabic character. Their ruler governs with the title of Emir, and the succession is hereditary. The male relatives of the reigning prince are all kept in close confinement, but are sometimes released when their services are required; although, on the slightest suspicion of any attempt at rivalship, they are at once sent back to their cells. The soil of the country around is extremely fertile, producing coffee, wheat, barley, millet, and fruits and vegetables in great variety and abundance.-(Jour. Roy. Geo. Soc.)

HUlSLEY, par. Eng. Hants; 9850 ac. Pop. 1520.
HURST, three pars. Eng.:-1, Kent; 560 ac. P. 40. -2 , (Old), Hunts; 1350 ac. P. 182.-3, (Pierpont), Sussex ; 5590 ac. P. 2118.

HURSTBOURNE, two pars. Eng. Hants :-1, (-Priors); 3070 ac. P. $506 .-2$, (Tarrant) ; 6380 ac. P. 850 .

HURUP (Öster), a fishing vil. Denmark, Jutland, bail. of, and 21 m . S.E. Aalborg, in the Kattegat. It has 12 ft . water at its quay; and the roads afford the best anchorage on the whole coast between the Liim-fiord and Grenaae.

HURWOR'TH, par. Eng. Durham; 3920 ac. P. 1599.
HUSAVIK, a vil. Iceland, on E. side Skjalfandi Bay, N. coast, which is here lined by bold cliffs. It has manufactures of sulphur.

HUSBAND'S-Boswonth, par. Eng. Leicester ; 3870 ac. Pop. 953.

HUSBORN-Crawlex, par. Eng. Bedford; 1520 ac Pop. 656.

HUSBY, a vil. and par, Sweden, län of, and 22 m . S.E. Falun, l. bank Dal. It has iron-works, and manufactures of gunpowder.

Il USH-Eon, a tn. China, prov. Quangtong, S. side isl. IIainan, about 3 m . from Howi-Howe. It is surrounded with walls of brick and stone, 40 ft . high, by 30 ft . thick, with a parapet 4 ft . high; streets tolerably broad, well kept, and carefully watched; and the inhabitants have an air of comfort rarely to be met with in a Chinese town. No mendicants are to be seen. Pop. tn. and suburbs, about 200,000 .

HUSSINE'TZ, or GUssnitz, a market tn. Bohemia, circle Prachin, on a slope above I. bank Flanitz, 37 m . S.E. Klattau. It has a chureh, townhouse, and school. John Huss was born here. Pop. 1173.

HUSSINGABAD, a tn. Hindoostan, presid. Bombay, prov. Candeish, l. bank Nerbndda, 135 m . N.W. Nagpoor;
lat. $22^{\circ} 40^{\prime} \mathrm{N} . ;$ lon. $77^{\circ} 51^{\prime} \mathrm{E}$. The houses cover an extensive area; but are meanly built, and thinly inhabited. It is now the capital of a large pergunnah, belonging to the British Government; and being the key of this part of the Deccan, las been made a permanent station for a military detachment. The bed of the Nerbudda here is much broken, and about 900 yards wide.

HUSTIIWAITE, par. Enc. York (N. Riding); 2800 ac. P. 577.

HUSUM, a seaport th. Denmark, ducly of, and 22 m. W. by s . Schleswig, at the mouth of a small stream, cap. bail. of same name. It contains a fine modern Gothic chureh, an ancient castle, partly occupied as a courthouse, a normal school and hospital ; and has manufactures of tobacco, cotton prints, and woollen stuffs; dye-works, breweries, lime-kilns, important wool and cattle fairs, and a winter haven, which only admits vessels drawing 7 ft ., but at which a considerable trade is carried on. Pop. 4000. Area bail., 116 geo. sq. m. Рор. 12,700.

HUSZTII, or Kıusst, a market tn. Hungary, Hither Theiss, co. Marmaros, in a plain, on the Theiss, at the conflucuce of the Nagy-Ag, 31 m . W.N.W. Szigeth. It has a Protestant and a R. (atholic church; a eastle, situated on a height, and famous in the early wars of Hungary ; and a trade in corn, wine, hemp, and cattle; a weekly market, and an annual fair. Pop. 4000.

HUTISKO, a vil. Moravia, 40 m . from Weisskirchen, in a deep valley, among hills, near the Betschwa; with a handsome chureh. Pop. 940.

HUTTANY, or HUTNEE, a tı. Mindoostan, prov. of, and 44 m . W. by S. Bejapoor ; lat. $16^{\circ} 45^{\prime} \mathrm{N}$.; lon. $75^{\circ} 7^{\prime} \mathrm{E}$. It carries on an extensive trade with Bombay, Surat, and other emporiuns. The principal article of commerce is grain; but considerable quantities of silk and cotton piece goods, \&c., are manufactured. There is here a large, handsome freestone building for the accommodation of travellers, capable of lodging 500 persons.

HÜT'TELDORF, or Uteldorf, a vil. Lower Austria, 1. bank Wien, 5 m . W. Vienna; sırrounded by gardeus and villas, in which many of the citizens of Vienna have their summer residence. It contains an old parish church, with a marble monument. Many of the inlabitants live by sending milk to the capital. Pop. 1100.

HUTTENDORF, or Zalesni-Lhota, a vil. Bohemia, circle Bidschow, on a small stream, 3 m . from Studenetz; with a wooden chureh and a school. Pop. 1076.

IIUT'TENHEIM, or IIETtENem, a vil. France, dep. Bas-Rhin, about 10 m . from Schelestädt; with a chureh, and manufactures of cotton goods, and a cotton-mill. Pop. 2054.

HU'T'TOF'T, par. Eng. Lincoln; 3310 ac. Pop. 515.
HU'TTON, a par. Scotland, Berwick; 4 m. by $3 . \mathrm{m}$. Pop. 1133.

HUTTON-ANd-Corrie, par. Scot. Dunfries; 12 m . by 3 m . Pop. 809.

IlU'T'TON, seven pars. Eng.:-1, Essex; 2950 ac. P. 449. -2 , Somerset; 2040 ac. P. $462 .-3,(-$ Bushell), York, (N. Riding) ; 5670 ac. P. 811.-4, (-Cranswich), York, (E. Riding); 6230 a.. 1'. 1228.-5, (in-the-Forest), Cumberland; 2370 ac. P. 264.-6, (Magna), York, (N. Riding) ; 2080 ac . P. 297.-7, (Ihtton's-Ambo), York, (N. Riding); 2300 ac . P. 403.

HUTWELL, or HUTTWEIL, a tn. and par. Switzerland, can. of, and 22 m . N.E. Bern, on the frontiers of Luzern. It was once surrounded with walls, but is now open; very indifferently built, though some of the houses are lined by areades; contains a handsome church; and has manufactures of cotton caps and hosiery; some transit trade as well as trade in corn and dairy produce, and several annual fairs. In 1831,
the town was set on fire by lightning, and great part of it destroyed. Pop. 3092.

HUXHAN, par. Eng. Devon; 830 ac. Pop. 150.
HUY [pronounced We $]$, a tn. Belgimm, prov. of, and 18 m . S.W. Liégc, in a beautiful valley, on the Meuse, at the conflaence of the Mehaigne and the Hoyoux. It is divided into two parts by the river, which is here crossed by a handsome bridge;

HUY, from the Nurd.-From Arnald's Viewb on the Meuse.
contains a handsome square, surrounded by elegant edifices, two churches, ont of 15 which it once possessed, a number of ruined abbeys and convents, a large, and regularly-constructed townhouse, a college, and several priniary schools, a theatre, a very extensive general hospital, and several other charitable endowments; and has manufactures of leather, paper, ironmongery, tinware, soap, salt, and pipes; three blast furnaces, numerous breweries, distilleries, flint, bark, and other mills; an extensive trade, greatly facilitated by a harbour in the Meuse, and consisting chiefly in grain, coal, iron, and somo wine, grown in the vicinity ; a weekly market, and numerous anuual fairs. Huy possesses a court of primary resort, several public offices, and three musical societies. It is of considerable antiquity; and had risen to importance in the 10th century. It has suffered much by war, having stood several sieges. Its fortifications were dismantled in 1718, bnt its castle was rebuilt in 1815 . There are several mineral springs in its vicinity. Pop. 7966.

HUYSSE, a vil. and com. Belgium, prov. E. Flanders, 12 m. S.S.W. Ghent. It is a very ancient place ; and Roman coins of the emperors Trajan, Vespasian, and Commodus, have been found in it. It has manufactures of lineu, an oil, and four flour mills. Pop. 4090.

HUY'TON, par. Eng. Lancaster ; 9720 ac. Pop. 3749.
HUZARA, or Huzroo, a commercial tı. Punjab, 27 m . E. Attock, on the route to Lahore; lat. $33^{\circ} 50^{\prime} \mathrm{N}$.; lon. $72^{\circ} 45^{\prime}$ E. The inhabitants are Afghans.

HUZAREH COUN'TRY, an extensive mountainous region in the $N$. part of Afglianistan, and so called because inhabited by a numerons Tartar race of that name. The S. part of the territory is occupied by a people called Eimanks. The entire region, including the country of the latter, is said to lie between lat. $31^{\circ} 30^{\prime}$ and $37^{\circ}$ N., and lon. $62^{\circ}$ and $68^{\circ}$ E., and to comprise a surface of $80,000 \mathrm{sq} . \mathrm{m}$. The population, generally, of this extensive tract have the Mongolian or Tartar physiognomy. The climate in tho N. parts is dreadfully severe; snow lying for six months continuously. The IIuzareh country is supposed by some geographers to be the l'aropamisus of the Greeks.

HVALOEN, or Qualoen, an isl. off N. W. coast, Norway, from which it is separated by a clannel about 4 m . wide; lat. $69^{\circ} 40^{\prime} \mathrm{N}$.; lon. $18^{\circ} 10^{\prime} \mathrm{E}$. It is very irregular in shape, being penetrated, particularly on the $N$. and $W$. sides, by a succession of deep bays; greatest length, N.N.E. to S.S.W., about 30 m .; breadth, varying from 2 m . to 15 m . Its interior is very rugged; but the mountains, though often terminating in remarkable peaks, are not elevated.

HIVALOERNE, an isl. group, Norway, in the SkagerRack, off the S.E. coast, and at the entrance of the Bay of Christiania, in lat. $59^{\circ} 7^{\prime} \mathrm{N}$. ; and lon. $10^{\circ} 55^{\prime} \mathrm{E}$.

HVEN, an isl. Sweden, in the Sound, 15 m . N.N.E. Copenhagen. It is about 6 m . in circumference, and forms a single parish; its surface finely diversified, but soil sandy, and the land chiefly occupied as pasture. Tycho Brahe had here his observatory, of which scarcely any traces now remain.
hVIDDING, or IIvityng, a vil. Denmark, near N.W. coast, Schleswig, bail. Hadersleben, 6 m . S.S.W. Ribe. It has a parish church, and is memorable as the place where, in 1137, King Erick Emund was slain, while holding a judicial meeting or thing in the open air.

HVIDDINGSOE, a small isl. Norway, in the Bukkefiord, off the coast, and $13 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. the town of Stavanger. A lighthouse has been erected on its S. extremity.

HVITA, or IIvitaue, two streams, Iceland:1, (North), which rises in the S.W. part of the island, is augmented by the Arnarvatn, and several smaller lakes, flows S.W., and, after a course of about 65 m ., falls into the Borgar-fiord.-2, (South), which rises near the centre of the island, receives the discharge of a large lake of same name, flows S.S.W., and, after a course of about 85 m. , falls into the sea, on the S . coast, 50 m . E. Reikiavik.

HYCKHAM, two pars. Eng. Lincoln:-1, (North); 1990ac. P. 367.-2,(South); 1160ac. 1.147.

HYDE, a township, England, co. Chester, $7 \frac{1}{2} \mathrm{~m}$. E.S.E. Manchester. It has several good streets, and many handsome shops, and is well supplied with water. There are a literary and scientific institution, and a mechanies' institute. The church is in the early English style, with a tower. The other places of worship are for Independents, Wesleyans, and Unitarians. Inhabitants chiefly employed in the cotton manufacture and coal mines. Pop. 10,151.

HYDERABAD, statelHindoostan. SeeNizam'sDominions.
HYDERABAD, a city, Hindoosta:, cap. Nizam's dominions, and prov. of same name, 370 m. S.E. Bombay; lat. $17^{\circ} 20^{\prime} \mathrm{N}$. ; lon. $78^{\circ} 33^{\prime}$ E., r. bank Musah, over which is a spacious bridge. The city is about 4 m . in length, and 3 m . in breadth, and is surrounded by a wall. The streets are narrow, crooked, and badly paved; houses mostly of one story, and chiefly of wood. The most remarkable buildings are the palace and mosques, of which last there is a considerable number. There is also a handsome house, built in the European style, erected by the Nizam, for the British resident. The Nizam has a number of large magazines here, in which are stored the presents received from the different European and native powers, by himself, his father, and grandfather, consisting of bales of cloths, cases of glass and china-ware, clocks, watches, \&e. There are few manufactures of importance; the principal are silks, interwoven with gold, called kinkocbs, turbans, and small ornaments.

The state of morals in this city is at the lowest ebb. The inhabitants are composed chiefly of Moslems, Patans, and Hindoos; but the first predominate, and are a set of the most lawless ruffians in India, with whom neither life nor property would be safe for a single day, were it not for the presence of the British troops. These, with the Nizam's contingent, are stationed at some distance from the city, and consist of about 12,000 men-one-tenth of whom are Europeans. The pop. is variously stated at $80,000,120,000$, and 200,000 . The province of Hyderabad forms the S.E. portion of the Nizam's dominions.

HYDERABAD, a tn. and fortress, Hindoostan, cap. of Scinde, l. bank Indus, from which it is between 3 m . and 4 m . distant, and 110 m . from its junction with the sea; lat. $25^{\circ} 22^{\prime}$ N .; lon. $68^{\circ} 41^{\prime} \mathbf{E}$. ; situated on or rather seattered over a rocky eminence, about 200 ft . high. The streets are narrow and dirty; and the houses-built of clay, wood, and brickmere hovels. The bazaar, however, is extensive, forming one street the entire length of the town, and displays considerable bustle and appearance of business. The fort is of a quadrangular form, with circular projecting towers at intervals. It is surrounded with a single brick wall of 30 ft . to 40 ft . in height, and in part, also, by a ditch of 8 ft . to 10 ft .
wide, and 5 ft . to 8 ft . deep, crossed by a wooden bridge. Here, also, is a palace of the Ameers, a square brick building, inlaid with coloured porcelain tiles. From its elevated position, and bold, though irregular outlines, the fort has a very

NORTH-WEST FACE OF THE FORT OF HYDERABAD From Edwards' Sketches in Scinde.
imposing appearance from a distance, but has little real strength. The principal manufactures of IIyderabad are arms of various kinds, and ornamental silks and cottons. In the immediate vicinity are some handsome tombs. Pop. estimated at 20,000 .

HYDRA, an isl. Greece, in the Archipelago, E. coast, Morea, between the Gulfs of Nauplia and Egina; lat. (summit), $37^{\circ} 19^{\prime} 30^{\prime \prime}$ N.; lon. $23^{\circ} 28^{\prime}$ E. (r.) ; greatest length, N.N.E. to S.S.W., 12 m. ; breadth, about 3 m . Its surface, though not very clevated (highest point 1939 ft .), is almost entirely composed of bare sterile rocks; so that the inhabitants, unable to derive subsistence from the soil, have been in a manner compelled to devote themselves to trade and commerce. And not only in these have they been eminently successful, but Greece is in no small degrce indebted for her ultimate independence to the patriotic efforts of the Hydriots, who, by their fleets, boldly maintained the cause, when it would otherwise have seemed hopeless.-The principal rown of the island bears the same name, and stands on the N.W. shore, on a rugged height, on which not a speck of verdure is seen. Owing to the nature of the site, the streets are nneven and even precipitous, but are kept remarkably clean, and the houses are built in the most substantial manner, many of them with large and airy apartments, spacious halls, and pavements of marble. The public edifices include churehes and religious establishments to the number of nearly 100 ; an exchange, a college, and commercial, navigation, and numerous elementary schools. The principal manufactures are silk and cotton stuffs, soap, leather, \&c. The trade embraces a large slare of the transit between the Black Sea and the Mediterranean. The harbour is formed by a deep bay; but is neither spacious nor secure. It is, however, lined by a quay, along which are extensive ranges of storehouses and shops, more than sufficient for all the trade which Hydra now possesses. During the war of independence, it was almost the only place where the Greeks could feel themselves secure, and they accordingly crowded to it from all quarters, and raised its population to nearly 40,000 ; but when the whole continent of Grcece became a safe residence, numbers of those who had taken up their abode here, hastily withdrew, and left the town with a pop. not exceeding 20,000 .
hyeres [anc. Arca], a tn. France, dep. Var, 10 m. E. Toulon, S. side of a hill, facing the Mediterrancan, but separated from it by a marshy common, the exhalations from which, as well as the lagoon of Gapau, make the site, though beautiful, unhealthy. It is built in the form of an amphitheatre; streets steep, narrow, winding, and badly paved, particularly in the upper part of the town. In the lower part, there is a
large and regular square, ill kept, but adorned by a marble pillar, with a bust of Massillon, who was born here; and a suburb, which contains all the best houses. The only edifiees deserving of notice are one of the parish churches, which is a large and curious structure, perched on a precipice; the townhouse, which has a good façade, fronting the marketplace, and the remains of the ancient citadel, occupying the very summit of the hill on which the town'stands. The chief manufacture is orange-flower water; and there are numerons olive-presses, several distilleries, and silk-mills. The trade is in olive-oil, wine, oranges, citrons, and other fruits. One of the two annual fairs lasts two days. Pop. 9966.

HYERES (Isles DE) [anc. Stoeehades], an isl. group, France, in the Mediterranean, off the coast of dop. Var, and from 10 m . to 15 m . S.E. Hyères. They consist of the three principal islands of Levant, Port-Cros, and Porquerolles, and a number of islets. They are rocky and almost bare, but enclose the fine roadstead of Hyères, and are strongly fortified. Porquerolles, the largest, is about 5 m . long, by 2 m . broal.

HYKULZYE, a large walled vil. Afghanistan, 25 m . N. Shawl ; lat. $30^{\circ} 32^{\prime}$ N. ; lon. $66^{\circ} 50^{\circ}$ E., in a fertile and well-cultivated country. Here, on March 28, 1842, a British army, under General England, were repulsed by the Afghans, who were in turn totally routed at the same place, by the same commander, a month afterwards.

HYMETTUS, a mountain, Greece, $4 \frac{1}{2}$ m. E.S.E. Athens, celebrated in ancient times for its becs ; height, 2680 ft . It still yields excellent honey.

HYON, a vil. and com. Belgium, prov. Hainaut, on the Trouille, at the confluence of the Nouvelles and the By, 2 m . S.E. Mons. It has salt-works, breweries, and mills, and a
trade in vegetables, soll at Mons, and in cattle and horses. A great number of the inhabitants work in the neighbouring coal-mines. Pop. 1163.

IIYSSINGTON, par. Eng. Salop; 2500 ac. Pop. 364.
HY'THE, a parl. and municipal bor. and market th., England, and one of its einque ports, co. Kent, 11 m . W.S.W. Dover, near the E. end of Romney marsh, at the foot of a steep hill or eliff. It consists eliefly of one long street, parallel to the sea, and several smaller. In the centre of the town are the townhall and market-place. The chureb, which occupies the slope of a hill, is an elegant cruciform structure, in the early English style. Under the chancel is a remarkably fine-groined crypt, now used as a depository for a large quantity of human bones, of whom, it is not certainly known, but said to be those of Danes, killed here in battle, before the Norman conquest. There are national and infant sehools, barraeks, a small theatre, public library, and reading-room, and some almshouses. Hythe was anciently a place of great importance, immediately on the sea; but its harbour has been entirely destroyed, by the accumulation of slingle thrown up by the waves. It has become a fashionable resort for seabathing. Pop. municipal bor., 2265. The parl. bor., which includes the munieipal bor., the liberties of Folkstone, and the pars. of W. Hythe, Saltwood, Cheriton, and Newington, returns one member to the Honse of Commons. Registered electors (1851), 758. 1'op. 8939.

II Y'TTEKROG, an isl. Denmark, about $3 \mathrm{~m} . \mathrm{S}$. isl. Laland. It forms a long narrow belt, curving E. to W. for nearly 4 m ., and is in immediate connection with the large sandbank called Rödsand, which stretehes E. to the S. extremity of Falster.

## [For places not found in $I$, look $J$ and $Y$; Russian names in $I E$ are sometines commenced with simple $E$.]

IAKHVA, a river, Russia, Siberia, whieh rises in gov. Tobolsk; lat. $61^{\circ} \mathrm{N}$.; and lon. $67^{\circ}$ E.; flows nearly due S., and joins the Konda at Markoni, after a course of about 130 m .

IAKUTSK, gov. Siberia. See Yakutsk.
IALPUCH.-1, A river, Russia, which rises nearly in the centre of gov. Bessarabia, nearly 50 m . S. Kishenan, flows S., and, after a course of 80 m ., expands into a lake of same name. Principal affluent, the Lunge.-2, A lake, formed by the expansion of the above river, in the $S$. of gov. Bessarabia; about 36 m . long by 6 m . broad, and communicating with 1 . bank Danube by several mouths. It abounds with fish.
iAL'TA or Yaita, a small seaport tn. Russia, gov. Taurida, dist. of, and 30 m . S.S.E. Simferopol, on the Black Sea, near the mouth of the Rekaffeeh. It is well sheltered by an inflexion of the coast and a mole about 270 ft . long, and promises to become a port of some consequence. It was formerly a flourishing Greek colony, and its ancient splendour is attested by the rains of churehes and other buildings.

IAMA, a river, Siberia, which rises in the E. sidc of the Stanovoi mountains, gov. Okhotsk, flows E.S.E., and falls, into the bay of Iamsk, in the gulf of Okhotsk, a little below the th. of lamsk, after a course of about 80 m .

IAMPOL, or YAMPOL, a tn. Russia, gov. Podolia, l. bank Dniester, 78 m. E.S.E. Kamenetz, in a fertile neighbourhood, with a house of correetion. Pop. (1812), 2827.

IANA, a river, Siberia, which rises in gov. Yakutsk, in the N. slope of the Tukalan mountains, near lat. $65^{\circ} \mathrm{N}$., flows circuitously N., and, after a course of nearly 600 m ., falls, by several mouths, into the Arctic Ocean, in lat. $72^{\circ} \mathrm{N}$., and lon. $137^{\circ} \mathrm{E}$. Its principal affluents are, on the r., the Adiga; and on the 1., the Dulgalak, Shemanova, and Butaktai.
iarenga, or Yauenga, a river, Russia, which rises in the N. of gov. Vologda, flows S. past the th. of larensk, and, after a course of uearly 90 m ., joins r . bank Vitchegila.

IAslELDA, or Jalsolda, a river, Russia, which rises in cirele Volkovisk, gov. (irodno, flows E.S.E., exparding into lake Sporovskee, enters gov. Minsk, and, after a course of about 130 m ., joins 1. bank Pripet, a little E. of linsk. The canai of Oghinski, comnecting it with the Chtehara, gives uninterrupted communication between the Pripet and the Niemen. Vol. 1.

IAMBOLI, a tn. European Turkey, Rumelia, 1. bank Tondja, 55 m . N. Adrianople; lat. $42^{\circ} 39^{\prime} \mathrm{N}$. ; lon. $26^{\circ} 18^{\prime} \mathrm{E}$.; with several mosques, and has some woollen manufactures.

IAKVA, a river, Russia, whieh rises on the W . side of the Ural mountains, in the E. part of circle Teherdin, gov. Perm, flows generally W., and, after a course of nearly 120 m., juins l. bank Vichera, about 15 m . E. Tcherdin. Its principal affluent is the Glukhaic Vilva.

IBA.-1, A considerable tn. Philippines, isl. Luzon, cap. prov. Zainbales, on a plain near the coast, 80 m . N.W. Manilla. Pop. 4130.-2, A vil. Hesse-Cassel, prov. Niederhessen, circle Rottenburg, with a castle and five mills. P. 1282.

IBABA, a tn. Abyssinia, Amhara, 70 m . S. by W. Gondar, S. shore of lake Dembea. In extent and riches it nearly equals Gondar. The eomitry around is fertile and agreeable.

IBAGUE, a to. New Granada, 70 m . W.S.W. Bogota; lat. $4^{\circ} 28^{\prime} \mathrm{N} .:$ lon. $75^{\circ} 18^{\prime} \mathrm{W}$.; climate healthy, though extremely hot; mines of eopper, gold, quicksilver, and loadstone, abound near it. l'op. 5000.

IBALLAA, a th. Eeualor, at the foot of the volcano of Imbarbura, about 50 m . N.E. Quito. Wheat and sugar are cultivated near it; and coarse cotton and woollen stuffs are extensively manufactured. Pop. about 10,000 .

IBBENBÖ REN, a tn. Prussia, Westphalia, gov. Miunster, 14 m . N.N. W. Osnabrüick, with two churches, a synagogue, and manofactures of linen and cotton, an iron-mill, a glasshouse, and some general trade. Near it are coal mincs and millstone quarries. Pop. 2014.

IBBERTON, par. Eng. Dorset; 960 ae. P. 232.
IBERIAN Jesinsula, the S.W. peninsula of Europe, occupied by the kingloms of Spain and Portugal.

IBI, a tu. Spain, Valencia, prov. of, and 18 m . N.N.W. Alicante, pieturesquely situated on the sides of a conical hill, crowned by a ruined castle and a hermitage. It is well built, has gencrally level and spacious stre ets, a large parish chureh. surnounted ly a tower; a handsome townhouse, primary school, and hospital; manufactures of linen; several oil and tlour mills; a trade in corn, wine, oil, wool, and cattle. P.298\%.
lBlAPABABA, Lhmmaraba, or Bapisa, a cordillera, Brazil. of considerable extent, stretcling E. to W. in prov.

## IBICU1

Ceara, and forming part of the E. boundary of prov. Pianhi It is divided into the mountains of Biapina, Boabista, Boritana, Bôcos, \&c., and contains mines of iron and copper, but little or no gold.

IBICUI, a river, S. America, which rises in the S.W. of prov. Sũo-Pedro-do-Rio-Grande, Brazil, enters Uruguay, and, proceeding in a circuitous course N.N.W., joins l. bank river Uruguay, at Yapequ, in lat. $29^{\circ} 20^{\prime}$ S., after a course of about 400 m. , navigable almost throughout for barges and canoes.

IBIZA, an isl. and tn. Spain. See Iviça.
IBO, one of the Querimba Islands, Mozambique Chamel; lat. (N.W. part) $12^{\circ} 20^{\prime} \mathrm{S}$. ; lon. $40^{\circ} 38^{\prime}$ E. (r.) It is nearly separated into two islands by a deep inlet from the N.W. The anchorage here is partly exposed to E. winds. The S. part of the island is called Quirambo.

IBOINA, a div. Madagascar-(which sce.)
IBOS, a vil. France, dep. Hautes-Pyréneès, 3 m . W. Tarbes, on the Sardaine. It contains a parish church, which has much the appearance of a strong castle, and has often furnished the Protestants with an asylum. Pop. 1999.

IBRAH, an old tn . Arabia, Oman, dominions of, and 70 m . S. by W. Muscat; lat. $22^{\circ} 41^{\prime}$ N.; in a wet district, thickly covered with palm trees. To avoid the damp, and gain a glimpse of the sun, the houses are unusually lofty. A parapet leading around the upper part is turreted, and on some of the largest turrets guns are mounted. The windows and doors have the Saracenic arch; every part of the building is profusely decorated with ornaments of stucco in bas-relief. The doors are also cased with brass, and have rings and other massive ornaments of the same metal. Its market is wellfrequented by Bedouins.

IBRAHIL, a tn. Turkey, same as Bralilow-(which see).
IBRANY, a vil. Hungary, Thither Theiss, co. Szaboles, about 10 m . from Nyir-Egyhaza. It has a Protestant and a R. Catholic parish church, and a castle. Pop. 1538.

IBROS or Ibros del-Rey, a til. Spain, Andalusia, prov. of, and 20 m . N.N.E. Jaen, on a height near the Guadalimar.

It is tolerably well built, in the form of an irregular parallelogram, has a parish church, courthouse, prison, and primary school; and manufactures of soap, three distilleries, a flour and numerous oil mills, and some general trade. Many of the inhabitants travel the country as pedlars. Pop. 3605.

IBSI'C', a market tn. Lower Austria, near the Prölling, which here forms a large waterfall. It has extensive manufactures of iron and steel, and a marble quarry. Pop. 3000.

IBSLEY, par. Eng. Hants; 870 ac. Pop. 325.
IBSTOCK, par. Eng. Leicester; 4270 ac. P. 2002.
IBSTONE, par. Eng. Bucks; 1380 ac. P. 347.
IBU, a tn., W. Africa. See Aboн.
IBURG, a vil. Hanover, gov. of, and 8 m . S. Osnabrück, cap. bail. of same name, with a castle, two churches, and an old Benedictine abbey. It is the entrepôt for the linen manufactured in the district. Pop. vil., 976; bail., 24,190.

ICA, a tn. Peru, dep. of, and 162 m . S.S.E. Lima, cap. of prov. of same name. It was founded in 1563 . Pop. 6000.

ICANA, a river, Brazil, prov. Para, which rises on the S.E. slope of the serra de Tunui, near the frontiers of New Granada, flows E.S.E. and joins 1. bank Rio Negro, near the town of San Felipe, and about 70 m . N.N.E. Fort Sã̃-Gabriel. Its principal affuent is the Cojari, which joins it on the left. Its whole course has bcen estimated at nearly 300 m . It is navigable upwards by canoes for 6 days' journey, when the navigation is interrupted by a cataract.

ICATU, a tn. Brazil, prov. of, and 40 m . S.E. Maranhão, r. bank Monim, about 10 m . above its mouth, in the bay of São-José. It is one of the oldest places in the country, having been raised to the rank of a town in 1616, contains a parish church, and has a harbour accessible to small vessels, though the approach is rendered difficult by sandbanks in the river. The inhabitants are generally employed in agriculture, and raise cotton of superior quality.-(Diccio. Imp. Braz.)

ICCOMB, par. Eng. Gloucester; 970 ac. Pop. 162.
ICELAND [German, Island; Dutch, Ijsland; French, Islande; Latin, Islandia], an isl. belonging to Denmark,

situated between the N . Atlantic and the Arctic Occans, and, (Greenland in the former, and about 850 m . W. of Nornay in respect of proximity, more properly part of the W . than of in the latter ; between lat. $63^{\circ} 24^{\prime}$ and $66^{\circ} 33^{\prime} \mathrm{N}$.; and lon. the E. hemisphere, being only 130 m . from the S.E. coast of $13^{\circ} 31^{\prime}$ and $24^{\circ} 17^{\prime} \mathrm{W}$. ; greatest length, E. to W., 301 m ;
central breadth, about 200 m . ; area, 28,800 geo. sq. m. In shape it somewhat resembles a heart, with its narrowest point turned S. The coast-line, for a considcrable extent on the S.E., is almost unbroken; but in all other directions presents a continued succession of deep bays or fiords, and jutting promontories. One of the most remarkable of the latter is in the N. W., where a large peninsula stretches out between the Hunafloi and Breidafiord, and is attached to the main part of the island by an isthmus scarcely 5 m . wide. Other two peninsulas project from the W. coast, separated by the Faxafiord, in which lies Reikiavik, and which measures about 50 m across, and stretches 25 m . inland. The water along the coast is generally very deep, and the bays furnish a great number of natural harbours, with good anchorage and complete shelter; but the navigation is rendered dangerous by vast numbers of rocky islets which line the shores. The best and most frequented harbours are those of Reikiavik and Eyarbacke on the S.W., and of Eya on the N. The interior of the island has, for the most part, a very wild and desolate appearance. It is covered by lofty mountain masses, of volcanic origin, many of them crowned with perpetual snow and ice, whieh, stretching down their sides into the intervening valleys, form immeuse glaeiers. These iey mountains, which take the common name of Jökull, have their culminating point in Öräfajökull, which is situated near the S.E. coast; lat. $64^{\circ} 0^{\prime} 48^{\prime \prime} \mathrm{N}$. ; lon. $16^{\circ} 45^{\prime} 31^{\prime \prime} \mathrm{W} . ;$ and has a height of 6409 ft . Next to it in height are the Snaifell, near the E. coast; lat. $64^{\circ} 48^{\prime} \mathrm{N}$. ; lon. $15^{\circ} 36^{\prime} 58^{\prime \prime} \mathrm{W} . ; 5965 \mathrm{ft}$; and Eyjafjallajökull, in the S.; lat. $63^{\circ} 37^{\prime} 2^{\prime \prime} \mathrm{N}$. ; lon. $19^{\circ} 41^{\prime} 33^{\prime \prime} \mathrm{W} . ; 5579 \mathrm{ft}$. Not only is the structure of these mountains volcanic, but in several of them the volcanic agency is still active, and eruptions of the most fearful description have repeatedly occurred within the last four ceuturies. Other remarkable specimens of volcanic agency are still witnessed in the numerous hot springs or geysers scattered throughout the island, but found

the great geyser.-From Gaimard, Voyagea en island et an Groenland.
which have each a course of above 100 m .; two streams, the Jökuldalr and Lagarfljot, proceeding N. E. from Suäfell, on the E, coast, both with a course of upwards of 80 m . and the Thjorsa, on the S.W. coast, with a course of above 100 m . The most valuable mincral product is sulphur; surturbrand, or lignite, is also worked to some extent. The other minerals deserving of notice are chalcedonies, rock crystals, and the well-known double refracting spar, for which the island has long been famous. On many parts of the coast, particularly the W., basaltic eaves occur ; that of Stappen is not unworthy to be compared with Fingal's Cave in Staffa.

The climate is mild for the latitude. At Reikiavik, on the S.W. coast, the mean temperature of the year is $40^{\circ}$; that of summer $56^{\circ}$, and that of winter about $29^{\circ} 30^{\circ}$. The air is damp and misty, the weather is extremely variable, and storms and hurricanes are not unfrequent. The prevailing winds are the N. and the N.E. In the S. part of the island the longest day is 20 hours, and the shortest 4 hours, but in the most N . extremity the sun at midsummer continues above the horizon a whole week, and of eourse diring a corresponding period in winter never rises. The average duration of human life in Iceland is shorter than in Denmark. The probable length of life in Denmark, at birth, is-for males 47, for females 50 ; in Iceland, for males 37, for females 48. Typhus fever prevails yearly, arising mainly from defective sanitary arrangements; not to say dirty and filthy habits, both in person and dwellings, attributed to the Icelanders by a recent female traveller. In like manner, influenza is an annual visitant in a mild form, and about every ninth year in a malignant form; these, with a fever which follows famine, are the chief native diseases. But the island has been frequently ravaged by small-pox, measles, scarlatina, and hooping-cough-diseases generally unknown in Iceland; but which have, at various periods, been introduced by foreign vessels, and carried off great numbers of all ages. A severe epidemic appears to oceur about every five years; and so great are the risks comeeted with the fisheries, that one-fourth of the deaths among the males, from 15 to 60 years of age, occurs by drowning; being nearly 2 to 1 of the number drowned in the Färoe islands, and 5 to 1 of those drowned in Denmark. The effect of these causes prejudicial to human life is seen in the slow increase of the population. In 1703 it was 50,444 ; in 1804 it had receded to 46,349 ; in 1843 it was 57,180 ; and in 1851, 60,000.

Vegetation is confined within narrow limits. The only trees are the serviee-tree (sperberbautm) and the birch, which have a very stunted form, the loftiest of them never exceeding 10 ft . Grain appears to have been at one time very partially cultivated, but is not now attempted to be grown; cole, potatoes, turnips, radishes, and similar roots thrive tolerably well. But by far the most valuable crop is grass, on which considerable numbers of live stock are fed. They have been estimated at 606,000 sheep, 24,000 horned cattle, and 20,000 horsss. The last,
more especially in the S.W., to the N.E. of Reikiavik, where, from one of the principal geysers, jets of water, stones, and mud are thrown up at intervals to heights varying from 100 to 200 ft . The general effeets of the volcanic agency, and the geological formations produced by it, are nowhere exhibited on a more magnificent scale than in Mount Hecla, 5095 ft . high; lat. $63^{\circ} 59^{\prime} \mathrm{N}$. ; lon. $19^{\circ} 44^{\prime} 15^{\prime \prime} \mathrm{W}$. (which see.)

The immense reservoirs of snow and ice furnish inexhaustible supplies to numerous lakes and rivers. Of the former the most important are the Thingvallavatn, Hvitarvatn, and Aruarvatn in the S.W., and the Myvatn in the N.E. The rivers, owing to the rugged nature of the surfaee, and the mountain barricrs which stretch across it, are more remarkable for their number than their length. Every valley opening to the coast has its stream; but the largest of them, following the general slope of the island, have a N. or N.N.E. direction. The most deserving of notice are the Skjalfanda and the Jükelaue or Jökulsa i Axarfirdi, on the N. coast,
though small, are strong and aetive. A nother domestie animal of great value (the rein-deer), though not introduced before 1770, has multiplied greatly, and forms large herds in the interior. Wild fowl, including the eider duck, whose down forms an important artiele of commerce, are very abundant, the streams are well supplied with salmon, and valuable fisheries of seals, torsk, and herrings, aro carried on on the coasts.
Manufactures are entirely domestic, almost every family possessing within itself the means of supplying its most necessary wants, and occasionally furnishing a surplus, chiefly of coarse woollens, mittens, stockings, \&e., to be disposed of at the markets of the principal villages. The principal exports are wool, oil, fish, feathers, sulphur, and Iceland moss. The inhabitants are of Scandinavian origin, and speak a Scandinavian dialect-the original Norse, which is still the vernacular here, though in Norway it has been supplanted by Danish. They have a tall, manly form, open countenance, florid complexion, and flaxen hair. They are simple in their mamers,
having no distinctions of rank, pure in their morals, strongly attached to their homes, and very hospitable. Their houses are low structures, chiefly composed of drift-wood and lava;

ICELANDERS aI A cottage door. -Frum Gaimard
some butter, milk, and preparations of milk, constituting their staple food. Their intellectual capacity is of a superior order; of their earlier productions the Eddas form brilliant specimens; but Icelandic learning has also embraced philology, mathematics, and other branches of science. This cultivation of mind, in conjunction with commerce, raised the island to a state of comfort which may be termed riches. From the 9 th to the 14 th centuries, when civilization had retrograded in Europe, Icelandic literature was flourishing, and many men of distinguished learning appeared. In more recent times, many of the most valuable works of Europe have been translated into the native tongue; and even the poems of Milton are read and appreciated at many of the cottage firesides. Education is generally diffused, and it is rare to meet with an individual who cannot both read and write. Far higher attainments are not uncommon; various learned societies exist, and travellers have sometimes been surprised by their guides addressing them in Latin. The Reformation was early introduced into Iceland, and has nowhere produced nobler fruits. Almost all the inhabitants hold its doctrines in their prinitive purity and simplicity. In external profession they are Lutherans, the whole island forming a single bishopric, subdivided into 253 parishes. The civil division is into 3 baili-wicks-Siideramt, Westeramt, and Norderamt with Oster-amt-subdivided into 19 smaller districts called. Sysseln. The principal governor takes the name of Stiftsamtmann, and presides over the Althing or States, which meet twice a-year at Reikiavik, the capital and only town in the island, and consists of 26 members; of whom 20 are chosen from the class of proprietors, and 6 ( 2 spiritual and 4 temporal) are nominated by the king. The island was first discovered by a Norwegian pirate in 870 , but was not permanently settled till a century after. The settlement continued to increase rapidly by the arrival of new settlers, and in the beginning of the 10 th century the inhabitants formed themselves into a republic, which existed for nearly 400 years. In the 13 th century it became subject to Norway, and afterwards, through it, to Denmark; with which, notwithstanding the recent union of Norway with Sweden, it still remains.-(Baggesen; Jour. Stat. Soc., \&cc.)

ICHABOE [Possession Island], a small isl. Atlantic Ocean, S.W. coast Africa, 3 m . from the land ; lat. (S. point) $26^{\circ} 38^{\prime} 30^{\prime \prime}$ S.; lon. $15^{\circ} 17^{\prime} 30^{\prime \prime} \mathrm{E}$. About the commencement of 1843 guano was discovered on this island, and by the end of 1844 the whole was carried away. The guano was from 35 to 38 ft . deep, and the deposit extended to a length of 1100 ft ., with an average breadth of 400 ft . As many as 350 ships have been anchored off the island at the same time, taking in cargoes of this much-prized manure.

ICIIAWUR, a tn. Hindoostan, rajahship of, and 32 m . S. W. Bhopaul. In 1820 it was reported to contain 1000 liouses. ICHENHAUSEN, a market $t n$. Bavaria, circle Swabia, on the Gunz, here spanned by a bridge, 27 m . W. Augsburg. It contains a church, castle, synagogue, and Jewish school. P. 2573.

ICHENHEIM, a vil. Baden, circle Middle Rhine, near the Rline, with a parish church. Pop. 1254.

ICHTERGHEM, a vil. and com. Belgium, prov. W. Flanders, $12 \frac{1}{2} \mathrm{~m}$. S. W. Bruges. Pop. (chiefly agricultural) 3980.

ICHTERSHAUSEN, a vil. Saxe-Coburg, principality of, and 12 m . E.S.E. Gotha, cap. bail. of same name, I. bank Gera, with an old and a new castle, a parish church, a paper-mill, and a trade in cattle. Pop. vil., 789 ; bail. 9807.

ICKENHAM, par. Eng. Middlesex; 1420 ac. Pop. 396.

ICKFORD, par. Eng. Bucks ; 1500 ac. Pop. 386.

ICKHAM, par. Eng. Kent; 2190 ac. Pop. 577.

ICKLEFORD, a par. Eng. Hertford; 940 ac. Pop. 570.

ICKLESHAM, a par. Eng. Sussex; 4270 ac. Pop. 681. ICKLETOON, par. Eug. Cambridge; 2672 ac. P. 700. ICKLINGHAM, All Saints, and St. James', united par. Eng. Suffolk; 6580 ac. P. 525. ICKWORTH, par. Eng. Suffolk; 1350 ac. P. 62. ICO, a tn. Brazil, prov. Ceara, in a valley, r. bank Salgado, 8 m . above its junction with the Jaguaribe, and 145 m . S. by E. Fortaleza. Being closely surrounded by hills, the air is confined, and the heat almost unsupportable; while it likewise is imperfectly supplied with good water. It is built almost entirely of wood, and contains three churches, a Latin, and two primary schools. The trade is in mandioc flour, sugar, salt, raw hides, and cotton. On the flat grounds near the river, melons, rice, and millet are extensivcly grown; and, on an elevated platean in the neighbourhood, are three springs, one of cold, another of tepid, and a third of boiling water. Traces of gold are found in different parts of the district, but no attempt is made to work it. Pop. of dist., 7000.

ICOD, or Fed-de-Los-Vinos, a tn. Canaries, in a beautiful valley, W. side isl. Teneriffe. It has tolerably well-built houses, many of them of two stories, but steep and ill-formed streets; a handsome parish church, richly decorated; a nunnery, two suppressed convents, and a primary school ; and manufactures of taffety, handkerchiefs, sashes, and other silk goods. In the vicinity, a good deal of grain, potatoes, and silk are raised, but the chief product is wine. Many of the inliabitants are sailors. Pop. 5479.

ICOLMKILL, an isl. Scotland. See Iona.
ICONIUM, an anc. city of Asia Minor. See Koniyeir.
ICRICOK, or ECRICOK, a tn., W. coast, Africa, r. bank Old Calabar river; lat. $5^{\circ} 48^{\prime} \mathrm{N}$. ; lon. $8^{\circ} 10^{\prime}$ E. ; almost concealed from view by trees and underwood, and difficult of approach, the ascent being nearly perpendicular. Behind the town is a fine and populous country, named Egbo Syra, the natives of which supply those who reside on the banks of the river with bullocks, sheep, goats, and large quantities of palm-oil.

ICY CAPE, a headland, Russian America, on the Arctic Ocean, almost equidistant from Capes North and Lisburne, and the most N. point reached by Cook in 1778 ; lat. $70^{\circ} 20^{\prime}$ N. ; lon. $161^{\circ} 46^{\prime}$ W. (к.)

IDA (Mount), [Kas-dagh]:-1, A celebrated mountain, Asia Minor, pash. Anadolia, about 7 m . N. from the head of the Gulf of Adramyti; lat. $36^{\circ} 12^{\prime}$ N. ; lon. $26^{\circ} 54^{\prime}$ E.; about 30 m . E. by S. the sitc of ancient Troy. From its slopes proceed the rivers Mendere, Touzla, Boklu, \&c., to the Sea of Marmara, the Egean Sea, and Gulf of Adramyti.-2, The anc. name of a lofty mountain, now called Psilorite, near the centre of isl. Crete. It is 7200 ft . high, but sinks down rapidly, towards the S.E., into an extensive plain.
II)A (Nagy), a market tn. Hungary, Hither Theiss, co. Abaujvar, on a sinall stream of same name, 41 m . S.E. Leutschan. It stands in a very fertile plain, has a chureh, two castles, one of them in ruins; and several annual fairs, particularly for fat cattle. Pop. 1732.

IDANHA-Nova, a tn. Portugal, prov. Beira-Baixa, com. Castello-Branco, on an eminence, near the Ponsul, here crossed by a bridge, 47 m. S.S.E. Guarda, with an hospital, almshouse, and convent.

IDAR, a vil. Germany, duehy Oldenburg, principality Birkenfeld, near Oberstein, with a church, and several mills for sawing and polishing stones. Pop. 1312.

IDBURY, par. Eng. Oxford; 1370 ae. P. 207.
IDDAH, a city, W. Africa, cap. kingdom of Eggarah, on the summit of a cliff, overlooking the Niger, and nearly 200 ft . above the river; lat. $7^{\circ} 2^{\prime} \mathrm{N}$. ; lon. $6^{\circ} 45^{\prime}$ E. The streets are numerous and irregular, and the buildings nearly all eircular the walla rising about 6 ft ., and built of a mixture of clay and small stones ; roofs conieal, made of palm-leaves, and some times supported in the centre by a wooden pillar, often rudely decorated with red and yellow clay. The dwellings of the higher orders are painted blue or white outside, and every article in the interior of the building is kept sernpulously clean. The natives are deseribed as a fine race, and as far ther advanced in civilization than their nèighbours. Cotton cloths are extensively manufactured, and many are occupied as smiths and armourers, and also in tanning of leather. Cowries are the only cireulating medium, but much business is also done by barter. The government, which is a hereditary monarehy, is somewhat arbitrary; and all religious power is confided to the Mallams or Mahometan priests, who are so illiterate as to be generally unable to write their own names. The eity contains about 2000 huts, and a pop. of from 8000 to 9000 .-(Allen's Niger Expedition.)

IDDESLEIGH, par. Eng. Devon; 2630 ac. P. 545.
IDE, par. Eng. Devon; 1120 ae. P. 795.
IDFFORD, par. Eng. Devon; 1810 ac. P. 331.
IDEGEM, a vil. and com. Belgium, prov. E. Flanders 25 m. S.S.E. Ghent, on the Dendre, which is here navigable, having a depth of 8 ft . to 10 ft . Inhabitants ehiefly employed in weaving linen; there are also a chicory factory, a brewery, and an oil-mill. Pop. 1217.

IDEN. par. Eng. Sussex ; 3120 ae. P. 554.
IDIAZABAI, a to. Spain, prov. Guipuzeoa, $27 \mathrm{~m} . \mathrm{S}$. St. Sebastian. It has a handsome churel, townhouse, sehool, prison; manufactures of iron, several mills, and a trade in dairy produce. Pop. 1087.

IDJENG, an active voleano, E. end of isl. Java, prov. Rezoeki, $10,170 \mathrm{ft}$. high. A fearful eruption of the moun tain took place in January, 1817.

IDLE, a river, England, co. Nottingham, flowing N.E., passing Retford, and falling into the Trent a little before it enters Lincolnshire.

IDLICO'TE, par. Eng. Warwick; 1410 ac. P. 82.
IIMMISTON, par. Eng. Wilts; 6160 ae. P. 497.
llDIAA, a in. Austria, Illyria, in Carniola, cirele Adelsberg, 28 m . N.E. Trieste, in a basin hemmed in by wooded mountains. It contains a handsome parish ehureh, eastle, theatre, high school, mining school, and hospital ; and has manufactures of linen and silk goods, and lace. Its chief elaim to notice, however, is for its mines of quicksilver, which, direetly or indirectly, furnish employment to the greater part of the inhabitants; and, after those of Almaden in Spain, are the richest in Europe, yielding annually about 200 tons of mercury. The roek in which the quieksilver oecurs is Jura limestone, and the seam consists of a black schist, in whieh the metal is found both in the state of cinnabar and of native quieksilver, which may be seen in glistening drops among the sehist. The mines are easily visited, the descent being by stone steps; the depth is about 240 fathoms. The furnaces are about a mile from the town, and the whole process of extraeting, roasting, and smelting the ore is very curions. Unfortunately, it is very prejudicial to health, and few of those employed in it reach the natural term of human life. The number of aetual miners is about 400. Pop. 4439.

IIIRIA, a river, Austria, Carniola, which rises in eircle Adelsberg, not far from the town of its own name, flows first E., then N., along the base of the Julian $\mathrm{Al}_{\mathrm{j}}$ s, and finally, turning $W$., joins 1 . bank 1 sonzo after a course of abont 45 m .

IDRO, a small th. Austrian Italy, prov. of, and 18 m N.N.E. 13reseia, pleasantly situated on a declivity, S.E. aloore of lake of same name. Pop. 1811.--The lake [anc. Edrinus Lacus], formed by an expansion of the river Chiese, is about 7 m . long, by 1 to 2 m . broad, extremely picturesque, with its ahores elad with forests, vineyards, olive plantations, \&c. Trout and other fish are plentiful.

IDSTED'T, a vil. Denmark, duchy of, and 5 m . N.N.W. Schleswig; only deserving of notice for a battle fouglit here, in 1850, between the Danes and Schleswig-Ilolsteiners, to the advantage of the former.

IDSTEIN, a tn. Nassau, cap. bail. of same name, in a valley, at the N. foot of the Taunus, 10 m . N.N.E. Wiesbaden. It is walled, has two churehes, a castle, and normal school; manufactures of linen and morocco leather, and several annual fairs. Pop. 1987. Area of bail., 68 geo. sq. m. Pop. 17,533.

IDUMAA, an ancient division or district of Syria, comprising the mountainous tract on the E. side of the great valleys El Ghor and El Arabah; and W. and S.W. of the Dead Sea. It consists, at the base, of low hills of limestone or argillaceous rock, then lofty mountains of porphyry, some of the cliffs of which attain an elevation of upwards of 2000 ft . above the surrounding plain of Arabah. This region is at present divided into two distriets, the N. called Jebal, and the S., Esh-Sherah, both oceupied by various tribes of Bedonin Arabs.

IDYOR, a vil. Hungary, Banat. on the Temes, 51 m . S.W. Temesvar. It contains two Greek non-united churches. Pop. 2300.

IEGORLYK, a river, Lussia, which rises in a N. branch of the mountains of Caueasus, near the frontiers of Circassia, flows circuitonsly N., and, on reaching the frontiers of gov. Don Cossacks, joins l. bank Maniteh, about 30 m . W. of Lake Bol-Ilmen or Manitch, after a course of about 190 m .

IEIA, a river, Russia, which rises in the W. of gov. Caucasus, near Dinitrievsk, flows first N.W., and then W., and falls into a bay on the N.E. side of the Sea of Azof, after a course of about 140 m . Its chief affluent is the Kongoi, which joins it on the right.

IEKA'TERINBURG, Iekaterinoslav, Iekaterinograd, Iekaterinodar, \&c. See Ekaterinblig, Ekaterinoslav, Ekaterinograd, Ekateminonar.

1 ELAGGOUI , or Elagui, a river, Siberia, which rises in lat. $63^{\circ}$ N., and lon. $83^{\circ}$ E., in gov. Yeniseisk, flows F., and, dividing into several arms, joins l. bank Yenisei, in lat. $63^{\circ}$ N., and lon. $90^{\circ}$ E., after a course of above 200 m . Its prineijal affluents are the Pokatka and Tilgan, both of which join it on the right.

IELETS or Eletz, a city, Russia. See Jeletz.
IELSI, a market tn. Naples, prov. Sannio, 10 m . E.S.E. Campo-basso, having a ehureh and eonvent. Pop. 2500.

IEMTZA, or Emtza, a river, Russia, which issues from the Lake of Konerskoe, circle Onega, gov. Archangel, flows first S.S.E., then N.N.E., and joins 1. bank N. Dwina, near the town of Eletskoi, after a course of about 95 in . Its banks are heavily wooded.

IEROUSLAN, or Eruslan, a river, Russia, whieh rises in gov., and about 70 m . E.N.E. Saratov, flows eireuitously S.S.W., and, after a course of nearly 180 m. , joins 1 . bank Volga, 18 m . above Kamyshin. Its principal affluent is the Torgun. Its banks are partly inhabited by German co'onists, who rear great numbers of fine cattle on its rich pastures

IESI [anc. Aisis], a tn. Papal States, delegation of, and $14 \frac{1}{2} \mathrm{~m}$. W.S.W. Ancona, l. bank Esino. It is a bishop's see, has a eathedral, five churehes, several convents, and manufactures of silk and woollen fabrics. Pop. 14,034.

IEVS'T, or Evst, a river, Russia, which rises in the E. of gov. Livonia, cirele Wenden, flows S.S.W., skirting the frontiers of that gov., and, after a course of nearly 60 m ., joins r. bank S. Dwina, at the N.W. extremity of gov. Vitebsk. Its chief affluent is the Pedez.

IF, an islet, Franee, dep. Bonches-du-Rhone, in the Roads of Marseilles, a little E. of isle Pomégue. It is a naked roek, rising about 50 ft . above the sea, wholly occupied by a strong fort, built upon it by Franeis I., in 1529. It is said to have been at one time planted with yews, and hence its name.

IFFEZHEIM, a vil. Baden, eircle Middle Rhine, bail. Rastadt, on the Rhine, the steamboats on which have a station here. It has a parish ehureh and two breweries, and is supposed to be the Roman $\mathrm{Li}^{\prime} \mathrm{i} u m$. Pop. 1366.

## IGUALEJA

IFORD, par. Eng. Sussex ; 1680 ac. P. 174.
IFTON, par. Eng. Monmouth; 680 ac. P. 41.
IGA, a seaport tn. Japan, isl. Niphon, cap. dist. of same name, W. coast, Bay of Owari, 100 m . E.S.E. Miako.

IGAL, a market tn. Hungary, Thither Danube, co. Sumegh, 34 m . N.N.W. Fünfkirchen. It is surrounded by forests, and has a handsome R. Catholic churclu Pop. 1560.

IGATIMI, a river, S. America, which rises in Paraguay, in the mountains of Amambuhi and Maracaja, between the Paraguay and Parana, flows first S., then E., and joins r. bank Parana in lat. $24^{\circ} 40^{\prime}$ ' S., atter a very winding course of about 200 m . Its navigation is much obstructed by eataracts, no fewer than 20 occurring within a space of 20 m .

IGBOROUGH, par. Eng. Norfolk; 1510 ac. P. 220.
IGEA-de-Cornago, a tn. Spain, Old Castile, prov. of, and 39 m . S.E. Logroño, r. bank Linares, here crossed by a bridge. It has a fine palace, belonging to the Marquis of Casa Torre; a church, courthouse, prison, and primary school; numerous oil and flour mills, and a weekly market. Pop. 1775.

IGEL, a tn. Rhenish-Prussia, gov. of, and 5 m . S.W. Treves, near 1. bank Moselle. It has a church and chapel, and a curious ancient obelisk of grayish-red sandstone, about 70 ft . high, with numerous carvings, bas-reliefs, and inscriptions, but so mutilated that neither its age nor object has yet been satisfactorily explained. Pop. 411.

IGGELHEIM, a vil. Bavarian Palatinate, 7 m . N.W. Spires, with a Protestant parish church and a mill. P. 1832.

IGHTERMURRAGH, par. Irel. Cork; 5556 ac. P. 3092.
IGHTFIELD, par. Eug. Salop; 2800 ac. P. 368.
IGHTHAM, par. Eng. Kent; 2570 ac. P. 451.
IGLA, or Iglawa, a river, Austria, which rises in the mountains of Moravia, on the S.E. frontiers of Bohemia, enters Moravia, flows circuitously S.E., past the towns of Iglau, Trebitsch, Eibenschitz, and Kanitz, and joins 1. bank Thuya, a little below the confluence of the Schwarza, after a course of about 80 m . Its principal affluents are, on the right, the Bokuna; and, on the left, the Oslava and Schwarza.

IGLaU or Gihawla [Lat. Iglavia], a tn. Moravia, cap. circle of same name, r. bank Iglawa, on a height 1500 ft . above the sea, 49 m . W.N.W. Brïnn. It consists of the town proper, surrounded by walls, and otherwise fortified, and of three suburbs; and, though the streets are somewhat uneven, is well built. It has a civil and criminal court, several important public offices, six churches-of which that of St. James's is a handsome Gothic structure, with a fine altar-piece, and that of St. Ignatius is adorned with fine frescoes; an old Jesuit college, now converted into handsome barracks; a courthouse, gymnasium, military and other schools, a poorhouse, bathing establishment, and two hospitals. One of the finest sights in Iglau is its burying-ground, which contains a great number of remarkable monuments, and is intersected by rows of old lime-trees. The great staple nanufacture is woollen cloth, which employs a great number of hands within the town and in its vicinity, and forms an important article of trade. There are also four dye-works, potash-works, and four annual fairs. In early times, silver-mines were extensively worked in the neighbourhood; but, having ceased to be productive, they have been abandoned. Pop. 16,553.-The cincle, area 780 geo. sq. m., is very hilly, but is well wooded, and contains a good deal of fertile arable land, though the climate is rather unfavourable. Pop. 189,000.

IGLESIAS [Lat. Ecclesice], an isl. Sardinia, cap. prov. of same name, div. of, and 38 m . W.N.W. Cagliari. It occupics a high and healthy site, and possesses ruinous fortifications; is the see of a bishop, has several courts and public offices, a cathedral, a handsome Episcopal palace, four convents, and a Jesuits' college. The trade is in corn, hay, oil, wine, brandy, and cheese. Pop. 4591.

IGLESUELA, two places, Spain:-1, A tn. New Castile, prov. of, and 52 m . W.N.W. Toledo, in a mountainous district. It has a church, townhouse, prison, and endowed school, and several flour mills. Pop. 748.-2, (Iglesuela-del(Cid), A tn. Aragon, prov. Teruel. It is well built, has a handsome church, with a lofty tower; a large and ancient townhouse, an hospital, primary school, manufactures of lineu and woollen cloth, and a trade in timber. Pop. 698.

IGLO or Neudorf [anc. Iglovia], a tn. Hungary, cap. of the XVI. Zips-Kronstädte, in a beautiful plain, on the Hernad, 5 m . S. Leutschau, 136 m . N.E. Pesth. It consists chiefly of a long spacious street, with a square in its centre, and is well built; has several important courts and public offices, and is the place where the chief provincial meetings are held; contains a Protestant and a R. Catholic parish church, the latter a large and handsome structure, with a lofty tower, covered with copper; a courthouse, townhouse, hospital, and ligh school; and has manufactures of linen and paper, bleachfields, saw and other mills, and three large annual fairs. In the vicinity are a bathing establishment and the beautiful castle of Sans Souci, both affording beautiful promenades. There are also several copper and iron mines, and smelting furnaces. Pop. 5000.

IGLOOLIK, a small isl. British N. America, in Fury and Hecla Strait; lat. $69^{\circ} 21^{\prime} \mathrm{N}$. ; lon. $81^{\circ} 53^{\prime} \mathrm{W}$.

IGMAND (Kis and Nagy), two nearly contiguous vils. Hungary, Hither Danube, co. of, and 9 m . S. Komorn.-Kis. Igmand has a R. Catholic churcl. Pop. 632.-Nagy-Igmand, on the commercial road from Ofen to Raab, has both a Protestant and a R. Catholic church, a mill, and a trade in corn. Pop. 2100.

IGNACE (St.), an isl. Lower Canada, in the St. Lawrence, at the head of Lake St. Peter, a little S. isle Dupas. It is low and marshy, but furnishes excellent timber, and abounds with wild fowl.

IGNACIO (SAN), a large vil. Bolivia, cap. prov. Chiquitos, finely situated on a small plateau, between two lakes, which supply the inhabitants with water, r. bank Paragau, 176 m . E.N.E. Santa Cruz-de-la-Sierra. This is one of the most considerable missionary establishments in the country, formed of Chiquitos Indians, who are trained to habits of industry, and have their interests carefully watched over by the public authorities. The village is well built, and has a spacious church, with a large Jesuit college attached. Pop. 5000 to 6000 .- (Castelnau.)

IGRAPIUNA, a tn . Brazil, prov. Bahia, near the tn . of Jorge-dos-Ilheos. It consists of a number of houses scattered along the banks of a river of same name, has a parish church, and a primary school, and an extensive trade in rice grown in the district. Pop. dist., 1000.

IGUAÇU, a river, Brazil, and one of the great affluents of the Parana, the l. bank of which it joins in the S.E. corner of prov. São-Paulo, after a course of about 470 m . It is properly a continuation of the Curitiba-(which see.)

IGUAÇU, a tn. Brazil, prov. of, and 25 m. N.W. Rio-de-Janeiro, r. bank river of same name, which falls into the bay of Rio-de-Janeiro. It consists of a number of louses of a simple but pleasing appearance, contains a parish church and a primary school, and is the head station for a battalion of the national guard. It has several distilleries and tileworks; which, together with agricultural produce, furnish the materials of a considerable trade. Pop. dist., 4000.

IGUALADA [anc. Aque Latex], a tn. Spain, Catalonia, prov. of, and 36 m . W.N.W. Barcelona, in a small valley watered by numerous torrents. It consists properly of an ancient and a modern town. The former was, till within a few years, surrounded by a large earthen rampart, and entered by six gates. These have disappeared, but the interior has still an antiquated look, and consists of narrow winding streets, with a small irregular square in the centre. The streets of the modern town are generally spacious, and the houses which liue them of good construction. Igualada contains an ancient Gothic church, with several good sculptures; the buildings of two old convents, a handsome townhouse, small theatre, and several schools; and has manufactures of woollens-of considcrable importance while the counection with America subsisted, but now greatly decayed; some cotton and mixed. goods, hempen shoes, leather, hats, and brandy, a cotton mill, a trade in the above articles and in corn, two weekly markets, and two annual fairs. Pop. 10,095.

IGUALAPA, a small tn . Mexico, dep. of, and 180 m . S.S.W. La Puebla. Pop. about 3000.

IGUALEJA, a tn. Spain, Andalusia, prov. of, and 40 m . W.S.W. Malaga, among lofty mountains, near the Genal. It is indifferently built, has a parish church, courthouse, and prison, an oil and several flour mills, and a trade in corn and chestnuts. Pop. 1414.

IGUAPE, a tn. Brazil, prov. São-Paulo, r. bank river of same name, $90 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Santos. It stands on low ground, formerly occupied by a lake, but now laid completely dry, and contains a parish church. Its harbour, though shallow, enables it to carry on a considerable trade, particularly in rum, timber, and rice. Pop. dist., 8000.

IGUARAÇU, a tn. Brazil, prov. of, and 25 m. N.N.W. Pernambuco, on a river of its own name, here crossed by a bridge. It has a principal and four anxiliary churches, a Franciscan convent, Latin and primary school, an hospital, and a small harbour about 4 m . below, in the river; and carries on a considerable trade, particularly in sugar and cotton, which are the chief products of the district. Pop. 5000 .

IGUMEN, a tn. Russia, gov. of, and 40 m. E.S.E. Minsk, eap. circle of same name. It is an insignificant place, but las in its vicinity glass-works, and two iron-mills. The circle, on the S.E. of the gov., is watered by the Beresina, and nearly covered with wood and heath, having only occasional stretches of gool arable land and pastures. P. 95,000.

LHA, a vil. Indian A rchipelago, isl. Saparooa or Honi-moa, the inhabitants of which are reputed to be good goldsmiths.
iHAROS-Beremp, a market tn. Hungary, co. Sumegh, 20 m . N.E. Kopreinitz, with a castle and an annual fair. Pop. 1240.

IHNA, a river, Prussia, which issues from a small lake in Pomerania, gov. Stettin, near Norenburg, flows S. to Reetz, then circuitously N.W. past the towns of Stargard and Gollnow, and, at the latter town, bending round to the W.S.W., falls into the N. extremity of the Dammsche-See, 8 m . N.N.E. Stettin, after a course of about 65 m .

IHRINGEN. a vil. Balen, circle Upper Rhine, bail. of, and near Breisach. It has a trade in wine, fruit, and cattle. 1'op. 220.

IJ (IIET), or the Y, a land-locked sea, IIolland, being a W. arm of the Zuider Zee. It forms the roads of Amsterdam, and receives the waters of the lake of Haarlem.

IJMA, a river, Russia, which rises in a desolate tract in the N.E. of gov.Vologda, flows N.N.E., enters gov. Archangel, and, passing the towns of Varons, Nenga, and Dibov, joins 1. bank Petchora, near the town of Rik-Kojva, after a course of about 220 m . Its chief affluent, which it receives on the 1., is the Ushta.

IJSSEL (DEE), two rivers, IHolland: -1 , [Latin, Isala or Sala; French, Yssel], A river which rises in Westphalia, flows N.W., and, after crossing the Dutch frontier in prov. Gelderland, receives the Alie; a stream also of Westphalian origin. The ljssel, now named the Oude or Old ljssel, flows thence, still N.W., past Deutichem to Doesburg, where it re ceives the New Ijssel; which is an offset of the Rhine, formed by a canal, cut by Drusus. From Docsburg the river flows, in a winding course, N. by W., across Gelderland, passing Zutphen and Deventer; forms the part of the boundary between that prov. and Overijssel which it subsequently enters; and passes Kampen, below which it falls into the Zuider Zee. Its principal affluents are the Borkul, which it receives at Zutphen; the Schipbeek, at Deventer; and the Grift, above Kampen.-2, (Hollandsche or Goudsche Ijssel), An offset of the Leck, which it leaves in prov. Utrecht, opposite Vianen; flows, in a circuitous W. and S.W. course, past Ijssclstein, Montfoort, Oudewater, and Gouda; and enters the Mas at Ijsselmonde, above Rotterdam.

IJSSELMONDE [1jssel Mouth].-1, Adistrict, IIolland, prov. S. Holland, composed of an island formed by the lower arms of the Waal and the Maas, between Dordrecht and Rot-terdam.-2, A m . Holland, prov. S. Holland, dist. of same name, I. bank Maas, opposite the mouth of the Ijssel, composed of two closely-built streets; with a Calvinistic chureh, and a school. Pop. 1291.

IJSSELMUIDEN, a vil. IIolland, prov. Overijssel, 1 m . W. Kampen, with a church and school. Inhabitants engaged in asriculture, and in raising pot-herbs. Pop. 520.

IJSEELSTEIN, a tn. Holland, prov. of, and 6 m . S.W. Utrecht, on the Ijssel. It is a neat place, is walled, surrounded by ditches, and traversel by a canal, called the Haven; has a townhouse, a pretty large building, with a tower; a market-place, two churches, and a synagogue; several schools, and some charitable institutions. Inhabitanta chiefly agricultural; but there are three coppersmiths' shops, and a rope-walk. I'op. 2249.

IJIGIIINSK, or Gijonsse, a fortificd tn. Siberia, gov. of, and 590 m . E.N.E. Okhotsk, at the head of a gulf of its own name, an arm of the Gulf of Penjinsk, and the mouth of the Gijiga ; lat. $63^{\circ} 6^{\prime} \mathrm{N} . ; \operatorname{lon} .159^{\circ} 52^{\prime}$ E. It has a church, and some trade in peltry. P. 600.

IJZENDIJKE, a tn. Holland, prov. Zeeland, 10 m. F. Sluis. It was formerly fortified, but its walls are now ruinous; it has a townhonse, in the market-place; a barrack, two churches, and a school. The inhabitants are chiefly agricultural; but there are also corn-mills, and some brewing and brick-making are carried on. Pop. 2063.

IK, two rivers, Russia, gov. Orenburg. The one rises in a mountainous district, lat. $23^{\circ} 50^{\circ} \mathrm{N}$. , and, proceeding N.N.W., and passing the town of Menzelinsk, joins l. bank Kama, after a course of about 220 m . The other flows S.S.W., and joins r. bank Sakmara, about 5 m . E. Nilikensk, after a course of about 90 m .

IKE-Aral-Noon, a lake, Chinese empire, Mongolia, Kalkas territory, near the E. frontier of Soongaria, between lat. $47^{\circ}$ and $48^{\circ} \mathrm{N}$., and intersected by the meridian of $90^{\circ} \mathrm{E}$. Length, 40 m ; average breadth, 20 m . It receives several considerable streams, but has no known outlet.

IKEN, par. Eng. Suffolk; 3630 ac P. 342.
IKERVAR, a market tn. Hungary, Thither Danube, co. Eisenburg, near 1. bank Raab, in a fertile district, occasionally inundated by the river, 73 m . S.S.E. Vienna. It has a church and two elegant castles, with extensive park and fine gardens belonging to Count Battliyany. Pop. 1000.

IKLODA. a vil. Hungary, Banat, co. of, and 23 m. S.E. Temesvar, on the Boganis, with two churches, and has a trade in cattle. Pop. 1782.

IKORETZ, a river, Russia, which rises in the N. of gov. Voronetz. flows S. and joins I. bank Don, about 30 m . below the junction of the Sosna, after a course of about 60 m .

IKROPA or Ikiopa, a river, Madagascar, formed by the junction of several head streams, which have their rise in the prov. Ankova, S.E. the town of Tananarivo, whence it flows N.N.W., and falls into Bombetoc bay, N.W. coast Madagascar, being known during the latter part of its course by the name of the Bombetoc. It is navigable to Maroa-bé, about 25 m. from the sea. Entire length, about 270 m .

ILA, or Way-ila, two rivers, Indian Archipelago, Moluceas :-1, In isl. Amboina, entering the sca on the S.W. coast of Hitoe.-2, In isl. Booroo. It rises from a lake in the interior, flows N., and falls into the sea about midway between E. and W. ends of the island.

ILALLY, a vil., W. Asia, khanat of, and 50 m . N.W. Khiva, to the E. of the great Turcoman desert. It consists of about 100 houses, contains a castle of the khan, and is inhabited by Sarts and Usbeks.

ILAM, par. Eng. Stafford; 2250 ac P. 244.
ILANMORE.-1, An islet, Scotland, Hebrides, $\frac{1}{2}$ m. N. Coll, about 1 m . in circumference. -2 , A small isl. Clew bay, Ireland, co. Mayo, about $4 \frac{1}{2} \mathrm{~m} . \mathrm{N} . W$. Westport.
illanroan and Ilanteraci, two islcts, Scotland, Hebrides, S.E. Oransay.

ILANZ [Ronansch, Gliou], a tn. Switzerland, can. Grisons, r. bank Vorder-Khein, at the confluence of the Velse. It has dilapidated walls, and is poor, but the country around is fertile. Pop. 568.

ILAY, Islay, or Yslay, a seaport tn. Peru, 50 m . S.S.W. Arequipa, of which it is the port ; lat. $16^{\circ} 32^{\prime}$ S.; lon. $72^{\circ} 43^{\prime}$ W. The rows is situated on the W. side of a gradually declining hill, sloping towards the anchorage, and is said to contain 1500 inhabitants, chiefly employed by the merchants of Arequipa. The houses are mostly constructed of planks, and are arranged into two or three streets, the whole having a most miserable appearance. The port is formed chiefly by a few straggling islets, is capable of containing 20 or 25 sail, and is much frequented by British merchant vessels. The principal exports are wool, bark, and spice; in exchange for which British merchandise is principally coveted. Near Ilay, the land is in several places covered with a whitish powder or dust, which lies many inches thick in hollow or sheltered places, and is drifted about like snow. It is not certainly known how or whence this substance has come, but it is pretty gencrally believed to be of volcanic production. In 1846 there entered the port 67 vessels, 18,784 tons; value of cargoes, $£ 274,722$; and there cleared out 71 vessels, 19,452 tons;
value of cargoes, $£ 262,564$. Of these, entered 37 British vessels, of 11,878 tons; value of cargoes, $£ 201,416$. Cleared out, 39 British vessels, of 12,546 tons; value of cargoes, £232,611.

ILBONO, a vil. Sardinia, div. of, and about 30 m . N.N.E. Cagliari, on a slope of the mountains of Barbagia. It is poorly built, has narrow streets, a parish and a minor church, a primary school, and a trade in wine. Pop. 1100.

ILCHESTER, a tn. and par. England, co. Somerset. The rown, 31 m . S. by W. Bristol, is pleasantly situated on the Ivel, here crossed by a substantial stone bridge. It consists of two regular streets, composed of small cottages, chiefly of brick, and roofed with slate and tile; has two established churches, oue of which has an octagonal tower 50 ft . high; two Dissenting chapels, two schools, an almshouse, and a county-hall. Flax-spinning and glove-making are carried on here to a considerable extent. Ilchester was a Roman station, and a considerable town of the ancient Belge. Mrs. Elizabeth Rowe was a native of the parish, and Roger Bacon was born at the Friary in the year 1214. Ilchester gives the title of carl to the family of Fox. Area of par, 690 ac . Pop. 1068.-(Loeal Correspondent).

ILDEFONSO (SAn), a vil. Spain, Old Castile, prov. of, and 4 m . S.E. Segovia, on the W. slope of the mountains of Carpetanos, surrounded by portions of the Cordillera of Guadarrama. It is walled, has four gates, is well built, and contains many handsome houses, arranged in well-formed streets, a handsome parish church, and an extensive royal manufactory of mirrors, but is chiefly noted for its palace of La Granja, a vast structure in the French style and taste, not of much merit externally, but sumptuously furnished, adorned with statues and numerous other sculptures and paintings, and surrounded by beautiful gardens, formed at an immense expense, in a naturally wild and sterile district, 3840 ft . above the sea. The court resides in this palace during part of the summer. Pop. 1117.

ILDERTON, par. Eng. Northumberland; 9670 ac. P. 585.
ILE-DE.FRANCE.-1, Isl., Indian Ocean. See Mau-mitius.-2, Prov., France. See Isle-de-France.

ILEK, a river, Siberia, which rises in gov. Irkutsk, in lat. $55^{\circ}$ N., flows N.N. W., past the town of Ilimsk, and, after a course of about 200 m ., joins r. bank Angara.

ILEKSKOI-Gorodek, or Iletski, a tn. Russia, gov. of, and 65 m . W.S.W. Orenburg, at the confluence of the Ilek with the Ural. It is the seat of a criminal conrt, contains a school of mines, a school for mutual instruction, and an hospital ; and has very extensive salt mines. In the vicinity are two lakes, one of which is warm and salt, and the other acid. Pop. 2000.

ILFORD (Great), a vil. and ward of Barking par. Englatd, co. Essex. The village is situated 7 m. E.N.E. London, on the Roding, here crossed by a bridge, and on the Eastern Counties Railway, of which it is a station; contains Baptist and Wesleyan meeting-houses, an hospital founded by Henry II., and house of correction for the S. division of the county. Pop. 3742.

ILFORD (Little), par. Eng. Essex ; 750 ac. P. 189.
ILFRACOMBE, a seaport, market tn., and par. England, co. Devon. The town, on the Bristol Channel, 41 m . N.W. Exeter; lat. $51^{\circ} 12^{\prime} 48^{\prime \prime \prime} \mathrm{N}$. ; lon. $4^{\circ} 7^{\prime} \mathrm{W}$. (r.) ; consists of one main street, about 1 m . in length, extending along the sea-shore, often very steep, and inconveniently narrow, comprising a number of good houses. At the S.W. end of the town stands the church, a large building; and there are, besides, two Dissenting places of worship and several schools. The harbour is safe and commodious, being inclosed and protected by formidable rocky heights, and nay be entered with perfect safety by vessels of 230 tons. It is much resorted to, particularly in the winter season, by ships passing up and down the channel from Ireland. It is provided with an excellent pier, 850 ft . in length, stretching across the mouth of the harbour, and, on an eminence overlooking it, is a light, 100 ft . above high water; visible at a distance of 15 m . A considerable coasting trade is carried on here. Oats are the chief article of export. There is also a pretty extensive herring fishery. Ilfracombe is resorted to for sea-bathing. It was a considerable seaport at a very early period, having contributed six ships and 82 mariners to the fleet destined for the expedition to Calais in 1346. Steamers run daily to and
from Bristol, and at longer intervals to other places on the coast. Market on Saturdays. Pop. (1841), 2855 ; (1851), 3654. Area of par., 3620 ac. Pop. 3679.

ILGELDI, a vil. W. Asia, khanat of, and 46 m . N.N.W. Khiva. It is surrounded by a good wall, and has several beautiful gardens in its vicinity, though the soil is generally sandy. It is inbabited by Usbeks.

ILHA-Grande, isl. Brazil. See Grande.
I'LHAVO, a tn. and par. Portugal, prov. Douro, S.W. of Aveiro, on the Atlantic; inhabited chiefly by fishermen. Pop. 6310.

ILHEOS, four small isls. Brazil, close to the coast of prov. Bahia, formerly called the Capitania of Jorge-de-Figu-eiredo-Correa, and now composing one of the comarcas of Bahia. The largest of them is covered with trees, but the others are steep barren rocks.

ILI, Ele, or Gouldja [Chinese, Hoei-yuan-tching], a city, Chinese empire, Soongaria, cap. dist. of same name, r. bank Ili river ; lat. $43^{\circ} 46^{\prime} \mathrm{N}$. ; lon. $82^{\circ} 30^{\prime} \mathrm{E}$. It is inclosed by a stone wall, and contains barracks, forts, granaries, and public offices for the use of Government; and is a place of banishment for Chinese criminals. Outside the town are the barracks for the troops. It carries on a considerable trade with China, through the cities in prov. Kansoo, and also with other towns. Pop. 75,000- -The District is one of the three into which Soongaria is divided.-The river, rising about lat. $42^{\circ} \mathrm{N}$., lon. $81^{\circ} \mathrm{E}$., in the mountains of Thian-shan-nan-loo, flows N.E., and then turns N.N.W., passing the city of Ili, and falling into Lake Tengiz or Balkash-Nor, on the frontiers of Siberia, after a course of above 300 m .

ILIM, a river, Siberia, which rises near lat. $55^{\circ} \mathrm{N}$., in the S.W. of circle Kirensk, gov. Irkutsk, flows circuitously N.N.W., passing the town of llimsk, and joins r. bank Angara, after a course of about 200 m .

ILIMSK, a til. Siberia, gov. and 300 m . N. Irkutsk, on the Ilim; surrounded by wooden walls, and has three wooden churches, some general trade, and a trade in furs. Pop. 531.

ILINCA, or Ilinissa, a mountain, Leuador, in the Andes, dep. of, and 33 m . S.S.W. Quito ; lat. $0^{\circ} 43^{\prime} \mathrm{S}$.; lon. $79^{\circ} \mathrm{W}$. It has three peaks, and rises $17,380 \mathrm{ft}$. above the sea.

ILISEH, or Ilijeh, a tn. Asiatic Turkey, pash. of, and 50 m. N.N.E. Diarbekir, on the route thence to Erzeroom; lat. $38^{\circ} 29^{\prime} \mathrm{N}$.; lon. $40^{\circ} 30^{\prime} \mathrm{E}$. The greater portion of the inhabitants are employed in the weaving of cotton cloth.

ILISSUS, a river, Greece, which rises near the village Aleti, flows W.S.W., passing immediately S. of the walls of Athens, and, after a course of only 12 m ., falls into the Gulf of Egina, not far from the mouth of the Cephissus. Its proximity to Athens, and the frequent mention of it by Greek writers, have given it great classical celebrity, though in itself it is very insignificant.

ILIYATS, the name by which the Persians designate the whole of those tribes who subsist by their flocks, and also that portion which is employed in the pearl fishery. The Iliyats disclaim comnctiou with the old Persian stock, and preserve their peculiar habits and customs. Their communities usually consist of 20 or 30 families. They make carpets and tents, and have nearly all things within themselves. They dress more meanly than any other Persians, a man rich in cattlo often appearing in a coat that will scarcely hold together.

ILKESTON, a market tn. and par. England, co. Derby. The town, 8 m. E.N.E. Derby, a station on the Erwash Valley Railway, is situated on a lofty hill, and consists of one long, irregular street, from which several others diverge at right angles; houses moderately-well built of brick, plentifully supplied with water, well lighted with gas, and rapidly increasing in population. The church is a fine ancient edifice, having been partly built in the time of Stephen, with a lofty tower, erected in 1737; and there are several Dissenting chapels, a mixed British, and two national schools; together with a mechanics' institution and library. The principal manufactures carried on here are those of hosiery, in all its branches, together with silk edgings, lace, silk mittens, and a very superior silk fabric, which is afterwards dressed in Yorkshire, and made into gloves in London. A considerable number of the inhabitants are also employed in miniug coal and ironstone. Weekly market on Thursday, for fruit. The Erwash and Nutbrook canals intersect the town. Area of par., 2290 ac. Pop. 5326.-(Local Correspondent.)

ILKETSHALL, four pars. England, Suffolk:-1, (St. Andrew) ; 1780 ac. P. 548.-2, (St. John); 800 ac. P. 71. -3, (St. Lawrence); 1750 ac. P. 221.-4, (St. Margaret); 1070 ac. P. 315.

ILKLEY, a vil. and par. England, co. York. The vilhage, 31 m . W. by S. York, is beautifully situated, r. bank Wharfe, and is much resorted to by summer visitants. It has an ancient church, Wesleyan chapel, and a free sehool. Many Roman coins, and other interesting relics, have been discovered in the vicinity. Area of par., 7600 ac . P. 1174.

ILI, two rivers, Europe, affluents of the Rline $:-1, \Lambda$ river, Austria, in Vorarlberg. It rises in the glacier of Iamthal, on the frontier of the Grisons, flows N.W. through the valleys of Ochsell and Montafon, receiving in its course, on the 1., the Gannera, Gargellan, Gampadell, Rells, Alvier, Gamperthorn, and Samina; and on the r., the Silber, Kloster, and Walser; and falls into the Rhine on its r. bank, on the frontier of St. Gallen, 14 mm . S. Lake Constance. Total course about $50 \mathrm{~m} .-2$, [Latin, Alsa], A river, France, which rises near Altkirch, dep. Haut-Rhin, runs N.N.E., passing Colmar, enters dep. Bas-Rhin shortly after passing Schelestat, communicates with the canals of Bruche and Monsieur, enters the town of Strasburg, and, shortly after leaving it, joins the Rhine. It becomes navigable at Colmar, about 57 m . above its mouth; whole course about 140 m .; chief affluents, the Lauch, Faecht, Giesen, and Andlau.

Illabisco, lake, Central America. See Cojutepeke.
ILLANA, a tm. Spain, New Castile, prov. Guadalajara, in a narrow gorge, surrounded by lofty mountains, 40 m . E.S.E. Madrid. It contains a parish church, courthouse, with prison; primary school, and hospital; and has manufactures of leather, and of tissues of hemp, wool, and flax; and a trade in corn, oil, wine, wood, and charcoal. Pop. 1467.

ILLANCSA, a vil. Hungary, Banat, 42 m . S.W. Temesvar, with two Greek non-united parish churches. Near it is an extensive bog, where large quantities of turf are annually cut. Pop. 3116.

Illanon, or Illana bay, a large bay, S.W. ceast, isl. Mindanao, having Bamban Point on the S.E., and the Strait of Basilan on the N.W., making the width of the entrance about 102 m .; its length inland being nearly the same. On the E . side of the bay is the town of Mindanao, about 2 m . up the Simov. About 9 m . further to the N . is Pollock Cove, a good harbour, where fresh water may be procured; but the inhabitants here, and those of the adjacent coast, mostly live by piracy, are a treacherous race, and must be carefully watched.

ILLARY, an isl. Scotland, Hebrides, co. Inverness, W. of North Uist. It is 3 m . long, by $1 \frac{1}{2} \mathrm{~m}$. broad; and yields tolerable crops of barley, and pasture for cattle. Pop. 80.

ILLASI, a vil. Austrian Italy, prov. of, and 9 m . E.N.E. Verona; the seat of a court of justice. It has a parish and an auxiliary church, and four mills. Pop. 1550.

ILLAVA, or Illan, a market tu. Hungary, Hither Danube, co. of, and 15 m. N.E. Trentschin, in a fertile district, l. bank Waag, here crossed by a stone bridge. It contains a large square, adorned with a fountain; a handsome parish church, with catacombs; a castle, and the remains of a monastery, now converted into a cloth factory. Pop. 1233.

ILLAWARRA, a fertile and beautiful dist. New S. Wales, co. Camden, about 50 m . from Sydney. It extends in a N. and S. direction for a space of 18 m . along the sea-coast, and comprises about $150,000 \mathrm{ac}$. There is a fine lake of the same name in the district.
llLLE.-1, A tn. France, dep. Pyrénées-Orientales, 14 m . W. Perpignan, r. bank Tet. It is surrounded by a wall, tlanked with towers, is well built, and contains three churches and an hospital. It has manufactures of linen for household purposes, rope-works, tanneries, and silk mills; and carries on a considerable trade in grain, fruit, which is excellent; flax, hemp, and cattle. The olive is cultivated to some extent in the vicinity, and the peaches grown here are much esteemed throughout Langucdoc. Pop. 2998.-2, $\boldsymbol{\Lambda}$ small river, France, which rises in Lake Boulet, in the N. of dep. Ille-et-Vilaine, flows S., and joins r. bank Vilaine at Rennes, after a course of about 20 m . It is an important feeder of Ille and Rance canal, which lies close to it almost during its whole course.

ILLE-et-Vilaine, a dep. France, bounded N. by the English Channel and dep. Manche, E. by Mayemne, S. by Yol. I.

Loire-Inferieure, and W. by Morbihan and Côtcs-du-Nord; lat. $47^{\circ} 37^{\prime}$ to $48^{\circ} 42^{\prime} \mathrm{N}$. ; lon. $1^{\circ} 3^{\prime}$ to $2^{\circ} 18^{\prime} \mathrm{W}$. It is of a compact, and, but for a projecting point in the S.W., and another in the W., would be nearly of a square form; greatest length, N. to $\mathrm{S} ., 75 \mathrm{~m}$; ; greatest breadth, 56 m ; area, 2582 sq. m. The coast-line is of very limited extent, and, except towards the E., where it is low and sheltered, is bristling with rocks, and lined with rocky islands. It, however, contains two tolerable harbours, that of St . Malo, and another in the Bay of Cancale. The surface is very much broken by low hills, which, without attaining great height, rise a little N. of the centre and form a watershed, dividing the department into two basins; the smaller of which, on the N., belongs to the English Channcl, and is drained chiefly by the Rance and the Couesnen; and the other to the basin of the Atlantic, which receives its waters by the Vilaine and its tributaries, Ille, Meu, Seiche, \&c. These two lasins are comected by the
 large stagnant pools, within the department; and extensive marshes, of which that of Dol is the largest, occupy a considerable portion of its surface. The principal geological formation is granite, overlain by primitive schists. The climate is not subject to great variations of temperature, extreme heat and cold being equally rare; but the air is much overcharged with moisture, and both rains and mists are very frequent. The soil of the department is generally of inferior quality, and the agriculture, owing partly to the excessive subdivision of the land into small patches, is very imperfect. Little more than one-half of the surface is arable, and nearly one-sixth of it is absolutely waste. The corn raised is rather above the consumption, and consists chiefly of wheat, maslin, rye, oats, and buckwheat. After these, the most important crops are hemp and flax. Tobacco also is cultivated to some extent, particularly near St. Malo. The apple and pear are gencrally difused over the department, and from their produce some of the best cider and perry of France are made. Among domestic animals, the horses and sheep are generally very inferior; horned cattle, especially cows, are of a better description, and considerable attention is paid to the dairy. Much of the cheese made resembles Gruyere, and finds a ready sale. Poultry, as well as game, large and small, abound; and both the sea-coasts, the rivers, and lakes, furnish abundant supplics of fish. The oysters of Cancale are particularly esteemed. The minerals are of little consequence. They include small quantities of iron, copper, and lead, none of which are worked. The granite quarries are of considerable value, and a quartz, used in making glass, is very common. The principal manufactures are leather, sailcloth, sacking, and coarse linens, hats, sewing thread, cordage, and ship-biscuits; and the trade, in addition to the above articles, includes corn, butter, cheese, chestnuts, honcy, oysters, and salt pork. For administrative purposes, the department is divided into six arrondissements-Rennes, the capital; St. Malo, Fougéres, Redon, Montfort, Vitré; subdivided into 43 cantons, and 347 communes. Pop. (1846), 562,950.

ILLER [anc. Ilargus], a river, Germany, which rises in Austria, in the N.W. of the Tyrol, near Baad, flows N., through a wild valley, to the town of Kempten, then N.N.W., forming part of the boundary between the kingloms of Bavaria and W ïrtemberg, and forming numerous chanuels and islands, and, after a course of about 100 m ., none of which is navigable, joins r. bank Danube, 2 m . above Uhm. Of its numerous affluents, the Aurach, which it receives on the left, is the largest.

ILLERTISSEN, a market tn . Bavaria, circle Swabia, cap. bail. of same name, r. bank Iller, here crossed by a bridge, 39 m . W.S.W. Augsburg, with two castles, a chapel, and an hospital; a trade in corn and cattle, and two annual fairs. Pop. 1145 . Area of bail., 48 geo. sq. m. Pop. 10,521.

ILLESCAS, a tn. Spain, New Castile, prov. of, and 17 m . N. N.E. Toledo, cap. dist. of same name, in an extensive plain, on the road from Madrid to Toledo. It is an ancient place of some celebrity, and still possesses remains of its former grandeur ; among others, several Gothic and two Moorish arches, and a large and handsome Gothic structure, with a grand façade and some fine paintings. The modern town consists of about 300 houses, substantially built, and arranged in two squares and several mpaved streets, and has a magnificent Gothic church, dedicated to the assumption of the Yirgin, with 159
a majestic square tower of Moorish architecture, surmounted by another octagonal tower, and terminated by a spire; a richlydecorated hermitage, with an image, whose alleged miraculous powers attract numerous pilgrims; a townhouse, with a colon-

TOWER OF THE CHURCH OF ST. MARV, illescas.
From Espaina Artistica y Monumental
nade in front; two primary schools, an hospital, several oilmills, and a much-frequented annual fair, which lasts three days. Pop. 1893.

ILLIERS, a tn. France, dep. Eure-et-Loir, 1. bank Loir, 15 m . S.W. Chartres, remarkable for the remains of an old castle. It has manufactures of cloth, blankets, hosiery, common and glove leather, and a trade in cattle, sheep, and wool. Pop. 2252.

ILLIMANI, a lofty mountain, Bolivian Andes, E. Cordillera, one of the most magnificent portions of the Andes, of which it is the culminating point, about 25 m . E.S.E. La Paz , from which its appearance is singularly majestic and imposing. It has four principal peaks, the most N . of which is in lat. $16^{\circ} 37^{\prime} 50^{\prime \prime}$ S., lon. $67^{\circ} 49^{\prime} 39^{\prime \prime} \mathrm{W}$. Three of the loftiest summits are of the following elevations respectively : S. peak $21,145 \mathrm{ft}$. above sea level, middle peak $21,094 \mathrm{ft}$., and N . peak 21,060. The snowy part of the $\mathbf{E}$. Cordillera begins with the gigantic mass of the Illimani, and proceeds in a continuous line of snow-clad peaks to the group of Vilcanota, where it unites with the Cordillera of the coast. Though its summit is covered with perpctual snow, the latter does not descend below $16,500 \mathrm{ft}$.

ILLINCZE, a vil. Austria, Sclavonia, 39 m . W.S.W. Peterwardein, on the Bossut. It contains a Greek nonunited parish, and another old church in ruins. Pop. 1174.

ILLINGEN, several small places, Germany, particularly -1 , A vil. Rhenish Prussia, gov. Treves, circle Ottweiler, with a K. Catholic parish church and a chapel; a colliery, glass-work, a trade in cattle, and 2 annual fairs. Pop. 548. -2, A vil. Würtemberg, circle Neckar, bail. Maulbronn, with a parish chureh. Рор. 1400.

ILLINGTON, par. Eng. Norfolk; 1380 ac. Pop. 93.
ILLINOIS, a river, U. States, formed by the union of the Kankakee and Des Plaines, in the N.E. part of the State of Illinois, to which it gives its name. It flows thence S.W. and S., diagonally, through the State; and falls into the

Mississippi about 20 m . N.W. its junction with the Missouri-lat. $38^{\circ} 58^{\prime}$ N., lon. $90^{\circ} 25^{\prime} \mathrm{W}$.-after a course of 400 m .; principal tributaries, the Fox and Vermilion. It is 1200 ft . wide at its moutl, and is navigable to the entrance of the Vermilion; above which it is obstructed by rapids. A canal has lately been formed from La Salle, connecting the river with Chicago, on Lake Michigan-a distance of about 106 m .

ILLINOIS, one of the Western U. States, bounded N. by Wisconsin; E. by Lake Michigan and Indiana; S.E. by Kentucky, from which it is separated by the Ohio ; and W. by the Mississippi, separating it from Missouri and Iowa; between lat. $37^{\circ}$ and $42^{\circ} 30^{\circ} \mathrm{N}$. ; lon. $87^{\circ} 17^{\prime}$ and $91^{\circ} 38^{\prime}$ W. Length, 350 m .; breadth, 180 m .; area, 56,405 sq. m., or $35,459,200$ ac. The surface is somewhat hilly near the Ohio, and undulating towards the W.; and a range of bluffs runs for a considerable distance along the margin of the Mississippi, sometimes rising abruptly from the water's edge, generally a few miles from it; but with these slight exceptions, the whole state is one continuous plain, with a gentle inclination towards the S.W. It has a greater proportion of arable land than any other State of the Union. The soil may be divided into alluvium of inexhaustible fertility, some of it having produced Indian corn uninterruptedly, and without manure, for nearly a century; dry prairie ground, rising from 30 to 100 feet above the alluvial soil, and almost equally valued, for, although less fertile, it is also less subject to inundations; wet prairie land, covered with coarse grass ; and timber land, some portions of which are amazingly fertile. The only part of the State thickly wooded is the extreme S . portion; evcrywhere else the prairies predominate. The principal rivers are the Illinois, which traverses the State diagonally N.E. to S.W., Rock, Kaskaskia, and Wabash. About 200 m . above the mouth of the Illinois is a beautiful sheet of water called Lake Peoria, 20 m . long and two broad. Vegetable productions :-Indian corn, wheat, rye, oats, buckwheat, potatoes, turnips, cotton, hemp, flax, tobacco, castor bean, \&c. Forest trees:-oak, walnut, ash, clm, sugar maple, locust, hackberry, buckeye, sycamore, and white pine. The common domestic animals are abundant, and immense numbers of swine are reared on the mast of the forests. Lead is found in immense quantities, and indeed the lead mines of this State are believed to be the richest in the world; the metal is found chiefly near the Wisconsin frontier, Galena being the centre of the mining district. Coal abounds in the bluffs, and several valuable salt springs are found in the E. and S.; the rocks mostly are limestone, gypsum, and sandstone. The climate, although somewhat humid, is generally healthy, except in the neighbourlood of marshy ground: average annual temperature $50^{\circ}$ to $53^{\circ} \mathrm{Fah}$. ; but winter, especially in the N., is remarkably cold. The commerce and manufactures of this State are as yet very inconsiderable, except in the article of lead. Illinois is divided into 99 countics, and has a number of small towns -Springfield being the seat of government, and Chicago, on Lake Michigan, the principal commercial depot. The legislature consists of 40 senators and 91 representatives. It was constituted a separate territory in 1809 , and admitted as a State into the Union in 1818. Pop. (1845), 643,482, of whom 331 were slaves; (1850), 85ऐ̀,384.

ILLKIRCH, or Elkifch, a vil. France, dep. Bas-Rhin, 3 m. S. Strasburg, r. bank Ill, with manufactures of fustian and pack-sheeting, steel, oil from seeds, and tobacco. P. 2969.

ILLMIRE, or Illaer, par. Eug. Bucks; 810 ac. P. 79 .
ILlMITZ (Also and Felsö), or Unter and Ober IllMitz, t wo contiguous vils. Hungary, Thither Danube, co. of, and 22 m. W.S.W. W ieselburg, on Lake Neusiedler. They contain a R. Catholic parish church, and have manufactures of soap. Much soda also is obtained here. Pop. 1206.

ILINAU, Unter and Ober, two nearly contiguous vils. Switzerland, can. of, and 9 m . E.N.E. Zürich, r. bank Kempt, with a parish church, prettily situated on a hill. It has two cotton-spinning mills, and spinning silk and weaving cotton are carried on. Pop. 2766.

ILLOGAN, par. Eng. Cornwall; 8010 ac. Pop. 7815.
ILLOK, or UJlak, a market tn. Austria, Sclavonia, co. Syrmia, cap. dist. of same name, agreeably situated r. bank Danube, over which there is here a ferry to Pilanka, on the
npposite side of the river, 24 m . W. Peterwardein. It contains a church, Franciscan monastery, a castle, and large cavalry barrack. On a height above the town are three forts, supposed by some to be of Roman origin, and in an aljoining wood are the remains of a temple of Diana. Pop. 3350.

ILLORA, a tn . Spain, Andalusia, prov. of, and 23 m . N.W. Granada, eap. dist. of same name at the S.E. extremity of the sierra de Parapanda, on a height crowned by a Moorish castle in ruins. It is very irregularly built, consisting of a great number of streets and lanes, some level and others sloping, generally well paved and lined by houses of two stories. The public square is tolerably large, and is adorned with an elegant and copious fountain. The principal buildings are two parish churches, one of them erected immediately after the expulsion of the Moors, a large and elegant structure, surmounted by a lofty tower; an old monastery, townhouse, hospital, and two primary schools. The manufactures consist of woollen and linen stuffs, and there are numerous oil and llour mills. Trade in corn, oil, vegetables, and fruit. P. 6359.

ILLORAI, or Lorat, a vil., isl. Sardinia, div. and 42 m . S.E. Sassari, most beautifully situated within the valley of the Goceano. The ruins scattered around show that it must at one time have been a place of some consequence, but it now consists of about 260 houses huddled together without any order. It contains a church, almost devoid of ornament; and a primary school; and has some trade in dairy produce, particularly cheese, which is much esteemed. Pop. 1000.

ILLOVA, a river, Austria, whieh rises in the S. slope of the Reda or Bila Mountains, on the confines of Croatia and Sclavonia; flows eircuitously S.S.W.. forming the boundary between these two countries, and joins l. bank Save, by several mouths, a little below the confluence of the Lonya, after a course of about 50 m .
llllUECA, a tn . Spain, Aragon, prov. of, and 35 m . W.S.W. Saragossa, on a flat near 1. bank Aranda. It contains six squares, a parish church, a palace, in which are the remains of the anti-pope Luna, who was born in it ; a townhouse, prison, and primary school ; and has mannfactures of common woollen cloth, an oil and flour mill, a weekly market, and an annual fair. Pop. 1350.

ILLUXT, or Illoukst, a market tn. Russia, gov. Courland, E.S.E. Mittau, with a fine castle, two churches, and a monastery. Pop. 900.

ILLYYEFALVA, or Elienmorf [Latin, Illia], a market tn. Austria, Transylvania, IIaromzeker Stuhl, r. bank Aluta, 13 m . N.E. Kronstadt, with a townhouse and three churches. Pop. 1417.
lLLYRIA (Kivanom of), [German, Illyrien-Königreich; Freneh, Royanine d' Illyrie], a territory or kingdom forming the S.W. portion of the Austrian dominions, and bounded N. by Salzburg and Styria; E. Styria and Croatia; S. the Adriatic; and W. Veniee and the Tyrol; area, 8243 geo. sq. m. It was formed in 1815. It is composed of the ancicut duchies of Carniola and Carinthia, the margraviate of Istria, the duchies of Göritz and Gradiska, and the town and territory of Trieste-the last three incorporated in 1849; prior to whieh they composed the Littorale or coast lands. It is very irregular in shape, and terminates sharply in the S. in a triangular peninsula. The surface is very mountainous. In the N. a branch of the Noric Alps, commeneing at the Gross-Glockner, stretehes E., forming the boundary between Illyria on the S., and Salzburg and Styria on the N. Another branch, forming the Carnic or Julian Alps, stretches aeross the kingdom in a S.W. direetion. From these prineipal branches, numerous ramifications procecd. In regard to drainage, the surface is divided into two great basins-that of the Danube, on the N., the far larger of the two ; and that of the Adriatic, on the S. The former basin receives its waters chiefly by the Drave, which, entering the kingdom below Lienz, traverses it from W. to E.; and partly also by the Save, which rises within and forms part of the boundary between it and Styria. The basin of the Alriatic receives its waters by a great number of small streams, of which the most important is the Isonzo. But though the streams are small, the bays into which they discharge themselves are of great magnitude, and form excellent roadsteads. Of these it is sufficient to mention that of Trieste, which eontains by far the largest seaport in the Austrian dominions. Thi elimate varies mueh, according to loeality. In the N., and among the
mountains, it is bleak and cold; but in the S., particularly in the valley of the Isonzo, is warm and pleasant. One of the greatest scourges of the country is the bora, which often blows from the N.E. and N.N.E. with the fury of a tempest, and commits great ravages. In harvest the sirocco becomes equally tempestuous, and is not unfrequently accompanied with deluges of rain. Notwithstanding the unfavourable nature of the surface, a very considerable proportion of it is under the plough, and, being industriously cultivated, yields good crops, especially of ryc and oats, but more sparingly of wheat. Flax, also, is extensively cultivated. A cousiderable extent of ground is in vineyards, but the produce is not remarkable either for quantity or quality; a large portion of it is converted into brandy. The pastures are very extensive, and rear great numbers of horses, cattle, and sheep. Bears and wolves are not uncommon in the forests, which eover a large extent of surface, and form one of the chief sources of revenue, especially when their extensive use in the smelting and refining of minerals is considered. Among these minerals the first place belongs to quicksilver, whieh in no other part of Europe, with exception of Almaden in Spain, is found in such abundance as here in the mines of Idria. The other minerals deserving of notice are gold and silver, still obtained in small quantities; iron, alum, zine, sulphur, coal, and salt. Besides the manufactures connected with these minerals, woollen, silk, and cotton tissues are extensively made. The trade is important, but was long greatly impeded by the imperfect means of transit; a railway, however, now leads nearly through the eentre of the kinglom from Vienna to Trieste. For administrative purposes, $111 y r i a$ is divided into the governments of Laybach and Trieste. The former, subdivided into Carinthia (Kärnthen) and Carniola (Krain), contains the five circles of Laybach, Adelsberg, Neustadtl, Villach, and Klagenfurt; the latter contains the three circles of Trieste, Görr, and Istria. Pop. (1846) $1,284,947$, of whom about three-fourths are Slaves, one-sixth Germans, and one-twentieth Italians, and the large majority R. Catholics.

ILM, a river, Germany, which rises on the N.E. slope of the Thuringerwald, bail. Ilmenau, in an isolated part of SaxeWeimar; flows, cireuitously, N.E. through SchwarzburgSondershausen, Schwarzburg Rudolstadt, and Saxe-Weimar, passing the towns of Ilmenan, Ilm, Kranichfeld, and Wcimar; and, after a course of about 60 m ., joins l. bank Saal, on the frontiers of Prussian Saxony. It is much used for floatation.

ILM, or Stadt-Ila, a tn. Germany, principality Schwarz-burg-Rudolstadt, cap. bail. of same name, 1. bank Ilm, 21 m . S.E. Gotha. It is well built, has a court of justice, an old monastery, which has been converted into a castle; manufactures of eoarse woollens, and a trade in cattlc. Pop. 2000.

ILMEN.-1, [formerly Moisk], A lake, Russia, gov. of, and near W . borders of Novogorod. It is nearly in the form of an equilateral triangle, at whose N . angle stands Novogorod. Its greatest length is about 33 m ; its breadth, 28 m . It receives numerous streams, and diseharges itself, by the Volkhov, into Lake Ladoga. Its navigation is rendered dangerous by sudden gusts of wind.-2, A lake, frontiers of gov. Caueasus and IJon Cossacks, ealled also Lake Manitch (which sec).

ILMENAU.-1, A tm. Saxc-Weimar, principality of, and 18 m. W. Weimar, cap. bail. of same name, at the N. foot of the Thuringian Forest, about 1500 ft . above the sea. Though an old town, it is well built; and has a court of justice, a mining directory, and other publie offices; two churches, a townhouse, and courthouse ; manufaetures of poreelain, dolls, woollen cloth, and ribbons; two iron-mills, and five annual fairs. A battle was fought here, in 1706, by the Swedes against the Saxons and Russians. Pop. 2364. Area of bail., 17 geo. sq. m. Pop. $6000 .-2$, A river, Ilanover, which rises in a marsh, 7 m . S.W. Bodenteieh, flows E. to that town, then circuitously N.N.W. past Elzen and Lüneburg, and joins 1. bank Elbe, 16 m . above Hamburg, after a crourse of about 70 m . Its ehicf afluent is the Ncetze.

ILMINGTON, par. Eng. Warwiek; 3400 ac. P. 891.
ILMINSTER, a market tn. and par. England, co. Somerset. The tows, 14 m. S. by E. Bridgewater, on an aeclivity, eonsists of one prineipal street, lying E. to W., with several smaller ones interseeting it at right angles; all of them well paved, and kept remarkably clean. It is well supplicd with water; the houses, in general, well built, and having a neat and comfortable appearance. It has a fine crueiform church,
in the decorated English style, with an elegant tower; several Dissenting places of worship, a well-endowed grammar and a free school, and a seminary for young ladies. The manufacture of dowlas and broad-cloth was formerly carried on here to a great extent; but only one woollen factory is now in operation. Many of the females are employed in glovemaking; but agriculture is the chief occupation. Weekly market on Wednesday. Area of par., 4390 ac. Pop. 3227. -(Local Correspondent.)

ILOCOS (North and South), two provs. Philippines, W. side isl. Luzon, extending from the N. extremity of that isl. S. to the point of Namacpacan; lat. $16^{\circ} 46^{\prime} \mathrm{N}$. ; their united length being about 120 m ., breadth about 33 m . Both provinces are mountainous; the more N. especially so, but still rich and fertile plains intervene, yielding indigo, corn, sugar, coffee, cacao, cocoa-nuts, and all the ordinary fruits and trees of tropical climes. In the mountains, buffaloes, stags, wild boars, oxen, and wild horses, are numerous. At one time, 20,000 looms were in active operation in Ilocos; and, although that number is now very much diminished, still all sorts of cotton stuffs, bleached and unbleached, are made and dyed. The two provinces are divided into 37 pueblos or communes, 25 of which belong to the S., and 12 to the N. province. Vigan is the cap. of the former, and Laoag of the latter. Pop. 358,733; of which 209,403 in the S., and 149,330 in the N. province.-(Mallat's Philippincs.)

ILOILO, a prov. Plilippines, S.E. part of isl. Panay, and, like the island itself, of a triangular form. It is the largest of the three provinces into which the isl. of Panay is divided, and it is also the most populous, the richest, and most industrious. Although mountainous generally, and thickly wooded, it contains some beautiful, fertile, and wellcultivated plaius; yielding rice, cotton, maize, cacao, cocoanuts, and tobacco of excellent quality. In the mountains gold is found. Turtle-fishing is also carried on extensively. The females manufacture fine cotton fabrics, and stuffs of exquisite beanty, composed of the fibres of the pine-apple leaf. Iloila is divided into 30 pueblos, of which Iloilo is the cap.; it is, however, a trifling place, with a pop. of 3870 . Pop. prov., 259,780.-(Mallat's Philippines.)

ILONCZA, or Ilnitza, a vil. Hungary, Hither Theiss, co. Beregh, at the foot of a mountain, 6 m . from Nyiresfalva, with a church, manufactures of nails, and a flour-mill. Iron is mined in the vicinity. Pop. 1008.

ILOVLA, a river, Russia, which rises in the W. of gov. Saratov, flows S.S.W., enters gov. Don Cossacks, and joins 1. bank Don, after a course of about 200 m . It flows, for a considerable distance, parallel to the Volga; and so near it, when opposite to the town of Kamishin, that a canal between it and that town was projected and actually commenced by Peter the Great. The result would have been to give a navigable communication between the basins of the Volga and the Don. The importance of the object caused the project to be revived by Catherine II.; but the impracticable nature of the ground, and the difference of nearly 300 ft . between the levels of the basins, led to its ultimate abandonment.

ILOVLINSKAIA, a tn. Russia, gov. Don Cossacks, 45 m . N.N.W. Tzaritzim, r. bank Ilovla, a little above its junction with the Don.

ILPENDAM, a vil. Holland, prov. N. Holland, 6 m . N. by E. Amsterdam, on the N. Holland Canal, with two churches and a school. Inhabitants chiefly engaged in cattlerearing and dairy farming. Pop. 518.

ILSENBERG, a vil. Prussian Saxony, gov. of, and 47 m . W.S.W. Magdeburg, at the mouth of the beantiful valley of the Ilse. It contains two churches, an old and a new castle, and has iron, copper, and tin works; a paper, oil, and other mills, wire-works, and vapour baths. Pop. 2112.

ILSFELD, a vil. Würtemberg, circle Neckar, bail. Besigheim, with a parish clurch and a mill. Pop. 2000.

ILSINGTON, par. Eng. Devon; 7100 ac. I. 1093.
ILSLEY (EAST), a smail market tn. and par. England, Berkshire. The rown, pleasantly situated in the midst of extensive sheep-downs, 9 m . N. by E. Newbury, has extensive sheep markets and fairs. Area of par., 3610 ac . Pop. 733.

ILST'ON, par. Wales, Glamorgan. P. 365.
ILTON, par. Eng. Somerset; 1920 ac. P. 557.
ILVESHEIM, a vil. Baden, circle Lower Rhine, bail. Ladenburg, with a parish church, and a castle. Pop. 1081.

ILZ, a river, Bavaria, which rises on the S.W. frontiers of Bohemia, in Mount Rachel, Böhmerwald chain ; and, proceeding S., joins I. bank Danube, at Passau, after having received several small tributaries on both banks. Direct course, exclusive of windings, S. by E., 25 m .

ILZA, a small river, Russian Poland, which rises in woiwod Sandomir, flows E. past the town of its name, and, after a course of about 40 m ., joins I. bank Vistula.

IMABA, a tn. Japan, isl. Niphon, prov. Simosa, E. from Jedo.

IMALAGUAN, a small isl., Philippines, in the Mindoro Sea; lat. (S. extremity) $10^{\circ} 42^{\prime} \mathrm{N}$.; lon. $121^{\circ} 13^{\prime} \mathrm{E}$. (R.)

IMAM-Dour, a tr. Asiatic Turkey, pash. of. and 90 m . N.N.W. Bagdad, l. bank Tigris ; lat. $34^{\circ} 34^{\prime}$ N.; Ion. $43^{\circ} 40^{\prime}$ E.

IMANDRA, a lake, Russian Lapland, gov. Archangel, dist. of, and 30 m. S. Kola; length, N. to S., about $65 \mathrm{~m} . ;$ average breadth, not above 5 m . It is frozen the greater part of the year, but, when open, is navigable. A canal connects it with the White Sea.

IMATACA, a river, Venezuela, which rises in prov. Caracas, in a mountain, not far from the coast, and near the town of its name; joins r. bank Orinoco, about 60 m . above its mouth, and after a course of about 75 m . Its channel is narrow, but deep.

IMBER, par. Eng. Wilts; 2490 ac. P. 405.
IMBERSAGO, a vil. and par. Austrian Italy, prov. Como, dist. of, and 3 m . S. Brivio, on a rugged precipice overlooking the course of the Adda. It contains a parish church, and the remains of an old castle, to which a fine park is attached. Pop. 1500.

IMBRO, or Imbros, an isl. European Turkey, prov. Rumelia, in the N . part of the Grecian Archipelago, W. from the entrance to the Dardanelles ; lat. (W. point) $40^{\circ} 10^{\prime} 36^{\prime \prime} \mathrm{N}$; lon. $25^{\circ} 49^{\prime}$ E. (R.) It is 18 m . long, E. to W., 8 m . broad, and terminates W. in Point Auflaka, and E. in that of Basse. It is mountainous; rising, in its loftiest peak, to the heiglit of 1959 ft . ; well wooded, and intersected with rich'y-fertile valleys, producing wine, oil, cotton, and lead. It has only two towns or villages-Flio and Castro. Pop. 4000, mostly Greeks.

IMERETHI, or Imeretia, a prov. Russia, on the S. of the Cancasus, now included in Kutais, the most W. of the three Russian Trans-Caucasian governments; greatest length, N. to S., 90 m ; greatest breadth, about 75 m . The surface has a general slope W. to the Black Sea; but is mostly very uneven and rugged, being traversed by ramifications of the Caucasus. The only streams are the Rioni and its tributaries. The climate is excellent, and the soil generally fertile. All the higher mountain-slopes are covered with magnificent forests; many of the loftier valleys afford luxuriant pasture; and in the lower grounds, notwithstanding the indolence and unskilful management of the inhabitants, heavy crops of wheat, barley, maize, tobacco, hemp, and madder, are raised. Fruit trees grow spontaneously; and chestnuts, walnuts, apricots, cherries, \&c., are found in abundance in every quarter. The vine also is said to grow spontaneously, and is often found entwining itself with the trees of the forest. Domestic animals are not numerous, but game is very abundant. Considerable attention is paid to the rearing of bees and silkworms. There are no manufactures deserving of the name; and the trade, almost wholly in the hands of Armenians, Greeks, and Jews, consists chiefly in exports of the raw produce of the country-particularly wine, corn, silk, wax, skins, wool, and fruit; and imports of woollen, linen, and silk goods, copper and iron ware, cutlery, salt, and colonial produce. The trade in slaves-males for the army, and females for the harems of the Turks-was once the most important of all, but has been put down by the Russians. Imerethi, in the 14th century, formed part of the kingdom of Georgia. It afterwards became independent, and was governed by its own sovereigns ; one of whom, in 1804, voluntarily made it over to Russia. Pop. about 81,000.-(Koch's Karte von dem Kaukasischem Isthmus, nebst Erläuterungen.)

IMIER (St.) [German, St. Immer], a vil. and par. Switzerland, can. of, and 25 m. N.W. Bern, in the valley of same name, watered by the Siize. It is an old, but well-built place; contains a church and a well-endowed hospital; and has manufactures of linen, lace, clocks and watches, and articles in metal. Pop. 2585.

IMMENHAUSEN, a tn. Hesse-Cassel, Niederhessen, near l. bank Holz-Kappe, 7 m . N.N.W. Cassel. It is walled, has a parish church, townhouse, and school. Pop. 156!.

IMMENS'TAD'T, a tn. Bavaria, circle Swabia, cap. dist. of same name, $75 \mathrm{~m} . \mathrm{S}$. W. Munich, with a church, castle, Capuchin monastery, hospital, and orphan asylum ; manufactures of nails and fire-arms, and a trade in linen and cattle. Close to the town is the old ruinous castle of Rothenfels. Pop. 1200. Area of dist., 84 geo. sq. m. Pop. 1240.

IMMINGHAM, par. ling. Lincoln; 4280 ac. P. 221.
IMOL, or Imely, a vil. IUngary, Thither Danube, co. of, and $10 \mathrm{~m} . \mathrm{N}$. by E. Comorn, near the confluence of the Zsitva with the Neutra. It contains a R. Catholic church, and belongs to the Archbishop of Gran; but almest all the inhabitants are Protestants. Pop. 1079.

IMOLA [anc. Forum Cornelii], a fortified tn. Papal States, cap. dist., and a bishop's sce, legation of, and 25 m . W. by S. Ravema, on an island in the Santerno, in the midst of a fertile plain covered with vincyards. It is surrounded by walls, defended by tewers, and overlooked by an old castle; lias a cathedral, and several other churches; several convents, five of which are for nuns; a college, public library, hospital, and theatre. It formerly alse possessed a literary academy of some celebrity-the Academia de' Industriosi. The town has some manufactures of cream-of-tartar and woollen hosiery; and it is the centre likewise of a pretty extensive wine-trade. Imola was founded by the Lombards on the ruins of Forum Cornclii, destroyed by Justinian ; and it afterwards became the subject of frequent contention. It was successively held by the different chiefs who ruled in central Italy, and was finally annexed to the Papal States by Julius II. Pop. 8000 .

IMONCHII, a tn. Austria, Dalmatia, 72 m. E. by S. Sebenico; lat. $43^{\circ} 30^{\prime} \mathrm{N}$. ; lon. $17^{\circ} 15^{\prime} \mathrm{E}$. ; about 1378 ft above sea-levcl. The houses are of stone, well built, and roofed with stone tiles; but are badly finished within, and are, in consequence, exccssively cold and uncomfortable in winter, to the rigours of which the elevated position of the town adds considerably. The floors consist of single planks, with abundant space betwcen each to admit a stream of wind from below; besides which, the doors and windows are numerous, and fire-places or stoves unknewn. To add to the cold and wintry lock of the place, the houses are all white-washed. There is a market every Wednesday and Saturday, which is frequented by Turks, who bring for sale horses, grain, butter, chcese, cattle, goats, sheep, and pigs, taking in exchange wine, brandy, and various manufactures. Pop. about 950.(Wilkinson's Dalmatia and Montenegro.)

IMPAL, Tooral, or Mutinee, a river, India-beyond-the-Ganges, one of the largest in Cassay. It rises N. of Munnecpoor, flows S., enters Burmah, shortly after which it turns E.N.E., and falls into the Khyen-dwen, about 120 m . N.W. Ava. Tetal course, about 200 m .

IMPERADOR (Villa DA), a tn. Brazil, prov. Parahiba, with a parish church, and some trade in provisions, sugar, and cotton.

IMPERATRIZ (Villa DA), a tn. Brazil, prov. Ceara, on the serra Uruburelama, W. of Fortaleza. It has a court of justice, and a parish church; inhabitants chiefly employed in cultivating cotton and rearing cattle.

IMPHRICK, par. Irel. Cork; 4111 ac. P. 1459.
IMPINGTON, par. Eng. Cambridge; 1200 ac. P. 248.
IMRE (SzENT), several places, Hungary, particularly :1, $\Lambda$ vil. Thither Theiss, co. Bihar, on the Beretyö, 8 m . from szekelyhid. It has a Protestant parish church. Pop. 1283. -2, A vil. Hither Theiss, co. Heves, in a somewhat sandy, but not unfertile district, 18 m . from Kartsagr-Uj-Szallas. It has a Protestant parish church, and a castle. Pop. 1368.

I MREGH, a vil. Hungary, Hither Theiss, co. Zemplin, on the Bodrog, 6 m . from Velcjte, with a Protestant church, a castle, and Franciscan monastery; and some trade in corn and winc. From the number of coins, urns, and other remains, found in the vicinity, it is supposed to have been originally occupied by a Roman colony. Pop. 804.

IMST, or Imnst [anc. Umbieta], a tn. Austria, Tyrol, cap. circle Upper Innthal, 30 m . W. Innsbriick. It is situated at a great height, in a wild and mountainous country; and has a parish church, a Capuchin convent, and some manufactures of cotton. At one time, the most inportant trade
was in canary birds, which were reared here in great numbers, and carried to the remotest corners of Europe; to St. Petersburg and Constantinople, and even across the IIellespont, and into Egypt. The trade still continues, but is very much decayed. To the N.W. of Imst is the Muttekopf, about 8670 ft . high. Pop. 2600.

INABA [Chinese, $Y n$-fun], a coast prov. Japan, in W. part of isl. Niphon. It is mountainous, but fertile ; produces abundance of silk, and is divided into seven districts.

INACCESSIBLE ISLAND, the most W. of the Tristan Da Cunha group, Atlantic; lat. $37^{\circ} 16^{\prime}$ S.; lon. $12^{\circ} 52^{\prime}$ W. (r.); forming an oblong square, 16 m . long by 12 m . broad, with a rugged surface, and a light sandy soil. It is nearly overgrown with stunted trees, heath, brushwood, and reeds.

INAGH, par. Irel. Clare; 19,888 ac. P. 4192.
INaGUA, or Heneagua (Gieat and Little), two of the Bahama isls. The former is the most S., and one of the largest of the group; lat. (N.E. point) $21^{\circ} 21^{\prime} \mathrm{N}$. ; lon. $73^{\circ} 1^{\prime}$ W. (r.) It comprises 576 sq . m., and contains an extensive salt pond. In 1847 it had not been surveyed, and a few acres only had been granted in it. It is valuable for the salt it produces, and for its pasturage; the interior being chiefly prairie land. It had, in 1847, only 172 inhabitants. Little Inagua lies $10 \mathrm{~m} . \mathrm{N}$. from the larger island; lat. (N. point) $21^{\circ} 33^{\prime}$ N.; lon. $73^{\circ}$ W. (r.)

INCA, a tn. Spain, isl. Majorca, on a low hill at the foot of a mountain-chain, 16 m . N.E. Palma. It consists chiefly of a wide and straight strect, which extends over the whole lengtly of the town, and is opened out by several minor streets. It contains a square, of considerable dimensions, but irregular figure; four chnrches, so placed as to make the form of a cross, one of them surmounted by a massive square tower ; is tewnhouse, grammar, and primary schools ; and has manufactures of linen, leather, soap, and brandy; numerous windmills, and two annual fairs, one of which lasts three weeks. P. 4503.

INCE., par. Eng. Chester; 1560 ac. P. 475.
INCH [a Celtic word, signifying island, used alone, and with qualifying affixes, in the names of parishes and islands in Scotland and Ireland]:-
J. Three pars. Scotland:-1, Wigton; 10 m . by $4 \frac{1}{2} \mathrm{~m}$. P. 633.-2, (Inchinnan), Renfrew; $3 \frac{1}{2} \mathrm{~m}$. by 2 m . P. 678.3, (Inchture), Perth; 12 m. sq. P. 745.
II. Numerous pars. Ircland:-1, Wexford and Wicklow ; 6803 ac. P. 2006.-2, Wexford; 1389 ac. P. 526.-3, Cork; 3823 ac. P. 1647.-4, Tipperary; 4889 ac. P. 1983. -5 , Donegal; 3100 ac. P. $978 .-6$, Dawn; 6494 ac. P. 2489.-7, (Inchicronan), Clare; 17,438 ac. P. 5118.-8, (Inchigeelagh), Cork; 45,415 ac. P. 6357.-9, (Inchinabacky), Cork; 1475 ac. P.543.-10, (Inch St. Laurence), Limerick; 2203 ac. P. 840.
III. An isl. Ireland, co. Donegal, Lough Swilly, $3 \frac{1}{2} \mathrm{~m}$. N.W. Londonderry. It has a varied surface, rising at InchTop to 737 ft . ; area, 3039 ac .; a small church, a Presbyterian meeting-house, and a R. Catholic chapel. On the N. side is Down fort. Pop. about 1000.
IV. Numerous isls. Scotland :-1, Four isls. Firth of Forth (Inchcolm), $2 \mathrm{~m} . \mathrm{S}$. Aberdour. It is about 1 m . long, partly arable, abounds in rabbits, and is noted for its onions, which are produced in great quantities. Alexander I. founded a menastery here in 1123 , the ruins of which still remain. (Inchgarvie), about mid-channel, immediately E. Queensferry. (Inchkeith), $3 \frac{1}{2} \mathrm{~m} . \mathrm{N}$. Leith, having near the centre a lighthouse, with bright revolving light, 235 ft . above the sea; lat. $56^{\circ} 2^{\prime} \mathrm{N}$.; lon. $3^{\circ} 8^{\prime} \mathrm{W}$. (Inch-Mickery), near E. of Inchcolm; its sheres are occupied by excellent oyster-beds. -2 , An isl. Firth of Clyde (Inch-Marnoch), $1 \frac{1}{2} \mathrm{~m}$. off S.W. side isl. Bute, 5 m . in circumference; about a fourth part is arable land, the rest is moor and pasture. It anciently belonged to the monastery of Sadell, to which it was given by Rodericus de Kintyre, probably about the year 1220. Thu ruins of a small chapel or oratory, which was dedicated to St. Marnock, are still to be scen here--3, Numereus isls., cos. Dumbarton and Stirling, in Loch Lomond, chiefly towards its S. extremity, of which the most noted are-(Inch-Cailliach) [Island of Old Women], co. Stirling, about 1 m . long, high, and well wooded; yields wheat and oats of tolerable quality. It was formerly the site of a nunnery. (Inch-Murrin ), the largest and most S . of the isls., $2 \frac{1}{2} \mathrm{~m}$. from the efflux of the Leven, 2 m . long by 1 m . broad, and chiefly
used as a deer-park. (Inch-Tcvanach) [Monk's Island], nearly 1 m . long by 3 furlongs broad, of a beautiful pyramidal form, mostly covered with wood.-4, (Inchbrayock or Rossie), an isl., co. Forfar, in the S. Esk, between Montrose basin and the German Ocean. Arca, 34 ac. Pop. 119.-5, (Inch-Kenneth), an isl. Hebrides, co. Argyle, at the entrance of Loch-naKeal, off the W. coast of Mull, 12 m . W. by S. Avos. It contains some ecclesiastical remains.

INCINO, a vil. and par. Austrian Italy, prov. Como, dist. of, and about 3 m . from Erba, in a plain at the foot of a mountain. From the ancient remains existing in it, it appears to have once been a place of much more importance than at present. It has two churches, one of them very ancient; and a silk mill. Pop. 1852.

INCISA [Latin, Intercisa], a tn. Sardinian States, div. of, and $14 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Alessandria, in a plain, r. bank Belbo. It was once walled, but all the fortifications have disappeared. It now consists of three distinct villages, communicating by
bridges over the stream; has three churches, one of which is bridges over the stream; has three churches, one of which is a handsome structure; three palaces, and several other commodious public and private edifices, and a trade in wine. 1'op. 2339.

INDALS-Elf, a river, Sweden, which rises among the mountaius on the E. frontiers of Norway, about lat. $64^{\circ} \mathrm{N}$., flows S.E., expanding into several lakes, and forming lofty cascades, and falls, by a wide embouchure, into the gulf of Bothnia, 20 m . S.W. Hernosand. After its last cascade, at Ede, which is above 200 ft . high, it becomes navigable. Its chief affluents are, on the r., the river which discharges lake Stürjon; and, on the l., the Ammer. Its course is about 70 m .

INDEN, a vil. Prussia, prov. Aix-la-Chapelle, circle Juilich, with a R. Catholic parish church, a chapel, and manufactures of linen, woollen cloth, and flannel, and several bleachfields. Pop. 983.

INDENTED HEAD, a promontory of S.E. Australia, Victoria, forming the S . side of Geelong harbour; lat. (N.W. 1oint) $38^{\circ} 12^{\prime} \mathrm{S}$.; lon. $144^{\circ} 40^{\prime} \mathrm{E}$. It is about 15 m . long, and 5 m . to 10 m . broad; area about $100,000 \mathrm{ac}$. The E. portion is low and flat, soil light, sandy, and well-covered with grass; thinly wooded with the honeysuckle, oak, mimosa, and eucalyptus. The land then swells, and alternates with beautiful hill and dale. On these hills the soil is of finer quality, and the grass more luxuriant, than on the plains.

## INDERAB, a tn. Tartary. See Anderab.

INDERABIA, an isl. Persian gulf, S.W. coast Laristan, from which it is distant about 7 m .; lat. $26^{\circ} 41^{\prime} \mathrm{N}$. ; lon. $53^{\circ}$ $39^{\prime}$ E. (R.) It is low and level, and is about $3 \frac{1}{2} \mathrm{~m}$. or 4 m . long, E. and W., with a grove of date trees near its centre.
india-beyond-the-Ganges, Further India, or IndoChina, a region of S. Asia, consisting of the most E. of its three great peninsulas, and extending, exclusive of the Malay peninsula, between lat. $1^{\circ} 20^{\prime}$ and $28^{\circ}$ N.; and lon. $90^{\circ}$ and $109^{\circ}$ E.; bounded N. by the E. Himalaya, separating it from Bootan and Tibet, also by the Chinese provinces of Yunnan and Quangsee, W. by Hindoostan, from which it is properly separated by the river Bralmapootra, also by the Bay of Bengal and Indian Ocean; E. by the China Sea; and S. by the Gulf of Siam, and Straits of Malacca. Length, N. to S., at least 2000 m .; greatest breadtl, E. to W., about 1200 m . Four great parallel mountain chains traverse this region N. to S., bounding the great basins of the Irrawadi, Menam, Menam-kong, and Tonquin rivers, respectively composing the central portions of the dominions of Burmah, Siam, the $\mathbf{E}$. Laos, and Cambodia and Tonquin, in the empire of Anam, which last comprises the E. quarter of this peninsula. Besides the above-mentioned states, India-beyond-the-Ganges includes Assam, Jynteah, Cachar, the districts of Sylhet, Tiperah, and Chittagong, Aracan, and the Tenasserim provinces, all which belong to the British presidency of Bengal-(see India, Bri-TISH)-and the semi-independent state, Cassay or Munneepoor. The whole region abounds with rich valleys, and yields many of the most valuable, and some unique mineral, vegetable, and animal products. Except on the $W$. frontiers-included in Bengal- the inhabitants are of races quite different from those located in Hindoostan or India-within-the-Ganges, and they resemble much more those inhabiting China and the great table-land of E. Asia. Their architecture, customs, and reli-gion-which last is Buddhism, in various and somewhat debased forms-are also analogous to those prevalent through-
out the rest of E. Asia; and, excepting Burmah, Cassay, and the British territories above indicated, all the states of this peninsula acknowledge themselves more or less tributary to the Chinese empire. See Anam, Burmah, Laos, Siam, \&c.

INDIA (British), an extensive empire, consisting of most part of the great central peninsula of Southern Asia-(see Hindoostan), together with Ceylon, various districts of the Bengal Presidency, the Tenasserim Provinces, and adjacent islands in 'India-beyond-the-Ganges;' and Singapore, Penang, Malacea, and Province-Wellesley - collectively called the Straits-Settlement-in or contiguous to the Malay peninsula. Ceylon, however, is a colony belonging to the British Crown, and unconnected with any of the Indian Presidencies; and, exclusive of it and the detached territories enumerated above, British India extends between lat. $8^{\circ} 5^{\prime}$ and $34^{\circ} \mathrm{N}$.; and lon. $66^{\circ} 38^{\prime}$ and $97^{\circ}$ E.; bounded N. by the Mimalaya, which separates it from Tibet and the territories of the Maharajalı Gholab Sing, also by the States of Nepaul and Bootan; N.W. by the Indus, and the mountain chains to Cape Monze, which separate the territory watered by that river from Afghanistan and Beloochistan; W. and S.W. by the Indian Ocean, which, with the Gulf of Manaar and the Bay of Bengal, bounds it also on the S.E. ; and, on its E. frontier, it extends in Upper Assam as far as E. Tibet, and is elsewhere separated by mountain ranges from the Burmese dominions. The wide region circumscribed by these limits, stretching through $28^{\circ}$ of lat. and more than $30^{\circ}$ of lon., is nearly 2000 m . in length, N. to S.; and 1800 m . in its greatest breadth, E. to W. It comprises numerous states besides the territory directly subject to the British rule; but those states are all more or less tributary; and, since the annexation of the Punjab in 1839-if we except Nepaul, Bootan, and some comparatively insignificant Portuguese and Freuch settlements-the whole of India, from its most N. frontier to Cape Comorin, may be considered as substantially British dominion.
The physical geography of India, and the manners, customs, religions, \&c., of its various races of inhabitants, have been already amply treated of in our article on Hindoostan ; and under the several articles Bengal, Bombay, and Madras Presidencies, Punjab, Scinde, Rajpootana, Deccan, Mysore, and the names of its other divisions, provinces, and states, will be found mentioned the peculiarities characteristic of each. The area and population of British India and its subsidiary states-exclusive of territories under the Bengal Presidency in the peninsula E. of the Ganges and Brahma-pootra-are shown in a table in next page.

The above 'dependent states' have all relinquished political relations with each other, or with any but the paramount British state, to which they are bound by alliances of various kinds. Some have treaties, offensive and defensive, and the right to claim protection, external and internal, from the British Indian Government; which has a right, on its part, to interfere in their internal affairs; others have similar right to claim protection and the aid of troops from the British Government, which has, however, no right to interfere in their internal affairs; while others are mostly tributarics, agreeing to subordinate co-operation to the British Government; their sovereigns, however, being supreme rulers in their own dominions.
Government.-By an Act of Parliament, passed in 1833, which subtracted materially from the privileges previously possessed by the East India Company, the government of British India was vested in that company as trustees for the Crown, subordinate to the Board of Control established by Mr. Pitt's India Bill in 1784. The Supreme Government, which has generally its seat in Bengal, consists of the Gover-nor-General, and a Council of five members, one of whom is the Commander-in-Chief; two are members elected from amongst the civil servants of the company, one from amongst their military officers, and one membèr is chosen who does not belong to the service of the company, bnt is generally selected for his acquaintance with British law. The Gover-nor-General is nominated by the Court of Directors, his appointment being subject to the approval of the sovercign, salary, $£ 24,000$. The Governor-General has the power to declare war, conclude peace, and make treaties of commerce and alliance. In conjunction with his Conncil, he makes laws and regulations which have force throughout the whole of the territories of British India, and amongst all the
servants of the Company within the dominions of the native princes; and he may sometimes, of his own authority, act in opposition to all the members of his council; but, in such cases, he must fully record his reasons for so doing, and all
his orders are subject to revision by the Court of Directors and Board of Control. The other members of the Supreme Council, except the Commander-in-Chief, are appointed by the Court of Directors, and must have resided in India for teu

Area and Population of British Inda, with its Dependent States.

years; salary, £9,600. The fifth member of the Council has not the privilege of voting with the rest, except on making laws and regulations for British India. The Supreme Council is also the Council for the Presidency of Bengal. The Presideneies of Madras and Bombay have each their Governor and Council of three members similarly appointed; the Governor receiving a salary of $£ 12,000$ annually. The Presideney of Agra remained distinct from that of Bengal for a short period only, under the title of the North-Western J'rovinces; that territory has been again united to the Bengal Presideney, and is administered by a Lieutenant-Governor.

The Board of Control, as originally founded, consisted of six members, but the chief authority exercised is vested in its President, who is a Cabinet Minister, and, under another
name, Sceretary of State for India. The Court of Directors of the East India Company, whith nominates the Governors and Members of Council of the different Presidencies, and retains most of the patronage throughout British India, is clected by a certain number amongst the holders of the capital stoek of the company, which consists of $£ 6,000,000$, shared, in different proportions, amongst 3600 individuals. Proprietors of $£ 1000$ stock have each one vote; of $£ 3000$ two votes; of $£ 6000$ three votes; and of $£ 10,000$ or npwards four votes in the election of Directors, and of committees to form by-laws, and for the control of pensions beyond a certain amount, and the bestowal of rewards. l'ersons holding less than $£ 1000$ stock have no vote, although they may take a part in the discussions of the court. The court consists of twenty-

## INDIA (Britisi)

four Directors, who must be born or naturalized subjects of Great Britain, and possessed of at least $£ 2000$ stock. Six members of the court retire annually from the direction, but are re-eligible after the lapse of 12 months; cach member of the court has a salary of $£ 300$ per annum (the chairman $£ 500$ ). For despatch of business the court is divided into three committees, respectively undertaking the finauce and home, the political and military, and the revenue and judicial departments. There is a 'secret committee,' composed of the chairman, deputy-chairman, and another member, who decide concerning political proceedings to be undertaken by the company. From this court proceed, on all ordinary occasions, instructions relative to the management of our Indian empire; but a draft of every despatch sent thither must be first submitted to the approval of the Board of Control; and the court is bound to lay annually before Parliament an account of its revenue and expenditure for the preceding ycar.
Justice.-In each of the capital cities of the presidencies of Bengal, Madras, and Bombay, is a superior, civil, and criminal court, ever which neither the Court of Directors nor the Board of Control have any authority, the judges in them being appointed directly by the sovereign. Within these cities, English law is held to be equally binding upon the European and the native inhabitants; but beyond their limits Europeans only are subject to British jurisprudence. The high courts at the three above-named presidencies are termed Sudder Dewannee and Foujdarry Adawlut, or superior civil and criminal courts, and they consist of a chief and three puisne judges, in addition to whom, in the courts at Calcutta, native IHindoo and Mahometan judges sit on the bench. In the Sudder courts, suits for property to the amount of $£ 5,000$ may originate, and from their decisions appeal lies only to the sovercign in council, and then only when the property in dispute amounts to $£ 10,000$ or upwards.
Other courts are those of commissioners of circuit, the judges of which hold sessions of jail delivery at least twice ayear at the zillah and city stations-zillah courts, both European and native, are established throughout British India, in each district or collectorate, as well as in the cities and towns. The European zillah courts consist of a judge, a magistrate, and a registrar, in conjunction with native assessors: in them may originate suits to the value of $£ 2000$, and they decide appeals from the decisions of the native zillah courts, and those of the registrars, sudder-ameens, and moonsiffs (native Hindoo and Mahometan arbitrators.) In the zillahs are also courts composed of native judges alone, who may try causes to the value of 1000 rupees, or to that of 5000 rupees, on the recommendation of a European judge. In each village and community are native police-courts, the head officer of which receives criminal charges, and holds inquests; and in the N.W. provinces are established ptnchayets or native juries of five persons, who arbitrate in minor causes. In all the superior courts, trial by jury takes place in criminal cases; and natives are eligible both as petty and grand jurors. The proceedings in the superior courts are conducted in English, but in provincial courts always in the vernacular languages. Copies of all laws and regulations are preserved for inspection in the courts of justice, and are translated and sold to the community at a low price. At Calcutta the court of requests, once the scene of much venality and oppression on the part of native officers, has been superseded by the establishment there ( 1850 ) of a small-cause court, on the plan of the county courts in England; and it is expected that similar courts will be established in the capitals of the other presidencies. Except at those capitals, the Mahometan laws (the severity of which has been mitigated under the British rule) are commonly administered to the Mahometan, and the Hindoo laws to the Hindoo population; but it is at the option of the judge to dispense with these in particular cases, and to substitute the regulations of the government of India. In the year 1850 there was extended to the whole of British India, an important ordinance-passed under the administration of Lord W. Bentinck, and which, since his rule, has been current in the Bengal presidency. Formerly a Hindoo, on his conversion to Christianity, laving become 'impure in the highest degree' in the opinion of his previous co-religionists, was held to have forfeited all his previous rights to property and inheritance, as well as other civil privileges. By the act referred to, all those pains and penalties which had before
been attached to the relinquishment of Hindooism were annulled, and no native of India now forfeits, by change of creed, 'any property or privilege to which he would, but for that change, have been entitled.'-(Calcutta Review, 1851.) By an act of the Indian Government, passed in 1843, slavery in India was abolished. The Meriah sacrifices of the hill tribes of Orissa were suppressed in 1845; other superstitious ceremonies elsewhere have shared the same fate; Suttce or widowburning; and Thuggee or religious murder, have been put down; and, for the most part, Dacoity or gang robbery.

Education.-Many efforts have long been made by the Indian Government to extend a knowledge of European branches of learning amongst the natives of India, particularly in the Bengal and Agra presidencies. A few years ago six superior colleges existed in the Bengal presidency, under the superintendence of the council of education established at Calcutta; the last of which colleges was founded at Patna. Within the Bengal presidency there were, by the last accounts, 51 district and other schools, including one for the Bhaugulpore hill-tribes; and the number of pupils in these, a few years since, amounted to 8203 , of whom 6140 were Hindoos, and 1621 Mahometans. The total expense of these schools amounted to 675,653 rupees ( $£ 65,000$ ); and, in 1845 , arrangements had been made for the establishment of 100 additional schools. The schools in the Bombay presidency are also under a board of education, consisting of three European members, one Parsee, and one Mahometan; and in this presidency, some years since, there were 120 schools, attended by 7750 pupils. At Madras is an institution termed a university; but for a long period fewer attempts were made to extend education in that than in the other presidencies. It is gratifying to observe that, in many instances, the long-standing prejudices of the Hindoos against certain branches of learning have been signally overcome; and that, for instance, in medical studies at Calcutta and elsewhere, Hindoo students have made distinguished progress. Religious distinctions also, although they have in India, as elsewhere, long widely scparated the different sections of the population, appear to have become divested of much of the bigotry which originally characterized them. A striking instance of this is to be found in the fact that, in the Malometan college at Ifooghly, both Christians and Hindoos are admitted, and the latter constitute the greater number of the students. Of the professors of this college also, eleven are Soonees, and three of the rival Shiah sect. At Amritsir, in the Punjab, a public seminary has lately been endowed by the Government with $£ 500$ annually; and in a portion of the Lahore territories, with a population of $2,470,000$, are 1835 native public schools, in which 11,500 boys receive instruction. Female education is generally discouraged by the Hindoos: in the Sikh territories, however, at the city of Lahore, are 16 schools, at which female children are instructed; and in all the three presidencies are flourishing female schools, under the superintendence of the missionaries of various denominations of Christians; who, as well as the Indian Government, are diligently and successfully employed in conveying secular instruction to the natives; the tuition received in such schools being superior to that obtained in the Government schools-inasmuch as in the latter religious instruction is absolutely prohibited, while in the missionary schools it professedly forms the prominent feature. The press in India is free, and, for the most part, it exhibits a tendency to liberal views. In 1848, there were published in Calcutta five newspapers in the Persian or Hindoostanee languages, and nine in Bengali; besides numerous editions of Hindoo and Mahometan works. At Delli, many scientific works, and translations of English historical works, were published, and printing was actively going on at Bareily. The transactions of the learned societies and reviews at Calcutta and Bombay are periodicals of high merit; and English newspapers are published in the capitals of all the presidencies (seven at Calcutta), and at Delhi, and Laliore. Literary works published in India are protected by a copyright act, passed in 1847, and similar to that in force in Great Britain.-Communic. to the Royal Asiat. Soc., and Acts of the Government of India.

The Ecclesiastical Establishment in India is under the superintendence of the Bishops of Calcutta, Madras, and Bombay, who are appointed by the sovereign; the first named having a revenue of $£ 4000$, and the others $£ 3000$ per ainum each,
which sums are paid by the E. India Company. There is also an archdeacon in each diocese. Chaplains at the different stations are appointed by the court of directors, subject to the approval of the Archbishop of Canterbury, or the Bishop of london. An allowance is made by the company to a certain number of the $\mathbf{R}$. Catholic clergymen, and clergymen of the Scotch Established churel. Other Christian sects suppert their own ministers in India. The church establishments of the Syrian Christians inhabiting the Malabar coast, and the native R. Catholic Christians, are unconnected with the paramount state.
Land Tenures.-The land-tax is the principal source of the Indian revenue. Throughout the greater pertion of the presidencies of Bengal, namely, in the provinces of Bengal, Bahar, Benares, and Orissa (excepting Cuttack), and in some parts of the Madras presidency-as the N. Circars, and parts of Salem and other central districts-the land is assessed under the zemindary or perpetual settlement; in most parts of the Madras presidency, in pertions of that of Bombay, and in Cuttack, it is under the ryotwary settlement; and in the Bombay and Agra presidencies, with few exceptions, the rent is raised upen the village system-a political arrangement. When the E. India Company succeeded to the territories in Bengal, \&c. previously held by the Mogul sovereigns, they found the revenue cellected by officers named Zemindars, Talookdars, \&c., whom, after a great deal of controversy, the Indian Gevernment of Lord Cornwallis constituted the proprieters of the soil. With them a perpetual settlement was made-the tax of the Government being fixed for ever at an amount calculated upon half the annual produce of the soil, for a certain term of years previously. This was the nominal nmount of the tax, but in practice the sums levied were much below that amount, being frequently but one-fourth, and, in some localities, one-sixth of the produce; and the Zemindars appropriated the surplus of the half, in addition to being entitled to retain one-tenth of the amount levied as a remuneration for collecting the tax. The ryotwary system, introduced by Sir Themas Munro into the territeries of Madras, involves a levy on each cultivated field separately, and the contract exists between the government and the cultivator, without the intervention of the Zemindar or middleman. The village system, under which most part of the presidency of Bombay, ind all of that of Agra, are assessed, has prevailed from time immemorial throughout India, and is an institution peculiarly consonant with the habits and usages of the people. The villages are so many petty republics, each having its own separate organization and functionaries, who may thus be enume-rated:-the Potuil or head of the village and local judge, the recorder, tax-gatherer, land-measurer, conductor of water, washerman, smith, coach-maker, potter, barber, watchman, astrologer, poet, and schoolmaster. These officers are chosen annually by the inhabitants of the village, and each has a share in the produce of the soil. The arrangement for the payment of the land-tax is here made by the Gevernment with the potail or head-man of the village. The lands, aggregately, are assessed at a certain amount, and if any members of the village community are unable to pay their share of the assessment, the responsibility rests with the community-the other members of which make up the deficiency by mutual arrangement. We learn, from a valuable report on revenue statistics by Lieutenant-Colonel Sykes, that the land-tax in the Agra presidency, where the village system is in force, is collected with facility; the amount annually raised there exceeds $£ 4,000,000$ sterling - the cost of collection being about $6 \not 4$ per cent. The maximum rate in that presidency is about 5 s .6 d . per acre, the minimuin $1 s .3 d$. , and the average $3 s .7 \frac{1}{2} d$. , on lands producing erops worth 200 rupees ( $£ 20$ ) per acre. In four colleetorates of the Deecan, also, where the land-tax is levied on the villages, the rate is no more than from 1 s .6 d . to 3 s .2 d . per acre. It was stated in 1847 that the increase of revenue in the N. W. provinces in 40 years had amounted to $£ 1,500,000$ sterling or 75 per cent., and Colonel Sykes expresses his assent to the statement that this increase of revenue 'has been attended with improvement in the condition of the rural popu-lation.'-(Jour. of the Statist. Soc., vol. x. p. 247.) In the Ayra presideney the amount of assessment has been settled with the villages for a period of 30 years, and in the Decean and S. Maharatta country for 20 years. In Bengal the permanency of the rent has so much fostered agriculture and
extended cultivation, that the Zemindars in all parts are said to enjoy a revenue 'at least equal to, and in many places a great deal more than, the Government tax'-at the expense, however, of the ryots or cultivators.

Staple Productions and Commerce.-The vegetable products of this wide empire have been already enumerated under the article Hindoostan. Amongst the cereals cultivated during the wet season are millets, jowaree (Holcus sorghum), bajree Holcus spicatus), and other kinds of holcus; maize, which is not popularly used as a bread-corn, but cooked and eaten as a green vegetable; and riee, in localities favourable for its culture. The grains cultivated during the dry season, from October to June, are bearded wheats, barley of several kinds, and various pulses. Contrary to generally-received notions in this country, neither rice nor wheat form the chief nutriment of the natives of India; the former is raised only on alluvial soils, and is often twice as dear as wheat, which succeeds it, as a grain for exportation, in the upper part of the valley of the Ganges, and on the table-lands; the bulk of the food of from 70 to 80 millions of the population, consists of grains the names of which are scareely known in Europe. Rice is principally produced in the vast plains of Bengal, on those of Tanjore, S. Arcot, \&c., in the Madras presidency, in the Concan and lower parts of the territories of Bombay, and commonly around the banks of rivers, near their mouths, where the climate is hottest, and the aunual inundation most extensive. In the delta of the Ganges, rice yields two crops annually, in August and December. In the year 1841-42, the total export of rice and other grain was valued at $£ 648,804$, of which the expert to the United Kingdom amounted in value to $£ 129,688$. In 1849 , the imperts into Great Britain of rice from India amounted to 875,510 ewts. By far the greater proportion of the indige consumed in Europe is produced in India. It is raised extensively from Dacca to Delhi; there are reported to be upwards of 470 indige factories in the Bengal and Agra presidencies, which are conducted by English capitalists, and the value of the annual produce is calculated at from $£ 2,000,000$ to $£ 3,000,000$ sterling. Its culture extends over upwards of $1,000,000 \mathrm{ac}$. in the Gangetic region; and, it is stated, that where it prevails the rural population are uniformly in the best circuinstances. It is also raised extensively in Candeish, in the Bombay presidency, and in other parts of British India. In 1842, indigo to the value of $£ 2,397,162$ was experted from Bengal, the total export from India being valued at $£ 2,730,560$; and, in $1849,75,982$ cwts. were imported into Great Britain and Ireland. The trade in opium is a Government monopoly; the article is raised, in the British territories, only in Bahar and Benares, and under very strict limitations; but, in the Indore territories, and other parts of the province of Malwa, in Central India, it is also grown, and is purchased or sold on commission by the British Goverument, for exportation to China, the Indian Arehipelago, and other parts of S.E. Asia. In 1833, the export consisted of 9534 chests of Patna and Benares opium from Calcutta, and 11,715 chests of Malwa opium from the Bombay presideney; the whole valued at $£ 3,151,486$. In 1839-40, the revenue derived from the sale of opium had decreased to $£ 784,267$; but, in 1843-44, it had again risen to $£ 2,551,017$; and, in 1849 , the sale of opium raised in the British territory realized to the Bengal Government the sum of $£ 3,015,000$, exclusive of the receipts from the sale of Malwa opium, and opiuin passes in Bombay, amounting to $\mathbf{L} 898,093$.

Cotton is a most important staple of Iudian produce. All the plants yielding it thrive more or less in different portions of the territory, especially the Gossypium herbaceum, which is supposed to be indigenous in India. It is raised chiefly in peninsular India, especially in the uplands of the S. and W., in which latter quarter are the principal ports of shipment. Baroach, Kattywar, and other distriets in Gujerat, and Darwar in the Bombay presidency, Coimbatoor in the Madras presidency, and the table-land of Mysere, are the portions of India most famous for their cotton crops. The indigenous cotton succeeds only on what is called the 'black cetton soil,' which is estimated to extend over about $200,000 \mathrm{sq} . \mathrm{m}$. of country; but, in addition, there is a 'red cotton seil,' formed of the debris of silicious roeks, extending over from 200,000 to $300,000 \mathrm{sq}$. m., on which alone the cotton of A merica succeeds, and for the culture of which it is well adapted. The detritus at the river mouths in Bengal has been found, on
Vol. 1.
analysis, apparently well suited for the growth of the 'seaisland ' cotton of the United States; but little cotton is raised in the Bengal presidency, its production being chiefly limited to the regions not producing the other great staples-indigo, sugar, silk, and opium. The consumption of cotton in India has been very vaguely and variously estimated at from $375,000,000$ to $3,000,000,000 \mathrm{lbs}$. per annum. It is certainly used to an enormous extent, nearly every article of clothing, or woven or padded furniture, for which wool, linen, \&c., are employed in other countries, being in India made of that material. The Indian cotton is naturally of good quality; it takes dyes well and readily, and its fibre swells in bleaching; but, being raised generally by cultivators with little capital, and being badly cleaned, and liable to dirt and injury from defective modes of conveyance, it can seldoin compete in price with other cottons brought to the British markets. In 1840-41, however, some experimental farms, under the superintendence of American planters, were established in the chief cotton districts; the cleaning of cotton by American machincry was also introduced, and some cotton, equal to any from America, has been imported at Liverpool. In 1841, 280,000 bales of cotton were exported from India. In 184546 , of the total exports, amounting to $143,252,960 \mathrm{lbs} .$, valued at $£ 1,531,734$, and chiefly sent to China and the United Kingdom, 128,820,270 lbs. were shipped from Bombay. In 1849, the import of cotton-wool from British India into Great Britain amounted to $70,838,515$ lbs., being considerably more than double the quantity received from Brazil, and somewhat more than one-tenth of the entire quantity imported and retained for consumption in the United Kingdom. In 1850, the total import amounted to $118,665,380$ lbs. ; of which $112,408,140$ lbs. were from the Bombay, $5,571,450 \mathrm{lbs}$. from the Madras, and $85,790 \mathrm{lbs}$. from the Bengal presidency.-(Parl. Report, May, 1851, \&c.)
For a long period, the E. India sugar was greatly inferior to the sugar of the W. Indies, and a heavy obstacle to its introduction into the British markets existed in the shape of discriminating duties, unfavourable to the E. Indian produce. But, since these have been removed, the export of sugar from India has rapidly extended, and the manufacture of the article has of late years improved so much, as to make it bear a very favourable contrast for purity, as well as saccharine quality, with the sugar from other quarters. In 1833, the whole import of sugar from India into the United Kingdom amounted to only $111,731 \mathrm{cwts}$., but it thenceforward steadily increased, and, in 1848, amounted to $1,360,417 \mathrm{cwts}$., or somewhat more than half as much as that received from the W. Indies. In the same year, the imports into Great Britain and Ireland from India comprised 19,853 cwts. of molasses, and 908,876 gallons of rum. In 1849, the import into the United Kingdom of sugar, from British India and the contiguous islands, amounted to $1,538,000$ ewts. In 1850 , of $1,375,315 \mathrm{lbs}$. similarly imported, $1,146,460 \mathrm{lbs}$. were from the Bengal presidency. The coffee imported in the same year from British India amounted to $3,845,357 \mathrm{lbs}$., of which $3,333,000$ lbs. were from the presidency of Bombay. Pepper is an important product of the Malabar coast, and the import into the United Kingdom from British India, in 1849, amounted to $3,913,611$ lbs. Silk is produced chiefly in Bengal and in Assam; the silk of which latter province is of the first quality, and is yielded by several different worms. The mulberry thrives so freely in India that its culture might be extended greatly beyond its present amount; the import of its raw silk from India into Great Britain, in 1849, is set down at $1,804,327$ lbs., or nearly as much as that sent by China; in addition to which, upwards of 500,000 pieces of India silk manufactures were in the same year received in the United Kingdom. Salt is a Government monopoly, and the source of a considerable revenue; it is made in large quantities in Cuttack. The quantity disposed of at the Government sales, in 1844-45, was 4,644,046 bazaar maunds, or $3,405,288 \mathrm{cwts}$. and, in the year 1848-49, the Indian Government realized $£ 2,488,567$ from the sale of this article, considerably more than half of which revenue was derived from the Bengal presidency. Nitre and nitrate of soda effloresce on the soil, over large tracts in Bahar, and in other parts of the country; and, in $1849,286,746 \mathrm{ewts}$. of saltpetre were imported from British India into Great Britain, being rather more than half the total supply to the United Kingdom. In Assam, a considerable
extent of the yellow soil which characterizes some of the tea districts in China, has been found to exist, and the tea-plant flourishes there spontaneously, as also in the province Ku maon, in the Himalayas. Tobacco of superior quality, teaktimber, from the Malabar coast and Tenasserim provinces; cardamoms, cocoa-nuts, chank and pearl shells, chiefly from the S.; drugs, dyes, gum-lac, linseed, sesamum, safflower, turmeric, ginger, skins and hides, borax, ivory, cassia, and other spices, are amongst the great variety of articles of the Indian export trade. Diamonds are found in Bundelcund and in the Deccan. Copper is plentiful in the Himalaya, but at present the ore is all but useless, from deficient means of transport. Gold, silver, lead, mercury, antimony, and other metals, are found in different districts; they do not appear, however, as essential sources of commercial wealth. India is not a country eminently adapted for sheep-farming, and the wool of the native breeds is coarse and dark-coloured. The better sheep are met with on the uplands of Mysore, Coimbatoor, and the Deccan, also at Jeypoor, in Rajpootana; and, of late years, attention has been paid to their improve ment, by crossing the breeds, and with so much success, that the export of wool to Great Britain had increased from 371 lbs. in 1833 , to $3,975,866 \mathrm{lbs}$. in 1845 ; and, in 1849 , it amounted to $4,182,853$ lbs. Subjoined is
A Table of the Aggregate Value of the Merchandise Exported and lmported from the three Presidencies of Bengal, Madras, and Bombay, in 1842-3:-

| Presidencies. | Fxports in the Year 1842-3. | Imports in the Year 1242-3. |
| :---: | :---: | :---: |
| Bengal (Calcutta).. | $\stackrel{\underset{6,8}{\mathbf{f}}, 9,954}{ }$ | $\frac{\mathbf{2}}{4,123,213}$ |

In 1849, the total exports from the United Kingdom to British India, including Ceylon, \&c., amounted to $£ 6,803,274$. The annual gross amount of the imports to and exports from India, in the years 1844-5, and 1847-8, is given below :-

| Date. | Exports | Imports. |
| :---: | :---: | :---: |
| $1841-5 \ldots \ldots$. | $16,590,211$ | $10,754,145$ |
| $1845-6 . \ldots$. | $17,008,672$ | $9,087,478$ |
| $1846-7 \ldots$. | $15,35,436$ | $8,811,250$ |
| $1847-8 \ldots \ldots$. | $13,565,949$ | $8,408,100$ |

In April, 1834, the exclusive right of the E. India Company to trade with China, \&c., ceased; and Europeans may now proceed by sea to any part of British India without a license, though some restrictions still exist to their liberty to enter the territories of the Company by land. Foreign ships may enter at any of the ports, but they are not privileged to convey freight from one port to another.

The principal weights, measures, \&c., in use in India are the seer ( 1 lb .13 oz .14 dwt ), the maund ( 74 lb .10 oz. nearly, Imperial measure); the old bazaar maund is equivalent to 82 lbs 2 oz . The beza or bizah is a land measure of 1600 sq. yards. The Company's rupee of 16 annas is valued at 2s. sterling; 16 Company'a rupees make a gold mohur. A lac is a hundred thousand, and a crore 10 millions.
Manufactures.-The silk fabrics of India are inferior to those of China; but, in 1842-43, there were exported from Bengal to Great Britain to the amount of $24,02,894$ rupees ( $£ 240,290$ ), constituting about two-thirds of their entire export. By far the most important mannfactures, as regards the extent to which they are produced by the natives of India, are cotton piece-goods, the best of which are made along the Coromandel coast. They are sent chiefly to Arabia, Persia, Pegu, Penang, and the Indian Archipelago; but their manufacture has sustained a progressive diminution within the last 35 years. In 1816-17, nearly all India was supplied with home-mannfactured cotton goods, and the same were exported to the United Kingdom to the value of $£ 1,659,438$. In 1842 -43 , the export from India to Great Britain reached only the value of $£ 40,267$; the native cotton goods, both as to home and foreign supply, having by that period become, in a great measure, supplanted by British cotton manufactures. In 1847, the British plain, printed, and coloured cotton fabrics cleared to Calcutta alone, from the ports of London, Liverpool, and the Clyde, amounted in the aggregate to $112,615,737$ yards, valued at $£ 1,329,476$; besides cotton twist $11,198,369$ lbs., worth $£ 526,308$. In 1849 , the cotton goods exported from Great Britain to India amounted in value to $£ 3,501,891$. Diapers and other cotton fabrics are, however, still produced at Dacca, once noted for its muslins ; chintzes, and a variety of other woven goods, at Calcutta and Burdwan. The silks of Amritsir, Lahore, Mooltan, and other towns in the Punjab, and of Moorshedabad, in Bengal, are of old celebrity. The shawls made from the wool of the Tibet goat by the Hindoo population of Cashmere; the leather, arms, paper, and lacquered wares of the same region; the arms made at Lahore; similar goods, pottery, turbans, Tatta silks, \&c., fabricated in Scinde; the mnslins of Cicacole, woollen carpets of Ellore, cottons of Tinnevelly, and gold chains and jewellery of Trichinopoly, in the Madras territories, deserve especial mention. Ship-building has declined at Calcutta, but it has lately risen to high importance at Moulmein. At Bombay are docks for the construction of vessels of the first class, and the Indian mercantile navy contains numerous ships of acknowledged excellence. (For further notices of manufactures, see Hindoostan.)

Roads and Communications.-The inland trade of India is greatly impeded by the want of internal communication. The grand trunk road from Calcutta to Benares and Delhi, on the latter portion of which the bridges over the rivers have only been recently made; a good road from Pauwelly, opposite Bombay, to Poonah; others from Bombay to Ahmednuggur, into Candeish, through the Concan district, on the Malabar coast, and for a part of the way, and to Jubbalpoor in Central India; one from Mirzapoor, on the Ganges, to Jubbalpoor and Nagpoor; and one from Masulipatam to IIyderabad, constituted the only lines of route, worthy of especial notice, as having been constructed before 1850 , when several good and extensive roads were made in the Punjab, between Labore, Putankote, and Mooltan, \&c.; and one was begun between Lahore and Peshawur. Excepting the foregoing, all of which have been formed chiefly within the last century, few public ways exist that are better than mere tracks, along which rude cars can be drawn, or oxen driven. Pack-bullocks of small size, carrying a load of about 240 lbs., are used for the conveyance of many kinds of goods; camels, for the same purpose, toward the W. frontiers; and, in the Himalaya, goats and sheep. Elsewhere, inost of the merchandize is conveyed on the backs of brinjarries, a caste of Hindoos whose business is that of carriers. The impediment to prosperity on account of the absence of roads, will be made strikingly apparent by the fact that, in 1823, while grain in Candeish was plentiful enongh to be sold at from $6 s$. to $8 s$. a quarter, in Aurungabad, not 100 m . distant, it was 34 s . ; and at Poonah, perhaps 150 m . farther, from 64 s . to 70 s . a quarter; and yet, for the want of routes on which to convey it, no attempt could be made to equalize the price of corn in these localities. It is stated that,
during the ten years from 1836 to 1846 , the sum of $£ 1,446,400$ was spent by the E. India Company in the formation of roads, buildings, bridges, tanks, and canals in India, exclusive of repairs. The railways projected or in progress in all the three presidencies, when completed, will remove many of the difficulties as to roads complained of, and tend greatly to the development of the great natural riches of India.

One of the most magnificent and the most useful of the works ever undertaken by the British Government in India, is the Ganges canal, now in progress of execution in the Doab, between the Ganges and Jumna. It commences at IIurdwar, and is to extend for a distance of 180 m ., to near Alighur, where it will diverge into two channels, one, 170 m . in length, running to the Ganges, at Cawnpoor; and the other, 165 m . in length, to the Jumna, near Humeerpoor, 40 m . W. by N. Futtehpoor. Branches, with an aggregate extent of 250 m ., will proceed to Futtehghur, and Coel; the total length being 765 m . This canal, which will be navigable throughout, is intended also to irrigate a tract of $8400 \mathrm{sq} . \mathrm{m}$.; and it is estimated that the increase of land revenue in the country throngh which it is carried will be $£ 350,000$ per annum; and, in addition, that about $£ 160,000$ will be annually derived from it by the sale of water. Very extensive masonry works are requisite for the Ganges canal. A considerable portion of the undertaking is already completed; and, of somewhat more than $£ 1,500,000$, which it is estimated will be the total cost, $£ 634,000$ had been spent on its construction at the close of 1850 . A large canal, estimated to cost half a million sterling, has been commenced in the Punjab. Both the Ganges and the Indus are now navigated by steam-vessels, the former river by strong and very buoyant iron boats.

Armed Force.-The following Table exhibits the strengtlı of the military forces in British India in 1845:-

|  | Bengai \& Agra. | Madras. | Bombay. |
| :---: | :---: | :---: | :---: |
| Company's Troops. Europeau officers........... | 1,578 | 1,022 | 551 |
| European non-commissioned and rank and file | ) 5,208 | 3,685 | 2,223 |
|  | 6,786 | 4.707 | 2,773 |
| $\underset{\text { Natire Troops. }}{\text { Cavalry ................... }}$ | 4,782 | 3,889 | 1,430 |
| Body-guard ................. | 433 |  |  |
| Artillery ..................... | 4,833 | 1,818 | 899 |
| Engineers, \&c................ | 1,368 | ${ }^{703}$ | 376 |
| Native Infantry............ | 83,411 | 55,378 | 28,991 |
| Khelat-i Ghilzie regiment | 999 6954 | ... |  |
| Irregular Cavalry ............. | 6,954 15,981 | Irregular Infautry | 2,473 4,958 |
| Bundelcund Legion.......... | 2,939 | Scinde Camel Corps | 1,935 |
| Military Police.............. | 11,144 | ... | ... |
| Total of Co.'s Troops... | 132,834 | 61,789 | 41,062 |

The total forces of the $\mathbf{E}$. India Company amounted therefore to 13,715 European, and 235,684 native troops, in all 249,399 , officers, and rank and file. In addition, there were in 1845, 963 officers, and 27,149 rank and file belonging to her Majesty's service. In the Punjab, there were maintained, in 1850, four local regiments of infantry, and one corps of cavalry, raised in that territory, besides a large police force. The Punjab military force consists, besides border corps, of five corps of infantry, five of cavalry, and three batteries of artillery. In the Punjab cavalry, Sikhs predominate; in the infantry, Mahometans. In the rest of the territory of British India, more than half of the native army consists of IIindoos; in Bengal they compose 83 per cent. of the Sepoy troops, and are mostly of the higher castes. In the Bombay army, sixeighths are Hindoos, but chiefly Sudras, or of the lower castes. In the Madras territorics, the Mahometans are more numerous amongst the armed force than elsewhere ; in the cavalry there are from six to seven in proportion to one Hindoo, and in the infantry about two to three or four Hindoos.
The Indian navy consisted, in 1848, of 39 steam-vessels, of an aggregate of 5044 horse-power, and burden of 18,360 tons ; of which 11, aggregate 1000 horse-power, 4405 tons burden, belonged to Bengal ; one, of 160 horse-power, and 411 tons burden, belonged to Madras; and 27, of 2884 horse-power, and a total of 13,544 tons burden, were attached to the presidency of Bombay; which was also the station of 14 sailing vessels, aggregate burden, 2826 tons.

## INDIA (British)

1276
INDIA (British)

Revenue.-The land revenue is collected, in the first instance, by the village collectors, teksildars or accountants ; from them it is sent to the provincial native treasnrers, who are bound in heavy securities to the Government, and act directly under the European collector of the district or collectorate. In addition to the land tax, the receipts are derived from the sales of opinm, salt, and tobacco; and, in the Bombay territories, opium passes, and dock dues; mint, stamp, and excise duties; post-office collection, sayer and abkarry, or spirit and other licenses, marine and pilotage receipts, subsidies and tribnte from the protected states, \&c. The Indian revente has for some years presented a deficiency as compared with the expenditure, in consequence of expensive wars. The following is

A Table of the Revenues and Charges of the sereral Prfsidencifs of British India, in the Year 1848-9, the CHakges including those Insbursed in England:-

The total public debt of the E. India Company amounted, in 1849 , to $£ 44,204,080$, and the annual interest to $£ 2,101,322$.

History.-Following in the wake of the Portuguese and the Dutch, who had already established commercial settlements in India, the English, at the end of the sixteenth century, determined to adventure in the E. seas; and, accordingly, in 1600, during the reign of Elizabeth in England, and of Akbar on the royal throne of Hindoostan, a company was formed for this purpose in London. which, in the next year, was enlarged so as to consist of 215 shareholders, headed by George Earl of Cumberland. This association, the nucleus of the present E. India Company, had, at its origin, a capital of $£ 70,000$ : its affairs were under the direction of a committee of 17 di rectors, the number of whom was afterwards increased to 24. In the face of numerous obstacles thrown in their way by the Portuguese, the ships of the Company traded at Surat and other places on the W. coast of India, and with such success that, after eight merchant squadrons having been sent to India in the space of twelve years, the company had derived an average profit of not less than 171 per cent. on their capital! In 1612 , a joint-stock capital of $£ 429,000$ was subscribed by the Company, who, early in the succceding year, obtained leave from the Mogul emperor to erect factories at Surat, Ahmedabad, Cambay, and Gogo. Violent hostilities with the Portuguese and the Dutch subsequently took place, but without much retarding the commercial prospects of the English, who, about 1626, established factories at Masulipatam and Armegon, near Nellore; and in 1634 were allowed by the emperor ShahJehan to trade at Pipley in Bengal, which fixes that date as the period when their ships were first permitted to enter the Ganges. In 1639, our countrymen procured from a local rajah the cession of a stripe of land, about 5 m . in length, on the Coromandel coast, where Madras now stands, and where Fort St. George was forthwith erected; this, accordingly, being the first territorial acquisition of the British on the Indian mainland.

In 1645 , through the influence of Mr . Broughton, a surgeon who liad successfully exerted his professional skill on some members of the imperial family at Agra, permission was acquired to erect factories at Balasore and Hooghly in Bengal ; to which, as well as to the English establishments at Surat, valuable privileges were, at his instigation, granted. In 1664, the island of Bombay was ceded by Portugal to Charles II. of England, as a part of the dowry of his queen; in 1668 this island was made over in perpetuity to the Company, which was now considerably augmented by the addition to it of other associations; and in 1687 Bombay became the capital of the British settlements in the E. Factories had by this time been established in various parts of Bengal, Bahar, and $S$.

India: and an expedition was even sent out ostensibly for the purpose of redressing certain injuries, but destined in reality for a service of no less magnitude than that of levying war against the powerful emperor Aurengzebe and the subadar of Bengal. In 1689, as Mr. Mill observes, 'it was laid down as a determinate object of policy (by the Company) that independence was to be established in India, and dominion acquired.' At that date they wrote to their agents: 'the increase of our revenue is the subject of our care as much as our trade.' In 1700 the Company had obtained, from the subadar of Bengal, the grant of a small zemindary on the Hooghly, comprising the towns of Calcutta, Govindpore, and Chuttanuttee; but it was not until 1713 that Mr. Hamilton, an English surgeon, who had successfully operated on the emperor Ferokhehere-treading in the steps of Mr. Broughton-procured from the emperor the confirmation of the grant, and thus established in the possession of his countrymen the locality whence extended the dominion forming the third and principal of the three great presidencies into which, until our day, British India has remained divided.

The French had already become possessed of settlements on the Coromandel coast, and territory in the Carnatic, and on the breaking out of the war between them and the English in 1745, India was made a theatre for their hostilities. In these, several native powers soon became involved; but, after various success on the part of the belligerents, the French, by 1763 , were completely worsted by the superior resources and strength of their antagonists. From the period of the war declared against the French in 1756, the ascendency of the English in India proceeded with rapid strides. The battle of Plassey in 1757 , in which a few forces under Clive ronted a Mogul army of 18,000 cavalry and 50,000 infantry, opened Bengal to the British; the district of the twenty-four pergunnahs was acquired in the same year, and Burdwan, Midnapoor, and Chittagong in 1760 . In 1765 the collection of the revenues of Bengal, Bahar, and Orissa was yielded by the emperor to the company; the N. Circars were acquired in the following year, and the zemindary of Benares in 1775. In the last-named year a war broke out between the British and Hyder Ali, who had seated himself on the throne of Mysore; and it was continued by his successor Tippoo, with short intervals, down to the death of the latter, and the capture of Seringapatam in 1799 ; since that period nearly all the territory comprising the sovereignty of Tippoo, except the tableland of Mysore, has passed under the direct rule of the E. India Company, and been annexed to the presidency of Madras.

The events which determined the progress of British ascendency in India were now transferred from the E. and S. to the central and W. parts of the same region. The war with the Mahratta powers-Sattara, Berar, Scindia, IIolkar, \&c. -occupied the early years of the present century, and was chiefly condncted under the administration of the Marquis Wellesley, as governor-general. Amongst the remarkable occurrences during this period were the battles of Assaye and Argaum, which distinguished the early military career of the Duke of Wellington, and evinced the genius of that great commander; the victories of Delhi, Lasswarree, Deeg, and Futtehghur, gained by Lord Lake; and the transference of the Mognl emperor, from the thraldom in which he had been held by the Mahrattas, to the protection of the British. Amongst the acquisitions made by the latter during this interval were Goruckpoor, \&c., from Oude, and the lower Doab, between the Ganges and Jumna, in 1801; other districts in Bundelcund in 1802 ; Cuttack district and the upper Doab, with other portions of the Delhi territory, in 1803 ; and in 1805, districts of Gujerat, previously belonging to the Guicowar.

A war soon afterwards ensued against the Pindarees, a host of roving and predatory warriors, who, during the disquiet which they caused, formed alliances with several of the Mahratta powers; also a war against the Goorkhas of Nepaul, who had made irruptions into the N. British provinces. The forces of Holkar received a severe defeat from the troops under Sir T. Hislop, at Mahidpoor, in 1817; but the Pindaree war could not be said to have ended until the fall of Aseerghur before the British arms in 1819. Bhurtpoor, which had on former occasions resisted five successive attacks by our troops, was finally taken by assault in January, 1826 ; since which epoch few military operations of much magnitude have
taken place in India E. of the plains of the Sutlej and Indus. During the period thus indicated, the accessions to the British territory comprised Kumaon, taken from Nepaul in 1815; the Saugur districts, Darwar, Ahmedabad, \&e., acquired in 1817; Candeish, Ajmere, Poonah, the Concan, the S. Mahratta country, and some districts on the Nerbudda in 1818 ; and several others incorporated into the Bombay presidency in 1820 and 1822.
The extension of the British sway next took place chiefly in the peninsula of India-beyond-the-Ganges. In 1824, in consequence of aggressions on our E. frontier, war was declared against the Burmese, who, after several defeats in the centre of their territories, in 1826 ceded to the British, Assam, Aracan, and the Tenasserim provinces-then added to the Bengal presidency. Singapore and Malacca became by purchase British possessions in 1824-5; Coorg in S. India, and Loodianah, with aljacent districts on the Sutlej. were acquired in 1834; Kurnool in 1840, and Jaloun in 1841.
Political intrigues in central Asia, having a tendency to produce dangerous hostilities within our Indian dominions, caused the interference of the British in the affairs of Afghanistan; and to that country a formidable army was sent from India in 1839, by means of which the deposed sovereign was replaced on the throne of Cabool. In 1841, those treacherons slaughters of British officers and troops took place at Cabool and elsewhere, which interposed the most alarining check that the British power had ever experienced in the E.; but in 1842 another army was sent beyond the Indus, which speedily restored there the prestige belonging to the British name. In consequence of events which we cannot afford space to detail, a British force entered Scinde in 1843, and, after Sir C. Napier's victory over the Ameers at Meanee, that country submitted, and it has since formed an integral part of Britis! India. In the same year disagreements between the president and some of the reigning family at Gwalior, in the centre of IIindoostan, precipitated hostilities in that quarter, which speedily terminated in the triumph of the British arms at the battles of Maharajpoor and Punnair; and although these events were not followed by any direct territorial aequisition on our part, a number of districts were afterwards sequestrated for the maintenance of a British force in Scindia's dominions. Finally, the British had to combat the most formidable enemy they had ever yet encountered on Indian soil. Towards the end of 1845 , an unprovoked invasion of the Sikhs across the Sutlej into the territories protected by the Company, compelled all disposable forces in India to move to the N.W.; and at the end of that year, and beginning of the next, the Sikhs were successively defeated in the actions of Moodkee, Ferozeshah, Aliwal, and Sobraon. In 1848, war was resumed by the Siklis and Afghans united, and the scene of hostility removed to the neighbourhood of Mooltan; but, after the battles of Chillianwalla and Goojerat--the last a most decisive action, fought February 21, 1849-this combination was wholly broken up, and the l'unjab was annexed to the British dominions. Sattara, formerly the territory of the Mahratta Peishwa, was added to the lBombay presidency in 1849; and Sumbhulpoor, a Gundwana rajahship of 9000 sq. m., has more recently lapsed to the British, from want of heirs to the last rajah. The chicf events of a political nature which have still more lately occurred in India, are disturbances in the territory of the Nizan, which, probably at no very distant period, will be absorbed into the wide-spread sovereignty immediately under British authority ; and the war commenced with Burmah in the early part of the present year (1852).

Subjoined are the dates of the accession to office of the various governors-general of India since the battle of Plassey in 1757 :-

India Revenue Report, 1848-49; Acts of the Govermnent of India; Culcutta Review, 1850-51.)
indian, Asiatic, Eastern, or Malay Apchipelago, the greatest group of isls. on the globe, whether considered with respect to their number or extent; situated to the S.E. of Asia, and washed W. by the Indian and E. by the Pacific Ocean. From the N.W. extremity of Sunatra-lat. $5^{\circ} 34^{\prime}$ N.; lon. $95^{\circ} 20^{\prime}$ E.; to the Arru Islands; lat. $6^{\circ}$ S.; lon. $134^{\circ} 30^{\prime} \mathrm{E}$.-a chain of islands, about thirty in number, separated in general only ly very narrow straits, extends through nearly $45^{\circ}$ of longitude, or about 2600 m . The greater part of this chain lics between the 7 th and 9 th parallels of S . lat.; but, at one point-Rotte island, adjoining Timor-it touches the 11th parallel. This is the S. boundary of the Archipelago. Its E. limit has less compactness and linear precision. At a short distance N. and E. from the Arru Islands, lies the great island of Papua or New Guinea, the W. peninsula of which is ly some considered as belonging to the Indian Archipelago. From 200 m . to 500 m . N.W. are the Moluccas or Spice Islands in the widest sense, and N. by W. from these again are the Philippine Islands; the largest of which group, Luzon, reaches the 17 th parallel of N . lat. Thus the Archipelago has an extreme length of $45^{\circ}$, and a breadth of $28^{\circ}$. With exception of the Philippines, which still belong to Spain; the islands of Penang, Singapore, Labuan, and the settlement of Sarawak, on the W. coast of Borneo, which belong to Great Britain; and the N. and N.W. portion of the island of Borneo, the Sooloo, and some other islands, under native potentates ; the whole of this vast archipelago is, either really or nominally, under the sway of Holland; this last portion is frequently named the Dutch East Indies.

Chief islands.-Within the limits here pointed out, lie some of the largest and finest islands in the world, as Borneo, Sumatra, above 1000 m . in length; Java, Celebes, Luzon, \&e. Some include in the Archipelago not only New Guinea, or at least its E.W. peninsula, but also the peninsula of Malacca. The fertile and cultivated islands of less size on the coasts of Sumatra and Java, or extending E. to the Spice Islands, inclusively, are as follows:-Nias, Mantawi, Poggy, Billiton, Banca, Madura, Bali, Lombok, Sumbawa, Comodo, Sandalwood Island, Flores or Mangarai, Timor, Ceram, Booroo, Gillolo, Mindanao, Palawan, Negros, Samar, Mindoro, Panay, Leyte, and Zebu. The small islands may be truly called innumerable, for there are numerous groups throughout the Archipelago, consisting each of hundreds of islands; many of them celebrated by the natives for their beauty and fertility, which have never been surveyed, and are even studiously avoided by European navigators; who dread not only the hidden dangers of coral bauks and islets, but also the piratical habits of those who dwell upon them.

Geological Constitution.-The islands which, in close array, form the $\mathbf{S}$. line of the Archipelago, are all mountainous, and the chief summits are volcanic. Many of them, indeed, are still active volcanoes. It would appear, then, as if this very long and narrow ridge of land had been raised from the ocean by the agency of subterranean fires. The line of volcanic action may be traced, on the W. side, through Sumatra to Chittagong, in the Bay of Bengal. On the E. side it reaches the meridian of $130^{\circ}$ E., nearly under which are the little volcanic islands of Nila and Scroa, in the sea of Banda. It then inclines N.W. The little islands lying on the W. of Gillolo are all volcanic. Ternate was laid waste in 1840 by volcanic eruption and cartliquake. Thence the volcanic line may be traced through the Philippines and Japan to Kamtschatka.

Enclosed Seas.-The islands are arranged in chains or in groups, leaving a number of open spaces or seas, often difficult of access, but the navigation of which is favoured by constant winds and a general exemption from tempests. These seas, within the Archipelago, are, chiefly, the China sea, between Borneo and the Malayan peninsula; the Java sea, between Java and Borneo; the sea of Celebes, between this island, Borneo, Mindanao, and the Sooloo Arehipelago. N.W. of the last-named barrier, between Borneo, the middle islands of the

## INDIAN ARCHIPELAGO

Philippine group, and Palawan, is the Sooloo sea. S. of Celebes is the sea of Flores; and further E. the Banda sea, S. of the Moluccas. The straits of Macassar, between Borneo and Celebes; the Molucea passage, Pitt's passage, and the Gillolo passage, may be added to the list of narrow seas. The last-named passage, and Dampier's Strait, by the coast of New Guinea, are the principal entrances to the Indian Archipelago from the E., while the straits of Malacea and of Sunda give access from the W.; and the straits of Lombok, Allas, Ombai, \&c., from the $S$.

Climate.-The whole Archipelago lies within the tropics, and indeed, for the most part, close to the equator; which passes through the middle of Sumatra and of Borneo, over Celebes and Gillolo. If New Guinea be included in the Archipelago, the latter will then present to view the most widely extended, from W. to E., of all the equatorial regions of the earth. The general equality of climate throughout is attended with a certain uniformity of production, and similarity of manners in the people. But close examination detects wide differences in the natural constitution and climate of the islands; and, as civilization has advanced upon them from the W., and has reached greater maturity in that quarter, there are still ample grounds for distinguishing the whole into groups. This whole oceanic and equatorial region is excepted from the general law of the trade winds, which, on the N. and S. sides of the line, respectively, blow constantly from the N.E. and S.E. Within the Indian Archipelago, and thence W. to the coast of Africa, the monsoons-that is, season winds-prevail, blowing alternately from the S.E. and N.W. But the monsoons, being an exception to a general law, vary much from place to place, though locally regular and constant; and E. of Celebes, or of the meridian of $124^{\circ}$, the seasons are reversed, or the rains fall during the dry season of the W. islands, and far less copiously than in the latter. This circumstance, with the absence of the rich soil formed by the disintegration of volcanic rocks, makes a broad distinction between the E. and W. islands in respect of fertility. The N. Philippine islands alone fall within the region of hurricanes and boisterous winds. But the general law of smooth seas and constant breezes, which prevails further S., is not strictly inviolable; and the Moluccas have not yet quite recovered from the ravages done by the hurricanes of 1778 and of 1816 .

Groups.-The divisions of the Archipelago, founded on natural characters, production, and population, are as follows: -The first division embraces the Malayan peninsula, Sumatra, Java, Bali, Lombok, and about two-thirds of the W. part of Borneo, to the meridian of $116^{\circ}$. So far there is a general uniformity of animal and vegetable productions; the soil is extremely fertile; rice is the general food of the people, who have made a considerable advance in the arts and habits of civilized life. The second division, comprehending Celebes, Booton, and E. Borneo, up to lat. $3^{\circ}$ N., is, in soil, food, and civilization, inferior to the first. Rice is here no longer abundant, and sago often supplies its place. The third division extends from lon. $124^{\circ}$ to $130^{\circ} \mathrm{E}$., and between lat. $10^{\circ} \mathrm{S}$. and $2^{\circ} \mathrm{N}$. Here the monsoons or seasons are altered, and nature takes a new aspect. The rich vegetation of the W. islands is seen only on the sea-shore, the hills are comparatively bare and arid. But this is the region in which alone the clove and nutmeg attain perfection. Yet the soil is not fertile, rice is rare, and the staple food in this division is sago. The inhabitants of this division are much inferior to those further W., and have never acquired the use of letters. The fourth is less distinctly marked out than the preceding. It lies between the parallels of $4^{\circ}$ and $10^{\circ} \mathrm{N}$., from lon. $116^{\circ}$ to $128^{\circ}$ E., including the N. angle of Borneo, the Sooloo Islands, and Mindanao. The inhabitants are superior to those of the third division. Rice is their chief food, but sago also is much used. The clove and nutmeg are here indigenous, but inferior in quality to those growing further S . The fifth division is that of the Philippine islands, from lat. $10^{\circ}$ to $18^{\circ} \mathrm{N}$. Here humid climate and volcanic soil reappear, and with them exuberant fertility. Rice again becomes abundant. Sugar and tobacco are produced; but the peppers of the first division, the fine spices of the third, and some of the fruits of the islands near the equator are wanting.

Vegetation.-The vegetable productions of so wide and so prolific a region can, within our limits, be adverted to only in the most summary manner. In the woods of Sumatra and

Java, most of the trees exceed 100 ft . in height. But tho density of the vegetation is still more astonishing than the vigour of individual plants. In the struggle for space and air, plants of different kinds become piled one over the other. Teak, mango, fig, musa, sandal, ebony, and other great trees, are mingled with palms of endless variety and gigantic forms; while climbing plants, frequently canes, interweaved from tree to tree, bind the whole together, and render the forest utterly impenetrable. The tendency to climb characterizes the vegetation of the Archipelago. Stems, a foot or more in diameter and belonging to species which elsewhere grow without support, here twine themselves round the giants of the forest. Several of the climbing canes also take root, like the musa, as often as they touch the ground with their boughs. The rafflesia, the largest flower known, being nearly 3 ft . in diameter, is a parasitic production, peculiar to these rank forests. The inexhaustible supply of great timber afforded by these woods is to the natives of far less importance than the cocoa-nut, the bamboo, and numerous slender palms which adorn the coasts.

Cultivated Produce.-The chief object of cultivation in the Archipelago is rice, of which two crops in the year are obtained in lands perfectly suited for that culture. Maize, though more prolific, holds there the same relation to rice which barley bears to wheat among us. The green crops sown after the rice harvest are varieties of pulse, one of which, called kachong ijo or green pulse, deserves mention, being cultivated by the Chinese colonists for the manufacture of soy. Yams and batatas are also reared in some places; but the manioc, which grows wild, is neglected, owing to the abundance of food obtainable with little trouble. In general the objects of cultivation-rice, maize, \&c.-are each known by one name throughout the Archipelago; while the indigenous and wild productions change their names with the localities. The cocoa-nut is among the cultivated plants. It is grown chiefly for the sake of its oil; but the finest edible oil is obtained from the nut of the kanari, a handsome tree, which flourishes within the same limits as the sago. Castor-oil is the lampoil of the Archipelago. The sago palm (Sagus genuina) is one of the humblest of the palm tribe, rarely exceeding 30 ft . in height, but it attains a diameter of nearly 2 ft . Before the tree has attained its full growth, and the fruit has formed, the stem consists of a hard shell about 2 in . thick, containing an enormous mass of soft medullary matter, which, being macerated in water, yields the farinaceous deposit called sago. As the fruit ripens, the internal pulp or medullary matter disappears. This palm chooses marshy situations. It seems to be co-extensive with the clove and nutmeg; but is most perfect in the island of Ceram. The sago-palm is, of all alimen tary prodnctions, that which yields food in the greatest abundance. The gomuti, another short and thick palm, peculiar to this region, also yields a medullary matter like sago; but it is more valued for its toddy, palm-wine or sap, of which it will sometimes give off three quarts a-day for two years. All the sugar used by the indigenous population is made from the inspissated juice of the gomuti, which furnishes also a very valuable material, like black horse-hair, convertible into excellent cordage. The small tubular twigs found enveloped in the black filaments serve for pens to the natives who can write, but the majority convert them into arrows for the blowpipe. The areca-nut, betel, pepper, and gambir or catechu, are all peculiar to the Archipelago, and supply important articles of trade, required by the masticatory habits of the native population. Europeans set a higher value on the fine spices, which are confined within very narrow limits. The clove was originally found only on the five Molucea islands, chiefly on Machian, whence it was carried to Amboina, to which spot its cultivation is now restricted by the Dutch. The nutmeg has wider limits, being found in Cochin-China, New Guinea, and even in New Holland. The minor aromatic productions of the Archipelago are very numerous.

Zoology. -The animal kingdom in this vast region, varies exceedingly according to locality, and for particulars respecting it, the reader must be referred to the special articles on the individual islands. Mammalia are numerous in the W. islands, but few in the E.; the types, in the former, such as the elephant in Sumatra, the tiger there and in Java, \&c., being allied to those of the neighbouring continent of Asia; and in the latter, connected more with those of Australia, especially in the possession of marsupials. Birds of the most brilliant

## INDIAN OCEAN

plumage, are numerous everywhere; tie swallow (Hirundo esculenta), bnilds her edible nests in the caves and roeks along the coast of almost all the islands, and that remarkable gallinaceous fowl, the megapodius, onee thought peeuliar to Australia, is found in E. part of the Archipelago. Serpents, dangerous from their strength or from their envenomed bite, as well as those that are harmless, abound in the jungle, and sea-serpents of many kinds swarm in the Sooloo, and other seas. The lac insect inhabits some of these islands; all of them swarm with atinging pests, that almost render life insupportable, or at all events, eall forth the exercise of the utmost vigilanee, and the greatest ingenuity to avoid or repel their attacks; and the white ant commits the most fearful ravages on buildings, and furniture of every deseription. The gavial or Gangetic croeodile, finds a congenial home in the streams of Sumatra, Java, and the other larger islands; the dugong (Halicore Dugong), a gregarious, herbivorous cetacean, frequents the shallows on the eoasts ; trepang (Holothuria), is taken in large quantities among the coral reefs and islets, and fish, and shell-fish, are innumerable.

Inhabitants.-In the absence of a geologieal knowledge of this extensive region, the partieulars of its mineral treasures, the gold and diamonds of Sumatra and Borneo, the tin of Banka, the coal and antimony of Borneo, \&e. cannot be made to assume any other than a loeal charaeter, and may, therefore, be here omitted. They suggest, however, one general observation, that neither gold nor diamonds, nor fine spiees, give any impulse to ineipient civilization. These preeious eommodities abound most in the most barbarous countries of the Archipelago; while arts and social improvement emanate from the grain-growing countries, as from the seats of systematie industry. In the Indian Arehipelago there are two aboriginal races, a brown or fair eomplexioned, of Malay extraetion; and a black, Papuan or Negro race. The brown race are about 4 in . below the average European stature. They are robust and somewhat clumsy, partieularly in the lower limbs; the faee is square, with hollow eheeks and projeeting jaws; large mouth, small nose, sinall blaek eyes, and lank hair. Their complexion does not scem to be affeeted by elimate or labits. The Battahs of Sumatra, and the wretched Dyaks of Borneo, who are among the fairest, live under the equator; the Javanese, the most civilized and most luxurious, are among the darkest. The Papuas or dark-euloured natives are dwarf Negroes; they rarely attain the height of 5 ft ., and have feeble frames; the skin is of a sooty black, not polished like that of the vigorous African; the elin retreats so as to form no part of the face; the lips are very prominent, the look wild and malign. These blacks probably once oeeupied the whole Arclipelago; but the inerease of the brown race has thinned their ranks in the W. islands, where they are still however, found in the mountains and fastnesses, hunted liy the others like wild beasts. They increase in numbers towards the E., and are the sole possessors of New Guinea. Wherever found, they seem to be in the lowest stage of eivilization.

Maritime Habits.-In the Indian Archipelago there are no dry pastures, no grasses, no open glades. Pastoral life, the ordinary beginning of industry and soeiety, is, therefore, out of the question. But the natives, confined by impenetrable forests to the sea-shore, are easily tempted to beeome navigators by the tranquillity of the waters, by the faeility of building boats where wood is so various and plentiful, and by the abundance of fish. An unusually large proportion of the whole population has maritime habits. Nor is this all; their chief towns are, in many instanees, built over the water; the bamboo houses being eonstrueted on stakes, every house with its boat fastened to the door. In towns of this deseription, as Borneo, Banjarmassing, \&c., the inhabitants may be said to live wholly on the water. The facility for construction of this sort, derived from the palin forests and the bamboo, gives rise to another singular and charaeteristic usage of this brown raee. They often shelter an entire village under a single roof, or, in other words, even the least civilized tribes of the Dyaks think nothing of eonstructing a house on piles, 10 or 20 ft . above the ground, large enough to lodge 500 people. The roof, covered with large palin leaves, is proof against the heaviest rain. The side-walls and floors are made of flattened bamboo, covered with matting; and, slight as the edifiee may appear, it is, for the wants of the people and for the climate, wonderfully perfeet. Having advanced thus far, it ia not
wonderful that the same people should have become skilful boat-builders, and their práhús, often of 60 tons' burden, are excellent specimens of naval arehitecture. Nowhere else in the world is the ineonvenience so strongly felt of a numerous population of idle seamen, and the pirate is as common and natural a character in the Archipelago as the robber in the Syrian desert.

Peculiar Exports.-The exports from the Indian Arehipelago are very numerous, but it will be here suffieient to mention the prodnets peculiar to that region. Europe takes cloves. mace, and nutmegs, cajeput [cayuputi] oil, black pepper, camphor, and gutta [gatah or gnm] percha. China buys, at a high priee, the edible swallows' nests, and the trepang (Holothuria) or sea slug. These dainties for the table are wholly monopolized by China; and the quantities bought, and priee paid for them, show the luxury prevailing in that country. Fleets of práhus are fitted out every year in Celebes for the trepang fishery on the coast of New IIolland. But mereantile enterprize of this sort is confined to the principal rajahs; to others the aecumulation of wealth would be a dangerous cxperiment. The only forms of government known to the brown or Malayan population are an eleetive confederation, as in Celebes; or an unlimited despotism, as in Java.(Crawfurd's Ilist. of the Ind. Archip.1820; Roorda van Eysinga, Handboek, \&c.-Geographical Manual of the Dutch E. Indian Colonies-Moniteur des Indes, Bruxelles; Journal of the Indian Archipelago, Singapore.)

INDIAN KEY, a small isl., U. States, Florida, 75 m . S. W. Cape Florida, mueh resorted to by invalids from the N. for its healthy and agreeable climate.

INDIAN OCEAN, that part of the general ocean which lies S. of Africa and Asia, and is bounded E. and W. by the Paeific and Atlantic Oceans, and S. by the Antarctic circle. More partienlarly, its boundaries are the Antaretic circle on the S. ; an imaginary line drawn from Cape Agulhas, the most S. point of Afriea, to the Antaretie cirele, separating it from the S. Atlantic, on the W.; the E. eoast of Africa, the coasts of Arabia, Beloochistan, Hindoostan or India; the W. coast of Burmah, Lower Siam, the Malay peninsula, the W. and S. eoasts of the islands Sumatra, Java, Australia, and Van Diemen's Land; from the most S . point of whieh last another imaginary line, drawn to the Antaretie eircle, separates it from the S. Pacific on the E.; thus extending from about lat. $25^{\circ} \mathrm{N}$. , in the Gulf of Arabia, a little beyond the tropie of Caneer, to the Antarctic cirele ; and from lon. $19^{\circ} 56^{\prime} 30^{\prime \prime}$ E., to $146^{\circ} 33^{\prime}$ E. Its extent, from N. to S., somewhat exeeeds 6500 m .; and its breadth varies from 6000 m ., between the Cape of Good Hope, and South Cape in Van Diemen's Land, to 4000 m ., between the coast of Arabia and that of Malacca and Sumatra. It is usually divided also into two parts-the N. or Equinoctial Ocean, extending S. as far as the tropic of Cajricorn; and the S. or Austral seetion, stretching S. of that limit to the Antaretie circle. Its N. shores are rendered singularly irregular by the projection of three vast peninsulas-Arabia, Ilindoostan, and Inlia-beyond-the-Ganges-whieh are respectively separated by the Persian Gulf, Arabian Sea, and Bay of Bengal; besides which may be mentioned, as other leading features on its land-boundary, the Mozambique Channel, Red Sea, Gulfs of Cuteh and Cambay, which form the peninsula of Gujerat; the Gulf of Manaar and Palk's Strait, Straits of Malacea, Sunda, Bali, Lombok, Flores, and Onbay, the sea of Timor, and Bass's Strait. It comprises also the following islands :Madagascar and Ceylon, Socotra, the Laeealive and Maldive islands, in the Arabian Sea; the Andaman and Nieobar islands, in the Bay of Bengal; together with the Comoro islands, Mauritius, Bourbon, Kerguelen's Land, and numerous other smaller islands. The following leading rivers, likewise, are tributary to this great oceanie basin:-the Euphrates and Tigris, the Indus, Nerbudda, Kistna, Godavery, Ganges, Brahmapootra, Aracan, Irrawadi, Selang, and Sulween; the last four of which are in India-beyond-the-Ganges.

In the S. part of this oeean the equatorial eurrent, connecting the Pacifie and Atlantie, flows from E. to W., at a rate varying with the seasons; but N. of Madagascar, where its breadth greatly diminishes, it runs from 45 m . to 60 m . in 24 houra. A S.W. eurrent also flows along the African coast, towards the Mozambique Channel ; its mean veloeity ranging between 18 m . and 28 m . a-day, but attaining more than double that rate near Delagoa Bay and Cape Corrientes.

It finally joins the Cape current near Cape Padron. In the Bay of Bengal, the currents depend wholly on the monsoons; a N. current flowing pretty rapidly along the Coromandel coast daring the S.W. monsoon, from February to May, and then more weakly till the iniddle of October. Between Coromandel and the Nicobar islands, and onward to the Strait of Malacea, it often flows to the S. W.; while in the N. part of the bay it runs N. in March, and often N. in April, when a general N.E. movement occurs over its entire surface, and continues till October. On the S.W. coast of Australia, the current divides near Cape Leeuwin, in lat. $34^{\circ} 22^{\prime} \mathrm{S}$., into two streans; one of which flows N., and the other E., with an average speed of about 20 m . each day, thus embracing the whole coast of Australia.

Winds, Monsoons, de. -The S.E. trade-wind, whieh prevails between the 10 th and 28 th parallels of S . latitude, blows with much force, and pretty constantly, from April to October, after which date its N. limits are considerably contracted; S. of these are the constant N.W. winds, which prevail almost in the same latitudes as in the Atlantic and Pacific Oceans. The monsoons are found principally in the N. part of this ocean, over a tract extending from the continent of Asia to about lat. $8^{\circ} \mathrm{S}$.; and from the Mozambique Channel, on the W., to the shores of Australia and the Sea of China, on the E. They blow uniformly in the same direction for six months, changing about the equinoxes. N. of the equator the N.E. monsoon prevails from October to April, the S.W. from April to October; while, S. of that limit, the N.W. monsoon blows while the N.E. is blowing on the N. side, and the S.E. prevails during the time of the S.W. monsoon N. of the equator. During the hot season, likewise, when the S.E. trade-wind recedes S., the N.W. monsoon occupies the space between the equator and the 12 th S . parallel. The hurricanes of this ocean usually range between lat. $9^{\circ}$ to $35^{\circ}$ S., extending from Madagascar to the island of Timor; they usually come from the N.E., near Java, and travel S.W. and S., returning again E. In the Bay of Bengal storms travel from E. S. E. to W.N.W. The season for them, S. of the equator, is from December to April; but at other times they are rare, and almost unknown. Their rate of travelling varies from 10 m . to 36 m . per hour : the celebrated Rodriguez hurricane (April, 1843), was computed to blow with a velocity of about 200 m . a-day, extending over 600 m . at a time, and accompanied by incessant and exceedingly heavy rains. The maximum heat of the water in the Indian Ocean occurs in the Arabian Sea, in lat. $9^{\circ} 55^{\prime}$ N., and lon. $59^{\circ} 52^{\prime}$ E., where it reaches $87^{\circ} 40^{\prime}$ Fah.-(Johnston's Physical Atlas.)
indiAN, or Western Territory, a tract of country, W. of the settled portions of the U. States of N. America, allotted, by the U. States Government, for the residence of the Indian tribes that have been removed chiefly from the S.W. states of the Union. It is bounded N. by the Arkansas and S. Kansas rivers, E. by Missouri and Arkansas, S. by Red River, which divides it from Texas, and W. by a desert; lat. $33^{\circ} 35^{\prime}$ to $39^{\circ} 16^{\prime} \mathrm{N}$; lon. $94^{\circ} 15^{\prime}$ to $100^{\circ} 30^{\circ} \mathrm{W}$. ; area of habitable portion, about $120,000 \mathrm{sq}$. m. This territory, for about 100 m . on its E. side, is in general fertile, and capable of yielding all the productions of the U . States under the same latitude; and the prairie grounds, of which the greater portion consists, produce abundance of grass for the feeding of cattle. In the N. parts the winters are cold, but the climate is generally healthy. The tribes among which this territory has been apportioned, are all more or less in advance of the wild Indians of the prairies; and several of thenn, especially the Cherokees, have made very considerable progress in the arts of civilized life. The total number of Indians transferred, or to be transferred to this territory, is estimated at 342,058 .

INDIANA, one of the Western U. States; bounded N. by Miehigan lake and state; E. by Ohio; E. and S. by the Ohio river, separating it from Kentucky; and W. by Illinois; between lat. $37^{\circ} 45^{\prime}$ and $41^{\circ} 48^{\prime} \mathrm{N}$.; lon. $84^{\circ} 42^{\prime}$ and $88^{\circ} \mathrm{W}$. Mean length, $260 \mathrm{~m} . ;$ mean breadth, $140 \mathrm{~m} . ;$ area, $36,000 \mathrm{sq} . \mathrm{m}$. It belongs wholly to the basin of the Ohio, excepting a narrow strip on the shores of Lake Michigan, backed by lofty bare sand-hills, and is almost one continued plain, with an inclination S.W. A range, however, of low hills, occasionally 300 ft. above the level of the Ohio, lies parallel to that river, from the mouth of the great Miami to the Blue river, sometimes
approaching close to it, and sometimes receding 2 m . or 3 m . from it. These hills are followed by an extensive heavilywooded plain. The state is well watered by several streams, of which the Wabash, flowing cireuitously N.E. to S.W., dividing the state into two unequal parts, a N. and a S., and, in the latter part of its course, forming the frontier line towards Illinois, is the most important. It has several affluents, and in part of its course separates into two forks, an $\mathbf{E}$. and a W.; it is navigable for steam-boats to La Fayette, 300 m ., and its principal affluent, the White river, is navigable to Indianopolis, the capital of the state, and situated near its centre. A canal from La Fayette E.N.E. unites the Wabash with Lake Erie, at Toledo in Ohio, and S.W. with the river Ohio at Evansville. All the principal streams, except the Ohio, are bordered by strips of bottom or prairie land from 3 m . to 6 m . broad; but, at a distance from the rivers, the surface of the country is broken, and the soil light. N. of the Wabash, the ground is for the most part level prairie-land, interspersed with lakes, woodlands, and swamps-those parts near the Wabash being remarkably fertile. Except in the neighbourhood of swamps, the climate is agreeable and healthfnl. Oak, ash, beech, buckeye, walnut, cherry, maple, elm, sassafras, linden, honey-locust, cotton wood, sycamore, and mulberry, form the natural growth of timber; wheat, rye, Indian corn, oats, buckwheat, barley, and potatoes, yield an abundant return; and cattle, swine, and dairy produce are plentiful. At Vevay, on the Ohio, are the best vineyards in the U. States; they are planted with indigenous vines, and are under the management of Swiss settlers. Though the mineral products have not yet been worked to any extent, iron, copper, coal, and salt are found, and, in a cave near Corydon, nitre, gypsum, and Epsom salts-the last in lumps from 1 lb . to 2 lbs. weight. Woollens and cottonsare made to some extent; there are several iron furnaces and forges, paper and fulling mills; and manufactures of tobaceo, hats, leather, soap, \&c., but still neither the mannfactures nor the commerce and trade of the state are of great account. The Baptists are the most numerous religious body in the state; next to them the Presbyterians and Methodists, besides which there are some Episcopalians, R. Catholics, Friends, \&e. Education is provided for by 4 colleges, 54 academies, and 1521 common and primary schools; still, in 1841, there were 38,100 whites above twenty years of age who could neither read nor write. The state is divided into 91 counties, and, besides Indianopolis, the cap., from which several railways diverge, some of them conneeting with the Kentucky lines, has New Albany, the largest town in Indiana, and several smaller towns, as La Fayette, Madison, Evansville, Terre-Haute, \&c. The executive government is in the hands of a governor and lieutenantgovernor, elected by the people for three ycars. The legislative power is vested in senators and representatives, chosen by the males above twenty-one years of age; one-third of the former, and the whole of the latter, being elected annually. The senators cannot be fewer than a third, and never more than a half, the number of the representatives; who, again, can never number less than 36 , nor more than 100 . Indiana was admitted into the Union in 1816. Pop. (1840), 685,866; (1850), 990,258.

INDIANA, a tn.,U. States, Pennsylvania, 125 m. W.N.W. Harrisburg, with a courthouse, a jail, four churches, and two schools, a brewery, and a pottery. Pop. 674.

INDIANOPOLIS, a tn., U. States, cap. Indiana, near the centre of the state, l. bank White River, here crossed by a bridge, and navigable for steamers. It has a state-house, a fine building, after the model of the Parthenon at Athens; several Baptist and other churches, a female institute, seminary, a flour and a saw mill. Pop. (1850), 8034.

INDIE, a vil. Austria, Sclavonia, co. Syrmia, about 4. m. from Beckska; with a Greek parish church. Pop. 2130.

INDIES (Dutch East), a name given to the Dutch possessions in the Indian Archipelago (which see).

INDIES (EAst), a general collective name applied to Hindoostan, India-beyond-the-Ganges, and the Indian Archipelago.

INDIES (West), Antilles, or Columblan Archipelago, [Latin, Antilla, Camercance Insule, Indixe occidentales; French, iles Antilles; Spanish, Autillas; German, Antillen, West Indien; Dutch, Voor-Eilanden, Antillen], an extensive system of islands in the W. Atlantic, stretching from the N.W. of Cape

## MECHANICAL AND OTHER PROFESSIONAL WORKS. RAILWAY MACHINERY:

A Treatise on the Mechanical Engineering of Railways; embracing the Principles and Construction of Rolling and Fixed Plant, in all departments. Illustrated by a Series of Plates on a large scale, and by nnmerous Eigravings on Wood. By Daniel Kinnear Clark, Enginccr. To be completed in about 28 Parts, 2s. $6 d$. each.

## 'THE ENGINEER AND MACHINIST'S ASSISTANT;

Being a Series of Plans, Sections, and Elevations of Steam Engines, Spinning Machines, Mills for Grinding 'Tools, \&e., taken from Machines of approved constrnction; with Descriptions and Practical Essays on varions departments of Machincry. In 28 Parts, imperial 4to, 2s. $6 d$. each.

## THE ENGINEER AND MACHINIST'S DRAWING-BOOK;

A complete course of Instruction for the Practical Engineer, comprising Lincar Drawing-Projections-Eccentric Curves-the varions forms of Gearing-leciprocating Machinery-Sketehing and Drawing from the Machine-Projection of Shadows-Tinting and Colouring, and Perspective-on the basis of the works of M. Le Blanc, and MM. Armengaud. With numerous Engravings. In 16 Parts, Imperial 4to, 2s. each.

## THE CABINET-MAKER'S ASSISTANT;

A Scrics of Original Designs for Modern Furniture, with Descriptions and Details of Construction, Observations on the Materials and Manufacture of Cabinet-work, and Instructions in Drawing, adapted to the Trade. In 23 Parts, $2 s .6 \mathrm{~d}$. each; 1 large vol., half morocco.

## THE MECHANIC'S CALCULATOR AND DICTIONARY.

By William Grier. The CalCUlator comprehends Principles, Rules, and Tables, in the various Departments of Mathematics and Mechanies; useful to Mill-wrights, Engineers, and Artizans in general. Cloth, 5s. $6 d$. THE DICTIONARY is a complete Note-book of Technical Terms, Rules, and Tables, useful in the Mechanical Arts. Illustrated hy Engravings of Machinery, and nearly 200 Cuts and Diagrams on Wood. Cloth, $9 s$. The Calculator and Dictionary in one Series of 27 Numbers, 6 d . each.

## THE PRACTICAL MEASURER;

Or Tradesman and Wood-merchants' Assistant, with Plates. By Alexander Peddie. New Edition. Greatly Enlarged. Roan, $6 s .6 d$. ; or in 12 Numbers, $6 d$. each.

## THE AGRICULTURIST'S CALCULATOR:

A Series of Tables for Land-Measuring, Draining, Manuring, Planting, Weight of ILay and Cattle by Measarement, Building, \&c. Adapted to the use of all engaged in Agriculture or the Management of Landed Property. Complete in 17 Nos., $6 d$. each. Bound in Roan, 93.

## RURAL ARCHITECTURE:

A Series of Designs for Cottages and Villas. Exemplified in Plans, Elerations, Scetions, and Details. With Descriptions. By Joun White, Architect. In 21 Parts, 2s. cach.

## THE FARMER'S GUIDE.

A Treatise on the Diseases of Horses and Black Cattle; with Instructions for the Management of Breeding Mares and Cows. By James Weba, Veterinary Surgeon. Cloth, 3s. $6 d$.

## SMITH'S ESSAY ON COTTAGES.

An Easay on the Conatruction of Cottages, for which the Premium was roted by the Highland Society of Scotland. With Working Plaus, Specifications, Details, and Eatimatcs. By G. Syirn, Architect, Edinburgh. Cloth, 4 s .
THE TAILOR'S GUIDE.
A Practical Guide for the Tailors' Cutting-room; being a Treatise on Measuring and Cutting Clothing, in all Styles, and for every period of life; also the Cutting of Pulpit and Bar Gowns, Regimentals, liveries, \&ce, with directions for Making-up and Alterations. By Joserf Cours. With numerous Plates and Diagram3. In 14 Parta, 2s. each. Cloth, 30s.
A TREATISE ON CLOCK AND WATCH-MAKING,
Theoretioal and Practical. By Thomas Reid, Edinburgh. Illustrated with 20 Folding l'lates, and Vignette Title-page. 21s. Cloth; or in 10 Parts, 2s. each.

[^1]WORKS PUBLISHED BY BLACKIE AND SON, gLasgow, Edinburgi, and london.

## POETICAL AND MISCELLANEOUS WORKS.

## ITALY,

CLASSICAL, HISTORICAL, AND PICTURESQUE; Hlustrated in a Series of Views from Drawinga by Stanfield, R.A., Roberts, R.A., Harding, Prout, Leitch, Brockedon, Barnard, \&c., \&c. With Descriptions of the Scenes. Preceded by an Introductory Essay, developing the Recent History and Present Condition of Italy and the Italians. By Camillo Mapei, D.D., formerly Canon of the Cathedral of Penne, and Graduate of the College of San Apollinare in Rome. In 21 Parts, Super-royal 4to, 2s. each.

This is one of the most beautiful illustrative Works that have ever issucd from the Press. It preaenta at the present moment a double claim to regard: independent of its beauty as a table-book, the literary department contains much concerning Rome, its Papal Ruler, and Church corruptions, that ought to be known in the family circle.

## THE WORKS OF ROBERT BURNS,

Complete Illustrated Edition, Literary and Pictorial, consisting of a complete Collection of his Poems, Songa, and Correspondence; arranged Chronologically, and accompanied by numerous Notes and Annotationa. The whole preceded by Propessor Wilson's celebrated Essay "On the Genius and Character of Burns," and Dr. Currie's Memoir of the Poet. With 50 Landscape and Portrait Illustrations. 25 Parts, Super-royal 8vo, 1s. each.

With Eight Supplementary Parts, containing 32 Plates; making in all 82 Illustrations. 2 Vola., elegantly bound in Cloth, 36 s.

## CASQUET OF LITERARY GEMS.

Containing upwards of Seven Hundred Extracts in Poetry and Prose, from nearly Three Hundred dif ferent Authors. Illustrated by 25 Engravings, from Original Drawings, chiefly by Members of the Royal Scottish Academy. In 4 Vols., elegantly bound in Cloth, price $28 s$.; or in 24 Parts, $1 s$, each.
